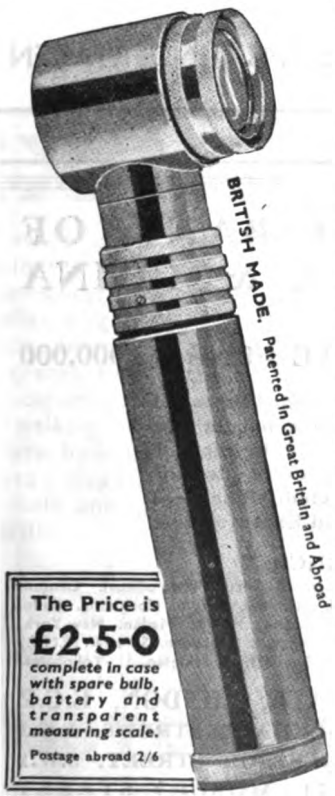
OF THE WORLD'S MOST FAMOUS INDUSTRIAL FIRMS, TECHNICAL EXPERTS, CHIEF ENGINEERS, ETC.,

USE THE PATENTED **ULTRA LENS**

as part of their standard equipment in their inspection, production control and purchasing departments, for the close scrutiny of metals, fabrics, fibres, minerals, cutting-tools, raw materials and innumerable other purposes, with excellent results.



The Price is
£2-5-0
complete in case with spare bulb, battery and transparent measuring scale.
Postage abroad 2/6

The patented ULTRA LENS is an Electric Super-Magnifying-Lens of great merits and of the most modern design.

Every detail is revealed in natural colouring with startling exactness.

The powerful magnification, the self-contained light, giving a daylight effect and reproducing the natural colours, make the ULTRA LENS a most efficient instrument for the minute examination of every conceivable object.

It enables the user to obtain valuable data and important facts under the most difficult and unfavourable working conditions—even in absolute darkness, as it is independent of any other source of light.

All sorts of tests can be made instantly, with a facility which no other means provides.

Immensely Practical, beautifully made. It pays for itself in the first few months.

The Nation's Pledge

to recognise its debt of gratitude to ex-servicemen. As LORD HAIG reminded the Public "The terms of the bond were simple, clear and perfectly well understood by every man and woman in the land. They were, that no man who went out to fight for his country in the crisis of its fate should be in a worse position on his return to civil life and that the dependants of those who fell should be amply and fittingly cared for."

EARL HAIG'S
BRITISH LEGION
APPEAL FUND

exists to help the carrying out of the Nation's pledge. All moneys subscribed by the public to EARL HAIG'S (British Legion) APPEAL FUND are devoted solely to one or another of the benevolent activities of the British Legion. These activities cover a wide field, and include the relief of distress amongst ex-servicemen of all ranks, their dependants, and the widows and orphans of those who fell, such essential services as finding them employment, assisting and advising them on questions relating to pensions, granting loans, free of interest, to enable them to establish businesses, providing the means to enable them to emigrate, giving them free legal advice on housing, employment, and similar matters, helping to educate the children, and so give them a fair start in life, and serving generally to discharge the obligations incurred through the National Pledge.

Donations are urgently needed to help the "carrying on" of this vital work. Please send a Donation to

The Crown Colonist

A Monthly Journal of Information

for all concerned in the Trade and Development of BRITISH EAST and WEST AFRICA, THE WEST INDIES, CEYLON, MALAYA and THE OTHER COLONIES, PROTECTORATES and MANDATED TERRITORIES OF THE EMPIRE.

Aden	Cyprus	Kenya	Nyasaland	Sudan (A.-E)
Bahamas	Falkland Is.	Leeward Is.	Palestine	Tanganyika
Barbados	Fiji	Malay States	St. Helena	Trans-Jordan
Bermuda	Gambia	Malta	Sarawak	Trinidad
B. Guiana	Gibraltar	Mauritius	Seychelles	Uganda
B. Honduras	Gold Coast	Nigeria	Sierra Leone	W. Pacific Is.
Brunei	Hong Kong	N. Borneo	Somaliland	Windward Is.
Ceylon	Jamaica	N. Rhodesia	Straits Settlts.	Zanzibar

THE BRITISH COLONIAL EMPIRE, as distinct from the Dominions and India, has of late sprung into prominence. The potentialities of this vast but largely undeveloped asset, comprising nearly 40 separate countries spread across the globe, as an expanding market for British manufacturing industry are now recognised.

Before the appearance of *The Crown Colonist* no journal existed, authoritative and technically competent, which, covering the Colonial Empire as a whole, made its special concern the trade and industry, public services and private enterprises, growth and economic development of all the Colonies, their relations with one another, with the rest of the Empire, and especially with Great Britain.

Collectively the Colonies form a great economic commonwealth spread across the world, united with strong bonds of loyalty to the mother country, and destined possibly to become of primary importance to the future of British manufacturing industry.

Regular Features

Round the Colonial Empire.
Exclusive reports from our own Correspondents in the Colonies, giving information on matters of economic and general interest. These are supplemented by a summary of the essential news from all sources throughout the territories concerned.

Special Articles.
By the best authorities on all important topics concerning Colonial life, industry, administration and development, and British trade and manufactures in relation to the Colonies.

Illustrations
of Colonial events and scenes and specially drawn maps are outstanding features of the journal.

TOPICS OF THE MONTH
LEADING ARTICLES

THE COLONIES ARE OUR BUSINESS

The Colonies cannot be successfully exploited without the aid of a sound publicity plan. Further, it is scarcely reasonable to imagine that such a plan could be devised other than by those with an intimate knowledge of the territories concerned.

We *have* that intimate knowledge and already apply it with outstanding success in the selling of a number of famous products.

If you are concerned with selling goods or services in any British Colony or Protectorate I shall welcome an opportunity for a preliminary discussion.

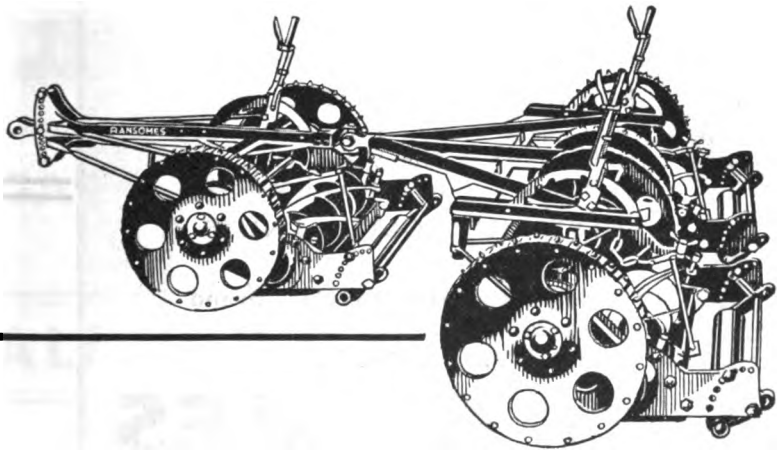
Surpassing all others

for **PARKS AERODROMES, GOLF COURSES, SPORTS GROUNDS, &c.**



50 acres a day can easily be cut by a Ransomes Quintuple Mower drawn by a tractor, and this enormous capacity makes Ransomes Gang Mowers indispensable for polo and other large sports grounds, aerodromes, parks, etc., requiring frequent cutting. With no other machine could these large areas be kept in such good condition. Now made in two patterns—Standard for ordinary work and "Magna" for longer grass and rougher conditions.
Supplied in sizes with 3, 5, 7 or 9 units, in widths from 7 to 25ft. Also a self-contained single unit for hilly land.

Ransomes
GANG MOWERS

Ransomes also supply a wide range of side-wheel and roller hand land mowers, petrol and electric motor lawn mowers, bent cutters, mowers for use with oxen, etc.

Illustrated catalogue will be sent on application.

Why pay carriage on Water?

- **EASILY HANDLED**
- **LOW ACIDITY**
- **HIGH IRON CONTENT**
- **ECONOMICAL**

It is obvious that the purchase of concentrated ink saves considerable carriage costs. Ninety per cent. of writing ink is water.

Tentone Liquid Concentrated Ink diluted with ten times its own volume of water gives an ink in every way suitable for fountain pens.

When permanent writing is not of first importance, or for use in schools, Tentone Blue-Black Liquid Concentrated Ink can be diluted to forty times its volume.

Coloured concentrated Inks can only be diluted with ten times their own volume.

★

PREFACE.

IN view of the creation of a Dominions Office (see page viii), the title of the publication was in 1926 altered to "The Dominions Office and Colonial Office List."

In 1927 Part II. was rearranged so as to collect together the accounts of the territories with which each Office is concerned.

The present Edition has been carefully revised thoughout, and the Editors desire to express their thanks for the ready co-operation and assistance which the Dominion and Colonial Governments and their colleagues in the two Offices have accorded to them. They will be glad to receive information of any errors or omissions which may be discovered, and to have notified to them any alterations or additions to be made in the biographical portion of the work. All communications should be addressed to "The Editors, Dominions Office and Colonial Office List, Colonial Office, Downing Street, London, S.W.1."

The Editors are greatly obliged to the different Dominion and Colonial Governments for the assistance afforded to them in regard to maps. It must, however, be distinctly understood that the maps in this publication are supplied for the purpose of illustrating the Handbook, and are (like the book itself) *not official.*

Special efforts have continued to be made to increase in number and bring up to date the biographies in the Appendix, and the Editors wish to express their acknowledgments to the Governments and Officers who have supplied them with information on the point. They are specially indebted to the Under-Secretary of State of Canada and to the Government of the Union of South Africa.

THE COLONIAL OFFICE.

THE first separate organisation in this country for the central administration of Colonial affairs was a Committee of the Privy Council appointed by Order in Council of 4th July, 1660, "for the Plantaçons." On the 1st December, 1660, a separate "Council of Foreign Plantations" was created by Letters Patent.

It may be interesting to state that on the 28th of February, 1671, Evelyn's Diary records the author's appointment as a member of this Council, with "a salary of £500 per annum to encourage me."

In September, 1672, the Council was united, by Letters Patent, to the Council for Trade, and was henceforward known as the "Council of Trade and Plantations." It was suppressed on 21st December, 1677, and its functions, which had been much neglected, were transferred to the Privy Council. It was re-constituted in 1695, and continued to exist until 1782, at which date it consisted of eight Members of Parliament, who received a salary of £1,000 per annum each.

The affairs of India were placed under its charge in 1748, and remained so until the establishment of the Board of Control in 1784. From 1768 Colonial affairs have been dealt with by a Secretary of State.

The office of Secretary to the Sovereign dates at least from the reign of Henry III. There was one principal Secretary only (who was already called Secretary of State) down to 1539, when a second was appointed. From 1708 to 1746 a third Secretaryship existed dealing exclusively with Scotland.

In 1768, a Secretary of State for the American, or Colonial Department, was appointed, in addition to the two principal Secretaries of State then existing; but the commissions to the Council of Trade and Plantations continued to run as before. Both the Council and the New Secretary of State's Department were abolished in 1782 by Burke's Act, 22 Geo. III., cap. 82, on the loss of the United States.

By this Act power was given to delegate to a Committee of the Privy Council all the functions hitherto exercised by the Council of Trade and Plantations, and by Order in Council of 11th September, 1782, circular instructions were sent to the Governors of the Plantations to transmit their returns and accounts to the Privy Council. Pending the appointment of a Committee, Colonial affairs were dealt with by a subordinate branch of the Home Department, styled the Plantations Branch.

At this time the duties of the two principal Secretaries of State were divided into "Home" and "Foreign," the affairs of Ireland devolving on the Home Department, which now undertook also those of the Colonies.

In 1784, by Order in Council of 5th March, a "Committee for Trade and Foreign Plantations" was appointed in pursuance of Burke's Act, and the new body was reorganised and placed upon a definite footing by the subsequent Orders of 22nd August and 25th August, 1786. The business hitherto dealt with by the Plantations Branch of the Home Office was transferred to this Committee.

At its commencement in 1793, the affairs of the French War were managed by the Home Department, but in 1794 Mr. Dundas (afterwards Lord Melville), who was then the Secretary of State dealing with the Home affairs of the Department, was appointed "Secretary for War," and also nominally Secretary of State for the Colonies; but the Departments of War and the Colonies were not actually united until 1801, when Lord Hobart was created Secretary of State for the War and Colonial Department. From 1794 the "Committee for Trade and Foreign Plantations" (now known as the Board of Trade) gradually ceased to have any connection with Colonial affairs.

From the conclusion of the French War the attention of the Secretary of State was chiefly occupied with the Colonies, and he was usually designated as Secretary o

Digitized by Google

State for the Colonies. In 1854 a fourth principal Secretaryship of State was created the Secretaryship for War; the affairs of the Colonies then became the entire charge of a principal Secretary of State. When the third Secretaryship of State was created in 1794 he had only one Under Secretary of State assigned to his Department. In 1806 an additional Under Secretary of State was appointed, thus bringing his establishment to the level of the Home and Foreign Departments. This appointment was discontinued after the end of the French War, but was re-established in 1825. This second Under Secretaryship is held by an officer changing with the Government. An Assistant Under Secretary of State was appointed in 1846, and a Legal Adviser was added in 1867, and made an Assistant Under Secretary of State in 1870. A third Assistant Under Secretary of State was appointed in 1874, and a fourth in 1898. A new post, that of Assistant to the Legal Assistant Under Secretary of State, was created in 1897. In 1907 the office was divided into the Dominions, Crown Colonies, and General Divisions, and a new post, that of Secretary to the Imperial Conference, was created. In 1911 a Legal Adviser was appointed in place of the Legal Assistant Under Secretary of State and the number of Assistant Under Secretaries of State was reduced to two. The number was again raised to three in 1916. On 1st March, 1921, when the affairs of the Middle East (including Iraq and Palestine) were placed under the Colonial Office, a fourth Assistant Under Secretary of State was appointed provisionally. The post was placed on the permanent establishment on 1st April, 1924. On the establishment of the Dominions Office in July, 1925, the number of Assistant Under Secretaries of State in the Colonial Office was reduced to three, but on the 1st October, 1930, a Personnel Division was created and a fourth Assistant Under Secretary of State was appointed to take charge of it.

During 1922, the arrangements for carrying out the Articles of Agreement for a Treaty between Great Britain and Ireland, signed on 6th December, 1921, were placed by H.M. Government under the supervision of the Secretary of State for the Colonies. Upon the passing of the Irish Free State Constitution Act 1922 (Session 2) (13 Geo. V ch. 1), and upon the exercise by the Government of Northern Ireland of the option provided in Article 12 of the Treaty, the Secretary of State for the Colonies became responsible for business relating to the Irish Free State and the Secretary of State for Home Affairs for business relating to Northern Ireland.

THE DOMINIONS OFFICE.

In July, 1925, a new Secretaryship of State for Dominion Affairs was created, and as a result the Dominions Office was set up, to take over, from the Colonial Office, business connected with the self-governing Dominions including the Irish Free State (now Eire), the self-governing Colony of Southern Rhodesia, and the South African territories (Basutoland, Bechuanaland Protectorate and Swaziland), and business relating to the Imperial Conference. One Minister combined the duties of the new post with those of Secretary of State for the Colonies until the 13th June, 1930, when Dominion Affairs became the entire charge of a principal Secretary of State.

The Staff of the Colonial Office and the Dominions Office is shown on pages xi to xvii. The Permanent Under Secretaries of State, Assistant Under Secretaries of State, Legal Adviser, Chief Medical Adviser, Financial Adviser, Labour Adviser and Assistant Legal Advisers are Officers selected by the Secretary of State. The rest of the Administrative and the Clerical Staff are recruited after competitive examinations held by the Civil Service Commissioners, from whom particulars can be obtained.

The present offices in Downing Street were occupied in 1875.

Rev. the Lord Bishop of St. Albans, D.D., *Prelate*; The Most Hon. the Marquess of Willingdon, G.C.S.I., G.C.M.G., G.C.I.E., G.B.E., T.D., *Chancellor*; Sir Cosmo Parkinson, K.C.B., K.C.M.G., O.B.E., *Secretary*; Lieut.-Col. Sir Archibald Weigall, Bt., K.C.M.G., *King of Arms*; Sir Eric Machtig, K.C.M.G., O.B.E., *Registrar*; Admiral Sir Alan Hotham, K.C.M.G., C.B., *Gentleman Usher of the Blue Rod.*

COLONIAL AUDIT DEPARTMENT.

The accounts of most of the Colonies and Protectorates are audited, on behalf of the Secretary of State, by Auditors, Deputy Auditors, Senior Assistant Auditors and Assistant Auditors, acting under the supervision of the Director of Colonial Audit, who is assisted in London by a central establishment connected with, but not forming part of, the Colonial Office. The Auditors, Deputy Auditors, Senior Assistant Auditors and Assistant Auditors, as well as the staff of the central office, form one Department, their salaries and expenses being defrayed by the Governments affected.

CENTRAL ESTABLISHMENT:—Queen Anne's Chambers, Dean Farrar Street, S.W.1.

Director of Colonial Audit—Sir John Harding, K.C.M.G., C.B.E., M.A.
Deputy Director of Colonial Audit—J. C. Fisher, C.B.E.
Assistant Director, Central Office—E. A. Smith.
Assistant Auditors—T. E. Hughes, B.A., C. W. Hodges, B.A., J. W. H. Allen, B.A.
Registrar—A. J. Rodd.
Examiner—J. A. Flin.
Clerk—F. James.

THE CROWN AGENTS FOR THE COLONIES.

OFFICES:—4 and 5, Millbank, Westminster, S.W.1; Stock Transfer Office, Lloyds Bank Buildings, Moorgate, E.C.2.

The Crown Agents act as commercial and financial agents in the United Kingdom for the Governments of all the Colonies for the administration of which the Secretary of State for the Colonies is ultimately responsible. They receive instructions direct from the Colonial Governments, but are supervised by the Secretary of State. They do not act for the self-governing Dominions or for India, but in addition to the business of the Colonial Governments concerned they transact, with the sanction of the Secretary of State, that of the Governments of territories under the protection of His Majesty and territories in respect of which a mandate has been accepted by His Majesty, and of various public bodies such as Municipal and Harbour Authorities situated in the Colonies.

Down to 1833 each Colony appointed its own agent in London, but in that year all the agencies were consolidated into one office, with the exception of six agents, who continued for a time to represent some of the West Indian Governments.

The Crown Agents are appointed by the Secretary of State for the Colonies, who fixes their salaries and pensions, regulates the appointment and the salaries and pensions of their staff, and exercises a general control over the funds by which their office is maintained. They and their staff are thus in a similar position to Civil Servants.

The following are the Colonies, Protectorates, etc., for which the Crown Agents transact business in this country:—

Aden.
Bahamas.
Barbados.
Basutoland.
Bechuanaland Protectorate.
Bermuda.
British Guiana.
British Honduras.
Brunei.
Ceylon.
Cyprus.
Falkland Islands.
Federated Malay States—
  Perak.
  Selangor.
Federated Malay States (*contd.*)—
  Negri Sembilan.
  Pahang.
  Kedah, Kelantan, Perlis, Johore, Trengganu — Not included in the Federation.
Fiji.
Gambia.
Gibraltar.
Gold Coast.
Hong Kong.
Jamaica.
Kenya.
Leeward Islands—
  Antigua.
  Dominica.
  Montserrat.
  St. Kitts-Nevis.
  Virgin Islands.
Malta.
Mauritius.
Newfoundland.
Nigeria.
Northern Rhodesia.
Nyasaland.
Palestine.
St. Helena.
Seychelles.
Sierra Leone.
Somaliland Protectorate.
Straits Settlements.
Swaziland.
Tanganyika Territory.
Transjordan.
Trinidad and Tobago.
Turks Island.
Uganda Protectorate.
Western Pacific (High Commission).
  British Solomon Is.
  Gilbert and Ellice Is.
  New Hebrides.
  Tonga.
Windward Islands—
  Grenada.
  St. Lucia.
  St. Vincent.
Zanzibar.

The Crown Agents also act as Agents for the following Authorities:—The Royal West African Frontier Force, and the King's African Rifles, the Kenya and Uganda Railway and Harbours Administration, the Gibraltar City Council, the Kingston and St. Andrew Corporation, Jamaica, the Lagos, Accra, Sekondi and Cape Coast Town Councils, the Lagos Executive Development Board, the Obuasi Sanitary Board, the Kumasi Public Health Board, Achimota College, Gold Coast, the Singapore Harbour Board and the Penang Harbour Board. They act also as Managers of the East and West African Widows' and Orphans' Pension Schemes, and as agents for the sale of Colonial Government Publications.

The chief heads under which business is transacted by the Crown Agents are:—

(1) The purchase, shipment, insurance, and, where necessary, inspection of stores of all kinds.

(2) The detailed design of bridges, buildings and engineering structures of all kinds; the preparation of specifications for, and the examination and approval of, detailed designs of locomotives, rolling stock, cranes, etc.

(3) The negotiation of contracts for the execution of large public works, and the preparation of designs and general advice relating to such works whether carried out by contract or departmentally, consulting engineers being employed in special cases.

(4) The negotiation, issue, management (including management of sinking fund and payment of interest), and repayment of loans.

(5) The investment of surplus balances, reserve and depreciation funds, and the like.

(6) The payment of salaries to officers on leave of absence in this country, allotments and remittances to their families, and pensions to retired officers, widows, and orphans.

(7) The selection and engagement of candidates for appointments of certain classes, mainly technical, and the provision of passages for these officers and for others returning from leave of absence.

(8) Any commercial, financial, or other business which the Governments may require to be transacted in the United Kingdom.

The conditions under which the Crown Agents comply with requisitions from the Colonies for stores are laid down in Regulations for His Majesty's Colonial Service 339-341. Branch offices in the city deal with shipping arrangements and the transfer of Colonial stock.

The Crown Agents' office is financially self-supporting, commissions and fees for work done being charged to the Colonial Governments, etc., which it serves at rates approved by the Secretary of State. No vote for the office therefore comes before the Imperial Parliament. The accounts kept by the Crown Agents on behalf of Colonial Governments are audited in accordance with the Regulations in force in the Colonies concerned. The accounts of the separate office funds are audited by the Comptroller and Auditor-General and are rendered to the Secretary of State.

Crown Agents for the Colonies.
Sir W. Cecil Bottomley, K.C.M.G., C.B., O.B.E.
H. C. Thornton, C.M.G., C.V.O.

By virtue of the Judicial Committee Amendment Act, 1895, as amended by the Appellate Jurisdiction Acts, 1908 and 1913, and the Administration of Justice Act, 1928, the following Judges from India and the Dominions beyond the Seas are members :—Sir Charles Fitzpatrick, G.C.M.G. (Canada), Sir James Rose Innes, K.C.M.G. (South Africa), Chief Justice Sir Lyman Poore Duff, G.C.M.G. (Canada), Sir Isaac Alfred Isaacs, G.C.M.G. (Australia), Chief Justice Sir William Mulock, K.C.M.G. (Ontario), Sir Lancelot Sanderson (Bengal), Chief Justice Sir Michael Myers, G.C.M.G. (New Zealand), Chief Justice Sir John Greig Latham, G.C.M.G. (Australia), and Sir George Edward Rich, K.C.M.G. (Australia), ex-Chief Justice John Stephen Curlews (South Africa), Chief Justice James Stratford (South Africa).

Registrar of the Privy Council and Registrar of Ecclesiastical Causes } Colin Smith, M.V.O., O.B.E., Barrister-at-Law.
Chief Clerk, W. Reeve Wallace, C.B.E.
Second Clerk, L. W. S. Upton.
Third Clerk, T. E. Henderson.
Shorthand Typists { K. Hope-Horwill. M. Winkworth.

COLONIAL EMPIRE MARKETING BOARD.

This Board was constituted in October, 1937, for the purpose of promoting the marketing of Colonial produce in the United Kingdom and overseas by means of a service of Marketing Officers and an organised system of publicity including participation in exhibitions and research. The Board consists of the Secretary of State for the Colonies and the Parliamentary Under-Secretary of State for the Colonies as *ex officio* members; Members of Parliament representing Government and Opposition parties; six representatives of the business world; the Director of the Imperial Institute; the Head of the Economic Dept. in the Colonial Office, and a representative from the Dept. of Overseas Trade.

Provision for the cost of the Secretariat and other expenses of the Board is made on the vote for Colonial and Middle Eastern Services (Civil Estimates, Class II 9).

Membership of the Board is as follows :—
Secretary of State for the Colonies (*Chairman*).
Parliamentary Under-Secretary of State for the Colonies (*Vice-Chairman*).
Clement Davies, K.C., M.P.
Rt. Hon. Thomas Johnston, M.P.
B. Riley, M.P.
J. A. de Rothschild, D.C.M., M.P.
Sir William Bradshaw, J.P.
Paul S. Cadbury.
The Hon. Leslie Runciman.
Arthur Foster, J.P.
Captain O. Lyttelton, D.S.O., M.C.
Sir John Chancellor, G.C.M.G., G.C.V.O., D.S.O.
Sir Harry Lindsay, K.C.I.E., C.B.E.
G. L. M. Clauson, C.M.G., O.B.E.
J. A. P. Edgcumbe, C.M.G., C.B.E.
Assessors :—Sir John Campbell, K.C.M.G., C.S.I., O.B.E., Sir F. A. Stockdale, K.C.M.G., C.B.E., V. H. Boyse, O.B.E.
Secretary, H. C. H. Bull, A.C.A., Office, 2, Sanctuary Buildings, 18, Great Smith Street, S.W.1.

COLONIAL ADVISORY MEDICAL COMMITTEE.

In October, 1909, the Secretary of State for the Colonies, on the recommendation of a Departmental Committee of Enquiry, appointed a Committee (the Advisory Medical and Sanitary Committee for Tropical Africa) to advise him on medical and sanitary questions connected with Tropical Africa.

In July, 1922, the functions of the Committee were extended to cover similar questions connected with all Dependencies, and the title "Colonial Advisory Medical and Sanitary Committee" was adopted.

On 1st January, 1931, the Committee took over the functions of the Colonial Medical Research Committee (described in previous issues of this Volume) which was dissolved on 31st December 1930; and its title was changed to the Colonial Advisory Medical Committee.

The present Membership of the Committee is as follows :—
(*Chairman*)—The Parliamentary Under-Secretary of State for the Colonies.
Sir William T. Prout, K.C.M.G., O.B.E., M.B., C.M.
Lieut.-Colonel S. P. James, C.M.G., M.D., F.R.S., I.M.S. (retd.).
Sir Arthur Horn, C.M.G., B.Sc., M.D., M.R.C.P.

* Lord Atkin, Lord Thankerton, Lord Russell of Killowen, Lord Macmillan, G.C.V.O., Lord Wright, Lord Romer, Lord Porter.

Mrs. Mary G. Blacklock, B.Sc., M.B., B.Ch., B.A.O.
H. H. Scott, C.M.G., M.D., F.R.C.P.
G. Carmichael Low, M.A., M.D., F.R.C.P.
Col. P. G. Stock, C.B., C.B.E., M.B., F.R.C.P.
J. A. Calder, C.M.G.
A. J. R. O'Brien, C.M.G., M.C., M.B., M.R.C.P.
A. G. H. Smart, M.B.E., M.D., D.P.H.
M. Lemberger, Colonial Office, *Secretary.*

COLONIAL SURVEY AND GEOPHYSICAL COMMITTEE.

The Colonial Survey and Geophysical Committee is an advisory Committee appointed by the Secretary of State for the Colonies to advise him on survey and allied questions affecting the Colonies, Protectorates and Mandated Territories. The Colonial Survey Committee was originally constituted in August, 1905; its scope was extended in 1912 to include geological surveys, and on the 1st January, 1935, it was reconstituted on a broader basis to enable it to consider not only survey and geological questions but also such allied problems as geophysical, meteorological and astronomical questions. It was also decided that the Committee should in future be constituted as far as possible on an *ex officio* basis.

The Committee now consists of:—

Sir John Shuckburgh, K.C.M.G., C.B., Colonial Office (*Chairman*), and the following *ex officio* members:—The Assistant Secretary in charge of the General Department of the Colonial Office, the Director-General of the Ordnance Survey, the Hydrographer of the Navy, the Head of the Geographical Section of the General Staff, War Office, the Director of the Meteorological Office, the Astronomer Royal, the Director of the Geological Survey of Great Britain, and the Head of the Department of Geodesy and Geophysics at Cambridge University. Mr. J. E. Marnham (Colonial Office) and Mr. J. Calder Wood, M.C. (War Office) are the *Joint Secretaries.*

THE ADVISORY COMMITTEE ON EDUCATION IN THE COLONIES.

This committee was appointed on the 1st of January, 1929, to advise the Secretary of State on any matters of education in the British Dependencies which he may from time to time refer to it, and to assist him in advancing the progress of education in those territories. It is constituted as follows:—

The Parliamentary Under-Secretary of State (*Chairman*).
A. J. Dawe, C.M.G., O.B.E. (*Deputy-Chairman*).

E. Burney, M.C., H.M.I.
Sir Donald Cameron, G.C.M.G., K.B.E.
Major A. G. Church, D.S.O., M.C.
Professor F. Clarke.
A. Creech Jones, M.P.
The Reverend J. W. C. Dougall.
Dr. Raymond Firth.
Professor Julian Huxley.
J. L. Keith.
Professor Doris Mackinnon, D.Sc.
A. I. Mayhew, C.M.G., C.I.E.
The Right Rev. Bishop E. Myers.
Miss E. C. Oakden, H.M.I.
Miss M. Perham.
H. S. Scott, C.M.G.
Sir Franklin Sibly, LL.D., D.Sc.
Sir Will Spens, C.B.E., LL.D.
H. Stannard.
H. Vischer, C.M.G., C.B.E.
Sir Richard Winstedt, K.B.E., C.M.G.
R. K. Winter, C.M.G.

Mr. Vischer and Mr. Mayhew are Joint Secretaries of the Committee and receive salaries from the funds contributed by Colonial Governments. The Official Secretary is Mr. G. A. Lusby (Colonial Office).

THE AFRICAN LIQUOR TRAFFIC CONTROL COMMITTEE.

This Committee was appointed in 1924 to consider and advise upon

(1) All applications for the placing of brands of patent-still gin on the Schedule of approved brands which will be admitted into the British West African Colonies and Protectorates.
(2) Any question which may arise as to the retention on the Schedule of any brand which has been placed on it.

It is constituted as follows:—

Chairman—J. B. Sidebotham.
Lt.-Col. C. A. Gordon Clark, C.M.G., D.S.O.
G. M. Miller.
Secretary—S. F. Whitcombe (Colonial Office).
R. F. Nicholson.
C. A. Adams, B.Sc., F.I.C.
J. M. Connell.

DISCOVERY COMMITTEE.

In March, 1923, the Secretary of State for the Colonies appointed an Executive Committee to control, subject to his instructions, the investigations, mainly connected with whaling, recommended by the Inter-departmental Committee on Research and Development in the Dependencies of the Falkland Islands (see Parliamentary Paper, Cmd. 657). For the purposes of the investigations, the late Captain R. Scott's ship "Discovery" was acquired on behalf of the Colonial Government, and, after being refitted to meet the requirements of the work, was placed in commission in 1925. In the same year a Marine Biological Station was established at Grytviken, South Georgia. It was handed over to the Govt. of the Falkland Islands in 1938. Another ship, of the Whale Catcher type, which was named "William Scoresby," was built for the Committee and placed in commission in 1926. In July, 1929, the "Discovery" was chartered for the purposes of the British, Australian, New Zealand Antarctic Research Expedition of 1929–31, and in her place a third ship, named "Discovery II," which was specially constructed for research work, was built for the Committee and commissioned on the 14th December, 1929. The "Discovery" was formally handed over to the Boy Scouts Association on 9th October, 1937.

The Committee is composed as follows :—

The Marquess of Dufferin and Ava, Parliamentary Under-Secretary of State for the Colonies, (*Chairman*).
Sir Sidney F. Harmer, K.B.E., D.Sc., F.R.S., British Museum (Natural History), (*Vice-Chairman*).
A. Bevir (*Colonial Office Representative*).
A. T. A. Dobson, C.V.O., C.B.E., Ministry of Agriculture and Fisheries.
Vice-Admiral Sir H. P. Douglas, K.C.B., C.M.G., R.N. (Ret.).
Rear-Admiral J. A. Edgell, C.B., O.B.E., R.N., Admiralty.
Sir J. Fortescue Flannery, Bart., M.I.C.E. (*Consulting Naval Architect*).
Dr. S. W. Kemp, F.R.S.
H. G. Maurice, C.B.
Sir John Middleton, K.C.M.G., K.B.E.
J. M. Wordie, F.R.S.E., Royal Geographical Society.
Dr. N. A. Mackintosh (*Director of Research*).
A. Stirling (Commonwealth of Australia).
Sir Cecil Day (New Zealand).
(vacant) (Union of South Africa).
W. E. Noall, M.B.E. (*Secretary*).
H. Horsburgh, A.M.I.C.E. (*Technical Officer*).
E. A. Nattriss. O.B.E. (*Shipping Officer*).
G. Bryant (*Accountant*).

IMPERIAL ECONOMIC COMMITTEE.

The Imperial Economic Committee was established in 1925. The functions of the Committee were extended by the Imperial Conferences of 1926 and 1930, and again as a result of the Report of the Imperial Committee on Economic Consultation and Co-operation, 1933. These functions are now as follows :—

(1) to complete the series of investigations into the possibility of improving the methods of preparing for market and marketing within the United Kingdom the food products of the overseas parts of the Empire, with a view to increasing the consumption of such products in the United Kingdom in preference to imports from foreign countries, and to promote the interests of both producers and consumers.
(2) to undertake enquiries into the production for export and marketing in various parts of the world of the raw materials of the Empire.
(3) to prepare, on obtaining the approval of the Governments of the Commonwealth, preliminary surveys of any branch of Empire trade and marketing, such as were contemplated in the recommendation of the Imperial Conference of 1926.
(4) to carry out any investigations arising out of recommendations contained in Reports submitted by the General Economic Committee and adopted by the Imperial Conference of 1930.
(5) to facilitate conferences among those engaged in particular industries in various parts of the Commonwealth.
(6) to examine and report on any economic question which the Governments of the Commonwealth may agree to refer to the Committee.
(7) to undertake the following services transferred from the Empire Marketing Board, viz :
  (a) periodical market intelligence notes, and
  (b) world surveys of production and trade (including those embraced by the "Commodity" series issued by the Empire Marketing Board).
(8) to make proposals to Governments in regard to other economic services and enquiries which, in its view, should be conducted on a co-operative basis, it being understood that this does not give to the Committee any power to initiate proposals regarding consultation in respect of economic policy.

The Committee consists of 20 members, nominated by their respective Governments. It is financed by contributions from all the Governments of the Commonwealth, and reports to those Governments.

The publications of the Committee comprise statistical surveys, special reports and regular intelligence services. 31 special reports and 4 surveys have been published. Summary reviews of production and trade are now published annually on Meat, Fruit, Dairy Produce, Grain Crops, Plantation Crops, Industrial Fibres, and Vegetable Oils and Oilseeds. The intelligence services include regular periodicals (with annual supplements) on Dairy Produce, Fresh Fruit, Dried and Canned Fruit, and Wool. For lists and rates apply to the Secretary.

F. J. du Toit (*Chairman*), A. T. Brennan, *Trade Commissioner*, Union of South Africa.
Sir Frederick Leith-Ross, G.C.M.G., K.C.B., Sir Geoffrey Clarke, C.S.I., O.B.E., United Kingdom.
F. Hudd, *Chief Trade Commissioner* (one seat vacant), Canada.
F. L. McDougall, C.M.G., Sir Clive Baillieu, K.B.E., C.M.G., Australia.
W. J. Jordan, *High Commissioner*, R. S. Forsyth, C.M.G., New Zealand.
J. W. Dulanty, C.B., C.B.E., *High Commissioner* (one seat vacant), Eire.
William C. Job (one seat vacant), Newfoundland.
Sir Firozkhan Noon, K.C.I.E., *High Commissioner*, Sir A. Ramaswami Mudaliar, India.
Sir Firozkhan Noon, K.C.I.E., Burma.
S. M. Lanigan-O'Keeffe, C.M.G., *High Commissioner*, Southern Rhodesia.
G. L. M. Clauson, C.M.G., O.B.E., Clifford Figg, Colonies and Protectorates.
Secretary—Sir David Chadwick, K.C.M.G., C.S.I., C.I.E.
Asst. Secretary—Sir Alan Green, C.I.E.
Address—2, Queen Anne's Gate Buildings, Dartmouth Street, S.W.1.
Telephone—Whitehall 4801.

COLONIAL ADVISORY COUNCIL OF AGRICULTURE AND ANIMAL HEALTH.

The Colonial Advisory Council of Agriculture and Animal Health was constituted in March, 1929, in accordance with the recommendations of the Committee on the organisation of a Colonial Agricultural Service (Cmd. 3049) and of the Colonial Veterinary Services Committee (Cmd. 3261). No specific terms of reference were given to the Council, but it was decided that its functions should be generally those which were recommended by the two Committees referred to above, i.e., to advise on the following matters:—

(*a*) The supply and training of specialist and field officers for the Colonial Agricultural and Veterinary Services, in conjunction with the recruiting authorities of the Colonial Office:
(*b*) The establishment of Central Research Stations and the general guidance of their work;
(*c*) The efficiency and general well-being of the proposed unified Colonial Agricultural and Veterinary Services, including such advice upon the Agricultural and Veterinary Services as the Secretary of State or Colonial Governments may desire;
(*d*) The collection, collation and distribution of scientific, agricultural and veterinary information in fields not covered by other agencies;
(*e*) Main agricultural and veterinary research policy in the Colonial Empire;
(*f*) The representation and collaboration of the Colonial Empire as a unit in Imperial schemes of research and in Imperial Bureaux;
(*g*) The general progress of agriculture, food production and animal husbandry in the Colonial Empire.

The Council is composed as follows:

The Parliamentary Under-Secretary of State for the Colonies (*Chairman*).
Sir F. A. Stockdale, K.C.M.G., C.B.E., Agricultural Adviser to the Secretary of State for the Colonies (*Vice-Chairman*).
Dr. A. J. R. O'Brien, C.M.G., M.C., Chief Medical Adviser to the Sec. of State for the Colonies.
W. H. Andrews, D.Sc., M.R.C.V.S.
E. J. Butler, C.M.G., C.I.E., D.Sc., F.R.S.
Professor F. L. Engledow, C.M.G., M.A., B.Sc.
Sir Arthur Hill, K.C.M.G., Sc.D., F.R.S.
Sir Harry Lindsay, K.C.I.E., C.B.E.
Sir Guy Marshall, C.M.G., D.Sc., F.R.S.
Sir John Orr, D.S.O., M.C., D.Sc.
Sir John Russell, D.Sc., F.R.S.
J. Smith, O.B.E., M.R.C.V.S.
Dr. H. A. Tempany, C.B.E., Asst. Agricultural Adviser to the Sec. of State for the Colonies.
G. L. M. Clauson, C.M.G., O.B.E.
A. D. Garson, Colonial Office (*Secretary*).

COLONIAL DEVELOPMENT ADVISORY COMMITTEE.

In August, 1929, the Secretary of State for the Colonies, with the approval of the Treasury, appointed the Colonial Development Advisory Committee, with the following terms of reference:

"In accordance with Section 1 of the Colonial Development Act, 1929, to consider and report on, in the manner to be prescribed in the regulations to be made by the Secretary of State under Section 1 (9) of the Act, applications for assistance from the Colonial Development Fund, in furtherance of schemes likely to aid and develop agriculture and industry in the Colonies, Protectorates and Mandated Territories, and thereby promote commerce with, or industry in, the United Kingdom by any of the means specified in Section 1 (1) of the Act.

The composition of the Committee is as follows:—

Sir Alan Rae Smith, O.B.E. (*Chairman*).
Sir John Chancellor, G.C.M.G., G.C.V.O., D.S.O.
Sir John Eaglesome, K.C.M.G.
Sir Alan Pim, K.C.I.E., K.B.E., C.S.I.
Sir Felix Pole.
T. W. Davies, of the Colonial Office, as *Secretary*.
S. W. Smith of the Colonial Office as *Assistant Secretary*.

STANDING FINANCIAL COMMITTEE.

The Standing Financial Committee was formed early in 1932 to consider any general financial questions affecting the Colonies as a whole.

The Committee is composed as follows:—

Sir Cosmo Parkinson, K.C.B., K.C.M.G., O.B.E., Permanent Under-Secretary of State for the Colonies, (duties) *Chairman*.
Sir John E. Shuckburgh, K.C.M.G., C.B.
Sir George J. F. Tomlinson, K.C.M.G., C.B.E.
Sir Henry M. Moore, K.C.M.G.
Mr. A. J. Dawe, O.B.E.
Sir John Campbell, K.C.M.G., C.S.I., O.B.E.
Mr. G. L. M. Clauson, C.M.G., O.B.E.
Sir Cecil Bottomley, K.C.M.G., C.B., O.B.E.
Mr. J. E. W. Flood, C.M.G. } *Crown Agents.*
Mr. E. Hale, *Treasury*.
Mr. V. H. Boyse, O.B.E. (Colonial Office), *Secretary*.

COLONIAL OFFICE CURRENCY COMMITTEE.

This Committee was appointed in 1930 to advise upon currency questions arising in the Colonial Empire.
The Committee consists of official and banking representatives as follows :—

Sir John Campbell, K.C.M.G., C.S.I., O.B.E., Economic and Financial Adviser to the Secretary of State for the Colonies. (*Chairman*) (Colonial Office).
Sir John Caulcutt, K.C.M.G.
Mr. S. D. Waley, C.B., M.C. (Treasury).
Mr. G. L. M. Clauson, C.M.G., O.B.E. (Colonial Office).
Mr. J. E. W. Flood, C.M.G. (Crown Agents for the Colonies).
Mr. V. H. Boyse, O.B.E. (Colonial Office).
Mr. J. Fisher.
Mr. H. J. Chadwick, *Secretary* (Colonial Office).

WEST AFRICAN CURRENCY BOARD.

The West African Currency Board was appointed by the Secretary of State for the Colonies in November 1912, on the recommendation of the West African Currency Committee of 1911–1912, to provide for and to control the supply of currency to the British West African Colonies and Protectorates.

The Board is represented in West Africa by Currency Officers at Lagos, Accra, Freetown, and Bathurst, who supervise and control the work performed for the Board by the branches of the Bank of British West Africa Ltd., which acts as the Board's Agent. The present Currency Officers are the Accountants-General of Nigeria and the Gold Coast, the Treasurer of Sierra Leone, and the Receiver-General of the Gambia.

The Board is at present constituted as follows :—Sir Frank M. Baddeley, K.B.E., C.M.G. (*Chairman*); J. E. W. Flood, C.M.G.; Sir R. Roy Wilson; O. G. R. Williams, C.M.G.; *Secretary*, W. A. F. Wickhart; *Assistant Secretary and Accountant*, W. A. Templeman.

The address of the Board is 4, Millbank, Westminster, S.W.1.

EAST AFRICAN CURRENCY BOARD.

The East African Currency Board was appointed by the Secretary of State for the Colonies in 1920 to provide for and to control the supply of currency to Kenya and Uganda. Its functions were subsequently extended to the Tanganyika Territory, and to Zanzibar (from 1st January, 1936).

The Board is represented in East Africa by Currency Officers at Nairobi (for Kenya), Entebbe (for Uganda), Dar-es-Salaam (for the Tanganyika Territory), and Zanzibar. The present currency officers are the Accountants-General of Kenya, Uganda, and the Tanganyika Territory, and the Chief Accountant of Zanzibar.

The members of the Board are :—

Sir W. Cecil Bottomley, K.C.M.G., C.B., O.B.E. (*Chairman*).
R. N. Kershaw, M.C.
L. B. Freeston, O.B.E.
Secretary, A. H. Hicks.

The address of the Board is 4, Millbank, London, S.W.1.

PALESTINE CURRENCY BOARD.

The Palestine Currency Board was appointed by the Secretary of State for the Colonies in 1926 to provide for and to control the supply of currency to Palestine.

The Board is represented in Palestine by a Currency Officer at Jerusalem. The present Currency Officer is the Treasurer of Palestine.

The members of the Board are :—

Sir Percy H. Ezechiel, K.C.M.G. (*Chairman*).
Sir John Caulcutt, K.C.M.G.
H. F. Downie, O.B.E.
Secretary—J. H. Brown.

The address of the Board is 4, Millbank, Westminster, S.W.1.

BUREAU OF HYGIENE AND TROPICAL DISEASES.

His Majesty's Government have established in London a Bureau for the collection and general distribution of information with regard to hygiene and tropical diseases. Accommodation has been provided by the London School of Hygiene and Tropical Medicine, at Keppel Street, Gower Street, London, W.C.1. The Bureau is partly maintained from Imperial funds, and from funds provided by various Dominion, Colonial and Protectorate Governments.

The Bureau is under the general control and direction of an Honorary Managing Committee, appointed by and responsible to the Secretary of State for the Colonies. The Committee is composed of the following members :—

A. J. R. O'Brien, C.M.G., M.C., M.B., M.R.C.P. (Chief Medical Adviser to the Secretary of State), *Chairman*.
Sir Arthur Horn, C.M.G., M.D., M.R.C.P.
T. Carnwath, D.S.O., D.Sc., M.B. (representing the Ministry of Health).
W. H. Andrews, D.Sc., M.R.C.V.S. (representing the Ministry of Agriculture and Fisheries).
Professor Sir John Ledingham, C.M.G., M.B., F.R.C.P., F.R.S.
Professor Sir W. W. Jameson, M.D., F.R.C.P.
G. Carmichael Low, M.A., M.D., F.R.C.P.
H. E. L. Montgomery (representing the Foreign Office and the Sudan Government).
Sir Edward Mellanby, K.C.B., M.D., F.R.C.P., F.R.S.
Major-General Sir John Megaw, K.C.I.E., M.B., Ch.B., I.M.S. (retd.).
P. H. Manson-Bahr, C.M.G., D.S.O., M.D., F.R.C.P.
J. A. Calder, C.M.G., of the Colonial Office.
J. B. Sidebotham, of the Colonial Office, as *Secretary*.

Digitized by Google

The Bureau is administered by a salaried Director, who is assisted by a staff of sectional Editors. Its main function is to collect from all sources information regarding hygiene and tropical diseases; to collate, condense, and, where necessary, translate this information, and to distribute it as widely and quickly as possible among those who are engaged in combating these diseases. This information is made available by means of the publications of the Bureau, viz., the Tropical Diseases Bulletin and the Bulletin of Hygiene both of which are issued monthly. The Bureau possesses a valuable Library which is now combined with that of the London School of Hygiene and Tropical Medicine.

The Director of the Bureau is H. H. Scott, C.M.G., M.D., F.R.C.P.

EXECUTIVE COUNCIL OF THE IMPERIAL AGRICULTURAL BUREAUX.

2, Queen Anne's Gate Buildings, S.W.1.

This body, consisting of nominees of the Governments of the United Kingdom, the Dominions and India, and of the Colonial Office, was set up in 1929 to administer a number (8) of Bureaux organised to act as clearing houses of information on research in eight specialised fields of agricultural science, and financed from a common fund provided by the Governments of the Empire. In 1933, the Council was entrusted with the supervision of the administration and finances of the Imperial Institute of Entomology and the Imperial Mycological Institute and of such research activities in the United Kingdom as the participating governments may agree should in future be conducted on a co-operative basis. On the recommendation of the British Commonwealth Scientific Conference of 1936 the Governments directed the creation of two more Imperial Bureaux, for Forestry and Dairy Science respectively. The Annual Reports of the Council are submitted to each of the Governments through their several members on the Council.

Chairman.—Lt.-Col. George P. Vanier, D.S.O., M.C.

Secretary.—Sir David Chadwick, K.C.M.G., C.S.I., C.I.E.

IMPERIAL INSTITUTE OF ENTOMOLOGY.

The Institute was founded at the beginning of 1913 for the purpose of encouraging and co-ordinating entomological work throughout the Empire in relation both to human and animal diseases and to agriculture. It was known as the Imperial Bureau of Entomology until 1930, when the name was changed to Imperial Institute of Entomology. The Head Office is at the British Museum (Natural History), Cromwell Road, S.W., and the Publication Office at 41, Queen's Gate, South Kensington, S.W. 7. Sir Guy A. K. Marshall, C.M.G., D.Sc., F.R.S., is the Director of the Institute, and Dr. S. A. Neave, O.B.E., and Dr. W. R. Thompson, F.R.S., the Assistant Directors.

The Institute was formerly under the control of an Honorary Committee of Management, but as from the 1st of October, 1933, in accordance with the recommendations of the Imperial Committee on Economic Consultation and Co-operation 1933, it has been placed under the control of the Executive Council of the Imperial Agricultural Bureaux.

The Institute absorbed the Entomological Research Committee appointed in June, 1909, by the Marquess of Crewe, when Secretary of State for the Colonies, with the object of furthering the study of economic entomology particularly in the British Tropical African Colonies and Protectorates.

Contributions for the upkeep of the Institute, which amount to approximately £13,700 per annum, are made by H.M.'s Governments in the United Kingdom and in the Dominions, the Government of India, the Governments of the Colonies, Protectorates, etc., and of the Sudan.

The Institute publishes a quarterly journal entitled "The Bulletin of Entomological Research," which includes original papers on entomological subjects; and a monthly journal entitled "The Review of Applied Entomology" (in two parts "Medical and Veterinary" and "Agricultural") summarising all current entomological literature bearing on injurious insects. The identification of insects is also undertaken on a large scale for official entomologists in all parts of the Empire, and information and advice are given on any matters concerning injurious insects.

In 1927 a Laboratory for breeding beneficial parasites for export to Oversea Governments was opened at Farnham House, Farnham Royal, Buckinghamshire. Dr. W. R. Thompson, F.R.S., an Assistant Director of the Institute, is Superintendent of the Parasite Laboratory.

IMPERIAL MYCOLOGICAL INSTITUTE.

The Institute (which was formerly known as the Imperial Bureau of Mycology), was founded in 1920. It was the outcome of a proposal unanimously adopted by the Imperial War Conference in 1918, that a central organisation should be established for the encouragement and co-ordination of work throughout the Empire on the diseases of plants caused by fungi.

The Institute is situated at Ferry Lane, Kew (Telephone, Richmond 0603), and was in charge of Dr. E. J. Butler, C.M.G., C.I.E., F.R.S., until 30th September, 1935. Mr. S. F. Ashby, B.Sc., formerly Professor of Mycology in the Imperial College of Tropical Agriculture, Trinidad, B.W.I. and then Mycologist at the Institute, was appointed his successor as from 1st October, 1935.

The Institute was formerly under the control of an Honorary Committee of Management, but as from the 1st of October, 1933, in accordance with the recommendations of the Imperial Committee on Economic Consultation and Co-operation 1933, it has been placed under the control of the Executive Council of the Imperial Agricultural Bureaux.

The funds of the Institute are provided from the various self-governing Dominions, India and the Sudan, and the non-self-governing Colonies, Protectorates and mandated territories. The Ministry of Agriculture and Fisheries, the Scottish Board of Agriculture and the Ministry of Agriculture, N. Ireland, also make annual contributions. Its work on the diseases of plants caused by fungi is broadly on the same lines as that of the Imperial Institute of Entomology in regard to insects. Its primary function is to assist economic mycologists in the overseas parts of the Empire by the accumulation and distribution of information on all matters connected with plant diseases and by the identification of specimens. The former purpose is fulfilled by the publication of a monthly *Review*, the establishment of a lending library, the preparation of

Digitized by Google

translations and summaries of existing knowledge, and also by direct correspondence. In addition to the identification of specimens, critical studies of parasitic fungi are carried out. Accommodation is provided for overseas workers who may wish to prosecute their researches while in England. With the co-operation of the Empire Marketing Board, a new and commodious building was built on a site in the Royal Botanic Gardens, Kew, and the Institute entered into occupation of this in July, 1930. A first Imperial Mycological Conference, organised by the Institute and attended by a large number of home and overseas mycologists, was held in 1924, and similar Conferences, which were widely attended, were held in September, 1929 and September, 1934.

IMPERIAL SHIPPING COMMITTEE.

Great George Street, S.W. 1.

This Committee was appointed in June, 1920, in pursuance of a resolution of the Imperial War Conference of 1918. The Committee derives its authority from, and is responsible to, the Governments represented at the Imperial Conference. It consists of 17 members, of whom 10 are nominated by the Governments of the various parts of the Empire, 5 are "persons experienced in shipping and commerce," and 1 is representative of civil aviation, under an independent chairman.

The terms of reference, as amended by the Imperial Conference of 1930, are :—

(i) To enquire into complaints from persons and bodies interested with regard to ocean freights, facilities and conditions in the inter-Imperial trade, or questions of a similar nature referred to them by any of the nominating authorities; and to report their conclusions to the Governments concerned.

(ii) To survey the facilities for maritime transport on such routes as appear to them to be necessary for trade within the Empire, and to make recommendations to the proper authority for the co-ordination and improvement of such facilities with regard to the type, size and speed of ships, depth of water in docks and channels, construction of harbour works, and similar matters; and in doing so to take into account facilities for air transport on the routes in question.

Chairman, Rt. Hon. Sir Halford Mackinder, P.C.
Secretary, G. V. Hole.

IMPERIAL COMMUNICATIONS ADVISORY COMMITTEE.

The Imperial Communications Advisory Committee was constituted in July, 1929, in accordance with the recommendations of the Imperial Wireless and Cable Conference 1928, to act in an advisory capacity in regard to telegraphic communications.

The Committee is charged with certain responsibilities relating to the activities of Cable & Wireless Limited—the company formed, in accordance with the recommendations of the Imperial Wireless and Cable Conference, for the purpose of co-ordinating the telegraphic services (both cables and wireless) connecting the various parts of the British Empire. The Committee is concerned with questions of policy regarding, in particular, the institution of new services, the discontinuance of existing services, alterations in rates, and the distribution of traffic between alternative routes.

The Committee consists of 8 members, appointed by the Governments of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, Ireland, India, and of the Colonies, Dependencies and Protectorates, respectively. The Government of any part of His Majesty's dominions now or hereafter possessing responsible government may also nominate one representative, who is entitled to be summoned to any meeting at which questions affecting the interests of that part of His Majesty's dominions are to be considered.

The Committee is at present composed as follows :—

United Kingdom, Sir Campbell Stuart, G.C.M.G., K.B.E. (*Chairman*).
Canada, L. B. Pearson, O.B.E.
Commonwealth of Australia, Sir Clive Baillieu, K.B.E., C.M.G.
New Zealand, M. B. Esson.
Union of South Africa, F. J. du Toit.
Eire, J. W. Dulanty, C.B., C.B.E.
India, Sir Firoz Khan Noon, K.C.I.E.
Colonies and Protectorates, Sir Claud Hollis, G.C.M.G., C.B.E.
Secretary, Warren Zambra.
Address, Electra House, Victoria Embankment, W.C.2.
Telephone, Temple Bar, 9468.
Telegrams, Impicatory, Estrand, London.

EMPIRE FORESTRY CONFERENCE AND THE STANDING COMMITTEE ON EMPIRE FORESTRY.

The Conference meets periodically, usually quinquennially (the last occasion being in 1935 in the Union of South Africa), to discuss questions of forest policy in the Empire and the wider technical aspects of forestry. The preparatory work for this Conference and the steps necessary to give effect to the resolutions are carried out by the Standing Committee on Empire Forestry, composed as follows :—

The Chairman of the Empire Forestry Conference; Chairman, British Forestry Commission; Director of Imperial Forestry Institute; Member of Council of Empire Forestry Association; and one representative of each of the following: Colonial Office; India Office; unit of Empire in which last Conference was held; unit of Empire in which next Conference will be held.

Secretary.—Fraser Story, 25, Savile Row, W.1.

Digitized by Google

IMPERIAL FORESTRY INSTITUTE, UNIVERSITY OF OXFORD.

Was founded in 1924 as a result of a resolution of the British Empire Forestry Conference held in Canada in 1923. It is at present financed mainly by Colonial Governments, the Forestry Commission, certain Provinces of India, and Burma; it provides post-graduate training and refresher courses for forest officers of the Empire and others, undertakes the structural examination and identification of woods and the identification of trees, and carries out research on biological and economic problems bearing on forestry.

Director.—Mr. J. N. Oliphant, C.M.G., M.A. and Dipl. For. (Oxon.).

The Institute is controlled by a University Committee on which the Government Departments contributing to its support are represented.

COLONIAL FOREST RESOURCES DEVELOPMENT DEPARTMENT.

This Department was set up on 1st April, 1935, to promote the marketing of Colonial Forest products

Forest Economist—Major F. M. Oliphant.
Market Development Officer—Major J. R. Cosgrove, D.S.O., M.C., M.E.I.C.
Office Superintendent—H. H. R. Dolling.
Office—Grand Buildings, Trafalgar Square, London, W.C.2.

THE IMPERIAL INSTITUTE

Trustees:—

The Lord President of the Council.
The First Commissioner of H.M. Treasury.
The Secretary of State for India.
The President of the Board of Trade.
The Secretary of the Department of Overseas Trade (Development and Intelligence).
The Rt. Hon. The Earl of Selborne, K.G., G.C.M.G.
The Rt. Hon. R. H. Brand, C.M.G.
(One vacancy).

The Imperial Institute building was erected at South Kensington as the National Memorial of the Jubilee of Queen Victoria, by whom it was opened in May, 1893. Since 1900 portions of the building have been in the occupation of the University of London.

The principal object of the Imperial Institute is to promote the utilisation of the commercial and industrial resources of the Empire, by the chemical and technical investigation of raw materials, by the supply of information relating to such materials and their production, and by the maintenance of comprehensive exhibits illustrating the economic resources of all the countries of the Empire overseas.

The Institute ceased to act as an independent institution in 1902, when it was placed under the management of the Board of Trade by Act of Parliament. The Colonial Office assumed the management by arrangement with the Board of Trade in 1907, and was placed in statutory control by the Imperial Institute (Management) Act of 1916.

As an outcome of the Report of the Committee of Enquiry appointed by the Secretary of State for the Colonies in 1923 and the subsequent resolution of the Imperial Economic Conference, an Act of Parliament (the Imperial Institute Act, 1925) was passed which repeals the Acts of 1902 and 1916, and provides (1) for the transfer of the Institute to the control of the Parliamentary Secretary of the Department of Overseas Trade; (2) for its management, under that Minister, by a Board of Governors representing all the interests concerned, and (3) for the amalgamation of the Imperial Mineral Resources Bureau with the Institute. The provisions of this Act were carried into effect in 1925.

Board of Governors.

President—The Rt. Hon. R. S. Hudson, M.P. (Secretary of the Department of Overseas Trade).

Vice-President—*Sir T. St. Quintin Hill, K.C.M.G., O.B.E. (Comptroller-General, Department of Overseas Trade).

Representatives of the Dominions, India, etc.:

Canada—(vacant).
Australia—The Rt. Hon. S. M. Bruce, C.H., M.C. (High Commissioner).
New Zealand—W. J. Jordan (High Commissioner).
South Africa—C. T. te Water (High Commissioner).
Newfoundland—D. James Davies, C.B.E. (Trade Commissioner).
India—Sir Firoz Khan Noon (High Commissioner).

Representatives of Government Departments:

Treasury—E. Hale.
Board of Trade—R. G. C. Somervell, Sir Alfred Faulkner, C.B., C.B.E. (for Mines Department).
Colonial Office—*G. L. M. Clauson, C.M.G., O.B.E., *J. E. W. Flood, C.M.G. (Crown Agent for the Colonies), *Sir F. A. Stockdale, K.C.M.G., C.B.E. (Chairman, Imperial Institute Advisory Council on Plant and Animal Products).
Ministry of Agriculture and Fisheries—V. E. Wilkins, O.B.E., Ph.D.
Department of Scientific and Industrial Research—Sir Frank Smith, G.B.E., K.C.B., D.Sc., LL.D., F.R.S.

*Members of Managing Committee.

Digitized by Google

Representatives of Scientific and Commercial Interests:

Royal Society—Prof. V. H. Blackman, Sc.D., F.R.S., F.L.S.

Formerly Governors of the Imperial Mineral Resources Bureau—W. Forster Brown, C.B.E., M.Inst.C.E., M.Inst.M.E., F.S.I., H. F. Marriott, A.R.S.M., M.Inst.C.E., M.Inst.M.M., M.I.M.E.

Imperial College of Science and Technology—Sir H. T. Tizard, C.B., F.R.S.

Association of British Chambers of Commerce—*Sir Stanley Machin, J.P.

Federation of British Industries—Alexander Johnston.

Royal Botanic Gardens, Kew—Sir Arthur Hill, K.C.M.G., M.A., D.Sc., F.R.S., F.L.S.

Imperial Institute Advisory Council on Minerals (Chairman)—*Sir William Larke, K.B.E.

Secretary—J. A. Nelson, B.Sc.

NOTE.—Sir Harry Lindsay, K.C.I.E., C.B.E., Director of the Imperial Institute, J. H. Jones, O.B.E., and F. Hollings, of the Department of Overseas Trade, attend meetings of the Board of Governors and Managing Committee.

The following is a brief account of the activities of the Institute.

The Institute works in co-operation with the Agricultural, Mines and other technical departments in the Dominions, India and the Colonies, whose operations it supplements by undertaking investigations and enquiries relating to the composition, uses and commercial value of products (animal, vegetable or mineral) which can be more efficiently conducted at home in consultation with merchants and manufacturers with a view to the local utilisation of the products or their export.

In addition to general laboratories for the investigation of products, there are special laboratories for the examination of rubber, cement, and ceramic materials, and complete technical trials of these and other materials can be carried out. By its close association with manufacturers and users of raw materials in this country, the Institute is able to arrange large-scale trials of promising materials when necessary. Samples of the principal raw materials which have been investigated and commercially valued during recent years, and as to which full information is available, can be inspected by interested enquirers.

Special analyses and investigations are undertaken for firms or private persons in any part of the Empire on payment of appropriate charges. Application for such investigations should be made in writing to the Director.

For the prompt execution of the investigation and enquiry work of the Institute, two Departments are maintained, viz., Plant and Animal Products, and Mineral Resources. Each Department is under a Principal Officer and has its own laboratory and intelligence sections, and is responsible for all publications dealing with its particular subjects. In each department a special feature is made of the collecting and indexing of such published and other information as is likely to be of service in dealing with enquiries and other work of the Institute.

Plant and Animal Products Department.—This department deals with all investigations and enquiries relating to foodstuffs, oilseeds, essential oils, fibres, drugs, tobacco, tanning materials, gums and resins, and such like products. Under the supervision of an Advisory Council on Plant and Animal Products Consultative Committees, including representatives of the trades or industries concerned, co-operate in the work on timbers, vegetable fibres, oils and oilseeds, essential oils, gums and resins, tanning materials, hides and skins, and insecticidal materials of vegetable origin; other Committees will be formed as and when required. Investigations of plantation rubber are also carried out at the Institute under the direction of the London Advisory Committee for Rubber Research (Ceylon and Malaya).

A very large number of reports on these subjects have been made to the Governments of the Dominions, Colonies and India. The results of some of the investigations are recorded in the quarterly "Bulletin of the Imperial Institute."

Mineral Resources Department.—This department is responsible for dealing with all investigations and enquiries relating to minerals, and one of its chief functions is to prepare and publish the well-known series of reports on the Mineral Industry of the British Empire and Foreign Countries. Seven Consultative Committees, composed mainly of members representing the industries concerned, co-operate in the work under the guidance of an Advisory Council on Mineral Resources which includes representatives of the various Overseas Governments. In this way a link is provided between the mineral resources of the Empire and the merchants and manufacturers in Great Britain.

Library.—The library of the Institute contains a large collection of Colonial and Indian works of reference, and is regularly supplied with the more important reports and other publications of government departments in Great Britain, the Dominions, Colonies and India, and also most foreign countries. More than 500 serial publications, mainly of a scientific or technical character, are regularly received.

The library is available for the use of enquirers between the hours of 10 a.m. and 5.0 p.m. on week-days (10 a.m. to 1 p.m. on Saturdays).

Statistical Section. This section is concerned with the collection of statistics for the use of other Departments of the Institute, for which purpose the chief statistical publications of nearly all the British and foreign countries are regularly received.

Public Exhibition Galleries.—The exhibits in these galleries are supplied chiefly through the Governments of the countries concerned, but also by manufacturers in Great Britain who employ Empire raw materials in their industries. The exhibits thus constitute a permanent exhibition illustrative of the commercial and industrial resources of the Overseas Countries of the Empire in relation to the home producer and consumer of finished goods. The specimens of raw products are of vegetable, mineral and animal origin, and have descriptive labels, statistical charts and diagrams attached to them stating their nature, uses and commercial importance. Other exhibits comprising dioramas, pictures, photographs, maps, models, sporting trophies and examples of native handicrafts, etc., illustrate the life of the people, local scenery and industries.

* Members of Managing Committee.

Digitized by Google

Guide Lecturers conduct parties through the Galleries at stated times. Surplus specimens of economic products when available are supplied at a nominal charge to school museums. Reference samples of little known raw products not generally available on the market are supplied to manufacturers and others interested.

There is a Central Stand in the Galleries for the supply of free literature and general information to enquirers and for the sale of Imperial Institute publications and picture postcards. Pamphlets, circulars, hand-books, etc., containing information relating to the commerce, agriculture, mining and other industries of the principal British Possessions, and also to emigration, are available for gratuitous distribution. Series of picture postcards, illustrating the more important industries of the Empire, are on sale, price 6d. per packet of six cards.

The Exhibition Pavilion in the Galleries is available for special exhibitions of a temporary nature.

Cinema.—Films depicting the life, sports and industries of the various countries of the British Empire overseas are shown in the Cinema daily. Lectures on Empire industries and countries are frequently given.

Empire Film Library.—The Empire Film Library maintained by the Institute contains cinematograph films illustrating the industry and agriculture as well as the life and products of the United Kingdom and the Empire overseas. The films are available for loan to schools and other approved bodies in this country without other charge than the cost of carriage.

The Galleries and Cinema are open from 10 a.m. to 5 p.m. on weekdays (except Christmas Day and Good Friday), and on Sundays from 2.30 to 6 p.m.

General Publications.—The "Bulletin of the Imperial Institute" is published quarterly, price 2*s.* 6*d.*, by post 2*s.* 9*d.* (annual subscription 10*s.*, including postage), and may be ordered direct from the Institute or through any bookseller. The Bulletins contain records of the principal investigations conducted by the Imperial Institute, and articles relating to progress in agricultural, mineral and other industries, with special reference to the industrial utilisation of raw materials of the British Empire. Other features of the Bulletin are (1) a record of work conducted by Government Technical Departments Overseas and (2) bibliographies of the more important published reports, articles, etc., on plant and animal products, economic minerals and vegetable insecticides.

Monographs and other publications relating to subjects and products dealt with at the Institute are also prepared. Such publications include a "Descriptive List of some Empire Timbers recommended by the Imperial Institute Advisory Committee on Timbers"; "Grading Rules and Standard Sizes for Empire Hardwoods," prepared by the Imperial Institute Advisory Committee on Timbers; "Tanning Materials of the British Empire"; "The Collection of Reptile Skins for Commercial Purposes," a report by the Imperial Institute Advisory Committee on Hides and Skins; "The Drying of East African Hides with reference to the prevention of Blister," a report by the Imperial Institute Advisory Committee on Hides and Skins; and "The Preparation of Empire Hides and Skins," issued with the approval of the Imperial Institute Advisory Committee on Hides and Skins; "Commercial Plant Fibres (excluding Cotton) of the British Empire," a Guide to the Empire Fibres Exhibition held at the Imperial Institute, March–April, 1936. Memoranda, prepared at the Institute on "Empire Sisal and its importance to the Cordage manufacturer," "Indian (Sunn or Sann) Hemp, its Production and Utilisation," and "The Production of Tung Oil in the Empire" were issued by the late Empire Marketing Board.

The Mineral Resources Department took over and continued the publications issued by the late Imperial Mineral Resources Bureau on the Mineral Resources of the British Empire and Foreign Countries, including the annual Statistical Summary, a series on the Mining Laws of the British Empire, and monographs on specific minerals and metals. Some 50 monographs have been issued and these are continuously being brought up to date. Among the more recent issues are volumes dealing with Platinum and Allied Metals, Strontium Minerals, Barium Minerals, Asbestos, and Manganese. Revisions of the monographs on Magnesium and Magnesite, Tin, Vanadium, Chromium, Coal and Aluminium are in preparation. Special publications dealing with Mining Royalties and Rents in the British Empire and a survey of the Mineral Position of the British Empire have also been issued.

Conference Rooms.—These large rooms, specially decorated and furnished, are reserved on the principal floor for use by representatives of the Dominions and Colonies and for meetings and receptions.

The Cowasjee Jehanghir Hall.—The Bhownaggree corridor and rooms in connection with this Hall are in the occupation of the Imperial Institute. The Hall is available for lectures, meetings, etc.

STAFF.

Director—Sir Harry Lindsay, K.C.I.E., C.B.E.

Plant and Animal Products Department.

Principal.—S. E. Chandler, O.B.E., D.Sc.(Lond.), A.R.C.S., F.L.S.

LONDON ADVISORY COMMITTEE FOR RUBBER RESEARCH (*Ceylon and Malaya*).

Superintendent (Scientific Staff)—G. Martin, B.Sc.(Birm.), A.I.C., F.I.R.I.
Senior Assistant (Scientific Staff)—W. S. Davey, B.Sc.(Lond.), A.I.C., F.I.R.I.
Assistants (Scientific Staff)—H. C. Baker, M.Sc.(Lond.), A.I.C., A.I.R.I.(Sc.), W. G. Wren, B.Sc.(Lond.), A.R.C.S.
Secretary—J. A. Nelson, B.Sc.Econ.(Lond.).

OFFICE OF THE TRADE COMMISSIONER FOR THE GOVERNMENT OF BURMA.

Trade Commissioner—Sir Harry Lindsay, K.C.I.E., C.B.E.
Assistants (Temporarily seconded from the Office of the High Commissioner for India)—U. Myat Tun, B.Sc. Econ.(Lond.)., U. Pe Than, U. Saw Ohn Tin, B.A.(Rangoon).

ROYAL BOTANIC GARDENS, KEW.

Kew as a scientific establishment dates from 1759, when a Botanic, or as it was then called a Physic Garden, was established by the Princess Augusta of Saxe-Gotha, Dowager Princess of Wales.

It was energetically maintained by her son, George III., with the scientific assistance of Sir Joseph Banks, who was virtually, for the greater part of his life, director. Under his advice collectors were sent to all parts of the world. The first New Holland plants were introduced during Cook's voyages, 1768-1780. At Sir Joseph Banks's instance the system of inter-colonial exchange through Kew was commenced, which has been maintained ever since. The most memorable undertaking of this kind was the voyage of the *Bounty* (1787), for the purpose of introducing the bread-fruit tree from the South Seas into the W. Indies. Nelson, the Kew collector, was amongst those sent adrift by the mutineers, and eventually died of the exposure. Another Kew gardener, James Hooper, who had been attached to Lord Amherst's Embassy to China, remained in Java, and was from 1817-30 Hortulanus of the celebrated Dutch Colonial Botanic Garden at Buitenzorg, which he helped to create.

Digitized by Google

Both George III and Sir Joseph Banks died in 1820, and the colonial and other work of Kew languished, though it was not absolutely abandoned during the reign of George IV and William IV. In 1838 the abolition of the whole establishment was contemplated by the Government. Public opposition led to the appointment of a Treasury Committee, the report of which was presented to Parliament in 1840. The following paragraphs briefly defined the functions of the reorganised establishment:—"A national garden ought to be the centre round which all minor establishments of the same nature should be arranged. . . . From a garden of this kind Government would be able to obtain authentic and official information on points connected with the founding of new colonies; it would afford the plants there required, without its being necessary, as now, to apply to the officers of private estabishments for advice and assistance."

These recommendations having been adopted by the Government, Sir W. J. Hooker, F.R.S., was appointed Director in 1841 to carry them out. A close connection between Kew and the Colonial and India Offices immediately sprang up. A scheme for a complete series of Colonial Floras was sanctioned in 1856, and has been steadily prosecuted. Kew serves to a large extent as an advanced horticultural school. Special attention is given to the preparation of gardeners for Colonial and Indian service, in which some 100 men, trained at Kew, are now in official employment.

Relations with the botanical institutions of the self-governing Dominions are maintained by semi-official correspondence. With those of colonies under the control of the Colonial Office the connection is closer. In 1902, the Director was given the title of "Botanical Adviser to the Secretary of State for the Colonies."

With a view to furthering the co-operation between Kew and the botanical and agricultural departments of the Dominions and Colonies, the Empire Marketing Board in 1927 made a grant to be devoted partly to the employment of an Economic Botanist at Kew, who was to be available either to visit the Dominions and Colonies from time to time or to set free a superior officer of the Kew staff to undertake overseas missions, and partly for sending botanical collectors to various parts of the world to study and bring home plants of economic importance for cultivation at Kew and distribution to the Dominions and Colonies. After the dissolution of the Empire Marketing Board the post of Economic Botanist was retained as part of the regular establishment.

Colonial botanical institutions fall roughly into three classes. Those of the first class are usually, like Kew, administered by a scientific director; those of the second class by a skilled superintendent: the third class consists of "botanic stations." These last are small and inexpensive gardens, devised, in 1885, in order to afford practical instruction in the cultivation of tropical crops, and were intended to develop the agricultural resources at first of the smaller West Indian islands, and subsequently (1887) British possessions in Tropical Africa. These are now an integral part of the Agricultural Departments of the Colonies concerned and usually are in charge of a Curator, who, in many cases, is a gardener trained at Kew.

The principal members of the Kew staff are:—

Director, Sir Arthur W. Hill, K.C.M.G., M.A., Sc.D., D.Sc. (Adelaide), F.R.S., V.M.H.
Assistant Director, J. S. L. Gilmour, M.A., F.L.S.
Economic Botanist, Sir Geoffrey Evans, C.I.E.
Keeper of the Herbarium and Library, A. D. Cotton, O.B.E., F.L.S.
Keeper of Museums, J. Hutchinson, LL.D.
Curator, W. M. Campbell.

MALAYAN INFORMATION AGENCY.

The offices of the Agency are at Malaya House, 57, Trafalgar Square, W.C.2.

The Agency has been established by the Governments of the Straits Settlements and the Federated Malay States, with the approval of the Secretary of State for the Colonies. The primary object of the Agency is to deal with questions affecting the export trade of Malaya with the United Kingdom, to advertise its productions and attractions, to furnish to enquirers, interested in those parts or desirous of becoming acquainted with them, information as to the opportunities which they give and the facilities for travel and exploration which they have for the tourist or traveller, and to supply (on payment in some cases) publications and maps.

The Agency is in a position to afford information as to the channels through which enquiry may be made by those desirous of obtaining employment in Malaya and to supply general information.

The Agency undertakes for the Straits Settlements and Malay States Governments work that does not fall within the scope of the transactions of the Crown Agents for the Colonies, who are the recognised financial and buying agents of these Governments.

The Advisory Board of the Agency consists of the Agent, a representative of mining interests, a representative of planting interests, a representative of commercial interests, and a senior member of the Malayan Government Service retired.

The present Board consists of:—

G. E. Cator, C.M.G., *Agent*.
G. W. Simms.
Eric MacFadyen.
J. Mitchell.
E. Jago, *Deputy Agent*.

H.M.'s EASTERN AFRICAN DEPENDENCIES TRADE AND INFORMATION OFFICE.

This Office is situated in the Grand Buildings, Trafalgar Square, London, W.C.2.

It was established in 1925, with the approval of the Secretary of State for the Colonies, by the Governments of Kenya, Uganda, the Tanganyika Territory, Nyasaland, Zanzibar and Northern Rhodesia, and the Kenya-Uganda Transport Administration.

The creation of such an Office was recommended by the Parliamentary Commission which visited East Africa in 1924. The functions of the office are to give all possible information to persons proposing to interest themselves in East Africa for the purpose of settlement, commerce, residence, or temporary visit, and also to stimulate the trade of East Africa by helping to introduce its products into home markets.

The office is under the control of Major C. H. Dale, C.M.G., O.B.E., the Commissioner.

In connection with the office an advisory Committee has been formed, the membership of which is given below :—

Major-General Sir John Davidson, K.C.M.G., C.B., D.S.O. *(Chairman).*
Sir Randolf Baker, Bart., D.S.O.
Sir John Caulcutt, K.C.M.G.
Sir Theodore Chambers, K.B.E.
E. W. Bovill.
Lieutenant-Colonel R. P. Collings Wells, C.B.E., D.S.O.
The Right Hon. Lord Cranworth, M.C.
Major W. M. Crowdy.
C. B Hausburg.
F. S. Joelson.
Major Sir Humphrey Leggett, D.S.O., R.E.
Sir Dougal O. Malcolm, K.C.M.G.
Col. C. Ponsonby.
W. A. M. Sim.
Major C. Walsh.
A. Wigglesworth.
Sir Trevredyn Wynne, K.C.S.I., K.C.I.E.

In addition to which three sub-committees are in being dealing respectively with matters relating to Kenya, Uganda and the other Dependencies concerned, but the work is mainly dealt with by the Full Advisory Committee.

Deputy Commissioner (vacant).

Officers, Major J. Corbet Ward, O.B.E. (*Secretary*); G. W. Knapman, I.S.O. (*Librarian*), W. McHardy, O.B.E. (*Representative of the Kenya and Uganda Railways and Harbours*), Lt.-Col. C. F. Knaggs (*Kenya Settlement and Publicity Agent*), S. S. Murray, M.B.E., *Nyasaland Representative*).

THE IMPERIAL COLLEGE OF TROPICAL AGRICULTURE.

Incorporated by Royal Charter.

The Imperial College of Tropical Agriculture, St. Augustine, Trinidad :—*Chairman of the Governing Body :* Eric Macfadyen ; *Principal :* Odin Tom Faulkner, C.M.G., B.A. Dip.Agric. ; *Secretary :* Sir Algernon Aspinall, Kt., K.C.M.G., C.B.E., B.A., Barrister-at-Law ; *Registrar :* G. G. Gianetti, M.A., Dip.Agric. (Econ.) ; *Bursar :* G. R. Langdale, A.C.A.

PROFESSORS :—*Botany :* E. E. Cheesman, M.Sc., A.R.C.S. ; *Chemistry :* F. Hardy, M.A., Dip.Agr. ; *Agronomy :* E. Harrison, C.M.G., M.S.A., B.Sc., N.D.A. ; *Economics :* C. Y. Shephard, B.Sc. ; *Entomology :* A. M. Adamson, M.A., B.Sc., Ph.D.

READERS :—*Agriculture :* D. D. Paterson, B.Sc. ; *Sugar Technology :* J .G. Davies, Dip.Agric., A.I.C.T.A

COMMISSIONER OF AGRICULTURE :—*Temporarily vacant ;* ASSISTANT COMMISSIONER :—C. C. Skeete, B.A.

LECTURERS :—*Botany :* K. S. Dodds, B.Sc., Ph.D. ; *Chemistry :* E. C. Humphries, Ph.D., B.Sc., H. F. Birch, B.Sc., Ph. ; *Economics :* A. L. Jolly, M.Sc. ; *Entomology :* E. McC. Callan, B.Sc., A.R.C.S., D.I.C. ; *Mycology :* R. E. D. Baker, B.A., A.I.C.T.A. (in charge of department), S. H. Crowdy, B.Sc., A.R.C.S. ; *Sugar Technology :* R. D. E. Yearwood, Dip.Agric., A.I.C.T.A.

General Information:—The Imperial College of Tropical Agriculture was incorporated in September, 1921, as the outcome of recommendations made in their Report (Command Paper 562) by the Tropical Agricultural College Committee appointed by Viscount Milner in 1919. The object of the College is to promote the study of Tropical Agriculture in suitable surroundings and to create a body of British Expert Agriculturists well versed in the knowledge of the cultivation of land in the tropics, of chemists and of scientific advisers possessing an intimate knowledge of the means of combating pests and diseases and to conduct Research. The College Buildings are at St. Augustine, near St. Joseph, Trinidad, on land granted to the College by the Government of Trinidad and Tobago. The funds of the College are derived from contributions from Colonies and Industries participating in the movement and an Imperial Grant. The Imperial Department of Agriculture, founded in 1898, was amalgamated with the College on April 1st, 1922.

The Academic Year extends from October 1st to June 30th. The following courses and facilities for study are available:—

1. Post-Graduate Courses. Open to holders of a degree or diploma of any British University, University College, or other Academic Institution specifically approved by the Governing Body of the Imperial College of Tropical Agriculture. Special facilities are available for such graduates to extend their knowledge of, or undertake investigations into, subjects pertaining to tropical Agriculture.
2. Refresher Courses. Open to officers of Agricultural Departments in the Tropics or similar institutions. Details are arranged on application.
3. A Three Year Diploma Course, primarily intended to give instruction in West Indian Agriculture. Admission to it, therefore, is, save in exceptional circumstances, limited to students from the Caribbean area. As qualification for admission to this course the matriculation of any University within the British Empire or its recognised equivalent will be accepted.
4. A two-year course in Sugar Technology.

Tropical Veterinary Science is also an important branch of the College curriculum.

The tuition fees are as follows:—

(*a*) Post Graduate Course £75 per annum, or in the case of a Student from a foreign country £100 per annum.

(*b*) Refresher Course £75 per annum, or in the case of Students from Contributing Colonies £50 per annum.

(*c*) Sugar Course, £50 and £75 per annum, or in the case of Students from foreign countries £100 per annum.

(*d*) Diploma Course £50 per annum, or in the case of Students coming from foreign countries £100 per annum.

Further particulars regarding the College can be obtained from the Secretary, The Imperial College of Tropical Agriculture, Broadway Buildings, Westminster, W.1, or from the Chief Clerk and Registrar, St. Augustine, Trinidad, B.W.I.

LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE.

(University of London),

Incorporating the Ross Institute.

GOWER STREET, LONDON, W.C. 1.

Chairman of the Court of Governors:—Rt. Hon. Neville Chamberlain, P.C., M.P.

Dean:—Professor Sir Wilson Jameson, M.A., M.D., F.R.C.P., D.P.H.

Secretary:—G. R. Oake, B.A.

The London School of Hygiene and Tropical Medicine was constituted by Royal Charter in 1924 and took over the London School of Tropical Medicine on 1st August, 1924.

The Bureau of Hygiene and Tropical Diseases is accommodated in the building.

In addition to the departments concerned with the following subjects, Departments of Biochemistry, of Chemistry as applied to Hygiene, of Industrial Physiology, and Medical Industrial Psychology have been established.

PUBLIC HEALTH.

A course of study covering a period of nine calendar months is given for the Diploma in Public Health of the University of London beginning in October. Composition fee 54 guineas. Professor and Director of the Division: Sir Wilson Jameson, M.A., M.D., F.R.C.P., D.P.H.

Digitized by Google

Bacteriology and Immunology.

A course of study is given for the Diploma in Bacteriology of the University of London lasting for one academic year, beginning in October. Composition fee for the course £47 15 0. Professor and Director of the Division: W. W. C. Topley, M.A., M.D., F.R.C.P., F.R.S.

Epidemiology and Vital Statistics.

Special three-monthly courses are given in Epidemiology and Vital Statistics. Fee £7 7s. for three months. Professor and Director of the Division: M. Greenwood, D.Sc., F.R.C.P., F.R.S.

Medical Industrial Psychology.

Special courses by arrangement for the Academic Diploma in Psychology (Industrial). Professor Millais Culpin, M.D., F.R.C.S.

Tropical Medicine and Hygiene.

The course of study is divided into two parts—Part I (Clinical and Laboratory Instruction), lasting three months; and Part II (Tropical Hygiene, with continued clinical instruction) lasting two months. Fees: Part I £25; Part II £15.

In addition to medical officers in the Colonial Service the school is open to qualified medical practitioners of any nationality and of either sex. Other applicants may be admitted in special circumstances.

Facilities for clinical and pathological studies are afforded by the Seamen's Hospital Society, whose Hospital for Tropical Diseases is established at Endsleigh Gardens.

The school course is designed to equip students for the Diploma of the Conjoint Board of the Royal College of Physicians of London, and the Royal College of Surgeons of England (D.T.M. & H. Eng.). Tropical medicine has been admitted as a subject for the M.D. of London University, and the school curriculum is adapted to afford facilities to candidates desirous of taking the M.D. in this subject.

The Milner fund is available for financing research. In addition, the Wandsworth Scholarship of £350 per annum (with extra allowances for overseas work), the Honourable Edward John Stanley Memorial Fund of £50 p.a., the Mansfield Aders Fund, and the Langley Memorial Prize of £30, are in the gift of the School. The Avebury Memorial Fund provides a sum of about £80 a year for study and research in Entomology. The Andrew Balfour Memorial Fund provides two free places in Part II (Tropical Hygiene) of the course for the D.T.M. & H.

Professor of Helminthology and Director of the Department of Parasitology, R. T. Leiper, D.Sc., M.D., F.R.C.P., F.R.S.

Professor and Director of the Department of Entomology, P. A. Buxton, M.A., M.R.C.S., L.R.C.P.

Director of the Division of Clinical Tropical Medicine, P. H. Manson-Bahr, C.M.G., D.S.O., M.D., F.R.C.P.

Ross Institute of Tropical Hygiene.

Director: Sir Malcolm Watson, LL.D., M.D., C.M., D.P.H.

Deputy Director: G. C. Ramsay, C.I.E., O.B.E., K.I.H., M.D., D.T.M. & H.

Assistant Directors: G. Macdonald, M.D., Ch.B., D.P.H., D.T.M., R. Svensson, D.S.O., M.C., B.A., M.B., B.Ch., M.R.C.S., L.R.C.P.

Organising Secretary: Major H. Lockwood Stevens.

THE INCORPORATED LIVERPOOL SCHOOL OF TROPICAL MEDICINE.

The Liverpool School of Tropical Medicine was founded in 1899 by the late Sir Alfred Jones, K.C.M.G., President of the Liverpool Chamber of Commerce.

Objects of the School.—(1) To train medical men proceeding to the tropics in the special subjects of tropical diseases and tropical hygiene.

(2) To conduct original researches into tropical diseases.

(3) To organise prophylactic measures against tropical diseases.

Its foundation was the direct result of an appeal issued by Mr. J. Chamberlain, who was then Secretary of State for the Colonies, advocating the formation of a school, or schools, of tropical medicine.

The school has, from its foundation, been dependent on voluntary contributions for support, but it at once received valuable assistance from the Government, first in the form of official recognition of the curriculum, and later by grants from Colonial Governments and from the Tropical Diseases Research Fund. The latter ceased at the end of 1929.

The school has sent out to the tropics since 1899 forty-four Research Expeditions.

From 1902 to 1906 the school published Memoirs. A new series of Memoirs was begun in 1924: three memoirs have now been published. In 1907 the Annals of Tropical Medicine and Parasitology were founded, and have now reached their thirty-third volume.

Attached to the school is a Tropical Ward of ten beds at the Royal Infirmary, Liverpool, and four private wards for paying patients were opened in August, 1925.

Digitized by Google

The present buildings of the school, comprising a Lecture Theatre, Library, Museum, Laboratories etc., were opened in 1920.

In 1922, the Sir Alfred Lewis Jones Tropical Laboratory was opened at Freetown, Sierra Leone, a site having been placed at the disposal of the School by the Colonial Government and the War Office. The laboratory is a well-equipped two-storeyed building, and it is to be hoped that research workers will avail themselves of its facilities to study various problems of tropical medicine, as ample material will be at their disposal.

Patron, H.M. The King.

Chairman, The Viscount Leverhulme.

Hon. President, The Earl of Derby, K.G., G.C.V.O., G.C.B., LL.D.

Hon. Vice-Presidents, Sir H. J. Read, G.C.M.G., C.B., Sir Arthur F. Richards, K.C.M.G. *Committee*, Representatives of the University of Liverpool, and leading business men interested in the tropics.

The following is the staff :—

Alfred Jones Professor of Tropical Medicine, Warrington Yorke, M.D., F.R.C.P., F.R.S.

Dutton Memorial Professor of Entomology, R. M. Gordon, O.B.E., M.D., Sc.D., M.R.C.P., D.P.H.

Professor of Tropical Hygiene, D. B. Blacklock, M.D., D.P.H.

Professor of Tropical Diseases of Africa, T. H. Davey, M.D., D.T.M.

Lecturer in Charge of the Department of Parasitology, T. Southwell, D.Sc., Ph.D., F.R.S.E.

Assistant Lecturer in Entomology, D. S. Bertram, B.Sc.

Assistant Lecturer in Parasitology, F. Lake, M.B., Ch.B., D.T.M.

Lecturer in Tropical Medicine, A. R. D. Adams, M.D., D.T.M.

Honorary Assistant Lecturer in Veterinary Parasitology, G. O. Davies, D.V.Sc., M.R.C.V.S., D.V.H.

Lecturer in Tropical Surgery, R. E. Kelly, C.B., F.R.C.S.

Lecturer in Tropical Dermatology, R. Stopford-Taylor, D.S.O., M.B., Ch.B., F.R.C.S.E.

Lecturer in Tropical Ophthalmology, A. McKie Reid, M.C., M.B., Ch.B., F.R.C.S.

Lecturer in Practical Sanitation, W. M. Frazer, M.D., D.P.H.

Lecturer in Bacteriology, H. D. Wright, B.A., M.D., D.Sc., M.R.C.P.E.

Lecturer in Vital Statistics, C. O. Stallybrass, M.D., D.P.H.

Lecturer in Public Health Chemistry, W. H. Roberts, M.Sc., F.I.C.

Lecturer in Sanitary Engineering, R. G. Batson, A.K.C., M.Inst.C.E., M.I.Mech.E.

Librarian, G. Phillips, M.A.

Curator of Museum, Mary G. Blacklock, B.Sc., M.B., Ch.B., B.A.O., D.T.M.

Caton Memorial Fellow (vacant).

Medical Research Council Research Workers, E. M. Lourie, M.B., B.S., D.P.H., D.T.M. & H. ; J. Devine, B.Sc., Ph.D.

Junior Tropical Medical Research Fellows, Medical Research Council, J. L. Dales, M.B., Ch.B., D.T.M., S. G. Cowper, B.Sc., Ph.D., M.R.C.S., L.R.C.P., D.T.M., W. H. R. Lumsden, B.Sc., M.B., Ch.B.

ROYAL INFIRMARY, LIVERPOOL (TROPICAL WARDS).

Physician, Warrington Yorke, M.D., F.R.C.P., F.R.S.

Assistant Physician, A. R. D. Adams, M.D., D.T.M.

Consulting Surgeon, Robert Ernest Kelly, C.B., F.R.C.S.

Consulting Dermatologist, R. Stopford-Taylor, D.S.O., M.B., Ch.B., F.R.C.S.E.

Consulting Ophthalmologist: A. McKie Reid, M.C., M.B., Ch.B., F.R.C.S.

SIERRA LEONE RESEARCH LABORATORY.

Director, T. H. Davey, M.D., D.T.M.

Assistant, (vacant).

Leverhulme Research Fellow, A. J. Walker, M.D., C.M., D.T.M.

Junior Tropical Medical Research Fellow, Medical Research Council, G. B. Ludlam, M.B., Ch.B., D.T.M.&H.

Hon. Secretary's Office :—1, Old Hall Street, Liverpool, 3.

THE EMPIRE COTTON GROWING CORPORATION.

King's Buildings, Dean Stanley Street, S.W. 1.

This body was incorporated by Royal Charter in November, 1921, and was endowed with a fund of nearly £1,000,000, being half the Government's share of the surplus from the wartime control of Egyptian cotton. It derives further funds from a statutory levy on all cotton purchased by spinners in the United Kingdom. The levy from 1923-8 was at the rate of 6d. per bale of 500 lbs. It was then reduced to 3d. per bale and in 1930 to 1d. per bale, with the approval of the Board

Digitized by Google

of Trade. By the Cotton Industry Act, 1938, the levy is maintained at a maximum rate of 1d. for the next 5 years. The Corporation staffs and maintains Experiment Stations in several cotton-growing parts of the Empire, where such problems are investigated as the breeding of the varieties of cotton most suitable for each district, and the control of pests and diseases. It has made financial grants to Colonial Governments for the development of cotton growing, and has paid for supplementary agricultural officers until it has been found possible to absorb them on the regular establishments. By means of post-graduate Studentships it has provided for the further training of men to act as specialists and agricultural officers in the new cotton-growing countries, either in Government service or on the Corporation's staff. The Corporation also maintains a long-range Research Station in Trinidad, where fundamental problems relating to the genetics and physiology of the cotton plant are studied. It has also devoted considerable attention to the development of transport of all kinds in cotton-growing countries.

Secretary, L. G. Killby, King's Buildings, Dean Stanley Street, S.W. 1.

THE OVERSEAS NURSING ASSOCIATION.

The Colonial Nursing Association was founded in 1896 for providing fully trained nurses for private and hospital work in the Colonies, and amongst other British communities abroad, and to facilitate in any other way the work of nursing.

At the request of the Colonial Office the Association recommends nurses for government service.

Since its foundation, in 1896, it has supplied 3,735 nurses, of whom 2,616 have been recommended for Government work, 1,119 to private posts and Hospitals not under Government.

Patroness, H.R.H. The Princess Beatrice.
President, The Rt. Hon. the Earl of Athlone, K.G.
Vice-President, Brig.-Gen. Sir Samuel Wilson, G.C.M.G., K.C.B., K.B.E.
Hon. Vice-President, Lady Piggott.
Hon. Treasurer, Brig.-Gen. Sir Samuel Wilson, G.C.M.G., K.C.B., K.B.E.

Windward Islands, G. C. Grant, Grenada.
M. H. Swabey, St. Lucia.
Zanzibar, L. W. Raymond.

The Objects of the Society are defined by its Charter of Incorporation, which bears date the 26th September, 1882.

"It aims to promote the preservation of a permanent union between the Mother Country and the various parts of the Empire. It provides a place of meeting for British subjects connected with the Dominions, the Colonies, and India; for residents in this country who are in sympathy with the objects of the Society and wish to promote the interests of the Empire beyond the seas; for British subjects and persons of direct British parentage resident in foreign countries. It provides a Library containing the best unofficial collection in existence of publications relating to the Empire; a comprehensive Law Library: an Empire Newspaper Room, and Reading, Smoking, and Reception Rooms. It publishes a Monthly Journal, and offers opportunities for the reading of Papers and for holding discussions upon subjects of Imperial interest, and it undertakes literary, commercial, and statistical inquiries in connection with the Empire. Nothing in the Papers or discussions is permitted tending to give the Society a party character." (Rule 1.)

The Membership comprises:—

(*a*)	*Resident Fellows* (*i.e.* resident within 50 miles of London)				
	Entrance Fee	£3	3	0
	Annual Subscription	5	5	0
(*b*)	*Resident* (*Country*) *Fellows* (resident between 50 and 100 miles of London).			
	Entrance Fee	1	1	0
	Annual Subscription	3	3	0

Digitized by Google

(c) *Resident (Country) Fellows* (resident in Great Britain over 100 miles of London).

Entrance Fee	£1 1 0
Annual Subscription	2 2 0

(d) *Non-Resident Fellows* (resident outside Great Britain).

Entrance Fee	1 1 0
Annual Subscription	1 11 6

Reduced Subscriptions for second and each succeeding member of the same family residing together :— Class (*a*) £3 3*s*. 0*d*. (instead of £5 5*s*. 0*d*.). Class (*b*) £2 2*s*. 0*d*. (instead of £3 3*s*. 0*d*.).

Affiliated Members. Subjects of Foreign Powers who are either British born or are the children of British parents on both sides are eligible for election as Affiliated Members and pay the same fees as Fellows.

Associates. Annual Subscription .. £1 1 0

Associates (who must reside in Great Britain) receive the Society's Journal, may attend meetings and other fixtures arranged by the Society, but have not the privilege of using the Society's Headquarters.

Junior Section : Companions.	Annual Subscriptions.	Resident within 30 miles of London. £ s. d.	Resident over 30 miles of London. £ s. d.
Class I, Age 21-24		1 1 0	0 10 6
„ II, „ 18-20		0 10 6	0 5 0
„ III, „ 15-17		0 2 6	0 2 6
„ IV, „ under 15		0 1 0	0 1 0

Companions are given a Certificate and a Badge. Classes I and II may use the building at Headquarters with the exception of the sitting rooms : instead they have the exclusive use of the Wakefield and Meath Common Rooms. They receive *United Empire* and may attend all ordinary meetings and entertainments. They may also occupy bedrooms when not required by Fellows.

Classes III and IV are allowed to use the Meath Room, and may attend appropriate meetings and entertainments.

The New Headquarters of the Society, designed by Sir Herbert Baker, and erected on the old site in Northumberland Avenue, was opened by Their Majesties the King and Queen, then the Duke and Duchess of York, on November 12th, 1936. The Building, which is six storeys high, occupies an area of over 11,000 square feet. It contains an Assembly Hall accommodating over 450 people ; Dining and Luncheon Hall, Reading, Writing, Reception, Billiard and Smoking Rooms ; Ladies' Drawing Room ; Junior Section Rooms, and 55 bedrooms. The Society's famous Library of over 200,000 volumes relating to the history, government, trade, resources and development of the British Dominions is housed on the first floor, where there is also the Newspaper Room, containing over 1,000 newspapers, magazines and reviews from all quarters of the Empire.

The Full Privileges of Membership, which are enjoyed by Fellows only, include the use of the building of the Society and of its Branches, the receipt of the monthly Journal, *United Empire*, invitation to the Annual Reception, the right of attending the Annual Dinner and other meetings and functions and of taking part in the government of the Society.

Books may be borrowed—subject to the Library regulations—and the correspondence of Fellows may be addressed care of the Society, a permanent postal and telegraphic address being thus afforded.

The building is open throughout the week from 9.30 to midnight (Christmas Day, Boxing Day and Good Friday excepted) and on Sundays from 11 a.m. to 11 p.m. The Library is open on Weekdays from 10 a.m. to 8 p.m.

The annual meeting is held not later than the month of May ; ordinary meetings are held at 8.30 p.m. once a month from November to May, for the reading and discussion of papers. Fortnightly Luncheons are held in the Society's Dining Room, with a speech on Imperial Trade questions. Afternoon and evening meetings are frequently held in the Society's Building, and concerts, recitals, etc., are arranged, as is also a monthly House Dinner. The number of members in December, 1938, was 20,271.

Address of the Society—1, Elm Court, Temple, E.C.4.

Digitized by Google

The Society of Comparative Legislation was founded to promote a knowledge of the course of legislation in different countries, more particularly in the several parts of His Majesty's Dominions, and in the United States. For over forty years the Society has been engaged in presenting year by year in its Journal in a concise and orderly form a summary of the legislation of the British Empire, and the United States, together with a critical introduction and complete index. Ten years of the legislation of the British Empire—1898 to 1907—with a valuable introduction by Lord Rosebery have been collected in four large volumes under the title of "The Legislation of the Empire." Besides the review of legislation the Society publishes in its Journal articles upon a variety of topics, including international law. The subscription (payable to the Society's Bankers, Messrs. Child & Co., 1, Fleet Street, London), is one guinea, which entitles the subscriber to all Journals published during the year.

THE ROYAL AFRICAN SOCIETY.

Patron.

The Royal African Society, founded in memory of Mary Kingsley is non-political and has the following aims :—

To stimulate interest at home and abroad in African problems and conditions.

To keep in touch with those who are engaged in African affairs whether in administration, law, public health, trade, industry, agriculture or other scientific pursuits and assist them, in every practicable way to deal with the problems arising in their particular spheres of activity.

To investigate the institutions, customs, religions, antiquities, history and languages of the Native races of Africa.

To facilitate the commercial and industrial development of Africa in the manner best fitted to harmonise the progress of its inhabitants with the welfare of the rest of the world.

The Head Offices of the Society and its Library, from which Members are entitled to the free loan of books, are in London at the Imperial Institute, South Kensington.

Members are entitled to the use of the libraries of the following societies and institutions : The Imperial Institute, The Royal Empire Society, The Royal Geographical Society, The International Institute of African Languages and Cultures, The Royal Institute of International Affairs.

The Society's quarterly *Journal*, which is included in the annual subscription, holds a high place in current literature. In dealing with every aspect of African life and development it endeavours to encourage and facilitate the exchange of information ; and is designed not only to interest those living and working in Africa but also to foster the study of African affairs in all parts of the world. It is non-political ; and while seeking to maintain a scientific outlook, aims specially at keeping the human interest in the forefront.

Supplements to the *Journal* on subjects of special interest are published from time to time during the year.

At the Society's monthly dinners, held in the Royal Empire Society's headquarters (price 6*s*. per head) Members and their friends are addressed by persons entitled to speak with authority on African questions.

For Members resident in the United Kingdom the annual subscription is £1 10*s*. and for those residing in Africa or elsewhere £1. The Life Membership is £25, and £15 for those over 50 years of age.

Members of Public Schools, Universities, etc., may become Associate Members at a special subscription of 10*s*. per annum up to and including their 23rd year.

Members and Associates are entitled to attend and to introduce visitors to the dinners and social functions of the Society.

Forms of application for membership may be obtained from the Secretary.

CORONA CLUB.

The Corona Club was founded by Mr. Chamberlain in 1900 with the object of providing an annual opportunity for Officers on leave from the Colonies to meet socially with each other, the members of the Colonial Office, and retired officers of the Colonial Service.

In pursuance of this idea, an Annual Colonial Service Dinner is held, usually about the second or third week in June, under the presidency of the Secretary of State for the Colonies for the time being. The dinner concludes with a short speech by the Secretary of State, after which those present are enabled to move freely about and converse with the Secretary of State and with each other.

Membership of the Club is open to all past and present members of the Government service in the Colonies, Protectorates and Mandated Territories administered by the Colonial Office, and of the Colonial Office itself and the Office of the Crown Agents for the Colonies, irrespective of rank.

The annual subscription to the Club is 5*s*., which goes towards printing, clerical assistance and other necessary expenses, any balance being devoted to reduction of the cost of the dinner. A compounded payment of £2 2*s*. secures life membership of the Club.

Full particulars may be obtained from the Honorary Secretary, C. J. Jeffries, C.M.G., O.B.E., Colonial Office.

THE CEYLON ASSOCIATION IN LONDON.

President—A. C. Matthew.

Vice-President—H. W. Horner.

Secretary—A. G. Baynham, M.C.

The Association had its origin in the proposal of the Planters' Association of Ceylon to establish a branch in London, and was formed in 1888 for the purpose of acting, in correspondence with the public bodies in Ceylon, for the protection and furtherance of the general interests of that Colony.

All residents in the United Kingdom interested in Ceylon are invited to become members of the Association, the annual individual subscription being 1*l*. 1*s*., and in the case of Firms and Companies in proportion to interests represented.

The Offices at 11, Idol Lane, Eastcheap, E.C.3, where the Ceylon newspapers and other publications connected with the Colony are taken in, are daily open to members.

The affairs of the Association are managed by the Council.

The office-bearers and the Council are elected annually in general meeting.

Membership :—Companies and Agencies, 196; Private Members, 307.

11, Idol Lane, Eastcheap, E.C.3. Telephone—Mansion House 4110.

THE ASSOCIATION OF BRITISH MALAYA.

The Association of British Malaya was formed in May, 1920, and is composed of persons living and who have lived in the Malay Peninsula and who are connected with British Malaya by professional or commercial ties. Members must be British subjects. The Association absorbed the London membership of the Straits Settlements Association which had existed for many years.

Digitized by Google

The Objects of the Association are:—

To form a powerful body of opinion on all subjects of public interest in British Malaya and to represent that opinion wherever it is likely to carry most weight.

To support the best ideals and traditions of British Administration, both in the Straits Settlements and in the Malay States.

To support all sound proposals for the clear benefit of the Colony or the Malay States, whether they emanate from those charged with the Administration or otherwise.

To represent and, if possible, secure remedies for real grievances affecting considerable interests.

To keep in close touch with all interests in British Malaya, such as Tin Mining and the Smelting of Tin Ore, Rubber Planting and all other forms of Agriculture, Mercantile, Shipping and Banking interests, Legal opinion, Chinese affairs, the managements of all classes of labour, the welfare of the Malay population and questions of Health and Education.

To establish locally a corresponding Committee with an equal representation from the Colony and from the Malay States who shall advise on all questions that may arise in respect of any of the above interests and who shall keep the Association fully informed of all facts and arguments connected therewith.

President—Sir Arnold Robinson.

Secretary—Oliver Marks, C.M.G., Haymarket Court, 31, Haymarket, S.W. 1.

The West India Committee is an incorporated association of Planters, Merchants, and others interested in the British West Indies, British Guiana and British Honduras. The object of the West India Committee is to promote the general welfare of those Colonies, and by united action to further their interests. Only British subjects are eligible for membership.

The West India Committee, which represents Trinidad and Tobago as trade representatives in this country, also acts as the representative in Great Britain of various West Indian organisations, having for their object the welfare of their colonies, notably the Jamaica Tourist Trade Development Board and the Barbados Publicity Committee.

The annual subscription for membership is £1 5*s.* 0*d.* or $6 for individuals and £3 3*s.* 0*d.* for firms, companies and associations, which entitles the subscriber to receive *The West India Committee Circular*. Subscription for Life Membership, for individuals, is £15 15*s.* 0*d.* There is no entrance fee.

The West India Committee Rooms are conveniently situated upon the first floor at 14, Trinity Square, London, E.C.3, near Mark Lane Station upon the Metropolitan and District Railways, and form a useful rendezvous for ladies and gentlemen from the West Indies when they visit their merchants in the City. Writing materials are provided, and in addition to all Official Gazettes, Parliamentary Papers, etc., all the West Indian newspapers are, through the courtesy of their editors, filed. There is also a comprehensive West Indian Reference Library.

Solicitors—Messrs. Ralph Bond & Rutherford.
Auditors—Messrs. Layton-Bennett & Co.
Bankers—Messrs. Coutts & Co.
Headquarters—Over-Seas House, St. James's, London, S.W.1.
Telegrams—"Ovazeeleag, Piccy, London."
Telephone—Regent 5051.
Over-Seas House Annexe—Regent 7444.
Scottish Headquarters—100 Princes Street, Edinburgh.

Objects.

The Over-Seas League is a non-party society of British subjects residing in all parts of the world. Its underlying motive is to promote the unity of British subjects. Its four chief objects are:—

(1) To draw together in the bond of comradeship British subjects the world over.
(2) To render individual service to our Empire.
(3) To maintain the power of the Empire and to hold to its best traditions.
(4) To help one another.

Members' Creed.

Believing the British Empire to stand for justice, freedom, order and good government, we pledge ourselves, as citizens of the British Commonwealth of nations, to maintain the heritage handed down to us by our fathers.

The Over-Seas Club was founded on August 27th, 1910, and, in March, 1918, amalgamated with the Patriotic League of Britons Over-seas, a Society organised in 1914 for the purpose of enabling British residents in foreign countries to contribute their share towards the defence of the Empire. The Over-Seas Club was granted a Royal Charter of Incorporation in 1922 under the name of the Over-Seas League. The Headquarters of the Over-Seas League is situated in Vernon House, 3–5, Park Place, St. James's Street, S.W.1. and 16, Arlington Street; and is known collectively as Overseas House.

In addition to the headquarters offices, the premises consist of reading, writing and smoking rooms, dining room, lecture hall, banqueting hall, billiard room, card room, drawing room, ladies' rest room, information bureau, travel bureau and the usual amenities of a first-class club, including bedrooms available for members.

THE VICTORIA LEAGUE.

President—H.R.H. The Princess Alice, Countess of Athlone.
Vice-President—The Dowager Countess of Jersey, D.B.E.
Chairman—The Lady Harlech.
Vice-Chairman—Sir Frederic G. Kenyon, K.G.B.E., K.C.B.
Hon. Treasurer—Lt.-Col. F. C. C. Balfour, C.I.E., C.B.E., M.C.
Secretary—Miss G. Drayton, C.B.E.
London Headquarters: 81 Cromwell Road, S.W.7.

Aims and Work.

The Victoria League was founded in April 1901, as a non-party Association of British men and women, in memory of Her Majesty the late Queen Victoria, for the purpose of promoting closer union between British Subjects living in different parts of the world.

With this object in view, the League:—

1. Organises personal intercourse between individuals at home and individuals in the Dominions, Colonies and Dependencies, arranges mutual hospitality, and secures a welcome for British subjects throughout the Empire. Takes a particular interest in students coming to Great Britain from the Dominions and the Colonies.
2. Acts as a centre for the collection and distribution of information, spreads knowledge and interest with regard to places and conditions in the Empire by means of Lectures and by the Circulation of Books and Newspapers.
3. Carries out similar work amongst the rising generation by Picture Talks, Essay Competitions, and other means, and by promoting Correspondence between schools and individual children, at home and in the Dominions.

The League co-operates, for purposes in accordance with its aims, with other bodies of a similar character.

THE WEST INDIAN CLUB, LIMITED, 4, WHITEHALL COURT, S.W. 1.

Established in 1898. *Registered under the Companies Acts on May 11th*, 1898.

Assistant Hon. Secretary—G. J. Dent.
Hon. Treasurers—Alexander Elder and Harold L. Q. Henriques.
Bankers—Barclays Bank (Dominions, Colonial and Overseas) Ltd.

The Objects of the West Indian Club are:—

(1) To bring persons interested in the West Indies and British Guiana together, in order to promote the discussion and consideration of questions affecting those Colonies.

(2) To further the interests of the West Indies and British Guiana by providing headquarters for associated action, not political, but social.

(3) To afford facilities for organising, in connection with the West Indies and British Guiana, Cricket Matches and other kindred amusements recognised by our English Universities and Public Schools.

(4) The doing of all such other things as are incidental or conducive to the attainment of the above objects.

Rates of Subscription.

Members resident within a radius of 50 miles of London (Charing Cross) ...	£4	4	0
Members resident in the British Isles outside a radius of 50 miles of London ...	3	3	0

IMPERIAL CONFERENCE.

The Imperial Conference was constituted under the terms of the first resolution of the Colonial Conference of 1907, which ran as follows:—

"That it will be to the advantage of the Empire if a Conference, to be called the Imperial Conference, is held every four years, at which questions of common interest may be discussed and considered as between His Majesty's Government and His Governments of the self-governing Dominions beyond the seas. The Prime Minister of the United Kingdom will be *ex-officio* President, and the Prime Ministers of the self-governing Dominions *ex-officio* members, of the Conference. The Secretary of State for the Colonies will be an *ex-officio* member of the Conference and will take the chair in the absence of the President. He will arrange for such Imperial Conferences after communication with the Prime Ministers of the respective Dominions.

Such other Ministers as the respective Governments may appoint will also be members of the Conference—it being understood that, except by special permission of the Conference, each discussion will be conducted by not more than two representatives from each Government, and that each Government will have only one vote.

That it is desirable to establish a system by which the several Governments represented shall be kept informed during the periods between the Conferences in regard to matters which have been or may be subjects for discussion, by means of a permanent secretarial staff, charged, under the direction of the Secretary of State for the Colonies, with the duty of obtaining information for the use of the Conference, of attending to its resolutions, and of conducting correspondence on matters relating to its affairs.

That upon matters of importance requiring consultation between two or more Governments which cannot conveniently be postponed until the next Conference, or involving subjects of a minor character or such as call for detailed consideration, subsidiary Conferences should be held between representatives of the Governments concerned specially chosen for the purpose."

The following further resolution was passed at the Imperial War Conference, 1917:—

"That the Imperial War Conference desires to place on record its view that the resolution of the Imperial Conference of 20th April, 1907, should be modified to permit of India being fully represented at all future Imperial Conferences and that the necessary steps should be taken to secure the assent of the various Governments in order that the next Imperial Conference may be summoned and constituted accordingly."

This resolution was duly communicated to the Governments of the self-governing Dominions, all of which agreed to the proposal.

The Irish Free State, which was constituted as a self-governing Dominion in 1922, was first represented at the Imperial Conference of 1923.

Prior to the Conference of 1907 there were four Colonial Conferences (three in London and one in Ottawa). A brief account of these five Conferences follows :—

Conference of 1887. (*See* C. 5091.)

Invitations to the Conference of 1887 were addressed to the Governors of all the Colonies in view of the celebration of the Jubilee of the reign of Her Majesty Queen Victoria. All the then self-governing Colonies sent delegates, as well as Natal and Western Australia, and representative gentlemen from some of the larger Crown Colonies attended meetings at which matters of interest to these dependencies were discussed. The proceedings were opened on the 4th of April with an address from the President, Sir Henry Holland, afterwards Viscount Knutsford, in which he reviewed the progress of the Empire during Her Majesty's reign and indicated the object for which the Conference had been summoned. The most prominent question discussed was the organisation of Colonial Defence, and an agreement was arrived at for the increase of the Australasian Squadron. Five fast cruisers and two torpedo gunboats were to be added to the squadron, the Colonies paying, for maintenance and depreciation of these vessels, 126,000*l.* per annum for ten years. All the Colonial Legislatures passed the necessary legislation for giving effect to this arrangement, and vessels for service on the Australasian Station reached Australia in September, 1891. The defence of the stations of King George's Sound and Thursday Island were also fully discussed, but no final decision was arrived at. It was also agreed that an Imperial Officer should be selected to inspect the Colonial forces and military defences. Among the other questions which came before the Conference were the provision for the Government of British New Guinea, and it was agreed that Queensland, acting with New South Wales and Victoria, should contribute 15,000*l.* a year for ten years for this purpose, the Imperial Government undertaking to provide a suitable steamer and maintain it for three years at an estimated cost of 29,000*l.* Queensland passed the necessary legislation in 1887, and the proclamation of sovereignty over the territory took place on the 4th September, 1887.

A full interchange of views on the relations of the Australasian Colonies with the Islands in the Pacific took place between Her Majesty's Government and the Colonial delegates, and the Conference unanimously approved the position taken up with regard to Samoa, and also the proposal for a joint Anglo-French Naval Commission for the preservation of the neutrality of the New Hebrides.

Among other questions discussed were the Australian and Pacific Mail services, telegraphic communication with Australia, the proposal for an Imperial Penny Post, the adoption of similar legislation with regard to merchandise marks and patents, and the enforcement of Colonial judgments and Orders in Bankruptcy.

In pursuance of the arrangement as to the inspection of the local forces of Australasia referred to above, Major-Gen. Sir Bevan Edwards, K.C.M.G., C.B., visited all the principal Colonies during 1890, and inspected their forces and defences. One result of his report was that it showed the importance of a closer union of the Australasian Colonies, and at the instance of Sir H. Parkes, the Premier of New South Wales, an Inter-colonial Conference was held in Melbourne during 1890, to consider the question of Federation. The result of its proceedings and also of the proceedings of the Federation Convention which followed will be found in the account of Australia. A Conference of Australasian Prime Ministers was held at Hobart in 1895 to discuss the question, and measures were passed by all the Colonies except Queensland for the election of delegates (ten from each Colony) to draft a Constitution Act. The delegates were elected in February, 1897, and prepared the basis of a constitution. The later developments are described under the heading "Australia."

Digitized by Google

During 1894 a Colonial Conference was held at Ottawa, on the invitation of the Dominion Government, to consider the question of trade and communications between the Colonies, and between the Colonies and the Mother Country. Delegates attended from New South Wales, Victoria, Queensland, South Australia, Tasmania and New Zealand and from the Cape Colony, and resolutions were passed urging the removal of legislative or treaty obstacles to preferential tariff treatment within the Empire, the establishment of a mail service between Great Britain and Australasia, *via* Canada, and the connection of Canada and Australasia by a cable under British control. A Committee of representatives of the Imperial and Colonial Governments was appointed in 1896 to consider the question of this cable, and eventually the execution of the project was decided on and a Board constituted to manage the undertaking. The work of laying was commenced in 1902.

Conference of 1894. (*See* C. 7553.)

The distinguishing event of the year 1897 was the celebration of the completion of the sixtieth year of the reign of Queen Victoria. Early in the year invitations were addressed to the Prime Ministers of all the self-governing Colonies to attend the celebration in London as guests of the Queen. The Prime Ministers, eleven in number, accepted and attended. Advantage was taken of their presence to hold a conference between them and the Secretary of State for the discussion of various questions of common interest. The proceedings were private, but a summary was presented to Parliament (C. 8596, July, 1897), in which were published the opening address by Mr. Chamberlain, setting forth the subjects of discussion, a short statement by Mr. Goschen on the question of naval defence, with special reference to the Australian naval agreement, and the resolutions arrived at by the Conference. It was generally agreed that the meeting had been most conducive to the interests of the Empire, and that it would be well to hold similar meetings in the future when occasion offered. As a result of a resolution passed at the Conference the existing commercial treaties with Germany and Belgium were denounced on the 30th of July, in order that the fiscal relations between the Mother Country and the Colonies might be completely independent of fiscal relations with foreign countries. This question had been brought prominently to the front by a Tariff Act passed in Canada, giving preferential treatment to the Mother Country, and the resolution was passed unanimously by the Conference largely in consequence of the urgent request of the Dominion Government. The matter of Imperial defence received much attention, and an offer was made by Sir J. Gordon Sprigg, on behalf of Cape Colony, to present a first-class battleship as a contribution to the British navy—for which a contribution in money was afterwards substituted.

Conference of 1897. (*See* C. 8596.)

Advantage was taken of the presence in London of the Prime Ministers of the self-governing Colonies in connection with the Coronation of King Edward VII, in 1902, to discuss with them various important questions of general interest, especially the political and commercial relations of the Empire and its naval and military defence. In the result a very considerable improvement was arranged, subject to the approval of the Parliaments concerned, in the terms of the Australasian Naval Agreement, by which the effectiveness of the squadron to which it related, as part of the naval force of the Empire, was to be greatly increased, and the amount of the Colonial contribution towards the maintenance of the squadron raised from 126,000*l.* a year to 240,000*l.* The Premiers of Cape Colony and Natal intimated their desire to increase their unconditional contributions to the Navy from 30,000*l.* and 12,000*l.* to 50,000*l.* and 35,000*l.* respectively. Newfoundland agreed to contribute 3,000*l.* a year towards the expense of a branch of the Royal Navy Reserve established in the Colony, on the condition that the number should be raised to 600 men. Various resolutions were passed respecting commercial relations.

Conference of 1902. (*See* Cd. 1299.)

Digitized by Google

The last Colonial Conference (thereafter to be designated the Imperial Conference) was held in 1907, in which the Prime Ministers of all the self-governing Colonies took part, including the Transvaal, where the first elections under responsible government had just taken place. At the opening meeting, on April 15th, Sir Henry Campbell-Bannerman welcomed the Colonial representatives on behalf of His Majesty's Government in the United Kingdom. The primary subject for consideration was that of the future Constitution of the Conference, raised by Mr. Lyttelton's despatch of 20th April, 1905, proposing the establishment of an Imperial Council. The resolution adopted (which is quoted above) provided for the meeting of an Imperial Conference every four years between His Majesty's Government and the Governments of the self-governing Dominions beyond the Seas, with the Prime Minister of the United Kingdom as *ex-officio* President, the Secretary of State for the Colonies taking the chair in his absence; and also provided that a permanent secretarial staff should attend to the business of the Conference during the period between its meetings. In the course of discussion Lord Elgin undertook so to alter the organisation of the Colonial Office that there should be a separate division dealing with the self-governing Dominions. The manner in which this undertaking was carried out by him is explained in his despatch of 21st Sept., 1907 (Cd. 3795).

Conference of 1907.
(*See* Cd. 3523.)

The Conference affirmed the need of developing a General Staff, selected from the forces of the Empire as a whole, to study military science in all its branches. With regard to naval defence, Australia indicated a desire to make provision for a local force, diverting to its service the subsidy paid to the Admiralty under the Naval Agreement.

The members of the Conference, with exception of His Majesty's Government in the United Kingdom, re-affirmed the resolutions of the Conference of 1902 on the subject of Preferential Trade within the Empire, His Majesty's Government being unable to admit that it was necessary or expedient to alter the fiscal system of the United Kingdom.

Among other subjects brought before the Conference were the improvement of mail communication with Australia, *viâ* Canada, the promotion of emigration to British Colonies, the adoption of uniform conditions of naturalisation throughout the Empire, uniformity in Company law, in trade statistics and in trade marks and patents, and the codification of the rules governing appeals to the Judicial Committee of the Privy Council.

In consequence of the Parliamentary discussions concerning the naval position which took place in March, 1909, the offers of "Dreadnoughts" from New Zealand and Australia, and the Resolution passed by the Canadian House of Commons on the 29th March, His Majesty's Government decided to convene a special conference to discuss Naval and Military Defence, under the terms of Resolution I. of the Conference of 1907. The Conference, at which all the then self-governing Dominions were represented, met for the first time on the 28th July, 1909, and for the last on the 19th August. The main results of the Conference were as follows:—

Defence Conference, 1909.
(*See* Cd. 4948.)

(1.) The offers of New Zealand and of Australia to contribute a battleship each were accepted, with the substitution of cruisers of the new "Indomitable" type for battleships. The two ships were to be kept one on the China and the other on the Australian Station.

(2.) Australia was to provide and maintain, with some temporary assistance from Imperial funds, an Australian unit of a general Pacific Fleet. The unit was to consist of a cruiser of the "Indomitable" type, three second-class cruisers of the "Bristol" type, six destroyers of the "River" class, and three submarines of "C" class.

Digitized by Google

(3.) Canada was to make a start with cruisers of the "Bristol" class and destroyers of an improved "River" class.

(4.) New Zealand was to continue her policy of a money contribution to be spent on the China unit of the Pacific Fleet. The cruiser of the "Indomitable" type given by New Zealand was to be the flagship of this unit.

(5.) In regard to military defence, a plan was drawn up in outline for so organizing the forces of the Crown, wherever they might be, that they might be capable of being rapidly combined into one homogeneous Imperial army.

The South African delegates were not, of course, in a position to submit or approve any definite proposals as the Union of South Africa was then in process of establishment.

In accordance with the agreement arrived at at the Defence Conference, the Commonwealth of Australia placed orders through the Admiralty for the Second Class Cruisers required; Canada purchased the "Rainbow" and "Niobe"; orders were placed for the cruiser to be given by New Zealand, and in Canada and Australia Naval Defence Acts were passed, under which the Naval Defence Forces are governed by principles similar to those in force in the Imperial Navy.

Copyright Conference, 1910.
(*See* Cd. 5272.)

In 1910 a Subsidiary Imperial Conference was convened to consider the subject of Imperial copyright. The Conference was held in May and June, and discussed fully the questions of the maintenance of the unity of copyright legislation throughout the Empire, and the desirability of the Empire accepting the Revised Copyright Convention of Berlin (1908). The Governments of all the Dominions were represented, and resolutions were passed in favour of the adoption of a uniform copyright law for the Empire, and in favour of the acceptance of the Revised Copyright Convention, subject to certain reservations. In accordance with the resolutions of the Conference an Imperial Copyright Act was passed in 1911. Legislation adopting its provisions was passed by the Commonwealth of Australia and Newfoundland in 1912, and by the Union of South Africa in 1916, and an Act, based on the Imperial Act, was passed in New Zealand in 1913. Legislation on the subject of copyright was also passed in Canada in 1921 and 1923, and came into effect on 1st January 1924.

Action on Resolutions of 1907 Conference.

Steps were taken in accordance with the fifth resolution of the Conference of 1907 to pass new Orders in Council respecting appeals from the Supreme Courts of New Zealand, the six Australian States, the provinces of Nova Scotia, New Brunswick, Prince Edward Island, Manitoba, British Columbia, Alberta and Saskatchewan, while Orders in Council respecting procedure were passed in respect of the Commonwealth of Australia, and the Union of South Africa. In accordance with the wishes of the Conference, steps were taken for the appointment of Trade Commissioners in the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand and the Union of South Africa, and a paid correspondent of the Board of Trade was appointed in Newfoundland. These officers perform with regard to matters of trade much the same functions as are performed by His Majesty's consuls in foreign countries.

Steps were taken to secure greater uniformity in the laws of the Dominions with regard to trade marks and patents. Moreover, the trade statistics of the Dominions were modified with a view to showing more clearly the trade with the United Kingdom, British possessions, and foreign countries.

Uniformity in company law was, in part, effected by legislation in the Transvaal in 1909, in Victoria in 1910, and in British Columbia. Moreover, the legislation of the Parliament at Westminster was consolidated in 1908.

Digitized by Google

Correspondence relating to Conference Work from May, 1907 to July, 1910, was published in Cd. 5273.

Imperial Conference, 1911.
(*See* Cd. 5745.)

In accordance with the Resolution of the Conference of 1907, the first Conference which was officially styled "Imperial" was held in May and June, 1911. The Prime Minister of the United Kingdom presided, the chair being taken in his absence by the Secretary of State for the Colonies, and, on one occasion, by the Prime Minister of Canada. The Prime Ministers of all the Dominions were present, besides two other Ministers from Canada, Australia and the Union of South Africa, one other Minister from New Zealand and one from Newfoundland. The question of the constitution of the Conference and the reconstruction of the Colonial Office was considered at length, but a majority of the representatives were of opinion that no fundamental change was necessary.

The Conference also considered the question how far the Dominion Governments could be consulted with regard to Treaties, with special reference to the fact that the Declaration of London of 1908 was not submitted to the Dominions for approval before it was concluded. The representatives of His Majesty's Government in the United Kingdom proposed, and the representatives of the Dominions agreed, that in future the Dominions should be afforded an opportunity of consultation when the instructions to be given to British delegates at meetings at the Hague Conference were being framed, that Conventions affecting the Dominions provisionally assented to at that Conference should be circulated to the Dominion Governments before they were officially signed, and that a similar procedure, where time and opportunity and subject matter permitted, should, as far as possible, be used when preparing instructions for the negotiation of other international agreements affecting the Dominions. It was also agreed that, with a view to relieving the Dominions of obligations under "most favoured nation" clauses in Treaties concluded years ago and binding on the Dominions, His Majesty's Government should open negotiations with several foreign Governments having such Treaties with a view to securing liberty of any Dominion to withdraw from the operation of the Treaty without impairing the Treaty as respecting the rest of the Empire.

The question of an Imperial Court of Appeal was discussed at length, and it was proposed, and accepted that two Lords of Appeal should be added to the number of four already existing so that their services might be available both for service in the House of Lords and for service on the Judicial Committee.

The question of emigration to the Dominions also came up. The President of the Local Government Board showed that the numbers then emigrating were fully as large as could safely be spared by the United Kingdom. It was agreed that the present policy of encouraging British emigrants to proceed to British Dominions rather than to foreign countries should be continued and that full co-operation should be accorded to any Dominion desiring immigrants.

The discussion of the question of Naturalisation resulted in an Agreement on the main principles on which Naturalisation in one of the Dominions should be recognised in other parts of the Empire.

The question of improved Cable communications was considered and the Postmaster General of the United Kingdom was able to announce the prospect of important reductions from January 1st, 1912, in rates for deferred messages and in Press Cables. It was also agreed that a chain of Wireless Telegraph Stations should be constructed from the United Kingdom, *via* Cyprus, Aden, Bombay and Singapore, to some point in Australia from which there would be communication over the land

Digitized by Google

lines to other parts of Australia, and from Australia both by cable and by wireless telegraphy to New Zealand. It was also agreed that the Pacific Cable Board should be authorised to lay a cable between Australia and New Zealand. The Governments of Canada and Australia undertook to consider favourably the extension of the Imperial Postal Order system and a resolution in favour of the lowering of the postal rates generally was agreed to.

In order to render possible further co-operation in commercial relations it was agreed that a Royal Commission should be appointed representing the Home and Dominion Governments with a view to investigating and reporting upon the natural resources of each part of the Empire represented at the Conference, the development attained and attainable, the facilities for production, manufacture and distribution, the trade of each part with the others and with the outside world, the food and raw material requirements of each and the sources thereof available, the extent, if any, to which the trade between each of the different parts had been affected by existing legislation in each, either beneficially or otherwise, and the methods by which, consistently with the existing fiscal policy of each part, the trade of each part with the others might be improved and extended.

It was agreed that all practical steps should be taken to secure uniformity of treatment of British shipping, to prevent unfair competition with British ships by foreign subsidized ships, to secure to British ships equal trading advantages with foreign ships, to promote the employment of British seamen on British ships, and to raise the status and improve the conditions of seamen employed on such ships. Proposals were made by the Dominion of New Zealand with the support of the Dominion of Canada for the grant of wider legislative powers in respect of shipping to the Oversea Dominions, but the Resolution was not accepted by the Governments of the United Kingdom, the Commonwealth of Australia, the Union of South Africa and Newfoundland.

In connection with the question of Merchant Shipping a discussion took place as to the treatment of British Indians in the Self-Governing Dominions. The Secretary of State for India (Lord Crewe) made a statement in which he pointed out that, while it was the undoubted right of the Self-Governing Dominions to determine in what manner their communities should be composed, and therefore to restrict in such way as they thought fit Indian immigration, it was important that this should be done in a way compatible with the comity due to the Indian people, and that in all cases in which Indians were permitted to enter the Dominions or were domiciled therein due respect should be paid to their rights.

The principles laid down by Lord Crewe were accepted by the representatives of the Dominion Governments.

It was agreed to consider how far it was possible to make arrangements with a view to the enforcement in one part of the Empire of Judgments and Orders of the Courts of Justice in another part. Resolutions were also passed in favour of uniformity in the law of copyright, patents, trade-marks, companies and workmen's compensation. The questions of provision for deserted wives and children, the celebration of His Majesty's Birthday, and the Suez Canal Dues were discussed, and it was agreed that concerted action should be taken by all the Governments of the Empire to promote better trade and postal communications between the United Kingdom and the Oversea Dominions, and in particular to discourage shipping conferences or combines in so far as the operations of such conferences were prejudicial to trade.

Before separating the Conference agreed that it was desirable that between Conferences there should be interchange of visits between Ministers of the United Kingdom

Digitized by Google

and Ministers of the Dominions and that His Majesty's Government in the United Kingdom should take into consideration the possibility of holding a meeting of the Conference, or a subsidiary Conference, in one of the Oversea Dominions.

Action on Resolutions of 1911 Conference.

After the termination of the Conference of 1911, agreements were made with the Governments of Sweden, Norway, Denmark, France, Costa Rica, and Colombia, authorising His Majesty's Government to terminate on twelve months notice the application of the Commercial Treaties with those Powers with regard to all or any of the self-governing Dominions. Similar power was obtained in the case of the Commercial Treaty with Switzerland. An Act was passed by the Parliament at Westminster to add two Lords of Appeal, available for service in the House of Lords and on the Judicial Committee, and to increase to seven the number of Judges of the Courts of the Oversea Dominions who may be members of the Judicial Committee. The Bill on Naturalization, which it was proposed to introduce into the Imperial Parliament, was re-drafted in accordance with the views of the Imperial Conference, and passed into law under the title of the "British Nationality and Status of Aliens Act, 1914." Legislation has been also passed in Canada and Newfoundland with effect from 1915, in Australia with effect from 1921, in South Africa with effect from 1926, and in New Zealand in 1928. Legislation was passed providing for the laying of the cable by the Pacific Cable Board between Australia and New Zealand, and the work was successfully carried out. Reductions were made in cable rates between the United Kingdom and the Oversea Dominions (including the establishment of week-end telegrams in addition to deferred rates).

A Royal Commission, under the Chairmanship of Lord D'Abernon, and including representatives of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, and Newfoundland, was appointed to investigate and report upon the natural resources and trade of the Empire.

The Commissioners took evidence in London on several occasions, and also visited New Zealand, Australia, the Union of South Africa, Newfoundland, the Maritime Provinces of Canada, and Central and Western Canada. They submitted, in all, 15 volumes of minutes of evidence, three statistical volumes (dealing respectively with the Food and Raw Material Requirements of the United Kingdom, the Trade Statistics and Trade of the Dominions, and the Chief Harbours of the British Empire and Foreign Countries), five Interim Reports, and a Final Report [Cd. 8462]. The enquiry was delayed by the outbreak of war and was only completed in the early part of 1917. The Reports deal mainly with the following subjects :—Conservation and development of Natural Resources, Scientific Research, Migration, Oversea Communications (including Harbour Development and Telegraph and Wireless Services), Unification of Legislation, and the creation of an Imperial Development Board.

Defence.

Contemporaneously with the meetings of the Imperial Conference in 1911, conferences took place between the Admiralty and representatives of the Dominion of Canada and the Commonwealth of Australia. The result of these conferences was laid before, and approved by, the Imperial Conference. An agreement was made as to the control of the naval services and forces of the Dominions of Canada and Australia, the limits of the naval stations to be allotted to them, and the mode of procedure to be adopted when vessels of the Dominion navies proceeded beyond the limits of their respective stations, whether to ports of the British Empire or to foreign ports. Military defence was discussed at a Committee of the Imperial Conference on the 14th and 17th of June, and the proceedings of that Committee were laid before, and approved by, the Imperial Conference (Cd. 5746-2). The two battle cruisers of the

Digitized by Google

"Indomitable" type, H.M.A.S. "Australia" and H.M.S. "New Zealand," and also two cruisers of the "Bristol" type, H.M.A.S. "Melbourne" and H.M.A.S. "Sydney," constructed as a result of the Conference of 1909, were completed and in commission during the Great War. The "Brisbane" was constructed in the Government Dock, Sydney, and launched on 30th September, 1915

On the 10th December, 1912, the Secretary of State for the Colonies addressed a despatch to the Governors-General of Australia and the Union of South Africa and to the Governors of New Zealand and Newfoundland, on the subject of the representation of the Dominions on the Committee of Imperial Defence. This despatch communicated the text of resolutions which had been adopted on May 30th, 1911, at a meeting of the Committee of Imperial Defence and which were to the effect that one or more representatives appointed by the respective governments of the Dominions should be invited to attend meetings of the Committee of Imperial Defence when questions of naval and military defence affecting the oversea Dominions were under consideration, and that the proposal that a Defence Committee should be established in each Dominion was accepted in principle. It was stated that, the Canadian Government having changed in the Autumn of 1911, it was necessary to put the proposals before Mr. (afterwards Sir R.) Borden and his colleagues when they visited London in 1912, and that Mr. Borden had provisionally accepted the resolutions and had stated that he saw no difficulty in a Minister of the Dominion Government spending some months of every year in London in order to carry out the intention. Mr. Borden had also expressed the desire that the Canadian and other Dominion Ministers who might be in London as members of the Committee of Imperial Defence should receive in confidence knowledge of the policy and proceedings of the Imperial Government in foreign and other affairs. It had been pointed out to Mr. Borden that the Committee of Imperial Defence was a purely advisory body and could not become a body deciding on policy which must remain the sole prerogative of the Cabinet, subject to the support of the House of Commons. But any Dominion Minister resident in the United Kingdom would at all times have free and full access to the Prime Minister and the Secretaries of State for Foreign and Colonial Affairs for information on all questions of Imperial policy. From Mr. Borden's speech in introducing the Canadian Naval Bill, it appeared that he accepted the proposals, and the same offer was open to all the other self-governing Dominions if they wished to adopt it, but it could be varied in the case of each or any Dominion to suit their wishes or the special circumstances of their case. (This despatch and subsequent correspondence were published in Parliamentary Paper Cd. 7347.)

In June, 1914, the Hon. G. H. Perley (afterwards Sir George Perley), a Minister without portfolio of the Canadian Government, came to reside in London as the representative of that Government, and was from time to time summoned to meetings of the Committee of Imperial Defence.

1914-16.

After the Great War had broken out, it was assumed by His Majesty's Government in the United Kingdom that it would not be convenient that the normal Imperial Conference should meet on its due date in May, 1915, and after communications had taken place with the Prime Ministers of the Dominions in the course of December, 1914, it was definitely decided by general agreement to postpone the Conference. In intimating its postponement to the Dominions, the Secretary of State for the Colonies at the same time informed the Prime Ministers that it was the intention of His Majesty's Government to consult them most fully, and if possible personally, when the time arrived to discuss possible terms of peace.

Up to the end of 1916 every opportunity was taken of confidential consultation and discussion with the Prime Ministers and other Ministers of the self-governing Dominions on matters connected with the progress of the war. Thus the Prime

Digitized by Google

Minister of Canada (Sir R. Borden) in 1915, and the Prime Ministers of the Commonwealth of Australia and New Zealand (Mr. Hughes and Mr. Massey) as well as Sir J. Ward (New Zealand) in 1916, attended meetings of the Cabinet in London during their stay in the United Kingdom, and Mr. Hughes and Sir G. E. Foster (Canadian Minister of Trade and Commerce) were two of the delegates of His Majesty's Government at the Paris Economic Conference in June, 1916.

When Mr. Lloyd George assumed office as Prime Minister in December, 1916, he announced, in the course of his speech in the House of Commons on December 19th, that it was proposed to summon an Imperial Conference at an early date in order to place the whole position before the Dominions and to take counsel with them as to the best means of securing an early and complete triumph. To this Conference representatives of India as well as of all the then self-governing Dominions were invited. All were able to attend with the exception of representatives of Australia, who were prevented from being present by the approach of a general election.

Imperial War Cabinet, 1917 Session.

It was arranged that the meetings should take two forms. In the first place the oversea representatives were made temporarily members of the War Cabinet, which thus became, for the time being, an Imperial War Cabinet, an event subsequently described by Mr. Lloyd George as a "memorable landmark in the constitutional history of the British Empire." Whilst the Imperial War Cabinet was in session the oversea members had access to all the information which was at the disposal of His Majesty's Government in the United Kingdom and occupied a status of absolute equality with that of the members of the War Cabinet. It had prolonged discussions on all the most vital aspects of Imperial Policy. Its conclusions were necessarily secret, but it was announced that important decisions were reached which would be of the greatest value not only in the prosecution of the war but also when the time came for negotiations for peace.

At the conclusion of its sittings the Prime Minister of the United Kingdom announced that the Imperial War Cabinet was unanimous that the new procedure had been of such service, not only to its members but to the Empire, that it ought not to be allowed to fall into desuetude. Accordingly he proposed, on behalf of His Majesty's Government, that meetings of an Imperial Cabinet should be held annually, or at any intermediate time when matters of urgent Imperial concern required to be settled, and that the Imperial Cabinet should consist of the Prime Minister of the United Kingdom, and such of his colleagues as deal specially with Imperial Affairs, of the Prime Ministers of each of the Dominions or some specially accredited alternate possessed of equal authority, and of a representative of the Indian people to be appointed by the Government of India. He hoped that the holding of an annual Imperial Cabinet would become an accepted convention of the British Constitution.

From the time of the meetings of the Imperial War Cabinet 1917, full confidential information with regard to the progress of the War was communicated by the Prime Minister of the United Kingdom to the Prime Ministers of the Dominions. In the following year information with regard to foreign affairs began to be regularly communicated in a similar manner.

Imperial War Conference, 1917.
(*See* Cd. 8566.)

Concurrently with the sittings of the Imperial War Cabinet, there was held an Imperial War Conference presided over by the Secretary of State for the Colonies, the special work of which was, to use the terms of an address which it presented to His Majesty the King, "to consider the steps that may be required to ensure that the fruits of victory may not be lost by unpreparedness in times of peace, and so to develop the resources of the Empire that it may not be possible hereafter for an unscrupulous enemy to repeat his outrages upon liberty and civilization." Much of the business of the Conference was necessarily of a highly confidential

Digitized by Google

character, but it was found possible to publish, soon after it terminated, the majority of the Resolutions passed, and a part of the discussions.

Reference can only be made here to one or two of the most important of the Resolutions.

One (No. XXI) asserted the principle "that each part of the Empire, having due regard to the interests of our Allies, shall give specially favourable treatment and facilities to the produce and manufactures of other parts of the Empire."

Another Resolution (No. IX) dealt with the future constitution of the Empire and placed on record the view of the Conference that "any readjustment of constitutional relations, while thoroughly preserving all existing powers of self-government and complete control of domestic affairs, should be based upon a full recognition of the Dominions as autonomous nations of an Imperial Commonwealth, and of India as an important portion of the same, should recognise the right of the Dominions and India to an adequate voice in foreign policy and in foreign relations, and should provide effective arrangements for continuous consultation in all important matters of common Imperial concern, and for such necessary concerted action, founded on consultation, as the several Governments may determine."

It was felt, however, that the subject was too intricate and important a one to be dealt with during the war, and the Resolution accordingly laid down that it should be the subject of a special Imperial Conference to be summoned as soon as possible after the cessation of hostilities.

Other of the published Resolutions dealt with the development of the material Resources of the Empire and their utilization for Imperial purposes. Of these one in particular (No. XIII) deserves notice. This advocated the establishment in London of an Imperial Mineral Resources Bureau to be specially concerned with the Mineral Resources and metal requirements of the Empire.

Of the Resolutions affecting India one (No. VII) dealt with its status as a partner State in the Empire, and recommended the full representation of India at all future Imperial Conferences, and another (No. XXII) accepted the principle of reciprocity of treatment between India and the self-governing Dominions.

Mention may be made also of two Resolutions (Nos. VIII and XII) which have resulted in the establishment of a permanent Imperial War Graves Commission, on which all parts of the Empire are represented. The object of this Commission is to care in perpetuity for the graves of those who have fallen in the common cause of the Empire.

Lastly, a Resolution was passed (No. XV) urging that the system of Double Income Taxation within the Empire should be reviewed as soon as possible after the conclusion of the War.

Imperial War Cabinet 1918 Session.

In the summer of 1918, meetings of the Imperial War Cabinet and Imperial War Conference were again held. The meetings were on this occasion completely representative for the first time of all parts of the Empire since members from Australia were present as well as Ministers from all the other self-governing Dominions, whilst India was also fully represented.

The Imperial War Cabinet was in session from the beginning of June to the middle of August, 1918. In a communique issued at the termination of the meetings it was announced that every aspect of policy affecting the conduct of the war and the question of peace had been examined.

It was further stated that the meetings had proved of such value that the Imperial War Cabinet had thought it essential that certain modifications should be made in the existing channels of communication so as to make consultations between the different Governments of the Empire as continuous and intimate as possible. It had therefore been

Digitized by Google

decided that, for the future, the Prime Ministers of the Dominions, as members of the Imperial War Cabinet, should have the right to communicate on matters of Cabinet importance direct with the Prime Minister of the United Kingdom whenever they saw fit to do so. It had also been decided that each Dominion should have the right to nominate a visiting or a resident Minister in London to be a member of the Imperial War Cabinet at meetings other than those attended by the Prime Ministers, and that these meetings would be held at regular intervals, arrangements being made also for the representation of India.

The Imperial War Conference in 1918, as in 1917, was held under the chairmanship of the Secretary of State for the Colonies.

Imperial War Conference, 1918.
(*See* Cd. 9177).

As in the previous year, the greater part of its deliberations was of a confidential nature, but it was found possible to publish a certain part of the discussions, and the great majority of the Resolutions passed.

Of these Resolutions, the most important (Nos. III, IV and XXIII) dealt with the future economic policy of the Empire with regard to raw materials. It was agreed that it was necessary to secure for the British Empire and the belligerent Allies the command of certain essential raw materials in order to enable them to repair the effects of the war as soon as possible and to safeguard their industrial requirements. The opinion was expressed that the Governments of the British Empire should make such arrangements amongst themselves as would ensure that essential raw materials produced within the Empire should be available for the purposes described, and should arrange with the Allied countries to utilize for the same purposes essential raw materials produced in those countries.

Other economic matters dealt with by Resolutions of the Conference were the non-ferrous metal industry (No. II), petroleum (No XVIII), dyes (No. X), the creation of an Imperial Mineral Resources Bureau (No. XVI), a matter already considered at the 1917 Conference, and post-war supervision of shipping (Nos. XI and XXIV).

As to the latter, the Resolutions passed were to the effect that the Conference accepted in principle the establishment of an Imperial Investigation Board to review shipping on the principal routes, to enquire into and report on all matters connected with ocean freights and facilities, and to consider the development and improvement of the sea communications between the different parts of the Empire with particular reference to the size and type of ships and the capacities of harbours.

The question of communications within the Empire other than shipping also engaged the attention of the Conference, and Resolutions were passed dealing with an Imperial News Service (No. IX), Cable Communications (No. XIV), and Inter-Imperial Parcels Delivery (No. XII). Of these the first stated that the Conference was impressed with the importance of securing an adequate News Service, supplied from British sources to be available in all parts of the Empire, and requested His Majesty's Government in the United Kingdom to formulate a scheme with these objects in view. The second laid it down that it was in the highest interests of the Empire to reduce materially the rates for telegraphic communications between the United Kingdom and the various Oversea Dominions, and laid stress on the desirability of the co-operation of the various Governments in the provision of a State-owned cable across the Atlantic. The third recommended that the existing facilities for Inter-Imperial Parcels Delivery should be enlarged, improved, and co-ordinated, and recommended the preparation of a detailed scheme for this purpose.

The Conference of 1917 had accepted the principle of reciprocity of treatment between India and the Dominions in the matter of immigration. In 1918 a further Resolution

Digitized by Google

(No. XXI) was passed elaborating the principle already laid down. Specified conditions were agreed to which should regulate in future the admission of British citizens domiciled in any British country, including India, into any other British country for visits for the purpose of pleasure or commerce, including temporary residence for the sake of education. It was further agreed that Indians already permanently domiciled in the other British countries should be allowed on certain specified conditions to bring in their wives and minor children.

Peace Conference at Paris, 1919, and Treaties, &c., arising out of the Peace Settlement.

On the close of hostilities in November, 1918, representatives of all the self-governing Dominions were immediately summoned. They took part, first in the preliminary discussions in London over the Peace negotiations, and secondly in the work of the Peace Conference at Paris.

The Regulations governing the work of the Paris Conference laid down that the British Empire should be represented by five Delegates and that the British Dominions and India should be represented as follows :—Two delegates each for Australia, Canada, South Africa and India (including the Native States); one delegate for New Zealand. It was added that each delegation had the right to avail itself of the Panel system, and that the representatives of the Dominions (including Newfoundland and India) might besides be included in the representation of the British Empire by the Panel system.

Co-ordination between the various British representatives was secured by frequent meetings and discussions in Paris. A special body was formed for the purpose of these discussions and was known as the "British Empire Delegation"; its secretariat was provided from the officials assisting the representatives of the various parts of the Empire.

Several Dominion Ministers were nominated to, and acted for the British Empire on, the allied Commissions which were appointed to consider various aspects of the condition of peace. Thus Sir R. Borden (Canada) was a member of the Commission on Greek Questions, Mr. Hughes (Australia) of the Commission on Reparation, Mr. Massey (New Zealand) of the Commission on the Responsibility for the War, and General Smuts (South Africa) of the League of Nations Commission.

The Treaty of Versailles was signed on behalf of Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, and India.

Under it Canada, Australia, New Zealand, the Union of South Africa, and India, as well as the "British Empire," became original members of the League of Nations, and were represented at the first and subsequent meetings of the Assembly of the League held at Geneva. The Irish Free State became a member of the League in 1923. At the Assembly of 1925, Senator Dandurand, the senior Canadian Delegate, was elected President of the Assembly. At the Assembly of 1927, Canada was elected to one of the non-permanent seats on the Council of the League, and in 1930 was succeeded by the Irish Free State, which, in its turn, was succeeded in 1933 by the Commonwealth of Australia.

The other important Treaties, Conventions, etc., arising out of the Peace Settlement, which were completed in 1919 and 1920, were also signed by representatives of Canada, Australia, New Zealand, the Union and India.

At the end of 1918, the "Oversea Settlement Committee" was brought into existence in order to advise His Majesty's Government in the United Kingdom on the new problems in connection with Imperial Migration arising out of the termination of the War. Special delegates were sent by the Committee to Canada, Australia and New Zealand to investigate the openings for women in those Dominions: the policy of free passages from the

Digitized by Google

United Kingdom to other parts of the Empire for ex-service men was inaugurated and maintained during the period 1919-1921. The adoption of a joint policy of State-aided settlement within the Empire was discussed between representatives of His Majesty's Government and the Governments of Canada, the Commonwealth of Australia and New Zealand in January-February, 1921, and their Report was approved at the Conference of Prime Ministers held in the Summer with a reservation on the part of the South African representatives.

In introducing the Budget for 1919–1920, the Chancellor of the Exchequer brought forward proposals for Preference on certain articles (such as tea, cocoa, sugar and tobacco) already subject to duty when imported into the United Kingdom, which were (1) consigned from and (2) grown, produced or manufactured in the British Empire. These proposals were accepted by Parliament and incorporated in the Finance Act, 1919, the general rate of preference given being ⅓th of the full rate.

The Imperial Mineral Resources Bureau was incorporated by Royal Charter and began its labours.

Action during 1919-21 on Resolutions of Imperial Conference 1911 and Imperial War Conferences, 1917 and 1918.

Arrangements were made in 1919 for a special service of news of general Imperial interest to be sent to Australia and New Zealand, to South, East and West Africa and to the Eastern Colonies, contributions being made by the United Kingdom and by most of the Dominions and Colonies concerned. These arrangements came to an end, however, in 1921.

An Imperial Statistical Conference was held in February, 1920 (Cmd. 648). It was followed by an Imperial Entomological Conference (Cmd. 835), an Imperial Forestry Conference (Cmd. 865) later in the year, and in 1921 by an Imperial Customs Conference (Cmd. 1231).

After consultations as to the composition and functions of the body to review the problems of Inter-Imperial Ocean Communications, an Imperial Shipping Committee was appointed in 1920 under the Chairmanship of Sir H. Mackinder. By the end of 1921 it had issued Reports on Bills of Lading (Cmd. 1205), Deferred Rebates as obtaining in the United Kingdom-Australia Trade (Cmd. 1486), and the functions and constitution of a Permanent Imperial Body for shipping questions (Cmd. 1483)

A Royal Commission set up in 1919 to enquire into the United Kingdom income tax included in its Report (Cmd. 615) recommendations for dealing with double income tax within the Empire (Resolution XV of Imperial War Conference 1917). These recommendations were adopted by His Majesty's Government in the United Kingdom and incorporated in section 27 of the Finance Act, 1920 (*see also* Finance Act, 1921 section 28). Corresponding legislation was passed by the Commonwealth Parliament in 1921 (Act 31 of 1921, section 5). Legislation had been in force in New Zealand since 1916 (Act 5 of 1916, section 92).

Settlement of the questions of (a) provision for deserted wives and children (b) reciprocal enforcement of Judgments, in different parts of the Empire (both of which subjects had been much discussed between the Home and Dominion Governments since the Imperial Conference of 1911) was facilitated by the passing of the Maintenance Orders (Facilities for Enforcement) Act, 1920, and by Part II of the Administration of Justice Act, 1920, in the United Kingdom.

A Committee appointed at the end of 1919 to enquire into the high power wireless stations needed by the British Empire on commercial and strategical grounds presented its Report in 1920 (Cmd. 777), and preparations were begun in 1921 to carry the recommendations into effect.

Digitized by Google

From June-August, 1921, a Conference of Prime Ministers and representatives of the United Kingdom, the Dominions and India was held in London. The Prime Minister of the United Kingdom (Mr. Lloyd George) presided, and the Prime Ministers of Canada (Mr. Meighen), the Commonwealth of Australia (Mr. Hughes), New Zealand (Mr. Massey) and the Union of South Africa (General Smuts) were present as well as representatives of India. The Prime Minister of Newfoundland (Sir R. Squires) was unable to attend.

Conference of Prime Ministers and Representatives of the United Kingdom, the Dominions and India, 1921. (Cmd. 1474.)

The greater part of the proceedings was highly confidential and comparable rather to the work of the Imperial War Cabinets of 1917 and 1918 than to that of the Imperial War Conferences of those years. The Conference considered in detail the Foreign Policy of the British Empire. Discussion took place in regard to the League of Nations, and general appreciation was expressed of its work, and of its claim to the support of the British Empire. Close consideration was given to the question of British Policy in Egypt. Several meetings were devoted to considering the Naval, Military and Air Defence of the Empire. Specific Resolutions were passed as to Empire Settlement and Migration, the nationality of children born abroad of British parents, Air Communications, the Imperial Wireless Scheme, Shipping, Wireless Telephony and Cable and Wireless Rates for Press Messages.

Agreement was reached as to the apportionment between the various parts of the Empire of the Reparation receipts falling to the British Empire under the Treaty of Peace with Germany.

The question of the position of British Indians in the Empire was further discussed, and a Resolution passed which, while reaffirming the Resolution of the 1918 Conference (*see* p. lxv above), recognised that there was an incongruity between the position of India as a member of the British Empire and the existence of disabilities upon British Indians lawfully domiciled in some other part of the Empire, and expressed the opinion that, in the interests of the solidarity of the British Commonwealth, it was desirable that the rights of such Indians to citizenship should be recognised.[1]

It was decided that, having regard to the constitutional developments in the Empire during the last few years, no advantage would be gained by holding the Constitutional Conference contemplated by Resolution IX of the Imperial War Conference, 1917 (*see* p. lxiv above); but stress was laid on the importance of continuous consultation between the Prime Ministers, and on the advantage of their meeting annually, or at such longer intervals as may prove feasible. The principle established in 1918 of direct communication between Prime Ministers, and of the right of the Dominion Prime Ministers to nominate Cabinet Ministers to represent them in consultation with the Prime Minister of the United Kingdom (*see* p. lxvi above), was reaffirmed.

Washington Conference, 1921. Genoa Conference, 1922.

In the course of the discussions on Foreign Policy at the Prime Ministers' Conference of 1921, much time was devoted to the problems of the Western Pacific and Far East; whilst the discussions were proceeding, the President of the United States of America issued his invitation to a Conference to be held at Washington in the Autumn of 1921, at which these matters would be discussed, as well as the question of limitation of armaments. The British Empire Delegation at this Conference included representatives of Canada (Sir R. Borden), Australia (Senator Pearce), New Zealand (Sir J. Salmond) and India. Several important conventions were concluded at the

[1] NOTE.—The representatives of the Union of South Africa were unable to accept this Resolution in view of the exceptional circumstances of the greater part of the Union. The representatives of India expressed the hope that, by negotiation between the Governments of India and of the Union of South Africa, some way could be found to reach a more satisfactory position.

Digitized by Google

Conference, including that for the limitation of Naval Armament, the Quadruple Pacific Treaty and the Nine-Power Treaty regarding China (*see* Cmd. 1627). The Dominions were also represented at the International Conference held in Genoa in the spring of 1922, and some sent representatives to the subsequent technical Conference held at the Hague.

Empire Settlement Act, 1922.

In 1922, in pursuance of the Resolution passed at the 1921 Conference, an Act, entitled the Empire Settlement Act, was passed by the Parliament at Westminster empowering His Majesty's Government in the United Kingdom in association with Dominion Governments or public or private organisations either in the United Kingdom or overseas, to formulate and co-operate in carrying out agreed schemes for affording joint assistance to suitable persons in the United Kingdom to settle in the Oversea Dominions.

Legislation was enacted amending the British Nationality and Status of Aliens Act, 1914 (*see* p. lxii), in the direction of giving greater facilities for the retention of British citizenship by children born abroad of British parents.

Action in 1922 on Resolutions of 1921 Conference and of previous Conferences.

A Conference on the subject of an Empire Patent was held in June.

Legislation was passed at the end of the year to facilitate the importation of cattle from Canada into the United Kingdom.

Shortly after Mr. Bonar Law assumed office as Prime Minister in the autumn of 1922, enquiries were made of the Dominions and India as to the possibility of holding an Imperial Economic Conference in 1923 to study the question of co-operation in the development of the resources of the British Empire and the strengthening of economic relations between its constituent parts. It was ultimately decided to hold an Economic Conference and a meeting of the Imperial Conference concurrently. Both Conferences took place in London in October and November, 1923, the Irish Free State being represented for the first time.

The Prime Minister of the United Kingdom (Mr. Stanley Baldwin) presided at the Imperial Conference, and the Prime Ministers of Canada (Mr. Mackenzie King), the Commonwealth of Australia (Mr. Bruce), New Zealand (Mr. Massey), and the Union of South Africa (General Smuts), the President of the Executive Council of the Irish Free State (Mr. Cosgrave) and the Prime Minister of Newfoundland (Mr. Warren), attended the meetings, as well as other Ministers and representatives of India.

The United Kingdom, the Dominions, India and the Colonies and Protectorates were all represented at the meetings of the Imperial Economic Conference, over which the President of the Board of Trade (Sir Philip Lloyd-Graeme) presided.

Imperial Conference, 1923.
(Cmd. 1987 and Cmd. 1988.)

The Imperial Conference gave detailed consideration to the Foreign Policy of the British Empire and reached a common understanding on the main heads of the policy to be pursued, subject to the approval of the Governments and Parliaments. The main conclusions, and extracts from the general statement made by the Secretary of State for Foreign Affairs, were subsequently published. The question of the Naval, Air and Military Defence of the Empire was also considered and resolutions were passed placing on record the chief conclusions which had been reached Certain points in connection with the negotiation, signature and ratification of Treaties were discussed and a Resolution was adopted. Other matters considered included the Condominium in the New Hebrides, the status of High Commissioners, the publication of correspondence between the several Governments, the contribution of India to the

Digitized by Google

expenses of the League of Nations, certain Nationality questions, the question of the validity of marriages between British subjects and foreigners, and the proposed extension of the powers of the Imperial War Graves Commission.

Several meetings were devoted to a further discussion of the position of British Indians in the Empire and to the consideration of a proposal put forward by the representatives of India to the effect that the Dominion Governments concerned, and the British Government for the Colonies and Protectorates, should agree to the appointment of Committees to confer with a Committee appointed by the Indian Government as to the best and quickest means of giving effect to the Resolution of the 1921 Conference (*see* p. lxix). This proposal was generally accepted, except by the Prime Minister of the Union of South Africa.

Imperial Economic Conference. 1923. (Cmd. 1990 and Cmd. 2009.)

The Imperial Economic Conference considered in detail the economic relations between the several parts of the Empire and discussed fully all aspects of inter-Imperial trade. The most important Resolutions passed were on the subject of Imperial Preference, Oversea Settlement, Co-operation in financial assistance to Imperial Development, Communications Economic Defence, the future of the Imperial Institute, Immunity of State Enterprises, and the establishment of an Imperial Economic Committee.

A British Empire Forestry Conference was held in Canada in the autumn of 1923, its recommendations which were discussed at the Imperial Economic Conference 1923, are set out in the Record of Proceedings of the latter Conference (Cmd. 2009). An Imperial Mycological Conference was held in July 1924 (*see* Stationery Office Publication Colonial No. 8 of 1924).

Action in 1924 on resolutions of Imperial Economic Conference, 1923.

Before steps had been taken to give effect to the resolutions of the Imperial Economic Conference, a new administration was formed in the United Kingdom, as a result of the general election in December, 1923, with Mr. Ramsay MacDonald as Prime Minister. Shortly after taking office, the new Government announced that they adhered generally to the resolutions of the Conference, with the exception of those relating to Tariff Preference and to the establishment of an Imperial Economic Committee; later their views on the resolutions of the Conference were set out in a Parliamentary Paper (Cmd. 2115). The principal action taken was as follows. Effect was given to the proposals for co-operation in financial assistance to Imperial development by Section 2 of the Trade Facilities Act, 1924, The Carriage of Goods by Sea Act, 1924, was passed, and similar legislation was carried in the Commonwealth of Australia. Provision was made in Section 31 of the Finance Act, 1924, for the exemption from United Kingdom taxation of shipping registered in such other parts of the Empire as grant reciprocal exemption to shipping registered in the United Kingdom. A Bill for the re-organisation of the Imperial Institute and the incorporation of the Imperial Mineral Resources Bureau with it was introduced into Parliament and passed through the House of Lords, but lapsed on the dissolution of Parliament in October, 1924. Arrangements were made for the establishment at Oxford of an Imperial Forestry Institute. A Committee on Imperial Wireless Services under the chairmanship of Sir Robert Donald reported (*inter alia*) in favour of the ownership by His Majesty's Government in the United Kingdom of wireless stations in this country for communication with the Dominions (Cmd. 2060); and steps were taken for the completion of the Government high power wireless telegraphy station at Rugby. A contract was also entered into with the Marconi Wireless Telegraph Company for the erection of "beam" stations, to be taken over on satisfactory completion and operated by the Government for communication with Canada. The contract provided for the possible extension of the arrangement to

Digitized by Google

cover communication with Australia, South Africa and India. In Canada steps were taken by the Canadian Marconi Company for the erection of the "beam" stations required. In Australia, the agreement with the Amalgamated Wireless Company was modified to provide for the erection of a "beam" station, and in the Union of South Africa arrangements were made with the Marconi Company for the erection of an experimental "beam" station. It was announced during the summer that, on further consideration, His Majesty's Government proposed that a Committee should be set up on the lines of the Imperial Economic Committee recommended by the Conference with one specific reference, namely, to consider the possibility of improving the methods of preparing for market and of marketing within the United Kingdom the food products of the oversea parts of the Empire. By the end of the year general agreement was reached for the establishment of a Committee on these lines. The definite proposals regarding Tariff Preference which were laid before the Conference were brought before parliament in June in the form of resolutions, and, so far as they were put to the vote, rejected by varying majorities. In the latter part of the year, a general election took place, and as a result a new Government was formed with Mr. Baldwin as Prime Minister. The new Government announced that such of the proposals relating to Tariff Preference as involved no increase in existing duties would be placed before Parliament as part of the budget of 1925, and that, as regards the other proposals, the full money equivalent of the advantage which would have been conferred by them on Empire imports, would be made available for expenditure on alternative schemes for improving the marketing of Empire imports of food stuffs: the proposed Imperial Economic Committee would be asked to advise as to the best methods of employing this amount.

Among the most important matters discussed at the Imperial Conference, 1923, under the head of Foreign Policy, was the offer of the United States Government to take part in an international conference or enquiry to investigate the European Reparations problem. This led up to the appointment of the Expert Committees under the Reparation Commission and eventually to the London Reparation Conference of July-August 1924, which considered the steps necessary to give effect to the Reports of those Committees. In connection with the London Conference, arrangements were made for the establishment of a British Empire Delegation, of which the representatives of any Dominions so desiring were members on the panel system; also for the representatives of the Dominions so appointed to be able to be present at meetings of the Conference on days when it was not their turn to sit as members of the British Empire Delegation. Canada, the Commonwealth of Australia, New Zealand and the Union of South Africa availed themselves of this arrangement, which was announced to be a special one for this Conference, and not to be regarded or quoted as a precedent.

Action in 1924 and the early part of 1925 on Resolutions of Imperial Conference, 1923.

A Squadron under Vice-Admiral Sir F. Field, consisting of the battle-cruisers Hood and Repulse and a squadron of light cruisers, left Plymouth in November, 1923 and returned in September, 1924. In the course of its cruise the Special Service Squadron visited Sierra Leone, the Union of South Africa, Zanzibar, Ceylon, the Straits Settlement, the Federated Malay States, Australia, New Zealand, Western Samoa, Fiji, Western Canada, Jamaica, Eastern Canada and Newfoundland, as well as Honolulu and San Francisco. It was received everywhere with great enthusiasm.

As regards the questions discussed in connection with the status of High Commissioners (namely, the possibility of obtaining some special precedences for High Commissioners on ceremonial occasions and the possibility of extending the privileges granted to them as regards exemption from taxation and similar matters) the action taken was as follows:—

Digitized by Google

(1) As regards precedence, the following notification was made in the London Gazette of the 29th July, 1924:

"Amongst the matters discussed at the Imperial Conference, 1923, was the question of precedence of the High Commissioners in London. In accordance with the undertaking then given (see page 17 of (Cmd. 1987)), the matter was examined and suggestions were put forward, with His Majesty's approval, by the late Government for the consideration of the Dominion Prime Ministers and the Government of India. These proposals have proved generally acceptable, and His Majesty has now been pleased to direct that the High Commissioners for Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, the Irish Free State, Newfoundland and India should be given precedence, on ceremonial occasions, according to the following principles:—

"(a) When British or Dominion Ministers, being at the time members of their respective Cabinets, are present, the High Commissioners should take precedence immediately after them; this precedence is subject to the qualification that the High Commissioner should not on any occasion be given a precedence higher than that accorded by the Table of Precedence to Secretaries of State.

"(b) When no members of the British or Dominion Cabinets are present, the High Commissioners should take precedence immediately after that accorded by the Table of Precedence to Secretaries of State."

(2) As regards exemption from taxation, rates, etc., it was announced in January, 1925, that His Majesty's Government in the United Kingdom would take the necessary action, including the introduction of legislation where necessary, to put High Commissioners personally in as favourable a position in these matters as Foreign Ambassadors and Ministers.

Consultation on Foreign Policy, &c. (Cmd. 2301.)

A suggestion was made by Mr. Ramsay MacDonald in the summer of 1924 that a preliminary enquiry should be held to consider the system of consultation with the Dominions on matters of Foreign Policy and general Imperial interest. After considerable discussion this was agreed to, in principle, by the Dominion Governments, but difficulties were experienced in arranging a suitable date, and no date had been fixed when the General Election took place in the autumn. The new Government, after considering the matter, intimated to the Dominion Governments its doubts whether there would be any advantage in pursuing the matter further at this stage.

In the autumn of 1924 the Commonwealth Government appointed a Liaison Officer in London for the purpose of studying the foreign situation and supplying the Prime Minister of the Commonwealth with any information necessary to supplement that received through existing channels.

Protocol for Pacific Settlement of International Disputes. (Cmd. 2273.)

In view of the terms of the Protocol for the Pacific Settlement of International Disputes drawn up at the Fifth Assembly of the League of Nations in September, 1924, His Majesty's Government in the United Kingdom took steps in December to ascertain whether the Dominion Prime Ministers could arrange to attend or be represented at a special meeting of the Imperial Conference to consider the issues arising out of the Protocol. It was found, however, that the exigencies of Parliamentary and other business made a representative meeting impossible, and it was accordingly decided to deal with the matter by correspondence. As a result it was announced by the Secretary of State for Foreign Affairs at the meeting of the Council of the League in March 1925 that His Majesty's Government and the Governments of Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa and India, were unable to accept the Protocol (see Cmd. 2368). A similar announcement was made later by the Government of the Irish Free State. Correspondence with the Dominions on the subject is printed in Cmd. 2468.

Digitized by Google

Provision was made in the Finance Act, 1925 (sections 8 and 9), to give effect to those of the proposals relating to Tariff Preference placed before the Imperial Economic Conference which did not involve any increase of existing duties; and a preferential rebate was also granted in respect of the new duties imposed by that Act (sections 4, 6 and 7) and by the Safeguarding of Industries (Customs Duties) Act, 1925. The Finance Act (section 25), by providing for the liability of Oversea Governments to taxation in respect of trading operations in this country, gave effect to the resolution of the Conference regarding the Immunity of State Enterprises from taxation. The Imperial Economic Committee was set up and in July issued two reports, viz.: a general report (Cmd. 2493) which *inter alia* contained the advice given by the Committee as to the method of employment of the sum to be made available for expenditure on improving the marketing of Empire imports of foodstuffs (*see* p. lxxii), and a report on Meat (Cmd. 2499). The Imperial Institute Act, 1925, was passed to carry out the reorganisation of the Institute, and the incorporation with it of the Imperial Mineral Resources Bureau, and came into operation on the 1st July. The Government high-power wireless telegraphy station at Rugby was completed and opened on the 1st January, 1926. The sites for the "beam" stations to be erected for communication with Canada, Australia, South Africa and India were acquired, and progress was made towards the completion of the stations. A committee, on which the Dominions concerned were represented, was set up to advise the Postmaster-General on matters connected with the operations of services by the "beam" stations, and held regular meetings during the year.

Action in 1925 on Resolutions of Imperial Economic Conference, 1923.

An Imperial Entomological Conference was held in June, 1925 (see Cmd. 2490).

Further Action in 1925 on the Resolutions of the Imperial Conference, 1923.

The Finance Act, 1925 (section 26), gave further relief to High Commissioners, Agents-General and their staffs in respect of exemption from income tax in this country; and administrative action was taken to place the High Commissioners personally in the same position as regards exemption from taxation in this country as foreign Ambassadors and Ministers.

Treaty of Locarno, 1925 (Cmd. 2435 and Cmd. 2525).

The Dominion Governments were kept fully informed of the negotiations on the subject of European Security which led up to the Locarno Conference of October, 1925, and the signature in London, on the 1st of December, 1925, of a Treaty of Mutual Guarantee and other connected instruments. Article 9 of the Treaty provided that it should not impose any obligations on any of the Dominions or India unless the Government of such Dominion or of India had signified its acceptance thereof.

Action in 1926 on Resolutions of Imperial Economic Conference, 1923.

In accordance with the announcement made by the Prime Minister in December, 1924 (*see* p. lxxiii), and following upon the recommendations of the Imperial Economic Committee (*see* above) a sum of £500,000 was voted by Parliament in the financial year 1926-7 for expenditure on improving the marketing of imports of Empire products, together with home agricultural produce. The fund was to be administered by the Secretary of State for Dominion Affairs who would be assisted by a Board, called the Empire Marketing Board. A small secretarial staff was appointed to assist the Board and various schemes under the two main heads of publicity and research were recommended by the Board and approved by the Secretary of State. In August the Irish Free State Government appointed a representative as member of the Imperial Economic Committee. The wireless "beam" stations for communication with Canada were completed and the service was opened.

Imperial Conference, 1926 (Cmd. 2768 and 2769).

A considerable part of the work of the Imperial Conference, which met in October, 1926, consisted of the discussion of questions affecting Inter-Imperial Relations, which were referred to a Committee of Prime Ministers and Heads of Delegations presided over by Lord Balfour. The Report of the Committee, which was unanimously adopted by the Conference stated certain general principles which appeared to it to govern the relations between the various parts of the Empire and dealt with the application of those principles to a number of practical questions.

Questions affecting Inter Imperial Relations.

As regards general principles, the Report stated that equality of status was the root principle governing Inter-Imperial Relations so far as concerned Great Britain and the Dominions, which it described as "*autonomous Communities within the British Empire, equal in Status, in no way subordinate one to another, in any aspect of their domestic or external affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations.*" It pointed out, however, that the principle of equality and similarity, appropriate to status, did not universally extend to function.

The application of these principles to particular questions was dealt with by the Committee under the three heads of (*a*) relations between the various parts of the Empire, (*b*) relations with Foreign Countries and (*c*) the system of communication and consultation.

(*a*) The Committee recommended that, in view of the altered state of affairs arising from the establishment of the Irish Free State as a Dominion, legislative action should be taken, subject to the approval of His Majesty the King, to secure that His Majesty's title should in future read "George V. by the Grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas King, Defender of the Faith, Emperor of India." It defined the position of the Governor General in a Dominion as the representative of the Crown and not the representative or agent of His Majesty's Government in Great Britain and expressed the view that the practice whereby the Governor General of the Dominion was the formal official channel of communication between His Majesty's Government in Great Britain and His Governments in the Dominions was no longer wholly in accordance with the constitutional position of the Governor General and that the recognised official channel of communication should be, in future, between Government and Government direct. It considered various points connected with the operation of Dominion legislation, with particular reference to the reservation of such legislation for the assent of His Majesty, the power of disallowance of such legislation, the competence of Dominion Parliaments to give their legislation extra-territorial effect and the principles embodied in or underlying the Colonial Laws Validity Act, 1865, and recommended the appointment of a special committee to enquire into these points. It also considered the question of principle involved in certain provisions of the Merchant Shipping Act, 1894, and recommended that a special Sub-Conference should be held to consider the subject.

(*b*) The Committee examined the working of the Resolution adopted by the Imperial Conference of 1923, on the subject of the negotiation, Signature and Ratification of Treaties (*see* page lxx) and made a number of recommendations as to Treaty procedure with a view to supplementing that Resolution. It considered, in the light of the same Resolution, the question of the representation of the different parts of the Empire at International Conferences and arrived at conclusions as to the most suitable procedure in the various classes of case arising. It examined

Digitized by Google

the possibility of applying the principles underlying the Resolution of 1923 to matters arising in the conduct of foreign affairs generally and agreed that the Governments concerned might usefully adopt as a guide in all negotiations falling within their respective spheres the following general principle: "So long as the initiating Government receives no adverse comment and so long as its policy involves no active obligations on the part of the other Governments, it may proceed on the assumption that its policy is generally acceptable. It must, however, before taking any steps which might involve the other Governments in any active obligations, obtain their definite assent." It also considered certain questions which had arisen as to the practice regarding the issue of exequaturs to Consuls in the Dominions.

(c) The Committee reviewed the system of communication and consultation during the intervals between Imperial Conferences, with special reference to the desirability of arranging that closer personal contact should be established between Great Britain and the Dominions, and the Dominions *inter se*, and summed up its conclusions in a Resolution which it submitted for the consideration of the Conference.

Foreign Relations and Defence.

Certain particular aspects of Foreign Relations were referred either to the Committee on Inter-Imperial Relations mentioned above or to special Committees of the Conference. As regards the policy of Locarno (*see* page lxxiv), the results which that policy had already achieved and those which it was hoped to secure were explained and discussed, and the Committee recommended to the Conference the adoption of the following resolution. "The Conference has heard with satisfaction the statement of the Secretary of State for Foreign Affairs with regards to the efforts made to ensure peace in Europe, culminating in the agreements of Locarno; and congratulates His Majesty's Government in Great Britain on its share in this successful contribution towards the promotion of the peace of the world."

Other matters.

Special Sub-Committees of the Conference were set up *inter alia* to deal with questions of Imperial Air Communications, Oversea Settlement, Research, Forestry and General Economic questions especially the encouragement and production of Empire films, Industrial Standardisation, and the future of the Imperial Shipping Committee and Imperial Economic Committee. Resolutions were adopted on all these questions.

The opportunity afforded by the Conference was taken for a discussion between representatives of the partner Governments (the United Kingdom, Canada, Australia and New Zealand) of certain outstanding questions connected with the Pacific Cable. It was settled that legislation should be introduced to provide for the future composition of the Board, the amount of its reserve fund and the disposal of annual surpluses. The new cable laid by the Board in duplication of its existing cable across the Pacific was opened for traffic in November.

Action in 1927, 1928, 1929 and 1930 on the Resolutions of the Imperial Conference, 1926.

In order to give effect to the recommendation of the Inter-Imperial Relations Committee of the Imperial Conference of 1926 as to the Title of His Majesty the King, the Royal and Parliamentary Titles Act, 1927, was passed and a Proclamation thereunder was issued by His Majesty on the 13th May, 1927, making the change recommended by the Committee (page 16 of Cmd. 2768).

In accordance with the wishes of His Majesty's Governments in Canada, the Commonwealth of Australia, the Union of South Africa and the Irish Free State, the procedure of direct communication between Governments, referred to in Section IV (b) of the Committee's Report (page 16 of Cmd. 2768), was adopted in the case of communications between His Majesty's Government in the United Kingdom and His Majesty's Governments in those Dominions.

Digitized by Google

A statement was made by Sir Austen Chamberlain at the meeting of the Council of the League of Nations on the 9th March, 1927, at the request of all His Majesty's Governments, that it was the desire of those Governments that the form of Treaties between Heads of States should be adopted in the case of all Conventions concluded under the auspices of the League, in accordance with the recommendation of the Imperial Conference (pages 22 and 23 of Cmd. 2768). This form was subsequently adopted generally in the case of both League and non-League Treaties.

In pursuance of the Resolution adopted by the Imperial Conference of 1926 as to the further development of the existing system of communication between His Majesty's Governments (page 27 of Cmd. 2768), His Majesty's Government in the United Kingdom appointed a representative in Canada, with the title of High Commissioner, who took up his duties in September, 1928. Arrangements were made, at the request of the Prime Minister of New Zealand, for an officer from the Foreign Office in London to be seconded for attachment to the Department of the Prime Minister of New Zealand in an informative and consultative character, particularly in relation to foreign affairs. Arrangements were also initiated whereby the Imperial Secretary in South Africa would act as a supplementary channel of communication between His Majesty's Governments in the United Kingdom and in the Union of South Africa.

In November, 1930, a post of High Commissioner in the Union of South Africa for His Majesty's Government in the United Kingdom was established; it was combined with the existing post of High Commissioner for South Africa which had until then been held by the Governor-General of the Union of South Africa.

Legislation to give effect to the scheme for the re-organisation of the Pacific Cable Board was passed, and the opportunity was taken to consolidate existing legislation (Pacific Cable Act, 1927).

The Workmen's Compensation (Transfer of Funds) Act, 1927, was passed to enable effect to be given to a recommendation of the Imperial Conference upon the subject (see page 47 of Cmd. 2768).

An Imperial Education Conference was held in June, 1927, and an Imperial Agricultural Research Conference was held in October, 1927. One of the recommendations of the latter Conference proposed the establishment of certain new Imperial Agricultural Bureaux, to be attached to existing Research Institutions in the United Kingdom, to deal with the interchange of information on special branches of agricultural science. A meeting of representatives of the Governments willing to contribute was held in London, in November, 1928, and drew up for the consideration of the Governments a scheme for the future control, organisation and finance of the proposed new Bureaux. The scheme was accepted and eight new Bureaux were set up in the course of 1929. These Bureaux are controlled by an Executive Council nominated by the various Governments of the Empire.

The wireless "beam" Stations (*see* p. lxxii) for communication with Australia, South Africa and India were completed and the services were opened.

Lord Lovat, the Under-Secretary of State for Dominion Affairs, and Chairman of the Oversea Settlement Committee, left England on the 4th August, 1928, on a visit to Canada, Australia and New Zealand, to discuss matters relating to oversea settlement with representatives of the Dominion Governments and of private organisations. Lord

Digitized by Google

Lovat left Canada on September 19th and arrived in New Zealand on October 8th. Owing to indisposition he was compelled to cancel his projected visit to Australia and he sailed for England from New Zealand on October 26th.

Defence.

In September, 1927, the New Zealand Parliament, on the motion of the Prime Minister of New Zealand, passed a resolution approving proposals for a contribution of £1,000,000 in instalments towards the expenses of the Singapore Naval Base.

Imperial Defence College.

The first course at the Imperial Defence College, the establishment of which was referred to in Conclusion eight of the Imperial Conference of 1926 on the subject of Defence (page 36 of Cmd. 2768), opened in January, 1927, and was attended by officers from the United Kingdom, Canada, the Commonwealth of Australia, New Zealand and India. In the case of the second course opening in January, 1928, arrangements were made for an officer from the Union of South Africa to attend in addition to officers from the parts of the Empire mentioned above. Since 1929 there have been attendances each year from Canada and each year except 1932 from Australia. An officer from New Zealand attended in 1930, and one has been nominated to attend the course in 1937.

Visits of United Kingdom Ministers to the Dominions.

The Prime Minister of the United Kingdom (the Right Honourable Stanley Baldwin, M.P.) visited Canada in July-August, 1927. In July, 1927, the Secretary of State for Dominion Affairs (the Right Honourable L. S. Amery, M.P.) left England on a visit to the Dominions, extending until February, 1928, which embraced South Africa, Australia, New Zealand and Canada. In October, 1929, the Prime Minister of the United Kingdom (the Right Honourable J. Ramsay MacDonald, M.P.), after a visit to the United States, spent some time in Canada, and visited Toronto, Ottawa, Montreal and Quebec. (See also the reference above to Lord Lovat's Tour.)

Conference on Cable and Wireless Communications.

A Conference met in January, 1928, in London, comprising representatives of His Majesty's Governments in the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, of the Union of South Africa and the Irish Free State, the Government of India, and of the Colonies and Protectorates, to discuss certain questions relating to cable and wireless communications. Its report (Cmd. 3163) was submitted in July.

In this Report it is stated that one of the main features of the situation referred to the Conference for examination was the fact that the cable undertakings operating between the various parts of the British Empire would be unable to continue on a paying basis in face of unrestricted competition on the part of the Beam Wireless services. The Conference came to the conclusion that the amalgamation in one undertaking of all the cable and wireless interests conducting communications between the various parts of the Empire provided the best prospects of conserving and improving the communication services of the Empire, without entailing contributions from public funds. Their recommendations may be summarised as follows (1) the formation of a Merger Company, to combine the respective interests of the Eastern and Associated Telegraph Companies and Marconi's Wireless Telegraph Company; (2) the formation of a Communications Company to hold all the Communication Assets of the Cable and Marconi Companies; (3) the transfer to this Company of the cables of the Pacific Cable Board, the West Indian Cable and Wireless system worked by the Board, and the Imperial Atlantic Cables; (4) the lease to the Company of the Post Office Beam Services; (5) the establishment of an Imperial Advisory Committee, to include representatives of the Governments participating in

Digitized by Google

the Conference, to whom representatives of other parts of the Empire might be added as required. An agreement to carry these recommendations into effect was executed on 29th May, 1929, on behalf of H.M.'s Governments in the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa and the Irish Free State, and of the Government of India, and these Governments have each nominated representatives to sit on the Imperial Communications Advisory Committee.

Economic Mission to Australia.

At the request of H.M. Government in the Commonwealth of Australia a mission comprising Sir Arthur Duckham, K.C.B., Sir Hugo Hirst, Bart, Sir Ernest Clark, K.C.B., and Mr. Dougal Malcolm sailed in August for Australia, with the following terms of reference—"To confer with the Commonwealth and State Governments, with the Development and Migration Commission, and with leaders of industry and commerce in Australia, in the development of Australian resources and on any other matters of mutual economic interest to Great Britain and the Commonwealth which may tend to the promotion of trade between the two countries, and the increase of settlement in Australia." The mission concluded their investigations in January, 1929, and before leaving that country issued a report giving a comprehensive review of the position there as it appeared to them.

Diplomatic Representation of the Dominions in Foreign Countries and Foreign Countries in the Dominions.

Following on the appointment in 1924 of a Minister to represent the interests of the Irish Free State at Washington, and the appointment late in 1926 of a Minister to represent the interests of Canada at the same capital (pages 26 and 27 of Cmd. 2768), the U.S. Government took steps for the appointment of Ministers at Ottawa and Dublin, who presented their credentials during the summer of 1927. Appointments of a Canadian Minister at Paris and of a French Minister at Ottawa were made in 1928.

The number of Canadian Ministers in foreign capitals was increased in 1929 by the appointment of a Minister to represent the interests of that Dominion at Tokyo; later in the year a Japanese Minister was appointed at Ottawa. Ministers representing the Union of South Africa were appointed during 1929 at the Hague, Washington and Rome, and Ministers for the Netherlands, the United States and Italy were appointed in the Union in 1929 and 1930. Irish Free State Ministers were appointed in the latter part of 1929 at Paris, Berlin and the Vatican City. Early in 1930 a Papal Nuncio was appointed at Dublin and this appointment was followed later in the year by the appointment of Ministers for France and Germany. In 1932 the functions of the Irish Free State Minister at Paris were extended to cover Belgium also.

Consular Representation of the Dominions in Foreign Countries.

During 1930 appointments were made of a Consul-General for the Union of South Africa in Portuguese East Africa and a Consul-General for the Irish Free State in the United States.

Geneva Naval Conference, 1927. (Cmd. 2964.)

At the Conference on the Limitation of Naval Armament held at Geneva during the summer of 1927, the several parts of the Empire were represented by plenipotentiaries, each holding a full power appointing him representative of His Majesty the King for the particular part of the Empire named in the full power. A statement to this effect, which also mentioned the desire of His Majesty's Governments that any resulting Treaty should be in the form recommended by the Imperial Conference of 1926, was made by the First Lord of the Admiralty at the opening session of the Geneva Conference (pages 5 and 6 of Cmd. 2964).

Digitized by Google

Treaty for the Renunciation of War, 1928.

During the negotiations which resulted in the signature, in August, 1928, of the Treaty for the Renunciation of War, there was constant communication between His Majesty's Governments, and the Governments of the United Kingdom, the Dominions and India were included amongst those invited by the United States Government to become original signatories to the Treaty. The Treaty was signed on behalf of the several parts of the Empire in the manner contemplated in such cases by the Imperial Conference of 1926.

The instruments of ratification of the Treaty by His Majesty in respect of the several parts of the British Empire were formally deposited at Washington on the 2nd of March, 1929, the instruments in respect of Canada and the Irish Free State by the Ministers representing in the United States the interests of those Dominions, those in respect of the United Kingdom and the Dominions not then separately represented at Washington by His Majesty's Ambassador.

Conference on the Operation of Dominion Legislation and Merchant Shipping Legislation, 1929.

A Conference opened in London in October, 1929, to consider the matters which the Imperial Conference of 1926 (pages 18 and 19 of Cmd. 2768) had recommended should be considered by an Expert Committee and a special Sub-Conference on Merchant Shipping Legislation. Representatives of the United Kingdom and all the Dominions except Newfoundland were present; it was also arranged between the Governments that India should be represented for the discussion of Merchant Shipping and of such other particular subjects arising at the Conference as might be of direct interest to India. The unanimous report of the Conference was communicated to the Governments concerned, and was subsequently published as Cmd. 3479.

Signature of the Optional Clause of Article 36 of the Statute of the Permanent Court of International Justice.

At the time of the Imperial Conference of 1926, a general understanding was reached that none of the Governments represented at the Conference would take any action in the direction of acceptance of the compulsory jurisdiction of the Permanent Court of International Justice without bringing the matter up for further discussion. During 1929, consultations took place between His Majesty's Governments regarding the acceptance of the Optional Clause of Article 36 of the Statute of the Court, and these consultations were continued in September between the delegates of the United Kingdom, the Dominions and India at the Assembly of the League of Nations at Geneva. As a result, the Clause was accepted during September on behalf of all parts of the British Empire, signatures being subject to ratification and declarations being made at the time of signature, indicating the conditions attached to acceptance of the compulsory jurisdiction of the Court (see pages 4 and 5 of Cmd. 3452 for texts). The necessary instruments of ratification had all been deposited by August, 1930.

London Naval Conference, 1930.

A Naval Conference was held in London in January, 1930, between the Powers which had participated in the Washington Naval Conference, 1921-22, arrangements for the representation of the several parts of the Empire being on similar lines to those made in connection with the Geneva Naval Conference, 1927. The Treaty which resulted from the Conference (see Cmd. 3556), was signed on behalf of the several parts of the Empire in the manner recommended by the Imperial Conference of 1926, and the necessary instruments of ratification were deposited by the end of the year, and the Treaty came into force as between the United States of America, the Members of the British Commonwealth of Nations, and Japan, on the 31st December, 1930.

The Imperial Conference met in October, 1930, under the Chairmanship of the Right Hon. J. Ramsay MacDonald.

Digitized by Google

A considerable part of its discussions on questions affecting Inter-Imperial Relations was devoted to consideration of the Report of the Conference of 1929 on the Operation of Dominion Legislation (Cmd. 3479 see p. lxxx). Agreement was reached on the provisions of the legislation which would require to be passed by the United Kingdom Parliament to give legal effect to the recommendations of that Report, and also on the procedure to be adopted preparatory to such legislation. The Conference also considered and adopted recommendations on other matters dealt with in the Report of the Conference of 1929, viz.: Nationality and, under the heading of Defence Questions, Discipline of Armed Forces, and Prize Law and Procedure. On the subject of Merchant Shipping a draft agreement was drawn up to provide for the future regulation of matters of common concern relating to Merchant Shipping, following the recommendations of the Report of the Conference of 1929. Agreement was also reached on provisions for the setting-up of an *ad hoc* arbitral tribunal by agreement between the parties, for the settlement of disputes which might arise between the Members of the British Commonwealth.

Imperial Conference 1930 (Cmd. 3717 and 3718). Questions Affecting Inter-Imperial Relations.

The Conference also placed on record a statement as to the appropriate procedure in regard to the appointment of Governors-General in view of the position of Governors-General as declared by the Imperial Conference of 1926 (see p. lxxv). A further review took place of the system of communication and consultation in relation to foreign affairs, and certain recommendations were made in regard to the Channel of Communication between Dominion Governments and Foreign Governments. The precedence granted in 1924 to the High Commissioners for the Dominions in London (see p. lxxiii) was discussed, and it was intimated by His Majesty's Government in the United Kingdom that they were prepared to recommend to the King that the Dominion High Commissioners should on all ceremonial occasions (other than those when Ministers of the Crown from the respective Dominions were present) rank immediately after Secretaries of State, that is, before all Cabinet Ministers in the United Kingdom, except Secretaries of State and those Ministers who already have higher precedence than Secretaries of State. A notification of His Majesty's directions in this matter appeared in the "*London Gazette*" of the 27th January, 1931.

In the sphere of foreign affairs, apart from the review of certain special questions of foreign policy, the main work of the Conference was the discussion of the means by which the Members of the British Commonwealth could best co-operate in promoting the policy of disarmament and world peace. These matters were referred to a Committee which, in the course of its work, considered three specific aspects of the problem, namely, the question of accession to the General Act for the Pacific Settlement of International Disputes, the proposals before the League of Nations to bring the Covenant of the League into harmony with the Pact of Paris, and the text of the draft Disarmament Convention, drawn up, in a provisional form, by the Preparatory Commission for a general Disarmament Conference. The Conference recorded agreed conclusions of a general nature on all these matters.

Foreign Affairs, Arbitration and Disarmament.

Discussions took place on matters of common interest connected with defence between representatives of the respective services in the United Kingdom and the Dominions.

Defence.

It was recommended, as a result of discussion between representatives of the United Kingdom, the Commonwealth of Australia and New Zealand, that the existing policy of the ultimate establishment of a definite naval base at Singapore should be maintained, but that, apart from existing contracts and the completion of the air base, the remaining expenditure required for completion should be deferred for five years.

Singapore Base.

Economic Questions.

The work of the Conference on the economic side was primarily concerned with the examination of large questions of policy connected with the promotion and development of Inter-Imperial Trade. At an early stage in the Conference the detailed examination of these questions was remitted to a Committee on Economic Co-operation. This Committee made considerable progress in the examination of the proposal for the establishment of a fixed quota for Dominion wheat milled in the United Kingdom, and the Government of the United Kingdom undertook to examine carefully the Report of the Committee on this subject in consultation with the Governments of the wheat-growing Dominions and of India.

The Committee on Economic Co-operation also examined questions concerning the adoption of quotas for commodities other than wheat, import boards, bulk purchase schemes and the organisation of channels of trade; its report on these subjects was referred to the Governments concerned for consideration.

At the conclusion of the Conference, after passing a resolution recording their belief in the importance of the further development of Inter-Imperial markets, the Conference resolved that, as they had not been able, within the time limit of their deliberations, to examine fully the various means by which Inter-Imperial trade might here be maintained and extended, the Economic Section of the Conference should be adjourned to meet at Ottawa within the next twelve months when that examination would be resumed with a view to adopting the means and methods most likely to achieve the common aim.

The Committee on Economic Co-operation also considered the future work of the Imperial Shipping Committee, the Imperial Economic Committee and the Empire Marketing Board, and resolutions on these subjects were adopted by the Conference.

The Committee appointed to consider matters relating to civil aviation expressed the hope that the next stage in the development of Empire air communications, viz., the opening in 1931 of a regular air service between England and South Africa, would be followed at an early date by an extension of the regular weekly air service between England and India as far as Australia.

Other Committees which were set up on the economic side of the Conference dealt *inter alia* with questions of Communications (other than transport), Oversea Settlement, Forestry, Research, Mineral Resources, the International Institute of Agriculture, Cotton Growing, Petroleum Production and Refining, Oversea Mechanical Transport, arrangements for a Conference of Statisticians, the use of Cinematograph Films for the Education of Producers, and the Standardisation of the Form of Customs, Invoices and Certificates thereon. Resolutions were adopted by the Conference on all these questions.

A Conference on Standardisation took place at the same time as the Imperial Conference and the Report of this Conference (Cmd. 3716) was considered by the Imperial Conference, which adopted the Resolutions put forward therein.

Action in 1931 on the Resolutions of the Imperial Conference, 1930.

In accordance with the recommendations of the Imperial Conference, 1930, resolutions were passed before the end of July 1931 by all the Dominion Parliaments approving the legislation proposed to give effect to the report of the Conference of 1929 on the Operation of Dominion Legislation (Cmd. 3479 *see* p. lxxx). The legislation required was accordingly passed by the United Kingdom Parliament in November and December and received the Royal Assent on the 11th December, 1931 as the Statute of Westminster, 1931 (22 Geo. V. cap. 4).

On the 10th December, 1931, an agreement relating to Merchant Shipping legislation was signed on behalf of the United Kingdom and all the Dominions, in the form approved at the Imperial Conference of 1930 (pages 32 to 37 of Cmd. 3717).

Digitized by Google

In May, 1931, it was announced that it had been decided to appoint a High Commissioner in the Commonwealth of Australia for His Majesty's Government in the United Kingdom (*see* page lxxvii as to the establishment of similar posts in Canada and the Union of South Africa) and that, pending the appointment of a High Commissioner, the duties of the post would be performed by the existing migration representative under the designation of United Kingdom Representative.

Diplomatic & Consular Representation of the Dominions in foreign countries.

A post of Irish Free State Minister at Brussels was established during 1931: it was arranged that this post should be held, jointly with his existing post, by the Irish Free State Minister at Paris (*see* page lxxix). In addition to the post of Consul-General for the Irish Free State in the United States (*see* page lxxx) two posts of Irish Free State Consuls were established during 1931 at New York and at Boston respectively.

General Act for the Pacific Settlement of International Disputes.

During 1931 accession to the General Act for the Pacific Settlement of International Disputes (Cmd. 3930) was effected on behalf of all the Members of the British Commonwealth of Nations except the Union of South Africa. In the case of the United Kingdom and certain other Members, of the Commonwealth, this accession was subject to certain conditions, which are indicated on pages 14 and 15 of Cmd. 3930.

Economic Section of Imperial Conference.

As the result of further communications between the Governments concerned the proposed meeting at Ottawa (*see* page lxxxii) was postponed and arrangements were made, after the change of Government in the United Kingdom in the autumn of 1931, for the Conference to meet at Ottawa in July, 1932.

Air Mail Services.

The first regular air mail left England for Tanganyika Territory on the 28th August, 1931, and in January, 1932, a through service to Cape Town was instituted. A considerable advance was made in 1933 towards the realization of the project for a through British Air Service between England and Australia by the extension of the existing England–India Service by Imperial Airways in July of that year to Calcutta, in October to Rangoon, and in December to Singapore. In 1934 the final stage of the route was completed and a regular through service between England and Australia opened by the departure of the airmail from Croydon on 8th December and from Brisbane on 10th December. The section Singapore—Brisbane is operated by the Qantas Company of Australia which receives a subsidy from the Commonwealth Government. In 1935 second weekly air services between England and South Africa and between England and Singapore were established to supplement the existing services on these routes. In the same year, negotiations with the Union and other African Governments for an accelerated and enlarged service to begin in 1937 and to carry all first class mail by air were also concluded. The service was to be performed by flying boats operating between England and Durban, and to be supplemented by branch services through Kenya and Tanganyika to Northern Rhodesia, between Lusaka and Germiston, and between Beira, Southern Rhodesia and Nyasaland. The service commenced in June, 1937. Carriage by air of all first class mail was extended to the route to India and Singapore in February, 1938, and to Australia in July, 1938. A conference was held in Ottawa in November and December, 1935, between representatives of the United Kingdom, Canadian and Irish Free State Governments to discuss arrangements

Digitized by Google

for experimental trans-Atlantic flights to be followed eventually by regular mail and passenger services across the Atlantic. A complete understanding was reached at this conference as to the basis upon which such services should be operated, and, after its conclusion, representatives of the three Governments concerned proceeded to Washington to discuss methods of co-operation over the trans-Atlantic routes with the United States Government.

Participation of Southern Rhodesia in Imperial Conference arrangements.

At the Imperial Conference of 1930, arrangements for the representation of the interests of Southern Rhodesia had been made whereby a Minister from the Colony and the High Commissioner for Southern Rhodesia in London advised the Secretary of State for Dominion Affairs on matters affecting Southern Rhodesia. Special arrangements were also agreed to by that Conference for the representation of Southern Rhodesia on Committees dealing with subjects, especially economic subjects, affecting Southern Rhodesia. Prior to the adjourned meeting of the Economic Section in 1932, consultation took place between the various Governments of the Commonwealth as a result of which it was agreed that the Government of Southern Rhodesia should send representatives to Ottawa who would attend the Conference as observers, with liberty, by permission of the Conference, to speak at its full meetings, and with a right to participate in the work of its Committees. Southern Rhodesia was represented at the Ottawa Conference on this basis by the Premier (Mr. H. U. Moffat) and the Treasurer (Mr. P. D. L. Fynn).

Imperial Economic Conference, 1932. (Cmd. 4174 and 4175.)

The adjourned Economic Section of the Imperial Conference, 1930, met at Ottawa on the 21st July, 1932, under the Chairmanship of the Right Honourable R. B. Bennett, Prime Minister of Canada, and was formally opened by the Governor-General (The Earl of Bessborough) who delivered a message from His Majesty the King. The Conference was known as the Imperial Economic Conference, 1932. The Conference established five committees who, assisted in their work by the formation of a number of sub-committees, submitted reports and resolutions which were adopted by the Conference. The subjects considered by the Committees were respectively :—

(1.) *Promotion of trade within the Commonwealth.*—Resolutions were adopted with regard to the percentage of Empire content necessary to qualify for preference, and with regard to export bounties and anti-dumping duties. In taking note of the trade agreements concluded at the Conference between the Governments of the Commonwealth, the Conference adopted a resolution recording its conviction :—

"That by the lowering or removal of barriers among themselves provided for in these Agreements, the flow of trade between the various countries of the Empire will be facilitated, and that by the consequent increase of purchasing power of their peoples, the trade of the world will also be stimulated and increased ;

Further, that this Conference regards the conclusion of these Agreements as a step forward, which should in the future lead to further progress in the same direction, and which will utilize protective duties to ensure that the resources and industries of the Empire are developed on sound economic lines."

Digitized by Google

(2.) *Customs Administration.*—Resolutions were adopted emphasising the desirability of avoiding uncertainty, friction and delay in connexion with the importation of goods.

(3.) *Commercial relations with foreign countries.*—A statement was adopted to the effect that it was the policy of the Governments of the Commonwealth not to allow treaty obligations entered into with foreign countries to interfere with mutual preferences accorded between Governments of the Commonwealth. A statement was also adopted on the subject of most-favoured-nation rights in relation to regional agreements between foreign countries.

(4.) *Monetary and financial questions.*—Resolutions were adopted regarding the measures tending to produce a rise in the level of wholesale prices and regarding the restoration of a satisfactory international money standard.

(5.) *Methods of economic co-operation.*—A recommendation was adopted, subject to certain reservations by the representatives of the Union of South Africa and the Irish Free State, providing for the appointment of a Committee composed of representatives of the Governments participating in the Conference, to consider the means of facilitating economic consultation and co-operation. The terms of reference included a survey of the functions and financial bases of various organisations already in existence which were enumerated in a special report. Resolutions were adopted also on industrial standardisation, grading of agricultural products, industrial co-operation, and films and radio.

The trade agreements referred to under the work of the Committee on the promotion of trade within the Commonwealth were negotiated at a series of special inter-delegation meetings.* The seven agreements entered into on behalf of the United Kingdom, which included special provisions relating to the non-self-governing Colonies, Protectorates and Mandated Territories, are printed in Cmd. 4174.

Since the Imperial Conference of 1930 the fiscal system of the United Kingdom had undergone a profound change, and, by the time of the Ottawa Conference, tariff duties, hitherto limited to a comparatively few commodities and imposed primarily for revenue purposes, had been widely extended by the Import Duties Act, 1932. While the preferential rates applicable to Empire products under legislation prior to the Import Duties Act had been left undisturbed, in all cases where a duty was imposed under that Act, admission free of duty had been granted unconditionally to the Colonial Empire and provisionally granted to the produce of the Dominions, India and Southern Rhodesia. These latter provisions for duty-free entry were due to expire on the 15th November, 1932.

Among the principal provisions of the agreements concluded at Ottawa were undertakings on the part of the United Kingdom to continue for the parts of the Empire concerned the duty-free admission of goods under the Import Duties Act, and to grant additional preferences, which were effected for the most part by raising the rates of duty already applicable to foreign goods. In a few cases duties were imposed on foreign commodities which had hitherto been admitted duty-free. On certain specified goods it was arranged that an agreed margin of preference should not be reduced without reference to the Dominions concerned. In the case of certain meats preferential arrangements were made by way of the quantitative

* See page xcii regarding the subsequent negotiations in 1937 and 1938.

Digitized by Google

regulation of imports without the imposition of a duty. In order to implement these undertakings the Ottawa Agreements Act, 1932, was passed on 15th November, 1932.

Reciprocal benefits accorded to the United Kingdom by other contracting Governments of the Commonwealth included the grant of increased tariff preferences (either by the lowering of duties on United Kingdom goods, or the increase of duties on foreign goods); provisions in certain cases with regard to the holding of enquiries by Tariff Boards, or otherwise, prior to the increase of any duty on United Kingdom goods, and to the rights of audience for United Kingdom producers at such enquiries; and acceptance of the principle that, subject to special consideration in the case of industries not fully established, protective duties should not exceed such a level as would give United Kingdom producers full opportunity of reasonable competition on the basis of the relative cost of economical and efficient production.

A list showing the trade agreements entered into between Governments of the Commonwealth other than the United Kingdom appears on page 62 of Cmd. 4175.

Position of Irish Free State in relation to the Ottawa Conference.

No agreement was concluded at Ottawa between the United Kingdom and the †Irish Free State on account of the differences between the two Governments which had arisen earlier in the year in relation to the Treaty settlement of 1921, with the consequence that goods from the Irish Free State ceased from 15th November, 1932, to enjoy the preferential rates provisionally granted by the Import Duties Act. Agreements were, however, concluded between the Irish Free State and Canada and the Union of South Africa.

Work of the Empire Marketing Board, 1930-32.

In 1931 the limitation of the Empire Marketing Board's Vote to the furtherance of marketing "in the United Kingdom" was removed with effect from the 1st April, 1931, and the Board became thus empowered to further the marketing of Empire products in any part of the world. The Board's Vote for that year was £490,000. In 1932 the Board's annual Vote was further reduced to £300,000, and the position and activities of the Board were considered at the Ottawa Conference in July, 1932, in the light of conclusions there reached on the subject of Imperial Preference. It was arranged that the future of the Board, as of other organs of Imperial co-operation, should be reviewed by a special Empire Committee which should meet in London in 1933, and that meantime His Majesty's Government in the United Kingdom should furnish the necessary resources for the continuance of the Board's essential work to the end of September, 1933.*

Resident Minister of the Commonwealth of Australia in London.

In 1932, the Right Honourable S. M. Bruce, Minister in the Commonwealth Government, was appointed to act as Resident Minister in London, discharging amongst other duties the functions ordinarily exercised by the High Commissioner for the Commonwealth. On accepting appointment in 1933 as High Commissioner for the Commonwealth, he relinquished the appointment of Resident Minister in London, and ceased to be a member of the Commonwealth Government.

* See on page lxxxvii, under heading of Imperial Committee on Economic Consultation and Co-operation, 1933.

† See page xciii regarding the Trade Agreement concluded in 1938.

Following on President Hoover's offer of a year's moratorium as from the 1st July, 1931, to the debtors of the United States and the decision of His Majesty's Government in the United Kingdom to suspend for a similar period inter-governmental debts due to them, His Majesty's Government offered a similar suspension to those of the Dominions which were indebted to the United Kingdom in respect of war obligations, namely the Commonwealth of Australia, New Zealand, the Union of South Africa and Newfoundland. The offer was accepted by the Commonwealth, New Zealand and Newfoundland, and has been renewed and accepted for the period which has elapsed since the Hoover year expired. His Majesty's Government in the Union of South Africa generously decided not to avail themselves of the offer to suspend payment and on the 31st August, 1934, they repaid the balance of the outstanding debt then amounting to £7,500,000. All of the Dominions entitled to a share of German reparation payments agreed to forgo such receipts during the Hoover year and subsequently up to the present date.

Reparations and Debts.

Canada, the Commonwealth of Australia, New Zealand and the Union of South Africa were represented at the Lausanne Conference which met in June, 1932, to consider the Reparation question, and were parties to the agreements negotiated at the Conference (see Cmd. 4126).

The United Kingdom, the Dominions Members of the League of Nations and India were represented at the Conference on the Limitation and Reduction of Armaments, which met at Geneva in February, 1932, and continued through the years 1932, 1933, and 1934.

Disarmament Conference.

In 1933 the appointment was made of a Consul (subsequently raised to Consul-General) for the Union of South Africa, at Hamburg. The French and German Consuls-General in the Union of South Africa were accredited to the Union Government as Chargés d'Affaires in 1933 and 1934 respectively.

Diplomatic and consular representation of the Dominions in foreign countries. (See pp. lxxix and lxxxiii)

In 1934 a considerable extension took place of the diplomatic representation of the Union of South Africa. Legations were established at Paris, Berlin, Lisbon, Stockholm, and Brussels, the last three being under the charge of the Ministers at Paris, Berlin, and The Hague respectively.

In 1935, an Irish Free State Legation was established at Madrid and a Spanish Legation at Dublin.

At the end of 1936 a Belgian Legation was established at Ottawa.

In accordance with the recommendation of the Imperial Economic Conference, 1932 (see (5) of page lxxxv), a Committee to consider the means of facilitating economic consultation and co-operation within the Empire met in London in February, 1933. Representatives of the United Kingdom, the Dominions, Southern Rhodesia and the Colonial Empire participated. The report of the Conference which was unanimous was communicated to the Governments concerned and was subsequently published as Cmd. 4335. It laid down a number of general principles in regard to the future organisation of agencies for inter-Imperial consultation and co-operation, made certain specific recommendations in regard to certain

Imperial Committee on Economic Consultation and Co-operation, 1933.

Digitized by Google

existing inter-Imperial scientific and economic services and activities, and recommended that the question of what research activities should in future be carried out co-operatively should be considered in the first instance by the Executive Council of the Imperial Agricultural Bureaux and subsequently by a Conference of the administrative and scientific heads of national research organisations and departments and of such other persons as the several Governments might select. The report was considered at a meeting in London at the end of July of representatives of the Governments of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa, the Irish Free State and India, who accepted generally the Committee's recommendations.

As a result of the acceptance by the several Governments of the recommendations in the Committee's report the Empire Marketing Board, as such, was disbanded with effect from the 30th September, 1933. Certain of the economic and statistical services carried on by the Board, *viz.*: (1) periodical market intelligence notes and (2) world surveys of production and trade, were transferred to the Imperial Economic Committee which, together with the Imperial Shipping Committee, has from the 1st October, 1933, onwards, been financed by the several Governments of the Commonwealth jointly, instead of as before, by His Majesty's Government in the United Kingdom alone. As regards research activities hitherto carried on by the Board, the Executive Council of the Imperial Agricultural Bureaux, to whom the question was referred in accordance with the recommendation of the Committee referred to above, recommended that certain of these should in future be continued on a similar basis of joint finance.

Conference of British Commonwealth Statisticians, 1935.

In accordance with the recommendation of the Imperial Conference, 1930, endorsed by the Imperial Economic Conference, 1932, and by the Imperial Committee on Economic Consultation and Co-operation, 1933, a Conference of British Commonwealth Statisticians was held at Ottawa from the 13th September to the 9th October, 1935, and was attended by representatives of the United Kingdom, Canada, Australia, New Zealand, the Union of South Africa, the Irish Free State, India, and Newfoundland.

Monetary and Economic Conference, 1933.

The United Kingdom and the Dominions were represented at the Monetary and Economic Conference which was held in London in 1933, under the auspices of the League of Nations. On the adjournment of the Conference a Declaration was issued in the names of the Commonwealth Delegations (other than that of the I.F.S.) putting on record their views on some of the more important matters of financial and monetary policy which were raised but not decided at the Conference (Cmd. 4403).

Wheat Conference, 1933.

The International Wheat Conference, the convention of which in August, 1933, was one of the results of the Monetary and Economic Conference was held in London under the Chairmanship of Mr. Bennett. Prominent parts were taken by the representatives of both Canada and the Commonwealth of Australia in the discussion between the producing countries which preceded the Conference, as well as at the Conference itself, which resulted in an agreement upon the policy to be adopted both by producing and importing countries with the object of securing an improved price for wheat.

Digitized by Google

The principal event during the year 1935 was the occurrence on the 6th of May of the twenty-fifth anniversary of the accession of King George V. Invitations were addressed to the Prime Ministers of the Dominions and Southern Rhodesia to attend the celebrations in London. The Prime Ministers of Canada, the Commonwealth of Australia, New Zealand, the Union of South Africa and Southern Rhodesia attended. The opportunity was taken to arrange for private and informal discussions with the Dominion Prime Ministers of matters of common concern, in particular in relation to foreign policy, but no official statement as to the course of the discussions was published.

The King's Silver Jubilee, 1935.

A Naval Conference opened in London in December, 1935, between the powers which had participated in the London Naval Conference of 1930. The Dominions were represented by their respective High Commissioners in London. The Treaty which resulted from the Conference in 1936 was signed on behalf of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand and India.

The London Naval Conference, 1935.

Action upon the decision to appoint a High Commissioner in the Commonwealth of Australia for His Majesty's Government in the United Kingdom, which was announced in 1931 (*see* p. lxxxii), was deferred during the ensuing period of financial stringency. It was announced in August, 1935, that Sir Geoffrey Whiskard, K.C.M.G., C.B., had been appointed to this post and that he would take up his appointment early in 1936.

High Commissioner for the United Kingdom in Australia.

In accordance with the recommendations of the Imperial Committee on Economic Consultation and Co-operation, (1933 *see* Cmd. 4335 and page lxxxvii), a British Commonwealth Scientific Conference met in London in September and October, 1936. Representatives of the United Kingdom, the Dominions, India, Southern Rhodesia and the Colonial Empire participated. The Report of the Conference was published as Cmd. 5341. The Conference made a number of recommendations upon projects involving co-operation and collaboration in scientific research within the Empire and particularly upon the organizations controlled by the Executive Council of the Imperial Agricultural Bureaux (*see* pp. xxvii *et seq.*). Amongst the most important of these was a recommendation for the provision for a further five years from the 1st April, 1937, of contributions to the eight agricultural Bureaux and the Institutes of Entomology and Mycology. It also recommended the establishment of two new Bureaux—of Dairy Science and Forestry—and the convening of a similar Conference between July and September, 1941.

British Commonwealth Scientific Conference.

In accordance with advice tendered by the respective Governments, the King approved, in July, 1936, the appointment of a Coronation Commission to consist of representatives of the United Kingdom, Canada, the Commonwealth of Australia, New Zealand and the Union of South Africa to meet in London for the purpose of considering those aspects of the arrangements for the Coronation which are of common concern. The following statement explanatory of the appointment was issued from Buckingham Palace:—

The Coronation Commission.

"It has been felt that the traditional procedure for making arrangements for the Coronation Ceremony needs to be supplemented, in view of the present

Digitized by Google

constitutional position, in order to provide suitable machinery for co-operation between the King's several Governments.

"The actual Ceremony takes place, of course, in the United Kingdom, and the matters solely affecting the United Kingdom, on which decisions are required, and executive action must be taken, will be dealt with by the Coronation Committee of the Privy Council and its Executive Committee which have already been set up.

"At the same time, in order to recognise the equal interest of the Dominions with the United Kingdom in those aspects of the Coronation which are of general concern, and with the object of harmonising ancient tradition with modern constitutional requirements, the King, as announced to-day, has appointed a special Coronation Commission to consider those aspects."

Imperial Conference, 1937 (Cmd. 5482). Subjects considered.

Advantage was taken of the presence of the Dominion Prime Ministers in London for the Coronation of His Majesty King George VI to hold an Imperial Conference, which was opened on the 14th May, 1937, two days after the Coronation ceremony. In the report of the Conference reference was made to the significance of the Coronation ceremony and the adoption of a revised form of the Coronation Oath, as marking the recognition of the principles underlying the British Commonwealth of Nations (pages 9—10 of Cmd. 5482). The main subjects dealt with by the Conference were foreign affairs and defence. Consideration was also given to the following: certain constitutional questions; a general review of the progress of Empire trade; Colonial affairs; questions arising in connection with shipping policy, including a review of the work of the Imperial Shipping Committee; civil air communications; certain other economic questions, viz., the work of the Imperial Economic Committee and a proposal for the establishment of an Empire Agricultural Council; New Hebrides and Polar questions.

Foreign Affairs.

In the sphere of foreign affairs a series of meetings of Principal Delegates was devoted to the consideration of various aspects of this subject under the three heads of the general international situation including the League of Nations; the European situation; and the Pacific and the Far East. A full and frank discussion took place and the Conference recorded the results of its deliberations on foreign affairs in the statement given on pages 14, 15 and 16 of Cmd. 5482.

Defence.

The Conference gave close attention to the subject of defence and considered ways in which it would be possible for the Governments concerned to co-operate in measures for their own security. The discussions began with a review of the events which led up to the adoption by His Majesty's Government in the United Kingdom of their rearmament programme, and included a detailed review of the state of defence in each of the countries represented at the Conference. Attention was given to the advantages attending co-operation in the production and supply of munitions and raw materials, as well as of food and feeding stuffs. Questions of mutual interest in this connection were examined by a committee and the Conference recommended that the interchange of detailed technical information on such questions should be continued between the technical officers of the Governments concerned. A statement regarding the defence discussions of the Conference is given on pages 16 to 20 of Cmd. 5482.

Digitized by Google

Certain constitutional questions raised by His Majesty's Government in the Union of South Africa, together with the question of the nationality of married women raised by His Majesty's Government in the Commonwealth of Australia, which had formed the subject of preliminary and informal discussions between advisers prior to the opening of the Conference, were referred to a Committee. This Committee presented a report dealing with nationality, treaty procedure and the nationality of married women which was adopted by the Conference. The report on nationality dealt with the relationship between the common status possessed by subjects of His Majesty and the particular status of membership of any one of the individual communities forming the British Commonwealth of Nations. The report on treaty procedure recognised that each Member of the British Commonwealth taking part in a multilateral treaty is, in the absence of express provision to the contrary, in no way responsible for the obligations undertaken by any other Member. The report on nationality of married women indicated that it was not found possible to arrive at an agreement in favour of any change in the existing law on this subject.

Constitutional Questions.

It had been agreed prior to the Conference that questions arising out of the Ottawa Agreements could best be dealt with as occasion offered in separate discussions between the individual Governments concerned and apart from the Conference, and there was accordingly no discussion on matters of detail affecting trade between the different parts of the British Commonwealth of Nations. A meeting of Principal Delegates was, however, held for the purpose of a general review of the progress of Empire trade. This meeting afforded a valuable opportunity for an interchange of views on economic questions of general concern.

Economic Questions.

General questions arising in connection with shipping policy, including the work of the Imperial Shipping Committee, were referred to a Committee. The Conference approved the report of this Committee, which dealt with questions of foreign discrimination against British shipping, the provision of additional statistics relating to shipping and the continuance of the work of the Imperial Shipping Committee.

The Conference also approved the report of a Committee set up to consider (1) the work of the Imperial Economic Committee and (2) the proposal for the establishment of an Empire Agricultural Council. This report recommended the continuance of the Imperial Economic Committee and the addition of a representative of Burma thereto, but considered that the establishment of an Empire Agricultural Council was not called for.

A Committee on Civil Air Communications discussed the prospect of establishing a British Commonwealth chain of air communications and the methods of co-operation which might be adopted by Members of the Commonwealth with this aim in view. The Conference adopted a number of resolutions proposed by the Committee on this question (see page 29 of Cmd. 5482). The Committee also arranged that the proposed air services across the Tasman Sea and Pacific Ocean should be discussed by representatives of the Delegations concerned.

Civil Aviation.

Digitized by Google

The position of the New Hebrides and certain Polar questions were examined by representatives of the Governments interested, and the Conference approved certain recommendations for co-operation between the Governments concerned on the latter subject.

Other Matters.

Arrangements were made in advance of the Conference for the special representation of Southern Rhodesia and Burma (which in April, 1937, was separated from India) as observers at the Conference. The Prime Minister of Southern Rhodesia (Mr. G. M. Huggins) and the Chief Minister of Burma (Dr. Ba Maw) were present at the Conference; they attended and spoke at Plenary Meetings, and at meetings of Committees where matters of special concern to them were under discussion.

Southern Rhodesia and Burma.

In 1937 the Empire Settlement Act, 1922, was continued for a further period of fifteen years by the Empire Settlement Act, 1937. During the fifteen years 1922–1937 of the operation of the principal Act, £6,082,042 were expended by the United Kingdom Government on schemes of assisted immigration and during that period 405,000 persons from the United Kingdom were assisted to settle oversea within the Empire. Assisted immigration which had been practically suspended to all Dominions as a result of the depression in 1931 was resumed to Australia in 1938.

Empire Settlement Act, 1937.

In 1937 the Trade Agreement concluded with Canada at Ottawa in 1932 was cancelled and replaced by a revised Trade Agreement dated 23rd February, 1937. This Agreement relaxed a considerable number of the margins of preference previously bound to the United Kingdom in the Canadian Customs Tariff. In this year also, there were negotiations at the request of the Governments of New Zealand and of the Union of South Africa, for a revision of the respective Trade Agreements, but in the result the Agreements were allowed to remain in force without modification. This also applies so far as similar negotiations in 1938 with the Government of the Commonwealth of Australia are concerned.

Trade Agreements.

In 1938 agreement was reached after discussion between representatives of the United Kingdom, the Commonwealth of Australia and New Zealand for the formation of a new company to conduct a regular air service twice weekly between Australia and New Zealand, and for the carriage thereby of all first class mail. It was proposed that the service should start in the early part of 1939.

Air Mail Services.

It was announced in July, 1938, that it had been decided to appoint a High Commissioner in New Zealand for His Majesty's Government in the United Kingdom, and that Sir Harry Batterbee, K.C.M.G., K.C.V.O., had been appointed to the post and would take up his appointment early in 1939.

High Commissioner for the United Kingdom in New Zealand.

In August, 1938, Lord Stanley, Secretary of State for Dominion Affairs, visited Canada and performed the opening ceremony at the Canadian National Exhibition at Toronto.

Visit of U.K. Minister to Canada.

In June, 1937, the draft of a new Constitution for the Irish Free State was approved by the Parliament of the Irish Free State and subsequently adopted by referendum. It came into force on the 29th December, 1937.

Constitution of Eire.

Article 4 of the Constitution provides that "The name of the State is Eire, or, in the English language, Ireland". The United Kingdom Government issued a statement on the 30th December, 1937, regarding their position in the following terms:—

"His Majesty's Government in the United Kingdom have considered the position created by the new Constitution which was approved by the Parliament of the Irish Free State in June, 1937, and came into force on December 29th. They are prepared to treat the new Constitution as not effecting a fundamental alteration in the position of the Irish Free State, in future to be described under the new Constitution as 'Eire' or 'Ireland', as a member of the British Commonwealth of Nations.

"His Majesty's Government in the United Kingdom have ascertained that His Majesty's Governments in Canada, the Commonwealth of Australia, New Zealand, and the Union of South Africa are also prepared so to treat the new Constitution.

"His Majesty's Government in the United Kingdom take note of Articles 2, 3 and 4 of the new Constitution. They cannot recognise that the adoption of the name Eire or Ireland, or any other provisions of those Articles, involves any right to territory or jurisdiction over territory forming part of the United Kingdom of Great Britain and Northern Ireland, or affects in any way the position of Northern Ireland as an integral part of the United Kingdom of Great Britain and Northern Ireland. They therefore regard the use of the name Eire or Ireland in this connexion as relating only to that area which has hitherto been known as the Irish Free State."

In January, 1938, negotiations were opened between representatives of the Governments of the United Kingdom and of Eire which were concluded in April, 1938, by the signature of three agreements, described respectively as "the Agreement regarding Articles 6 and 7 of the Articles of Agreement of December 6, 1921", "the Financial Agreement" and "the Trade Agreement". The agreements were published as Cmd. 5728 and were subsequently confirmed by resolutions of the Parliament of Eire and by an Act of the United Kingdom Parliament entitled the Eire (Confirmation of Agreements) Act, 1938 (1 and 2 Geo. 6, Ch. 25). Section 1 of that Act provided that the territory which under previous United Kingdom statutes was required to be styled and known as the Irish Free State should be styled and known as Eire, and that, accordingly, references in any enactment to the Irish Free State should be construed as references to Eire.

Agreements between the United Kingdom and Eire.

On 17th November, 1938, a Trade Agreement was concluded between the Governments of the United Kingdom and the United States after prolonged negotiations which could not be formally put in hand until an assurance had been received from the Dominions concerned that they would be prepared to relax some of their guaranteed privileges in the United Kingdom market (under the Trade Agreements concluded at Ottawa in 1932 and subsequently). These privileges

U.S.—U.K. Trade Agreement.

Digitized by Google

related to the duties on goods such as wheat, apples, pears, certain canned fruits, chilled or frozen salmon, honey and timber, and formal letters were eventually exchanged with the Dominions concerned regarding the extent of the relaxations. In a foreword to the text of the Agreement, as published in the United Kingdom, the United Kingdom Government expressed their cordial appreciation to the Governments concerned of their readiness to facilitate the conclusion of the Agreement by consenting to such modifications of their rights as were necessary to enable it to be concluded.

A complementary Agreement was concluded on the same date between the Governments of Canada and the United States.

PART II.—INTRODUCTION.

The greater portion of the Colonial Empire has accrued within comparatively recent times, though the first attempt at Colonial settlement, that of Sir Humphrey Gilbert in Newfoundland, was made as early as 1583. The Treaty of Utrecht (1713) left this country in possession, in addition to the New England States and other Settlements on the N. American Continent, only of Newfoundland, New Brunswick, Nova Scotia, St. Helena, two slave-trading stations at the Gambia and the Gold Coast, the Bermudas, Jamaica, Barbados, the Bahamas, St. Kitts, Nevis, Antigua, Montserrat, the Virgin Islands and Gibraltar. Until the great wars which marked the second half of the eighteenth century, there was little further territorial expansion. The States of New England, and the steadily increasing business of the East India Company, afforded sufficient outlet for the colonising activities; but when the progress of the Seven Years' War caused a conflict with France in North America and India, an era of colonial expansion began. The Treaty of Paris (1763) added to the Empire the rest of Canada and Dominica, St. Vincent, Grenada, the Grenadines and Tobago in the West Indies. The nucleus of the Colony of Sierra Leone was acquired in 1788. By the Treaty of Amiens (1802) the Netherlands and Spain ceded Ceylon and Trinidad respectively. The two Treaties of Paris (1814 and 1815) added to the Empire the Cape, British Guiana, Malta, Mauritius, Seychelles, St. Lucia, and Tobago (which had been given back to France in 1783). The reign of Victoria saw the occupation of Natal, Rhodesia, Bechuanaland, Basutoland, and the Transkei, Zululand, British Columbia and the wide North-West Territories of the Canadian Dominion, as well as Australia, New Zealand, Tasmania and British New Guinea. Also Hong Kong, Labuan, Lagos, the greater portion of the Gold Coast, and Fiji were ceded and Cyprus and the basin of the lower Niger were acquired by agreements. From 1890 large expansion was witnessed in Africa, as a result of the arrangements between the United Kingdom, Germany, France, and Portugal for the delimitations of their respective possessions and spheres of influence in that continent; and, by the end of the 19th century the United Kingdom had established its claims, to the exclusion of other Powers, over the wide territories now known as Kenya, Zanzibar, Uganda, Nyasaland, British Somaliland, the Protectorate of Nigeria, the Northern Territories of the Gold Coast, and the Protectorate of Sierra Leone. A Protectorate was proclaimed over Amatongaland, now part of Natal, in 1895. In 1898 Weihaiwei was obtained on lease from China, as well as an extension of British Kowloon. The former was given back to China on 1st Oct., 1930. In 1899, by an arrangement with Germany, certain of the Solomon Islands were transferred to the British sphere of interest. The Orange Free State and the Transvaal were annexed in 1900. In the same year Tonga, in the Western Pacific, came under British protection, and the Cook Islands, Savage Island and other small islands were annexed.

British protection has been extended to all that part of the Malay Peninsula which is not in the possession of Siam, and the government of the various States is carried on in accordance with the advice of British Residents or Advisers.

The Great War of 1914–18 resulted in extensive territories, formerly belonging to Germany and Turkey, being placed under British administration under mandates from the League of Nations.

Of these, the following were entrusted to the control of the Government of the United Kingdom:—

Tanganyika Territory, *i.e.*, the former German East Africa, less the north-west corner which was assigned to Belgium.

Cameroons under British Mandate, a strip bordering on Nigeria of the former German Protectorate of the Cameroons.

Togoland under British Mandate, a strip of former German Togoland bordering on the Gold Coast.

Palestine and Trans-Jordan.

To Australia were entrusted German New Guinea and the neighbouring German islands in the Pacific Ocean; to New Zealand, the German Samoan Islands; and to the Union of South Africa, German South West Africa.

A mandate for Nauru was given to the British Empire.

Including India but excluding the countries held on mandatory conditions, the Empire now extends over 11 millions of square miles. The area of the oversea Empire excluding India is nearly 80 times that of the United Kingdom, and the estimated population is 64¾ millions.

Of the total area of over 9½ million sq. miles, the self-governing Dominions (exclusive of Ireland) cover about 7½ million sq. miles, inhabited by a population of 23 millions, so that the area more or less under the direct authority of the Home Government amounts to 2 million sq. miles, with a population of about 48 millions. All but about 300,000 sq. miles of this is in Africa.

Digitized by Google

Since 1870 British troops have been gradually withdrawn from all the self-governing Dominions, and now the land defence of these Dominions rests entirely on their local forces. Of the Colonies, Gibraltar, Malta, Cyprus, Aden, Mauritius, Ceylon, Straits Settlements, Hong Kong, Jamaica, and Bermuda possess British garrisons, while there are R.A.F. units in some of them. British forces are also stationed in Palestine and Trans-Jordan. The Naval defence of the Empire still rests mainly on the Imperial Navy, though, as will be seen from the pages relating to the Imperial Conference, most of the self-governing Dominions now give substantial assistance. There are Imperial naval stations at Simon's Town, Bermuda, Ceylon, Malta, Gibraltar, Singapore and Hong Kong.

An account of the Colonial Conferences of 1887, 1894, 1897, 1902 and 1907, the Imperial Conference of 1911, and Defence Conference of 1909, the Imperial War Conferences of 1917 and 1918, the Conferences of 1921, 1923, 1926 and 1930, the Imperial Economic Conference, 1932, the various recent international Conferences in which the Dominion Governments have been concerned and the Conference of 1937 is given under the heading "Imperial Conference."

A conference of Governors and other official representatives of the Dependencies not possessing responsible government was summoned by Mr. Amery, Secretary of State for the Colonies, in May, 1927 ,under the style of "The Colonial Office Conference". In all twenty-six Governments were represented. The Conference under the chairmanship of the Secretary of State, sat for three weeks, and the list of agenda comprised a great variety of subjects of concern to the Colonies generally, *e.g.*, recruitment and training of Colonial Civil Servants and the conditions of their service, medical, agricultural, forestry and transport questions, organisation of scientific research, education, cinematograph films, Colonial Trade Agencies in London and Colonial participation in trade exhibitions, civil air development, wireless communications and broadcasting, co-operation in the exchange of information, etc.

A full summary of the proceedings and conclusions of the Conference was published by the Stationery Office as Cmd. 2883 and Cmd. 2884 (1/3 and 4/6 respectively).

The second Colonial Office Conference was held in June and July, 1930. Twenty-seven Oversea Governments were represented and Observers on behalf of the Administrations of the following countries also attended the meetings:—India, Union of South Africa, Southern Rhodesia, South African High Commission Territories, Sarawak, and North Borneo.

The Secretary of State for the Colonies presided over the Conference which, as in 1927, was composed solely of official representatives. Amongst the subjects under discussion were the Colonial Development Fund; broadcasting, civil aviation, and mechanical transport developments; the organization of the Colonial Service as a whole, especially in the light of the Report of the Committee on the system of appointment in the Colonial Office and the Colonial Services (*see* Cmd. 3554); the organization of the scientific services including proposals for a unified agricultural service (*see* Cmd. 3049); labour questions; prison administration and the treatment of juvenile offenders. On a great number of these questions a general agreement on policy was secured, and the Conference unanimously recorded its emphatic opinion that such periodical opportunities of reviewing subjects of general concern were of considerable value to Colonial Administrations.

A summary of the proceedings of the Conference was published by the Stationery Office as Cmd. 3628 (price 2/-).

PART II.—B. HISTORICAL AND STATISTICAL ACCOUNT, WITH PUBLIC ESTABLISHMENTS, OF THE OVERSEA DOMINIONS AND OTHER TERRITORIES WITH WHICH THE DOMINIONS OFFICE IS CONCERNED.

AUSTRALIA.

THE COMMONWEALTH.

The Commonwealth of Australia is constituted under an Act passed by the Parliament of the United Kingdom in 1900—63 & 64 Vict., cap. 12. By this Act it was made lawful for the Queen, with the advice of the Privy Council, to proclaim that, on and after a day appointed in the proclamation, the people of New South Wales, Victoria, South Australia, Queensland, and Tasmania, and also if Her Majesty were satisfied that the people of Western Australia had agreed thereto, of Western Australia, should be united in a Federal Commonwealth under the name of the Commonwealth of Australia.

A proclamation was accordingly issued by Her Majesty on the 17th of September, 1900, appointing the 1st of January, 1901, as the day on which the Commonwealth should be established—Western Australia being included as an original State in accordance with the result of a referendum taken before that date in the Colony and with Addresses passed by both Houses of the Legislature.

A short history of the events leading up to the establishment of the Commonwealth, and of the provisions of the Constitution, as fixed by the Act of Parliament above quoted, is given below. The account of the different States of the Commonwealth is arranged alphabetically, and a description of territories dependent on the Commonwealth follows.

The Earl of Hopetoun (afterwards Marquis of Linlithgow) was selected as the first Governor-General of the Commonwealth, a Commission was issued to him on the 29th of October, 1900, and he was sworn on the 1st January, 1901.

It was announced in September that the Queen would issue a special Commission to H.R.H. the Duke of York, for opening in Her Majesty's name the first session of the Commonwealth Parliament in the spring of 1901, and that H.R.H., accompanied by the Duchess of York, would pay visits to the different States of the Commonwealth. At the invitation of the Government of New South Wales, a representative body of troops, about 1,000 strong, sailed from England in November, to attend the inauguration of the Commonwealth at Sydney on the 1st of January, 1901. A small detachment of officers and non-commissioned officers of the Indian Army also proceeded to Sydney on the same occasion. The Commission issued by the Queen to the Duke of York was renewed on the accession of King Edward VII. The Duke and Duchess landed at Melbourne on the 6th of May, and on the 9th the Duke opened the first session of the first Commonwealth Parliament in the Exhibition Building at Melbourne. The Duke and Duchess subsequently visited Brisbane, Sydney, New Zealand, Hobart, Adelaide and Perth, leaving Australia on the 26th of July to continue their tour to Mauritius, South Africa and North America.

Australian Federation.

Until the passing of the Commonwealth of Australia Constitution Act the only means of joint legislative action in Australia was provided by the "Federal Council of Australasia Act, 1885" (48 & 49 Vict., cap. 60). This Act created a Council of two members from each Colony which adopted the Act, except in the case of Crown Colonies, which had only one member each, with power to Her Majesty at the request of the Legislatures of the Colonies to increase the number of representatives for each Colony by Order in Council. Such an increase was upon the request of the Legislatures made by Her Majesty on 3rd March, 1894, when an Order in Council was passed, providing that each Colony which was or should be represented on the Federal Council, except any Crown Colony, be represented by five members. This Council had power to legislate with regard to the relations of the Colonies with the Islands in the Pacific, prevention of the influx of criminals, fisheries in Australasian waters beyond territorial limits, service and enforcement respectively of civil and criminal process out of the jurisdiction of the issuing Court, the enforcement of judgments beyond the limits of the Colony where they had been passed, the extradition of offenders, and the custody of offenders on ships belonging to Colonial Governments beyond territorial limits, and generally on any matters referred to it by Order of Her Majesty in Council on the request of the Colonial Legislatures. The Legislatures of any two or more Colonies might also refer to it for legislation questions of defence, quarantine, patents, copyright, bills of exchange, recognition of marriage and divorce, naturalisation, status of

Digitized by Google

corporations, and joint stock companies, and other matters of general Australasian interest; but legislation of the Council on such matters was to extend only to the Colonies by whose Legislatures the matters should have been so referred, and such Colonies as might afterwards adopt the same. It had also power to decide on any questions affecting the mutual relations of any two Colonies referred to it by consent. The Council was to meet at least once in every two years.

The first meeting took place on 25th January, 1886, when representatives were present from Victoria, Queensland, Tasmania, Fiji, and Western Australia. Measures were passed authorising the service of the civil powers and the enforcement of the judgments of the Courts of the different Colonies throughout the territories of all those represented, and various important questions were discussed, including the defence of King George's Sound and Torres Straits. The second session opened on 16th January, 1888. An address was adopted to Her Majesty respecting the deportation of French criminals to the Pacific. An Act was also passed to regulate the Pearl Shell and Bêche-de-mer Fisheries in Australasian waters adjacent to Queensland. The Council met for its third session on 29th January, 1889, when representatives from South Australia were present for the first time. An Act was passed to regulate the Pearl Shell and Bêche-de-mer Fisheries in Australian waters adjacent to Western Australia. The amendment of the basis of representation in the Council was discussed at the session, and communications on the subject subsequently passed with the Imperial Government. The fourth session opened on 20th January, and closed on 24th January, 1891. South Australia was not represented, the Act (a temporary measure for two years only) under which that province joined the Council having expired. The only Bill passed was one to facilitate the recognition in other Colonies of Orders and Declarations of the Supreme Court of any Colony in matters of lunacy. An address to Her Majesty was also adopted referring to the desirability of British subjects being placed on an equal footing with subjects of other countries in regard to the acquisition of land in, and trading with, natives of the New Hebrides.

The fifth session was commenced on 26th January, 1893, when the Colonies of Victoria, Queensland, Tasmania, and Western Australia were represented. An Act was passed providing for the discipline and government of the garrisons established at King George's Sound and Thursday Island; and a resolution was adopted in favour of an increase in the number of representatives for each Colony, except any Crown Colony, to five. The Standing Committee was instructed to take steps for giving effect to this resolution, and also for securing the adhesion of the Colonies not represented in the Council. As the result of action taken by the Standing Committee, the Legislatures of all the Colonies in the Council addressed Her Majesty, requesting that the proposed increase in the number of representatives might be made; and, on 3rd March, 1894, Her Majesty was pleased to make an Order in Council providing "that each Colony which is or shall be represented in the said Council, except any Crown Colony, shall be represented by five members."

The sixth session opened on the 30th January, 1895, when the same four Colonies were represented as at the preceding session. There were present, for the first time, five delegates from each Colony. At this session no Bills were brought forward, but resolutions were adopted affirming the desirability of defining the status, and of granting facilities for the winding up of companies carrying on business in different Colonies; of rendering uniform the laws relating to banking; of establishing an effectual system of quarantine; of adopting a more economic method of raising public loans; and of taking steps with a view to the holding of a second Federation Convention. An address to the Queen was also adopted praying for the appointment of an Australian representative on the Privy Council Bench, in view of the special features often presented by Australian appeals.

The seventh session was commenced on 26th January, 1897, when the Colonies of Queensland, Tasmania, Victoria, and Western Australia, were represented. An Act was passed, upon a reference of the matter to the Council by the Legislatures of Victoria and Queensland, to provide for the naturalisation within the Australian Colonies, or some of them, of persons of European descent naturalised in any of such Colonies, also upon a reference of the subject by the Legislatures of Tasmania, Western Australia, Victoria, Queensland, an Act was passed to make provision for the enforcement in certain cases within the Australian Colonies, or some of them, of Orders of the Supreme Court of such Colonies for the production of testamentary instruments. The Council adopted an Address to Her Majesty, referring to the Address adopted in 1891 with regard to restrictions in the way of trade with the natives of the New Hebrides, urging that negotiations should be entered into with the other Powers concerned with a view to imposing on their subjects equal restrictions in that trade. This and all the previous sessions were held at Hobart. The Council resolved that the place of its next meeting should be Melbourne.

The Commonwealth Act.

Notwithstanding the existence of the Federal Council, however, a movement was made for the establishment of a more effective Federation, to embrace a Federal Executive, as well as Legislature, somewhat upon the model of Canada. Towards the end of 1889 negotiations were opened between the various Australasian Colonies, the result being that a Conference of the seven principal Australasian Colonies met in Melbourne, on the 6th February, 1890. At this Conference it was unanimously agreed that the best interests of the Australian Colonies would be promoted by their "early union under the Crown," and that the Legislatures of the various Colonies should be invited to appoint to a National Australasian Convention during the year 1890 delegates empowered to report upon the scheme for a Federal Constitution.

In accordance with these resolutions, delegates were appointed, and the Convention commenced its deliberations in Sydney on the 2nd March, 1891. After an animated discussion, which lasted more than five weeks, a "Bill to constitute a Commonwealth of Australia" was drawn up and adopted. The Convention recommended that this Bill should be submitted by the Parliaments for the approval of the people of the several Colonies. It provided for the union of the Australasian Colonies in a Federal Commonwealth under the Crown: for a Governor-General to be appointed by the Crown, who should be aided and advised by an Executive Council: the constitution of a Senate and House of Representatives, with certain definite powers, the latter to have the initiation of money bills,

Digitized by Google

which the former might pass or reject, but not amend: for the establishment of a Federal Judicature: the revenue of the Commonwealth to be derived from the Customs and Excise duties, and other taxation, which should be collected by Federal officers, and expended as required for Federal purposes, any surplus to be returned to the respective Colonies. It also provided for absolute free trade internally throughout the Commonwealth, so soon as the Parliament should have imposed uniform Customs duties. The draft Bill of 1891, though it crystallised the idea of Federation, failed to command the serious attention of the Legislatures, and Federalists began a popular agitation to place the movement on a new footing.

A meeting of the Premiers of all the Australasian Colonies took place in Hobart in January, 1895, and agreed to a scheme for framing a Federal Constitution to be submitted for the approval of their respective Parliaments. The Enabling Bill, agreed to at this Conference providing for the election by each Colony of 10 delegates to prepare a scheme of Federation, was adopted by the Parliaments of N. S. Wales, Victoria, S. Australia, and Tasmania, and in a modified form by Western Australia.

Delegates were accordingly duly elected and assembled in Convention at Adelaide on 22nd March, 1897, for the purpose of drafting a constitution. Having prepared a "Bill to constitute a Commonwealth of Australia," the Convention was on the 23rd April adjourned to reassemble at Sydney on 2nd September. The draft Bill was in the meantime submitted to the local Legislatures, and various amendments were suggested by those bodies. The Bill, together with those amendments, was further considered by the Delegates at the Sydney Session of the Convention, and a long discussion took place on various proposals submitted for settling questions of difference between the two Houses of the new Federal Legislature. Considerable progress was made with the rest of the measure, but the work of revision was not completed, and the Convention adjourned until 20th January, 1898, partly in the hope of seeing delegates from Queensland join in the final discussion. This hope was not realised, as the Queensland Legislature, for the second time, shelved the Enabling Bill.

The Convention met again at Melbourne on the 20th of January, 1898, and remained in session till the 17th of March, and a Bill was adopted which in accordance with the Federation Enabling Acts of the different Colonies was submitted to the popular vote for acceptance or rejection. In Victoria the polling was—For acceptance, 100,520; against, 22,099. The Bill was also accepted by the vote of the people in South Australia and Tasmania. But in New South Wales the statutory minimum number of 80,000 affirmative votes required by the Enabling Act of that Colony was not obtained, and the matter fell through for the time.

A further Conference of Premiers was held at Melbourne in January, 1899, to consider the objections of New South Wales; and this time Queensland was represented. The Premiers met in a spirit of compromise, and on the 2nd of February an agreement was come to which all the Premiers agreed to submit to their Parliaments for reference to the electors, it being understood that New South Wales should lead the way. South Australia, however, for purposes of local convenience, took a referendum vote upon the Bill on the occasion of the General Election, without waiting for New South Wales. This vote was taken on the 29th of April, when 65,990 votes were given for Federation and 17,053 against

In New South Wales, the Bill providing for the reference to the people of the amended draft constitution was passed by the Lower House on the 2nd of March, but in the Upper House amendments were made. One of these required that one-third of the electors on the register should vote for the Bill in order to secure its acceptance. The Bill as amended passed the Legislative Council on the 21st of March. On the 22nd March the Lower House rejected the amendments of the Upper House. The latter body refused to give way. A conference between the two Houses was held without result on the 28th of March. Mr. Reid, Premier of New South Wales, prorogued Parliament for a few days, and on his advice the Governor added twelve new members to the Council. The Bill was re-introduced in the Lower House, and passed on the 13th of April. It was accepted by the Legislative Council with an unimportant amendment (providing that a period of eight weeks should elapse before the referendum was taken) on the 20th of April, and on the 25th of April it was announced that the question would be submitted to the electors on the 20th of June. It was accepted by a majority of about 25,000.

On the 27th July, the amended Commonwealth Bill was accepted by overwhelming majorities in Victoria and Tasmania, and on the 2nd September by a majority of about 7,500 in Queensland. The delay in taking action in Western Australia led to some correspondence between Sir John Forrest, Premier of Western Australia, and Mr. Reid. Mr. Reid declared on behalf of the Federating Colonies that no amendments to meet the views entertained in Western Australia could now be considered; and the same assurance was repeated by Sir G. Turner, Premier of Victoria. Sir J. Forrest, in fulfilment of his undertaking at the Premiers' conference, brought the draft Constitution before the Legislature, which referred it to a Select Committee, who reported that it should not be accepted without considerable amendment. The Legislative Council finally refused to allow a referendum to be taken.

Addresses to the Queen from the five Colonies which had accepted the Constitution praying for the enactment of the Commonwealth Bill were received in the autumn of 1899.

As it appeared that some alterations in the Bill might be required by the Imperial Government, Mr. Chamberlain telegraphed to the Governor of New South Wales, expressing the hope that delegates were coming home to advise and assist during the passage of the Bill through Parliament.

Delegates were appointed, and reached England in March. Western Australia also sent a delegate to represent the views of that Colony, and the Agent-General for New Zealand was appointed to watch the interests of New Zealand.

The discussion between Her Majesty's Government and the Delegates turned chiefly on the clauses of the Bill relating to the Appeals to the Privy Council. Under the Bill, in Section 74, appeals were allowed both from the Supreme Courts of the States and from the Federal High Court, but there was a limitation in cases affecting the interpretation of the Constitution of the Commonwealth or of a State "unless the public interests of some part of Her Majesty's dominions other than the Commonwealth or a State are involved." Various memoranda passed on this subject of Clause 74, the delegates demurring to any alteration in the Bill, whilst Her Majesty's Government pointed out the difficulty of interpreting the Clause.

Digitized by Google

and the danger that it might unduly restrict the right of appeal in cases where the interests of foreigners or British subjects outside Australia were affected.

The Bill was introduced into Parliament with amendments to secure Her Majesty's prerogative to grant special leave of appeal from the High Court of the Commonwealth or the Supreme Court of any State to the Privy Council. But the discussion with the delegates continued, and two successive compromises were arrived at. First, the appeal on Constitutional questions was made dependent on the consent of the Executive Government or Governments concerned, and finally was made dependent on a certificate to be granted at the discretion of the High Court.

No other amendments of any consequence were made by Parliament in the Bill as received from Australia, except that provision was made for the inclusion of Western Australia as an original State, provided that Her Majesty was satisfied that the people of that Colony had agreed thereto prior to the issue of the Proclamation.

The Queen caused to be sent to Australia, for presentation to the Commonwealth Parliament, a duplicate of the Commission issued for the formal declaration of Her assent to the Act, together with the pen, inkstand, and table used on the occasion of its signature. She subsequently presented a duplicate of the Proclamation bringing the Act into force, duly signed and passed under the Great Seal.

Constitution of the Commonwealth.

The Constitution of the Commonwealth of Australia is contained in the Act of Parliament 63 & 64 Vict., cap. 12. The opening part of the Act recites that the union is to be indissoluble and provides for the admission of other Australasian Colonies and possessions of the Queen. It makes provision for the proclamation and date of establishment of the Commonwealth, declares the binding force of Commonwealth laws, and makes definitions. The Federal Council of Australasia Act, 1885, is repealed, and the Commonwealth is declared to be a single self-governing Colony for the purposes of the Colonial Boundaries Act. The proclamation was made on 17th September, 1900, constituting the Commonwealth as from 1st January, 1901.

The leading features of the Constitution proper are as follows:—

The Parliament consists of the King, a Senate and a House of Representatives. The Governor-General acts for the King.

The Senate consists of six members from each State. The number may be increased or diminished, but so that the equal representation of the original States is maintained, and no original State has less than six Senators. Qualifications for Senators are the same as those for Members of the House of Representatives, as given below. Senators are chosen for six years. The qualifications of electors for the first Parliament were those for the more numerous House of the Parliament of the State in which the elector was competent to vote. In the first Parliament of the Commonwealth the *Franchise Act*, 1902, unified the franchise for both Houses, on the basis of universal adult suffrage.

The House of Representatives has approximately twice as many members as the Senate, and the number of members for each State is in proportion to the population, but not less than five for any State. The qualifications of electors are as stated in the preceding paragraph. Each elector is to vote only once. Qualification of a Member to be (*a*) 21 years of age; (*b*) to be an elector or entitled to be; (*c*) resident 3 years; (*d*) natural born or naturalised 5 years.

House may continue to exist for 3 years from first meeting, but may be dissolved sooner; number of members may be increased or diminished by Parliament, subject to the Constitution.

The general powers of the Parliament are grouped under 39 headings, the principal of which are to make laws for trade, taxation, bounties, borrowing, postal services, naval and military, census and statistics, currency, banking, insurance, insolvency, corporations, divorce, marriage, invalid and old age pensions, immigration and emigration, quarantine, industrial disputes, railways, &c. Exclusive powers are held in regard to the seat of Government, State departments transferred, and other matters declared by the Constitution to be within the exclusive power of the Parliament.

Money Bills may not originate in, nor be amended by, the Senate, which House may, however, return the Bill requesting any omission or amendment. Equal power with the House of Representatives is possessed in respect of all other proposed laws. Tacking Bills are prohibited.

Provision for Dead-locks.—Joint dissolution, and if again passed in Lower House and rejected in Senate a joint sitting to be held, and if passed by an absolute majority of total number of both Houses, disputed Bill to become law.

A Bill having passed both Houses the Governor-General shall either assent, withhold assent, reserve the Bill or return it and recommend amendments.

Executive power vested in King and exercisable by Governor-General in Council, who may appoint Ministers of State.

State departments of Customs and Excise transferred to Commonwealth on its establishment. Departments of posts, naval and military defence, light-houses, &c., and quarantine, on a date or dates to be proclaimed (Posts, telegraphs, &c., and naval and military defence became transferred to the Commonwealth on 1st March, 1901; quarantine on 1st July, 1909; and lighthouses, &c., on 1st July, 1915).

High Court of Australia established; appellate and original jurisdiction.

Collection of Customs to pass to Commonwealth. Customs and Excise duties to be uniform, and intercolonial free-trade established within two years after the establishment of the Commonwealth, after which period the Federal Government shall have exclusive power to levy such duties and to grant bounties on the production or export of goods. Western Australia may continue duties in force on intercolonial goods at the establishment of uniform tariff for five years, subject to reduction of one-fifth each year.

Of the net revenue from Customs and Excise not more than one-fourth to be applied by Commonwealth towards its expenditure. This holds good for the first 10 years and thereafter until the Parliament provides otherwise (Braddon clause).

Right of States to reasonable use of river waters for conservation or irrigation reserved.

Inter-State Commission provided for to regulate trade and commerce, and prevent discriminations being made by any State which may be deemed unreasonable or unjust to any other State. This Commission was established in 1913 and functioned till 1920, since which date no further appointments have been made.

Digitized by Google

Constitutions, powers, and laws of States protected. State Debts may be taken over.

Admission of new States provided for. Commonwealth to protect States against invasion or domestic violence.

Seat of Government to be in New South Wales, not less than 100 miles from Sydney, and to be within Federal territory. Parliament to meet at Melbourne until it meets at the new capital. The first session of Parliament at the Federal Capital City (Canberra) was opened by H.R.H. The Duke of York (now H.M. King George VI) in May, 1927.

An alteration diminishing the proportionate representation of any State, or the minimum number of representatives of a State, or altering its limits, or in any way affecting the provisions of the Constitution in relation to it, shall not become law without the approval of a majority of the electors of such State.

The financial portion of the Act is too intricate to be briefly summarised. *See* Sections 81-105 of the Act.

Constitution may be altered by an absolute majority of each House; then to be submitted to electors, and if in a majority of States a majority of electors voting approve, also majority of all electors approve, then the change may be made. In case of a dead-lock between the two Houses, renewed after three months' interval, the Governor-General may submit the question to the electors in each State qualified to vote for the Lower House.

Two questions, both dealing with finance, were submitted to a referendum concurrently with the Federal elections of April 13th, 1910. The first provided that the Commonwealth should take the whole of the revenue from Customs and Excise, and pay to the States a sum equal to one pound five shillings per annum per head of their population, to be determined according to the latest available Commonwealth statistics. A special payment was to be made to Western Australia, in view of the large contribution per capita made by that State to the Customs revenue. It was intended that this arrangement should take the place of the Braddon clause but it was rejected by the electorate. The Surplus Revenue Act, 1910, retained to the Commonwealth for ten years the whole of the Customs and Excise Revenue, subject to each State receiving an annual payment equal to 25*s.* per head of the population of the State. This arrangement continued in force, until 1st July, 1927, when it was abolished by the States Grants Act. By the Financial Agreement Acts, 1928 and 1929, provision was made for the payment to the States of fixed annual amounts towards the interest on State debts. Special allowances are still made to South Australia, Western Australia and Tasmania. The second proposal related to the conversion of the State debts. The Constitution provided for the conversion of all the debts existing at the time of Federation, and it was the object of the second proposal to amend the Constitution so as to give the Commonwealth unlimited power to assume all State debts existing at any time. This proposal was passed.

Two more "proposed laws" for the alteration of the Constitution were submitted to a referendum on 26th April, 1911. They were:—

A. Constitution Alteration (Legislative Powers) 1910, and

B. Constitution Alteration (Monopolies) 1910.

The object of *A* was to extend the legislative powers of the Commonwealth Parliament in four directions (*a*) Trade and Commerce (*b*) Corporations (*c*) Industrial Matters and (*d*) Trusts and Monopolies. The result would have been a great change in section 51 of the Constitution. The object of *B* was to give the Commonwealth the power of making laws for, or assuming control of, any business or industry which was declared by resolution of both Houses to be the subject of any monopoly. Both resolutions were rejected by a large majority. At the general election of 1913 (May 31st), six questions were submitted to referendum; each question representing a proposed alteration of the Constitution, on which the electors were asked to decide. Of these, five were the old questions of 1911 re-submitted, and the sixth dealt with railway disputes. All the proposals were again rejected, but by much smaller majorities than in 1911.

Referenda were taken on 19th December, 1919, regarding a constitutional extension of Commonwealth powers in legislation and the nationalisation of monopolies. In each case the majority of votes was not in favour of the proposed extension.

On 4th September, 1926, a referendum was taken regarding an alteration of the Constitution in relation to the extension of legislative powers in regard to (*a*) Industry and Commerce, and (*b*) Essential Services. In each case the majority of votes was not in favour of the proposed extension.

In pursuance of a referendum held on the 17th November, 1928, the Constitution was altered by inserting a new section authorising the making of agreements between the Commonwealth and the States in relation to the taking over of State debts by the Commonwealth and the borrowing of money by the Commonwealth and the States. By an agreement entered into in 1927 and validated in 1929 the Commonwealth has taken over the State debts and provision has been made for the establishment of a Loan Council to exercise control over borrowing by the Commonwealth and the States and for the establishment of a sinking fund for the redemption of loans.

On 6th March, 1937, proposals were submitted to the electors for the alteration of the Constitution to provide for Commonwealth control of Aviation and Marketing. In the case of Marketing the majority of votes was against the proposed alteration, while in the case of Aviation, although the total votes gave a favourable majority, the proposal was defeated as in the majority of States the majority of electors was not in favour of the amendment.

It will be observed from the summary given above that the Constitution follows that of the United States rather than that of Canada so far as the distribution of Federal and State powers is concerned. The matters belonging to the Commonwealth are limited to those expressly specified, and in other respects State powers are maintained. But its general political scheme rests on the doctrine of the constant responsibility to Parliament of an Administration formed with the approval of the Representative of the Crown.

The Governorships of the States are still filled by the Crown, and the Governors correspond on State business directly with the Secretary of State. The Governor-General is, however, kept informed of the correspondence passing between the Governors of the different States and the Dominions Office.

Legislation, &c.

Until 1927 the Parliament of the Commonwealth sat in Melbourne, but since May, 1927,

Digitized by Google

the sittings of the Commonwealth Parliament have been held at Canberra, Federal Capital Territory.

The subjects engaging the attention of the Federal Parliament have been numerous and important. A record of legislation enacted from the inauguration of the Commonwealth to 1915 is given in the 1920 edition and from 1916 to 1920 in the 1923 edition of this work.

The following is a summary of the more important legislative enactments of the Commonwealth Parliament during the year 1936 :—

(i) *Air Navigation Act.* Modifies the power of the Governor General to make regulations with respect to the control of air navigation by restricting power to control in relation to trade and commerce with other countries and among the states.

(ii) *Australian Soldiers' Repatriation Act.* Further extends the benefits to returned soldiers who are permanently unemployable or who are suffering from pulmonary tuberculosis and extends the existing benefits provided for returned nurses.

(iii) *Financial Relief Acts.* Embody the proposals of the Government for relief from the provisions of the Financial Emergency Acts for the year 1936–37.

(iv) *Income Tax Assessment Act.* Consolidates and amends the law relating to the imposition, assessment, and collection of Income Tax. The Act is the outcome of the work of the Royal Commission on Taxation which issued four reports during 1934.

(v) *Nationality Act.* Gives effect to articles 8, 9 and 10 of the convention concluded at the Hague in 1930 concerning certain questions relating to the conflict of nationality laws.

(vi) *Northern Territory Representation Act.* Confers the right on the representative of the Northern Territory in the House of Representatives to vote on motions for the disallowance of ordinances of that Territory.

(vii) *Primary Producers' Relief Act.* Alters the amount appropriated for the year 1935/36 in payment of a subsidy on fertilizer used on pasture and other crops (except wheat) from £275,000 to "such sums as are necessary" and extends the period within which applications for the subsidy are to be lodged.

(viii) *Referendum (Constitution Alteration) Act.* Reduces from nine to four weeks the period within which arguments in favour of and against proposed laws for the alteration of the Constitution are to be forwarded to the Chief Electoral Officer.

(ix) *Sales Tax Amendment Act.* Amends generally the various Sales Tax Assessment Acts and the Sales Tax Procedure Act.

(x) *States' Grants Act.* Appropriates 500,000*l.* for the payment of financial assistance to the States on an approximate population basis.

(xi) *Trade Agreement Acts.* Approve provisional commercial agreements between the Commonwealth and Belgium, Czechoslovakia, France, and South Africa for reciprocal most favoured nation treatment and other tariff concessions.

(xii) *Wheat Growers' Relief Act.* Distributes 1,878,000*l.* to the States for the relief of wheat-growers in respect of the 1935/36 season.

Commonwealth Departments.

The Trade and Customs Departments of the States were transferred to the Commonwealth Government on the 1st of January, 1901, and the Defence and Post and Telegraph Departments on the 1st of March, 1901. Other departments which have been created are the Attorney-General's Department, the Department of Industry, the Treasury, the Prime Minister's Department, the Department of External Affairs, the Department of the Interior, the Department of Health, the Department of Commerce and the Department of Repatriation (The Navy, Army and Air Force are now in one Department, *i.e.*, Defence).

Customs Duties.

The Customs Tariff in force in Australia is the Customs Tariff, 1933–1938. Amendments to the Schedule to the Tariff were made by Resolutions introduced into the Commonwealth Parliament on 4th May, 1938, 21st September, 1938, and 17th November, 1938. These Amendments are subject to ratification by the Parliament.

The Australian Customs Tariff has been built up in conformity with the policy of protection of Australian industries and preference to goods the produce or manufacture of the British Empire, and with due regard to the revenue aspects. The United Kingdom and Australia Trade Agreement Act, 1932, lays down the principles for the determination of the margin of preference to be accorded to goods the produce or manufacture of the United Kingdom.

The British Preferential Tariff applies to goods the produce or manufacture of the United Kingdom, and subject to the condition that the goods have been shipped in the United Kingdom to Australia, and have not been transhipped, or if transhipped then only if it is proved satisfactorily that the intended destination of the goods when originally shipped from the United Kingdom was Australia. The provisions of the British Preferential Tariff may also be applied wholly or in part to any part of the British Empire, and a number of non-self-governing British Colonies and Protectorates are now obtaining the benefits of these provisions in respect to certain specified goods.

The Intermediate Tariff which was a feature of the Australian Customs Tariff until the 14th October, 1932, was again introduced on the 28th November, 1935, insofar as certain items subject to treaty negotiations were concerned in order to facilitate the implementations of Trade Agreements. The benefits of the Intermediate Tariff may be extended to any country by proclamation.

Following on the completion in 1936 of Trade Agreements with Belgium, Czechoslovakia, France and the Union of South Africa, the benefits of the Intermediate Tariff in respect of certain goods were extended to these countries. At the same time and also on later dates the benefits of the Intermediate Tariff were extended to other countries (including British non-self-governing colonies, protectorates and mandates) entitled to most favoured nation treatment.

The General Tariff applies to all goods except those the produce or manufacture of the United Kingdom and those covered by reciprocal agreements.

Primage Duty. In addition to duties imposed by the Schedule to the Customs Tariff, 1933–1938, *ad valorem* primage duties are imposed for revenue purposes and these may be summarised in general as follows :—

(*a*) 5% on goods entitled to admission at the British Preferential Tariff rate under items deemed to be protective in their incidence;

(*b*) 10% on goods entitled to admission at the British Preferential Tariff rate under items deemed to be non-protective in their incidence;

(*c*) 10% on goods subject to the General Tariff rates.

Under the United Kingdom and Australia Trade Agreement Act, 1932, Australia agreed to reduce primage duties on goods the produce or manufacture of the United Kingdom and the pursuance of this policy in the light of the revenue position has led to

Digitized by Google

reductions in the rate applied to United Kingdom goods including various lines dutiable under items deemed to be protective in their incidence and also under items carrying revenue duties.

Certain goods have, mainly in the interests of the primary industries, been exempted from payment of primage duties, whilst other goods, principally machines and tools of trade not manufactured in Australia are liable to 4% primage when subject to the General Tariff and are exempt when subject to the British Preferential Tariff. Various classes of raw materials are also exempt or are subject to reduced rates of primage duty.

Goods of New Zealand origin are exempted from the payment of primage duties in accordance with the Trade Agreement between Australia and New Zealand.

Papuan and New Guinea goods are also exempt from the payment of primage duty.

Reciprocal Agreements. A reciprocal trade agreement between Australia and New Zealand has been in force since 1922 under which special Tariff rates are granted on certain goods and the British Preferential Tariff is extended to all other goods imported from the Dominion of New Zealand. A new agreement was made in 1933 and extended in 1934.

In 1925 a trade agreement between Australia and Canada was consummated. This, however, covered only a limited number of items. In 1931 a new trade agreement between Canada and Australia was concluded under which practically all goods of Canadian origin were accorded preference. Amendments were made to this agreement in 1934, 1936 and 1937 and the schedule at present in operation is known as the Customs Tariff (Canadian Preference) Act, 1934–1938.

Certain goods, the produce of Papua and the Territory of New Guinea, are admitted into Australia free of duty in conformity with the Customs Tariff (Papua and New Guinea) Preference Act, 1936.

In addition (as quoted previously) reciprocal trade agreements have been concluded with Belgium, Czechoslovakia, France and the Union of South Africa.

Exchange Adjustment. A Customs Tariff Exchange Adjustment Act is also in operation which provides for certain deductions from the amounts of duty payable on goods which qualify for admission under the British Preferential Tariff and which come within certain items regarded as protective items. These deductions are made in accordance with the following provisions:—

(a) Whenever at the date of exportation of any such goods Australian currency is depreciated to the extent of not less than sixteen and two-thirds per centum in relation to the currency of the British country from which those goods are imported, a deduction from the amount of duty payable on those goods in accordance with any law of the Commonwealth for the time being in force imposing duties of Customs (other than primage duty and duty imposed by the Customs Tariff (Industries Preservation) Act, 1921–1933, or any Act amending or in substitution for that Act) or in accordance with Customs Tariff proposals shall be made of—
(i) one-fourth of that amount of duty; or
(ii) twelve and one-half per centum of the value for duty,
whichever is the less; and

(b) Whenever at the date of exportation of any such goods Australian currency is depreciated to the extent of not less than eleven and one-ninth per centum and less than sixteen and two-thirds per centum in relation to the currency of the British country from which those goods are imported, a deduction from the amount of duty payable on those goods in accordance with any law of the Commonwealth for the time being in force imposing Duties of Customs (other than primage duty and duty imposed by the Customs Tariff (Industries Preservation Act), 1921–1933, or any Act amending or in substitution for that Act) or in accordance with Customs Tariff proposals shall be made of—
(i) one-eight of that amount of duty; or
(ii) six and one-quarter per centum of the value for duty;
whichever is the less.

Subsequent to the enactment of the Customs Tariff (Exchange Adjustment) Act, 1933, the Tariff Board in its inquiries into the economics of Australian industries has adopted the principle of recommending protective rates of duty on the basis of—

(a) reasonable and adequate protection necessary under existing conditions after provision is made for the protective incidence due to Australian depreciated currency; and

(b) reasonable and adequate protection necessary where exchange conditions Australia on London are at par.

The Tariff Proposals of the 6th December, 1934, gave effect, for the first time, to the new principle of imposing rates of duty as recommended by the Tariff Board as in (a) above. Automatic increases in the rates of duty are, however, provided for during any stage in which Australian currency appreciates in relation to sterling, and thereby ensures the pro rata maintenance of the duty level recommended by the Tariff Board in its (b) recommendation for par exchange conditions. Recommendations of the Tariff Board in respect of items carrying protective rates of duty given effect to subsequent to the 6th December, 1934, have provided for automatic variations in duties in consonance with fluctuations in the rate of exchange and consequently such items have been removed from the provisions of the Customs Tariff (Exchange Adjustment) Act.

Industries Preservation Act. The Customs Tariff (Industries Preservation) Act, 1921–1933, provides that a special dumping duty may be imposed on goods exported to Australia which are of a class or kind produced or manufactured in Australia, at a price less than the fair market price for home consumption at the time of shipment, or at less than a reasonable price when the importation of such goods is detrimental to an Australian industry. The duty imposed is the amount by which the export selling price to Australia is less than the fair market value or the reasonable price, as the case may be. Goods sold on consignment are dealt with somewhat similarly. A dumping freight duty may also be imposed on goods carried to Australia either free of freight or at reduced rates of freight. The amount of the dumping duty in such cases is equal to the extent of the freight concession granted.

The Act also provides that the Minister for Trade and Customs, after inquiry by the Tariff Board, may impose an exchange dumping duty on goods imported from a country whose currency has depreciated in relation to Australian currency, if the sale of these goods by reason of such depreciation is detrimental to an Australian industry. The amount of the duty may be derived from the formula

$$\frac{a-b}{b} \times c$$

where a is the nominal par value in sterling of

Digitized by Google

unit of the currency of the country of origin, b the value in Australian currency of the same unit at date of exportation, and c the value for duty of the goods assessed in accordance with the Customs Act, 1901–1936. No goods have yet been subjected to this duty. When dumping duties (except exchange dumping duties) are calculated in any currency other than Australian currency the amount of dumping duty is payable in Australian currency ascertained according to a fair rate of exchange, such exchange rate to be declared in cases of doubt by the Minister.

Statistics.

Full statistics relating to the various States, etc., are given under subsequent headings. It will be convenient, however, to summarise some of the more important statistics for Australia as a whole.

Secretary, G. Lightfoot, 1,158*l.*

NEW SOUTH WALES.

Boundaries and Area.

The State of New South Wales lies on the eastern coast of Australia, almost entirely between the 29th and 36th parallels of south latitude, and between the 141st and 154th meridians east of Greenwich. It is bounded on the east by the Pacific Ocean, to which it presents a coast line extending from Point Danger at its north-eastern extremity to Cape Howe at the south-east. From this point, which is the north-east limit of the State of Victoria, it is bounded by a surveyed and marked line running in a north-westerly direction to the source of the River Indi and thence by the southern bank of the Murray, as far as the 141st meridian of east longitude. The intersection of the Murray with this meridian forms a common point of the three States of New South Wales, Victoria, and South Australia.

On the west, the State is separated from South Australia by the line of the 141st meridian, as far as its intersection with the 29th parallel of south latitude, at which point New South Wales, South Australia, and Queensland touch. Commencing at this point, the northern boundary of the State follows the 29th degree of latitude, east of the Barwon River, then along the Macintyre and Dumaresq Rivers to the junction of the latter with Tenterfield Creek, thence along the crest of a spur extending from the great Dividing Range. Then it follows the Dividing Range to Macpherson Range and proceeds along this Range until it reaches the coast at Point Danger.

The area of New South Wales (inclusive of a dependency, Lord Howe Island, 5 square miles, but exclusive of the Australian Capital Territory, 940 sq. miles), is 309,432 square miles or 198,036,480 acres, being a little over two and a half times that of Great Britain and Ireland. Excluding the surface covered by rivers, lakes and principal harbours, the area is 195,067,000, acres or about 304,800 square miles.

The length of the State, from Point Danger on the north to Cape Howe on the south, is 683 miles, the length of the seaboard is 907 miles. From east to west, along the 29th parallel, the breadth is 756 miles, while diagonally from the south-west corner, where the Murray passes into South Australia, to Point Danger, the measurement is 850 miles.

Sydney, the seat of Government, is in 33° 51′ 41.1″ S. lat., and 151° 12′ 23.10″ E. long.

Occupation of Rural Lands.

The number of rural holdings over one acre in extent used for agricultural and pastoral purposes at 31st March, 1937, was 76,239 and the area was 173,880,500 acres, viz.

	Acres
Freehold and other land virtually alienated from the Crown ..	86,149,700
Leased from Crown with full right to convert to freehold	13,750,500
Leased from Crown with limited right to convert to freehold	1,729,900
Other tenures (mainly Crown leases in Western Division)	72,250,400
Total	173,880,500

A distribution of the freehold and virtually alienated land in area series is as follows:—

Area Series *	Holdings	Area of Holdings *
		Acres.
1- 30	10,261	128,591
31- 320	26,599	3,883,400
321- 640	11,185	5,360,807
641- 1,280	11,026	10,180,128
1,281- 2,000	5,103	8,216,047
2,001- 3,000	3,154	7,713,772
3,001- 5,000	2,505	9,674,029
5,001-10,000	1,686	11,378,609
10,001-50,000	996	19,130,994
50,001 and over	118	10,483,297
Total	72,633	86,149,674

History.

The name "New South Wales" was given to the eastern part of Australia on its discovery by Captain Cook in 1770, but the first settlement was not formed

* Crown lands attached to these holdings are not included.

In addition to the holdings to which these figures relate there were 3,606 consisting of Crown lands only

Executive Committee, Sir G. A. Julius, B.Sc., B.E., M.I.M.E., M.I.E. (Aust.), Chairman; Sir David Rivett, K.C.M.G., M.A., D.Sc., Deputy-Chairman and Chief Executive Officer; Prof. A. E. V. Richardson, M.A., D.Sc.
Secretary, G. Lightfoot, 1,158*l.*

NEW SOUTH WALES.

Boundaries and Area.

The State of New South Wales lies on the eastern coast of Australia, almost entirely between the 29th and 36th parallels of south latitude, and between the 141st and 154th meridians east of Greenwich. It is bounded on the east by the Pacific Ocean, to which it presents a coast line extending from Point Danger at its north-eastern extremity to Cape Howe at the south-east. From this point, which is the north-east limit of the State of Victoria, it is bounded by a surveyed and marked line running in a north-westerly direction to the source of the River Indi and thence by the southern bank of the Murray, as far as the 141st meridian of east longitude. The intersection of the Murray with this meridian forms a common point of the three States of New South Wales, Victoria, and South Australia.

On the west, the State is separated from South Australia by the line of the 141st meridian, as far as its intersection with the 29th parallel of south latitude, at which point New South Wales, South Australia, and Queensland touch. Commencing at this point, the northern boundary of the State follows the 29th degree of latitude, east of the Barwon River, then along the Macintyre and Dumaresq Rivers to the junction of the latter with Tenterfield Creek, thence along the crest of a spur extending from the great Dividing Range. Then it follows the Dividing Range to Macpherson Range and proceeds along this Range until it reaches the coast at Point Danger.

The area of New South Wales (inclusive of a dependency, Lord Howe Island, 5 square miles, but exclusive of the Australian Capital Territory, 940 sq. miles), is 309,432 square miles or 198,036,480 acres, being a little over two and a half times that of Great Britain and Ireland. Excluding the surface covered by rivers, lakes and principal harbours, the area is 195,067,000, acres or about 304,800 square miles.

The length of the State, from Point Danger on the north to Cape Howe on the south, is 683 miles, the length of the seaboard is 907 miles. From east to west, along the 29th parallel, the breadth is 756 miles, while diagonally from the south-west corner, where the Murray passes into South Australia, to Point Danger, the measurement is 850 miles.

Sydney, the seat of Government, is in 33° 51′ 41.1″ S. lat., and 151° 12′ 23.10″ E. long.

Occupation of Rural Lands.

The number of rural holdings over one acre in extent used for agricultural and pastoral purposes at 31st March, 1937, was 76,239 and the area was 173,880,500 acres, viz.

	Acres
Freehold and other land virtually alienated from the Crown ..	86,149,700
Leased from Crown with full right to convert to freehold	13,750,500
Leased from Crown with limited right to convert to freehold	1,729,900
Other tenures (mainly Crown leases in Western Division)	72,250,400
Total	173,880,500

A distribution of the freehold and virtually alienated land in area series is as follows:—

Area Series *	Holdings	Area of Holdings*
		Acres.
1- 30	10,261	128,591
31- 320	26,599	3,883,400
321- 640	11,185	5,360,807
641- 1,280	11,026	10,180,128
1,281- 2,000	5,103	8,216,047
2,001- 3,000	3,154	7,713,772
3,001- 5,000	2,505	9,674,029
5,001-10,000	1,686	11,378,609
10,001-50,000	996	19,130,994
50,001 and over	118	10,483,297
Total	72,633	86,149,674

History.

The name "New South Wales" was given to the eastern part of Australia on its discovery by Captain Cook in 1770, but the first settlement was not formed

until 1788, at Port Jackson, under Captain Phillip, R.N. The capital was named after Viscount Sydney, who was Secretary of State for the Colonies when the settlement was formed.

New South Wales was then held to include the whole eastern portion of the continent. The first newspaper was established in 1803. The Merino sheep was introduced in 1797, but settlement for a time was slow because a passage over the Blue Mountains, giving access to the interior plains, was not discovered until 1813. The population in 1800 was 5,217. At the first census in 1828 the total population was only 36,598, but it was increasing rapidly and the discovery of gold in 1851 attracted much population. Responsible government was established in 1856, and the next thirty years was a time of remarkable prosperity and progress. On the 1st January, 1901, the Colony of New South Wales federated with the Colonies of Victoria, Queensland, South Australia, Western Australia, and Tasmania to form the Commonwealth of Australia. This, the second outstanding political event, was followed by a further period of phenomenal prosperity and progress which lasted until the outbreak of the European war in 1914. Then the extraordinary oversea demand for the staple products, which increased as the war continued, enhanced the value of local production, so that the critical period which followed the post-war trade boom passed without any economic disorder and the State entered upon a period of steady industrial expansion. This expansion continued until the latter part of 1929 when a heavy fall in the prices of staple exports caused a depression similar to that prevailing in other countries of the world. In order to meet the crisis which ensued the States and the Commonwealth made drastic reductions of adjustable expenditure and imposed additional taxation with the object of balancing budgets, a general reduction of wages and salaries and of interest on public and private debts. Special taxation was levied for the relief of unemployment. These measures coupled with a partial recovery in export prices produced a substantial improvement in economic conditions; the volume of employment has increased steadily since 1932. A balanced budget has been attained notwithstanding large reductions in taxation.

Climate.

New South Wales is situated entirely in the temperate zone and its climate is generally mild and equable with plenty of sunshine. The mean temperature in the shade at Kiandra in the coldest portion of the State during 1936 was 43·6° Fah. and at Bourke in the western division it was 67·7°. On the coast the mean summer temperature is from 75° to 77° in the northern districts, and 66° to 70° in the southern. The winter means are 56° to 59° and 50° to 55° respectively. The mean annual temperature in Sydney is 63·5°. On the mountains snow lies in a few places all the winter. On the tablelands the mean annual temperature is somewhat lower than in the coastal districts, where the winter is milder.

The rainfall decreases as the distance from the coast increases. The average rainfall of Sydney is about 47 inches annually, the average annual number of days on which rain falls is 152.

The prevalent winds in summer are the north-east sea-breeze and light westerly; in winter, westerly.

In winter, on the lowlands, frosts are common in the southern and rare in the northern districts.

*Trade and Industry.**

The staple products of New South Wales are wool and wheat.

*Note.—The values of exports are in Australian currency and the values of imports in sterling.

The quantity and value of wool exported from New South Wales to countries outside Australia during the last five years is shown below; the figures include wool produced in other States and exported through New South Wales, but exclude New South Wales wool transferred to other States for export oversea. The quantities are stated as in the grease:—

		£
1933–34 ..	376,627,300 lb. ..	value 24,254,807
1934–35 ..	392,414,400 „ ..	„ 16,718,261
1935–36 ..	380,277,240 „ ..	„ 22,114,134
1936–37 ..	366,398,406 „ ..	„ 27,632,175
1937–38 ..	314,790,557 „ ..	„ 19,117,430

The exports of wheat in 1937–38 were 9,789,249 centals valued at 3,608,247*l.* and wheaten flour, 4,031,825 centals value 1,968,625*l.* Other important exports of Australian produce were as follows:—

	£ Aust.		£ Aust.
Butter ..	1,796,544	Fruit, dried, fresh and preserved ..	555,465
Hides and skins	2,469,352	Timber ..	420,263
Meats, frozen and preserved	2,225,349	Lead, pig ..	1,514,858
Leather ..	393,692	Tin ingots ..	187,198
Tallow ..	196,150	Coal	354,047
Eggs	268,258	Iron and steel	951,573

The principal imports in 1937–38 were:—

	£ Stg.		£ Stg.
Machinery elec.	2,648,733	Kerosene and lubricating (mineral) oil	825,225
„ other	4,314,187	Rubber, crude	658,631

Vehicles and parts ..	3,697,645	Books (printed)	454,647
Other metals and metal manufactures	2,666,998	Kinematograph films	473,947
Piecegoods ..	5,133,540	Argol ..	213,775
Floor covering	705,667	Paints and varnishes ..	350,122
Bags and sacks	516,649	Timber (undressed ..	922,366
Yarns	554,069	Crockery and glassware ..	643,258
Tobacco ..	1,447,296	Jewellery and timepieces .	489,771
Tea	1,503,601		
Fish	648,136		
Copra ..	210,935		
Linseed ..	6,890		
Petroleum and shale spirit	2,117,423		

In 1936–37 the produce of Great Britain and Northern Ireland represented 39·2 per cent of the oversea imports of merchandise and 32·4 per cent. of the exports of merchandise was shipped thereto.

Sydney and Newcastle are ports of registry; 52 vessels, of a total tonnage of 11,918, were registered during the year ended 30th June, 1937; the total number of vessels on the registers at 30th June, 1937, was 901 with a tonnage of 95,337.

Factories and Works.

In 1936–37 there were 8,726 factories and works, employing 208,497 persons, of whom 152,064 were males and 56,433 females. The total value of land and buildings was 51,629,598*l.* and of plant and machinery was 51,979,614*l.*; the total salaries and wages paid amounted to 36,642,444*l.*; the value of production was 76,754,000*l.*, and the value of the output was 192,812,414*l.*

Agricultural Production.

The total area under crop during the season 1936–37 was 5,951,043 acres, and the total value of agricultural production 23,416,000*l.* The principal crops in 1936–37 were wheat 55,668,000 bushels, maize 3,302,520 bushels, hay 917,499 tons, sugar cane 279,169 tons, oats 3,967,560 bushels, wine 2,944,494 gallons, rice 2,276,530 bushels, ar

Digitized by Google

potatoes 66,255 tons. It has been estimated that the production of wheat in 1937–38 was 56,000,000 bushels.

Pastoral and Dairying Productions.

The number of live stock on 31st March, 1937, was as follows:—Horses, 545,829; cattle 3,288,169; sheep, 53,166,000; and pigs, 390,780. The wool produced in 1936–37 was 503,616,000 lbs. (as in the grease), valued in Sydney at 34,106,000*l*. It is anticipated that the production in the season 1937–38 was 497,000,000 lbs. (approx.).

The production of the dairying industry during 1936–37, included 109,830,751 lbs. of butter, 7,417,640 lbs. of cheese, and 22,069,860 lbs. of bacon and ham. A preliminary estimate of the butter production in 1937–38 is 121,500,000 lbs. The total value of pastoral production in 1936–37 was 40,306,000*l*., and of dairying and farmyard production was 14,592,000*l*.

Mining.

The main coal basin of Australia is situated in the coastal districts of New South Wales, extending along the seaboard for a distance of about 200 miles. The production of coal in 1926 was 10,885,766 tons valued at 9,436,520*l*. from 141 collieries; during 1937, 10,051,519 tons valued at 5,823,460*l*. were produced from 173 mines. Silver and silver lead to the value of 4,306,616*l*., and zinc concentrates valued at 657,967*l*., were produced in 1937. The total value of the minerals won during 1937 was 13,496,603*l*., excluding the value of Portland cement, lime and coke.

All Industries.

The total value of production from recorded industries during the year 1936–37 was 168,954,000*l*. or 63*l*. 0*s*. 6*d*. per head of population, valued as at place of production.

Currency and Banking.

The currency of New South Wales is under the supervision of the Commonwealth Government. British or Australian gold coins are legal tender. The paper currency in the form of Australian Notes is controlled by the Commonwealth Bank, and the export of gold has been subject to approval by the Commonwealth Bank since December 1929.

The 14 trading banks operating in the State in 1938 were:—Commonwealth Bank of Australia; Rural Bank of N.S.W.; Bank of New South Wales; Commercial Banking Company of Sydney, Ltd.; Bank of Australasia; Union Bank of Australia, Ltd.; English, Scottish, and Australian Bank, Ltd.; Queensland National Bank, Ltd.; Bank of New Zealand; Commercial Bank of Australia, Ltd.; National Bank of Australasia, Ltd.; Bank of Adelaide; Comptoir National d'Escompte de Paris; Yokohama Specie Bank, Ltd. Total average amount of deposits in trading banks in June quarter, 1938:—

Deposits not bearing interest ..	£59,684,933
Deposits bearing interest	88,007,612
Total	£147,692,545

Deposits in the Savings Banks in New South Wales amounted to 86,015,555*l*. on 30th June, 1938, equivalent to 31*l*. 12*s*. 3*d*. per head of population. Interests on deposits is allowed at the rate of 2 per cent. per annum on personal accounts up to 500*l*. and at 1½ per cent. from 500*l*. to 1,300*l*.

Means of Communication.

On 30th June, 1938, there were 6,124 miles of railways, owned and worked by the Government, the cost of construction and equipment being 145,257,282*l*. The receipts during the year ended 30th June, 1938, were 19,486,116*l*.†, and the working expenses 13,759,988*l*., the balance therefore available towards meeting the annual charge for interest and exchange being 5,838,128*l*. There were 116 miles of private railway. Several Victorian railway lines have been extended into New South Wales in districts not served by the State's railways, the total length being 203 miles. There were also 189 miles of Government tramways, earning 3,529,368*l*., against working expenses amounting to 2,944,792*l*. in 1937–38. The total capital expenditure on tramways in operation at 30th June, 1937, was 9,046,640*l*.

There were 68 civil aircraft registered in the State at 30th June, 1937; the licensed pilots numbering 314, including 80 commercial pilots. Commercial services are maintained from Sydney to Melbourne (twice daily each way except Sundays), Brisbane (twice on weekdays, once on Sundays, each way), Bega (four times weekly each way), Broken Hill (twice weekly each way), and from Cootamundra to Charleville (twice weekly each way) as part of the England-Australia Air Mail Route.

Posts and Telegraphs.

There are 3,059 telegraph stations, and the revenue received during the year ended 30th June, 1937, was 383,917*l*. from telegraphs and 78,825*l*. from cablegrams. The earnings from telephone services during the year amounted to 2,902,740*l*. Overseas wireless telegraphy and telephone services have been provided to give communication with Great Britain and other countries. In June, 1937, 25 licenses were in force for broadcasting stations, together with 6 National Broadcasting stations. The broadcast listeners licenses at 30th June, 1938, approximately numbered 402,000.

In 1937, the cable messages sent from New South Wales numbered 370,741 and 371,467 were received.

Of inland rivers the Murray, Darling, Murrumbidgee, and Lachlan are navigable most of the year for small river craft, and nearly all the coast rivers are navigable for varying distances by ocean-going steamers, especially the Richmond, the Clarence, the Macleay, the Manning, the Hunter and the Hawkesbury, while Port Jackson (Sydney Harbour), Port Stephens and Jervis Bay are large natural harbours. Steamers leave Sydney regularly for nearly all parts of the world, but communication with Europe is chiefly by the vessels of the P. & O. (*via* Colombo and Marseilles), P. & O. Branch Service (*via* Suez), the Orient Royal Mail line (*via* Suez and Naples), the Messageries Maritimes (*via* Marseilles), Canadian Australasian line (*via* Vancouver), Oceanic (Matson) line (*via* San Francisco), White Star-Aberdeen line (*via* Durban and Capetown, also *via* Suez), Scottish Shire line (*via* Suez), Blue Funnel line (*via* South Africa, also *via* Suez), the New Zealand Shipping line, Shaw, Savill and Albion line; the Clan line; Cunard line (Commonwealth and Dominion line); Aberdeen and Commonwealth line; Federal Steam Navigation Co.; British India S.N. Co.; Ellerman and Bucknall line; Holland-Australia line; Trans-Atlantic S.S.; Norwegian-Australia line; German-Australian Line: North German-Lloyd; Australia-Italia line; Blue Star line. Approximately seven mails are sent to and five despatched from England by sea monthly.

Letters forwarded by steamer from England reach Sydney in about 32 days. An air mail service, twice a week since 15th May, 1936, is scheduled to complete the journey between these centres in 10 days.

† Exclusive of the amount of 800,000*l*. paid by the Government as a contribution towards the losses on developmental lines.

Digitized by Google

Education.

The education system of New South Wales is under the control of the Minister of Public Instruction regulated by the Public Instruction Act of 1880. Teachers in State schools belong to the Public Service and are paid fixed salaries according to their qualifications and the classifications of their schools. Education is free, and compulsory between the ages of 7 and 14 years.

At the close of 1937 there were 3,409 State schools divided as follows:—High Schools, 42 (12 boys, including 2 Agricultural high schools and 3 junior high schools; 8 girls, including 1 junior high school, and 22 mixed); Intermediate High Schools, 50; public schools 2,646 (including 618 provisional, 24 half-time, 1 travelling, 1 correspondence, 1 activity school, 15 central, 11 special and hospital, and 36 evening continuation schools); subsidised schools, 720; and reformatory school, 1. School buildings are erected and maintained wholly at the expense of the Government.

State aid to denominational schools ceased many years ago, but general religious instruction is imparted by the State teachers, and for limited periods with the consent of parents by ministers of religion. All children are carried free by rail to the nearest school. In cases where children reside over a reasonable walking distance from the nearest school, subsidy is paid to assist the parents in the cost of their children's conveyance. In remote localities where there are at least 3 children over 5 years of age, unable to attend an existing school, but an insufficient number for the establishment of a public or provisional school, a subsidy is paid to families engaging a private teacher. A properly equipped travelling school conveys a means of instruction to several outlying groups in the western portion of the State in rotation. As a further means of providing facilities for the education of children of isolated families a correspondence school has also been organised.

The "Bursary Endowment Act," passed in 1912, provides for the establishment of a fund for Bursaries tenable in public or private secondary schools and in the Sydney University and for the constitution of a Bursary Endowment Board. About 300 Bursaries, each tenable for four or five years and 100 Bursaries each tenable in 4th and 5th years at a High or Registered Secondary School, and carrying a monetary grant ranging from 9*l.* 12*s.* to 40*l.* per annum, are awarded annually. Agricultural Scholarships, Technical Scholarships and about 40 University Bursaries are also awarded annually. A Higher Education Scheme has been established which provides for (*a*) higher primary education in Superior Public Schools which are of three types (commercial and junior technical for boys and domestic science for girls), and for (*b*) High School education of several types (general, commercial, technical and agricultural), in High Schools. There are also District Rural Schools, which provide elementary agricultural instruction. Intermediate Certificates are issued on the satisfactory completion of a three years' High School course, and leaving Certificates (qualifying in prescribed subjects, to the University Matriculation Certificates) are awarded on the satisfactory completion of a five years' High School course. Forty-two High Schools, including 2 agricultural and 4 junior high schools are in operation, and there are also 50 intermediate high schools at which the secondary course is in operation. At the end of 1937, 1,257 students were undergoing courses of training, covering two years or more, at the Teachers' Colleges.

Evening Continuation Schools have been brought into operation in city and country centres divided into the following classes: (1) Junior Technical Schools; (2) Commercial Schools—in both cases the object being to assist lads to push on more rapidly in the callings they have chosen; and (3) Domestic Science Schools, for girls only.

For the year 1937 the cost to the State of public instruction was 4,490,085*l.* exclusive of 450,377*l.* expended on technical education.

The University of Sydney was established and endowed by the State in 1850. Its State endowment was originally 5,000*l.*, and from 1890 to 1892 was 13,900*l.*, but it was increased from 25,600*l.* to 100,000*l.* per annum from 1st January, 1938. The endowment is largely added to by private donations. The State endowment and special grants for 1937-38 amounted to 83,269*l.* Five denominational colleges are affiliated to the University. In addition, there is the women's college, also affiliated. During the year 1937–38, the total State endowment amounted to 3,000*l.* The University has the power of granting degrees in arts, law, medicine, science, engineering, agriculture, veterinary science and dentistry. Recently, several faculties have been added to its curriculum. There are also technical colleges, under the Department of Public Instruction, and classes are held in Sydney and in the principal country towns. The Central College—a large establishment—is extensively equipped and staffed for trades, professional, and scientific instruction. The fees are within the reach of all, and the colleges are open to males and females alike. In addition, provision is made for the instruction of those residing in isolated localities by means of correspondence lessons. A Mobile Technical Workshop operating at various country towns provides for technical instruction in a number of trade subjects. There is an Australian Museum, a National Art Gallery, a Public Library, including the Mitchell Library, with endowments of 1,000*l.*, 2,000*l.* and 2,000*l.* respectively, a State Conservatorium of Music and a Music Library. Public libraries and schools of arts are established throughout the State. There are also a Royal, a Medical, a Linnæan, a Zoological, a Historical, a Geographical, and seven Art Societies, a Government Observatory, Agricultural and Forestry Museum, and a Mining and Geological, and Technological Museums, Government Agricultural Colleges, Experimental Farms, with many other educational associations.

Local Government.

In New South Wales the greater portion of the State has been incorporated, leaving only the "Western Division," which is but sparsely settled, outside the scope of local government. Even in that division, however, several towns have been established as Municipalities.

The area incorporated comprises 183,964 square miles out of a total area of 309,439 square miles in the State (*i.e.*, exclusive of Lord Howe Island and the Federal Capital Territory of Canberra and Jervis Bay).

The local government of this large area, with the exception of the City of Sydney, is provided for under the Local Government Act, 1919, as amended by subsequent Acts.

The City of Sydney was first incorporated in 1842, being the first town in the State to be granted municipal government, but it has, since its incorporation, been governed under special Acts applying to it alone.

Apart from the City of Sydney, there are two types of local government provided for, viz.:—Shires and Municipalities—the former comprising country districts (sometimes of great extent, the largest being the Shire of Lachlan containing 5,736 square miles) and the latter the larger towns. There are now (September, 1938) 139 Shires and 159 Municipalities in the State. As regards town areas

Digitized by Google

in Shires, a Shire Council may (subject to the Governor's approval and if a majority of the electors concerned do not veto the proposal at a poll which may be taken on a petition signed by not less than 100 of such electors) acquire the right to exercise many of the powers of a Council of a Municipality in any such area by having the area declared by Proclamation of the Governor to be an "Urban Area," without the expensive machinery of a separate municipal government having to be set up. Provision is also made for the proclamation of any municipality as a city, if it fulfils the requirements laid down by the Act and for the continuance as cities of all towns so proclaimed before the Act came into force. Cities, however, have no greater powers than Municipalities, and are treated as Municipalities under the Act in all respects except as to name.

The Act provides, practically, for adult suffrage; that is, that every natural-born or naturalised British subject, male or female, of the full age of 21 years, who is an owner or rate-paying lessee of rateable land, or an occupier of land shall be entitled to enrolment as an elector. Occupier includes every person who is residing or has had his principal place of abode on land whether ratable or not in a ward or riding and has continuously during the period of twelve months prior to the day prescribed for enrolment resided or had his principal place of abode in the area. Councils consist of not less than 6 and not more than 9 Councillors in the case of Shires and not less than 6 nor more than 15 Aldermen in the case of Municipalities. Any person whose name is on a roll of electors is eligible for election as a Councillor or Alderman, except in certain cases where disqualification is provided for, the most important of which is on account of business or financial relations with the Council.

Each Shire is divided into Ridings, and a Municipality may be divided into Wards or may exist as an undivided area, but Ridings and Wards must be represented by an equal number of Councillors or Aldermen, as the case may be. Provision is made for the election of Urban Committees of three persons (or such other number as the Governor may determine from time to time) to manage the affairs of Urban Areas where such have been created. General elections of Councillors and Aldermen take place every three years, the last election having been held in December, 1937, and it is provided that in any Shire and Municipality elections may, if the electors so decide at a poll taken upon a petition of one-fifth of their number, be held according to the principles of proportional representation. Only one Council has to date adopted the system of proportional representation.

The functions of Shire and Municipal Councils include the control of roads, bridges, wharves and jetties, the lighting of streets, the regulation of traffic (except in the Sydney Metropolitan Traffic Area), the removal and disposal of nightsoil and garbage, the provision of electricity and water supplies and of sewerage services, the regulation and licensing of public vehicles (except where the Commissioner of Road Transport and Tramways is the licensing authority), the control and management of parks and recreation grounds, etc.

To provide the revenue for exercising its powers a Council is empowered to levy a general rate of not less than 1*d.* in the £ on the unimproved capital value of all ratable land in its area. Where, however, a general rate of 1*d.* is more than sufficient in any year to meet the requirements of a Council, the Governor is empowered to authorise the levying of a rate less than that sum.

In addition to the general rate Councils are empowered to levy special rates for special works, local rates for works of benefit to a portion of the area only, and loan rates for the repayment of loans. In the case of these rates ratepayers may petition for a poll to be taken on the questions as to whether the rate shall be levied on the unimproved capital value or the improved capital value of the land subject to it.

The amount of the rates which a Council may levy is limited as follows, but provision is made that the Governor may grant permission to exceed these limits in special cases:—

Shires.—General rate—2*d.* in the £ on the unimproved capital value of all ratable land in the Shire.

Rates in Urban Areas other than general, and water and sewerage local rates—2*s.* in the £ on the assessed annual value of all ratable land in the Urban Area.

Municipalities.—General rate—a sum equal to 2*d.* in the £ on the unimproved capital value and 1*s.* 6*d.* in the £ on the assessed annual value of all ratable land in the area; provided that a general rate of more than 3*d.* in the £ on the unimproved capital value shall not be levied on a mine worked for minerals other than coal and shale. All rates (other than water and sewerage local rates)—a sum ascertained by adding together the calculated yield of 2*d.* in the £ on the unimproved capital value and 2*s.* in the £ on the assessed annual value of all ratable land in the Municipality.

Water local rates are limited in both Shires and Municipalities to a sum equal to 2*s.* in the £ on the assessed annual value of all land ratable to the water rate. Sewerage local rates are limited to a similar sum.

In Municipalities outside the county of Cumberland the general rate leviable in respect of urban farm land is less than that in respect of other land. The maximum amount in the pound (on the unimproved capital value) of such rate is not more than one half of the amount levied in respect of other land in the Municipality, or the amount of the general rate levied in the adjoining Shire, or if more than one of such Shires, the highest amount levied as the general rate in any of such Shires, whichever is the greater, but no such rate must be less than 1*d.* in the £ on the unimproved capital value. These provisions may also be applied by proclamation to Municipalities within the county of Cumberland.

There are four methods provided by which Councils may borrow for purposes authorized by the Act, viz.:—limited overdraft, renewal loan, ordinary loan and special loan. Ratepayers may petition for a poll of ratepayers to be taken on the questions as to whether a special loan shall be raised, or as to whether the loan rate shall be on the unimproved or improved capital value. In regard to ordinary loans, a recent enactment contains provisions which are designed, for a limited period, to enable Shire and Municipal Councils, under the most favourable conditions, to borrow for the purpose of undertaking extensive decentralized works programmes. Ordinary loans may be approved by the Governor in terms of this amendment until 30th June, 1939.

It is compulsory for loan rates to be levied for the repayment of renewal, ordinary, and special loans, except in certain circumstances, and except in the case of special loans raised by Shire councils. The total amount which may be owed by a Municipal Council on account of its borrowings is limited to twenty per cent. of the unimproved capital value of all ratable land in the Municipality, and special loans raised by a Shire Council must not in the aggregate exceed thrice the amount of the income of the Shire. Where loans are self-supporting, i.e., in the case of reproductive loan works and services which are not a charge upon the rates, the Governor

Digitized by Google

may direct that they be not taken into account in calculating the Council's limit of borrowing.

A Council may also, subject to limitations enter into contracts for the purchase of goods and the performance of work on terms providing for payment by the Council by instalments extending over a period of years. The total of the amounts owing by a Council under these contracts is required to be taken into account as a charge against the Council's borrowing limit.

To assist Shire Councils it is provided that out of the Consolidated Revenue a sum of not less than 150,000*l.* shall be distributed each year among Shire Councils by way of endowment, according to an apportionment made by the Governor every three years. For the current triennium 1937, 1938 and 1939 an amount of 177,500*l.* per annum was made available for distribution as endowment. Special grants and repayable advances for works are also made by the Government each year to both Shire and Municipal Councils; the amount paid for the financial year ended 30th June, 1938, being £2,425,624.

In addition to what has been stated above as to a Council's powers, some novel features which were introduced by the Act of 1919 may be mentioned. These include the formation of groups of wholes or parts of Shires and Municipalities—the groups being called "County Districts"—in order to carry out more effectively such functions of the Councils of the areas included as the destruction of aquatic plants like water hyacinth (the growth of which in some districts has been found to render rivers unnavigable until the river is cleared and the plant destroyed), the prevention of river bank erosion or of floods, the supply of electricity, or any other function which would be a matter of concern to the district in which such Shires or Municipalities are situated. The Act provides for each "County District" to be administered by a "County Council" composed of delegates elected by the Council of each Shire or Municipality included in the District. The functions of a County Council are limited to the powers specially delegated to it by the Governor. The other powers of the Shire or Municipal Councils of the District are not interfered with in any way. Six "County Districts" have so far been proclaimed, and one has been abolished.

Difficulty was experienced in the past in getting the Councils of many Shires and Municipalities to carry out works such as the making of a new road or bridge desired by the residents of a particular Riding or Ward, and the 1919 Act accordingly provides that in circumstances like that, upon a petition signed by all the Councillors or Aldermen representing the Riding or Ward, or by at least one-fifth of the ratepayers of the Riding or Ward, the Council shall take a poll of ratepayers of that Riding or Ward, and, if such poll is favourable, shall carry out the work the people want and levy a local rate to provide for the repayment of the cost.

It is also provided in the Act that a Council may at any time take a poll of electors or ratepayers on any question arising out of the administration of the Act, and any question of importance may be thus referred to the people themselves for decision.

Constitution.

The Constitution Act of 1902 provides that the Legislature of New South Wales "shall, subject to the provisions of the Commonwealth of Australia Constitution Act, have power to make laws for the peace, welfare and good government of New South Wales in all cases whatsoever." The Legislature consists of the Crown and two Houses—the Legislative Council and the Legislative Assembly.

The Governor is the local representative of the Crown. He exercises powers similar to those of a constitutional sovereign, and his functions are defined partly by statutes and partly by Letters Patent and Instructions to the Governor issued under Royal Sign Manual. He acts on the advice of the Executive Council or of a Minister of the Crown, except in limited spheres where he possesses discretionary power, e.g., in regard to dissolution of Parliament.

The Executive Council consists of members of the Ministry formed by the leader of the dominant party in the Legislative Assembly and the Governor presides over its deliberations.

In compliance with a referendum assented to in May, 1933, the Legislative Council was reconstituted on 23rd April, 1934. The new House consists of 60 members, elected by the combined vote of members of both Houses of Parliament. Provision is made for the retirement of 15 members in rotation every 3 years. The inaugural new Council was elected by members of the existing Legislative Council and Legislative Assembly, four groups of 15 being elected for 3, 6, 9 and 12 years respectively. Members of the Legislative Council receive no remuneration. The Legislative Assembly consists of ninety members elected under a system of universal adult suffrage. Any person enrolled as an elector may be elected to the Assembly, except members of the Legislative Council or of the Federal Legislature. Bills appropriating money or imposing taxation and bills affecting the Assembly itself must originate in the Assembly and by its power over supply this House controls the executive.

The duration of Parliament is limited to three years, but it may be dissolved by the Governor at any time. The Constitution Act provides that it must meet at least once in every year.

Members of both Houses are supplied with free passes on State railways and tramways and members of the Legislative Assembly receive an annual allowance of 670*l.*

The elections of members of the Legislative Assembly are conducted by secret ballot. Adult British subjects, men and women, are qualified for enrolment as electors when they have resided in the Commonwealth for a period of six months, in the State for three months, and in any sub-division of an electoral district for one month preceding the date of claim for enrolment.

Each elector is entitled to one vote only, and voting has been compulsory since 1930. The electoral rolls are compiled under provisions for compulsory enrolment introduced in 1921.

Electors absent from their districts are permitted to record their votes at any polling place in the State, and provision is made for postal voting in the case of persons precluded from attendance at any polling place by reason of illness or infirmity, distance over 10 miles, or travelling. Persons whose names are not shown on the electoral roll or who are marked as having voted, may vote in certain circumstances after making a declaration that they have not already voted.

Voters must number the candidates in order of preference on the ballot paper, and votes are informal unless preferences have been duly expressed for all candidates. In counting votes, the candidate is elected who has secured an absolute majority of votes either of first preferences outright or of first preferences plus votes transferred to him in due order of preference by excluding in turn candidates with the lowest number of votes and re-allotting their votes according to the next preference indicated.

Digitized by Google

The electoral law provides that electorates are to be redistributed whenever directed by the Governor. In the event of there being no direction by the Governor, a distribution must take place on the expiration of nine years from the date of the last redistribution. The redistribution is made by a special commission of three persons, viz.:—the Electoral Commissioner, the Government Statistician, and the Surveyor-General.

For the purposes of the distribution it is prescribed by the Parliamentary Electorates and Elections (Amendment) Act of 1928 that the State must be divided into three parts, viz.:—the Sydney area, to which 43 seats are allotted, the Newcastle area 5 seats, and the Country area 42 seats.

Finances.

The finances of the State of New South Wales cover a wide range of activities by reason of the State ownership of railways and tramways, large water and sewerage works, harbour improvements, etc. The greater part of the loans raised by the State have been expended on these works, and until recent years all their accounts were included with the Consolidated Revenue Fund. Since 1925, however, separate accounts were formed for the principal undertakings and it has become difficult to compile on a strictly comparable basis a statement showing the aggregate receipts and expenditure of the State. Consequently, there is some duplication in the following table of receipts and expenditure of the principal revenue accounts in two groups—governmental and business undertakings; for instance, an annual contribution of 800,000*l.* from the consolidated Revenue Fund to the Railways Fund is included as receipts and expenditure under both headings:—

The net revenue from Customs in 1937–38 was 14,828,000*l.* and from Excise 7,414,000*l.*

Public Debt.

The total amount of the Loan Liability to the Commonwealth at the 30th June, 1938, was 354,167,254*l.*, of which 181,800,821*l.* is redeemable in Australia, 159,446,470*l.* in London, and 12,919,963*l.* in New York. The sinking fund balance at the 30th June, 1938, was 180,669*l.* Taking into account the sinking fund balance and Commonwealth advances in special desposits accounts, also overdrafts on loan accounts, the net public debt of New South Wales at 30th June, 1938, was 349,318,725*l.* In terms of the Financial Agreement between the Commonwealth and the States, the Commonwealth took over the debts of New South Wales and the other States on 1st July, 1929, and assumed the liabilities of the States to bondholders. The Commonwealth contributes an annual sum towards interest on the debts and the Commonwealth and States contribute to a national debt sinking fund established under the agreement. The Australian Loan Council of representatives of the Commonwealth and each State manages the debts and supervises public borrowing.

* Includes outside packages and containers not classified according to country of origin, viz., 610,219*l.* in Jan.–June, 1930; 695,067*l.* in 1930–31; 461,244*l.* in 1931–32 and 604,652*l.* in 1932–33, 595,497*l.* in 1933–34, 763,540*l.* in 1934–35; 784,340*l.* in 1935–36; 863,771*l.* in 1936–37; 683,692*l.* in 1937–38. (These were recorded for the first time in January, 1930).

LORD HOWE ISLAND.

Latitude, 31° 30′ S. Longitude 159° 5′ E.

This island lies 436 miles north-east from Sydney, and 300 miles from Port Macquarie, the nearest part of the Australian continent.

It was discovered on February 17th, 1788, by Lieutenant H. L. Ball, of H.M.S. "Supply," whilst on his way from Port Jackson to found a settlement at Norfolk Island. It is of volcanic origin and crescent shaped, about seven miles in length and from one-half to one-and-three-quarters in width, containing about 3,220 acres. It is of great beauty throughout and covered with a dense and most luxuriant vegetation, but from the peculiar bouldery character of the formation of the major part of its floor, it has scarcely more than 300 acres suitable for agriculture. The soil of these few acres is extremely rich, and will produce almost any sub-tropical vegetation.

No lands have been sold, and the people pay no rent, occupying the land upon sufferance only—the Government reserving the right of resuming whenever they may see fit.

The population numbers 177 souls. Very fair and comfortable accommodation may be obtained at up to date guest houses on the island. The natural beauties of the island render it most attractive to visitors. Tourists are visiting this beautiful island in largely increasing numbers. Fish are very plentiful, and good sport can consequently be had. There is a regular steam service to the island from Sydney under the agency of Burns, Philp and Co.

The Island is a dependency of New South Wales and the Government of New South Wales have appointed a Board of Control consisting of S. L. Anderson (Under-Secretary, Chief Secretary's Office); and H. H. Guest; The Board have charge of the affairs of the Island, and the management and control of the Kentia palm seed industry. Lord Howe Island is the home of the Kentia Palms, the hardiest and most beautiful palms in the world and the seeds are collected and sold under the Board's direction. Hundreds of bushels of these seeds are shipped annually to all parts of the world.

QUEENSLAND.

Situation and Area.

Queensland occupies the whole of the north-eastern portion of Australia, commencing at a point on the east coast called Point Danger, in lat. 28° 8′ south, about 400 miles north of Sydney, the capital of New South Wales.

The greater portion of the southern boundary line is formed by the 29th parallel of south latitude. The eastern seaboard extends about 1,500 miles, from Point Danger passing Cape York, the extreme northern point of the continent, terminates on the boundary of the Northern Territory. Thursday Island, in Torres Straits, with Moreton, Stradbroke, Fraser, Hinchinbrook, Prince of Wales. Wellesley, and many other islands, are included in the State.

The breadth of the territory near the southern boundary is about 900 miles from the eastern coast line to the meridian of 138° east longitude, which forms the western boundary line of the State, separating it from the Northern Territory. This includes the greater part of the Gulf of Carpentaria, which has a seaboard of about 750 miles. The whole of the State of Queensland comprises 670,500 square miles, or 429,120,000 acres (being equal to more than the combined areas of France, Germany, Italy and the British Isles).

Early History.

Captain Cook landed in Moreton Bay in 1770, but the Brisbane River, running into Moreton Bay, was not discovered until 1823, and the Moreton Bay Settlement was formed from New South Wales in 1824. The Darling Downs were explored in 1828, and squatters began to settle on the rich pasture grounds. The territory was, however, not thrown open to colonisation until 1842, and, after explorations by Leichhardt, 1845-7; and by Kennedy in York Peninsula in 1847, it was separated from New South Wales on 10th December, 1859, when it became a separate colony, under the name of Queensland, with about 25,000 inhabitants, having responsible government from the time of the proclamation declaring the Colony distinct.

Climate and Physical Features.

The climate is comparable to that of Madeira, the mean temperature being high but constant. The northern part is tropical. The mean temperature at Brisbane is about 69·0°, the extreme range during 1937 being from 42.4° to 100·5°. The rainfall in the interior is scanty and variable; the total for year at Brisbane was 34·79 inches in 113 wet days; mean barometer at 9 a.m. 30·04.

The country extending along the eastern seaboard is indented with several fine bays and estuaries, which are the outlets of rivers, a number of which are navigable for good-sized vessels.

A mountain range, called the "Main," or "Great Dividing Range," extends throughout the greater portion of the colony: it is a continuation of the main range, or Cordillera of New South Wales and Victoria, and runs northerly throughout its course, and continues its course northerly to its termination at Cape York, the most northerly point of the continent of Australia. At or near the 21st parallel of south latitude another range leaves the Great Divide nearly at right angles, and traversing the State westerly, separates the waters flowing east, south and west from those which, flowing northerly, debouch into the Gulf of Carpentaria. Between this range and the eastern shore are situated the highest mountains in the country, viz., the Bellenden Kerr Range, which reach an elevation of over 5,000 feet above the sea level.

Products and Industries.

Between the main range and the sea, especially on the banks of the rivers, there are large quantities of good alluvial land, which in its natural state is covered with a dense growth of timber. Much of this, in the more settled portions of the country, has been cleared and cultivated, and is found to yield a remunerative return to the farmers, who are usually small proprietors, cultivating the soil principally with their own labour, and growing chiefly sugar, maize, wheat, English and sweet potatoes, tobacco, cotton, and semi-tropical fruits and vegetables.

Sugar growing is a very important industry. In 1936 there were 338,686 acres under cane, of which the crops on 245,918 acres were crushed, yielding a return of 5,170,571 tons of cane, which produced 744,676 tons of sugar at 94 % net titre.

Maize was grown on 181,266 acres, and returned a yield of 3,148,814 bushels.

Digitized by Google

The cultivation of cotton is now being undertaken on a large scale, and during 1936, 62,200 acres produced 19,198,600 lbs. of unginned cotton.

In 1936 the quantity of land under arrowroot (*Canna Edulis*) was 865 acres, which yielded 10,204 tons of tubers. Factories made 1,769,656 lbs. of arrowroot flour during 1936-37. A small proportion of this root is utilised for pig food.

Amongst other fruits, bananas occupied 7,305 acres, of which 4,983 acres produced 1,447,244 bunches of fruit. Pineapples, 6,314 acres, of which 4,408 acres produced 1,227,734 dozen. Oranges, 3,534 (2,750 bearing, 784 not bearing) acres, with 307,439 bushels. The total value of all crops for 1936 was estimated at £13,557,000.

Much of the country to the west of the dividing range of mountains is elevated tableland, consisting of wide plains, sparsely timbered but well grassed and watered, embracing many millions of acres of excellent agricultural soil. Within a certain distance of the mountains where the rainfall is tolerably regular, most of the land is well adapted for the production of wheat. This is cultivated in the neighbourhood of Toowoomba and Warwick on the Darling Downs; also at Roma and Mitchell further to the west. There is every prospect of the area of cultivation extending to the Burnett District and further west in the near future. In 1936 out of the total area planted with this cereal, 5,259 acres were mown for hay, and 283,648 acres yielded 2,016,236 bushels of grain.

Grazing is far in advance of tillage farming in the State, and at 31st December, 1937 there were 2,478 squatting "runs" or tracts of land, containing 239,606,080 acres, leased from the Government at a very low annual rental, more than half the number of which are surveyed, besides which an additional area of 81,350,958 acres are leased as grazing selections, and 7,273,720 under occupation licence at 1st January, 1937. Number of horses 441,536, cattle 5,950,572, sheep 20,011,749, pigs 290,855,

Wool produced, 1936-37, expressed as greasy 153,766,368 lbs., value 9,155,506*l*.

The chief exports overseas of home production were:

	1935-36.	1936-37.	1937-38.
	£	£	£
Wool	7,870,668	10,170,252	9,391,780

Sausage Casings ..	4,593	3,091	6,943
Eggs	105,910	122,193	77,962

Goods sent to other States of Australia are not included above.

Interstate Trade statistics are not available in detail but during the year ended 30th June, 1937, imports into Queensland from other States amounted to £20,541,000, while exports to other States totalled £13,629,000, in addition to Queensland's gold production of £1,029,000 which was exported through Southern States.

The imports are apparel and soft goods, vehicles, oils in bulk, implements and machinery, metals and manufactures thereof, iron and steel, paper, etc.

The mining industry is important.

Queensland's mineral output for 1937 showed an increase of 778,989*l*. on 1936 figures, due chiefly to increases in lead, zinc, copper, coal, gold and tin.

During 1937 gold was obtained chiefly from the following fields: Mt. Morgan, Cracow, Charters Towers, Mt. Coolon, Etheridge, Bowen and Batavia River.

The production for the year was 127,281 fine oz., valued at £1,104,760.

Many other minerals are worked in the State, the principal of which and their value for 1937 were:—

Tin.—£202,614.—Chief centres of production: Chillagoe, Cooktown, Herberton, Kangaroo Hill and Stanthorpe.

Lead. — £887,939. — Chief centres: Cloncurry (Mount Isa), Etheridge.

Copper.—£308,968.—Chief centres of production: Chillagoe, Cloncurry, Etheridge, Herberton and Mt. Morgan.

Silver.—£284,592.—Chief centres: Chillagoe, Cloncurry, mostly Mt. Isa, Herberton.

Limestone.—£13,179.—Chief centres: Chillagoe, Cloncurry, Gladstone, Gympie, Rockhampton, Stanthorpe and Townsville.

Zinc.—£606,150.—Chief centre: Cloncurry (Mount Isa).

Bismuth.—£3,588.—Chief centre: Biggenden.

Wolfram.—£26,139. — Chief centres: Chillagoe, Herberton.

Molybdenite.—£3,849.—Chief centre: Chillagoe.

Ironstone.—£3,858.—Chief centres: Chillagoe, Cloncurry.

Fluorspar.—£3,911—Chillagoe.

Total value of minerals other than gold, £3,287,732. Excellent coal continues to be raised in the environs of Ipswich, in the Clermont, Maryborough and Rockhampton Districts and the Darling Downs, and at Bowen and Mount Mulligan, N.Q., but besides these pits numerous workable seams of this mineral are known, and their being actively worked depends solely on the opening of an extended market. The total output for 1937 was 1,120,179 tons, valued at £934,107.

Several companies have been formed with the object of prospecting for oil in the Roma and other districts, but up to the present, payable quantities have not been discovered.

Useful timbers of various descriptions grow in abundance in Queensland, and ought to become a valuable export. The timber indigeneous to the State is popularly divided into two classes, termed respectively "hard" and "soft" woods. The undermentioned trees supply the hard wood which is most in demand: blue gum, mesamate, iron bark, blackbutt, turpentine, stringy bark, spotted gum, bloodwood, tallow wood, yellow wood, dark yellow wood, swamp mahogany, crows ash, &c. Some of these woods are especially valuable for railway making, bridge, pier, and wharf building as well as for fencing purposes, on account of their strength and durability. The timbers which are used for house and boat building, cabinet and ornamental work, have a fine grain, are easily worked, and take a bright polish; a few of those most in use are as

Digitized by Google

follows: hoop, kauri and bunya pine, maple silkwoods, silky and satin oaks, black and walnut bean, rose walnut, mahogany and grey teak.

Amongst the medicinal plants supplying extracts and preparations which are attracting notice in both Europe and America may be mentioned—*Duboisia myoporoides*, the extract of which is in demand as a substitute for belladonna; *Alstonia constricta*, whose bark is a valuable tonic; *Euphorbia Drummondii*, the extract of which is effective in dysentery and low fever; *Euphorbia pilulifera*, or the asthma herb; and the lemon-scented iron bark (*Eucalyptus staigeriana*) which, on distillation, yields an essential oil equal to that of the lemon. The extract from leaves of the eucalyptus is used largely as a remedy for colds, fevers, &c.

During 1936-37 the value of the production of Queensland's fishing industry was as under:

	£
Fish, Crabs, Turtles and Oysters ..	176,889
Pearls and Pearlshell	149,462
Tortoise and Trochus Shell	37,636
Bêche de Mer	5,729

Brisbane, Maryborough, Bundaberg, Rockhampton, and Townsville are ports of registry, and had, in 1937, 228 vessels on their registers, of a total tonnage of 14,533.

Water Supply.

A considerable sum has been advanced from time to time to municipalities and boards for the construction of works for the supply of water to the city of Brisbane and to towns in the State, of which a large proportion has been repaid, leaving at the end of 1936 an indebtedness to the Government of £3,025,259. (including Brisbane figure as at 30th June, 1937). In addition £2,394,341. (as at 30th June, 1937) has been advanced for Metropolitan Sewerage Works.

Loans other than Government outstanding, at 31st December 1936. For water £2,515,317 (including Brisbane figure, as at 30th June, 1937); for Metropolitan Sewerage £3,114,470 (as at 30th June, 1937).

An important feature of the country west of the coast range is the proved existence of artesian water in some 376,800 of the 670,500 square miles comprising the area of the state. At least 5,607 artesian bores have been sunk the depth ranges to a maximum of 7,009 feet (the depth of the bore at Springleigh); 1,500 of these bores overflow. The estimated continuous yield of water from these flowing bores at 30th June, 1937, was 251,052,000 gallons per diem. In addition, supplies were pumped from 3,800 bores. Generally stated, the waters are soft, and of excellent quality. The static pressure at the surface ranges from fully 220 lbs. per square inch, as at the Government bore at Thargomindah, to a few lbs., and the temperatures of the waters range from 212° to 78° Fahr. The amount expended in boring for artesian water is estimated by the Department of Irrigation and Water Supply at about four and a half millions sterling, exclusive of the cost of casings, so that not far short of five millions sterling represent the amounts expended, chiefly by pastoralists, in improving and increasing the value of the national estate. In addition to this expenditure, Government have expended large sums on the construction of water conservation works on main roads and stock routes, and these works have opened up country, facilitated settlement, and added to the value of public lands.

During 1936 54,095 acres were artificially watered by various means. The crop chiefly benefited being sugar cane, but vegetables, fruit, lucerne, other fodder crops and grass lands have been similarly treated.

Population.

The population of Queensland, excluding the aboriginals, was found by the returns of the census of April, 1881, to be 213,525 persons; a census was taken on the 1st of May, 1886, when it was found that the total population was 322,853 persons, an increase of 51·20 per cent. in 5 years; and the census of 5th April, 1891, showed the population to be 393,718; of these 223,799 were males, and 169,939 females. The census of 3rd April, 1911, showed that there were 329,506 males and 276,307 females, making a total of 605,813, exclusive of 8,687 aboriginals. The population is mostly either Australasian born or of European parentage. The figures for 1911 do not include all aborigines, but only those living under civilised conditions. The census taken on 30th June, 1933, showed a population of 497,217 males and 450,317 females, making a total of 947,534 persons exclusive of aboriginals. Population of State 31st March, 1938, 996,219. The census of aboriginals as on 30th June, 1937, on the count revealed that there were at that date 12,119 full bloods and 5,880 half-castes in the State.

Local Authorities and Towns.

Practically the whole of the State is divided into Local Authority Areas (cities, towns and shires), a few islands only occupied by a population of some 1,500 persons being excluded. The Local Authority areas are governed by aldermen and councillors who are elected by the people and have authority in all parochial matters.

City of Brisbane figures included in the following data are for the year ended 30th June, 1937. The receipts of these bodies including receipts for Water and Sewerage purposes in 1936 were £7,235,465; their expenditure £7,580,853; the assessed rateable value of the property in districts under their control £71,884,731; their liabilities were £26,353,004, whilst their assets totalled £21,602,625. Liabilities and assets for the water and sewerage works, which are due principally on behalf of these local bodies, are included in the figures given and amounted to £13,837,904 and £15,144,704, respectively.

In addition the various Local Authorities control other public utilities—electric light, small railways and tramways (including Brisbane and Rockhampton Street Tramways); particulars follow for year 1936:

Public Utility.	Receipts.	Expenditure.	Liabilities.	Assets.
	£	£	£	£
Electric Light..	1,171,234	1,049,033	2,672,244	4,040,581
Railways & Tramways ..	978,933	878,776	2,688,013	3,378,243
TOTALS	2,150,167	1,927,809	5,360,257	7,418,824

Brisbane, the capital of the State, is beautifully situated about 20 miles from the mouth of the fine river of that name. The city, including its suburbs,

Digitized by Google

had, at the Census on 4th April, 1921, a population of 210,032 (ten miles radius). The City of Brisbane now consists of an area of 385 sq. miles and the estimated population on 31st March, 1938, was 320,760. It is only about 10 miles in a direct line from the sea coast; the climate is healthy, and during the greater part of the year most enjoyable.

The other chief towns are Townsville (30,035), Maryborough (11,938), Rockhampton (30,000), Mackay (11,720), Toowoomba (28,600), Gympie (8,300), Ipswich (22,675), Charters Towers (8,100), Cairns (13,750), Warwick (7,000), Bundaberg (12,571), Southport (6,000).

Currency and Banking.

There were, on 30th June, 1938, 10 banks (exclusive of the Commonwealth Bank) with 536 branches. The value of the coin and bullion is given as 250,932*l.*; deposits, 38,532,702*l.*; assets, 48,696,241*l.*: liabilities, 40,335,244*l.*

At the same date the assets of the Commonwealth Bank were 8,466,572*l.*, and the liabilities 13,178,093*l.* (including 11,561,750*l.* deposits).

The Commonwealth Savings Bank, Queensland Branch, had on 30th June, 1938:

No. of Operative Accounts ..	463,642
Value of Deposits	28,206,457*l.*
Average per Inhabitant	28*l.* 2*s.* 3*d.*

The coinage of Queensland is that of the Commonwealth of Australia, and provisions as to legal tender are the same as in the United Kingdom. The Australian Note Issue is controlled by the Commonwealth Bank.

Education.

A Government system of elementary education was established in Queensland in 1875. Primary education is absolutely free and compulsory for children between the ages of five and fourteen years.

Schools are established at all places thickly enough populated to warrant them. These are administered by a central department under the jurisdiction of the Minister for Public Instruction.

Secondary education is provided for by high schools, technical colleges and grammar schools. The former two types are directly maintained and controlled by the Government, whilst the latter are State endowed. Primary school pupils by test examination may gain free admittance to secondary schools.

Intermediate Schools have also been established—principally for vocational training.

There is also a University in Brisbane.

In 1936 there were in operation 1,720 State Schools, with an average attendance of 118,483 pupils. Of these 14, with 97 teachers and an average attendance of 1,918 scholars, were High Schools. There were also (1936) 228 private schools, with average attendance of 28,361 children, and 8 grammar schools, with average attendance of 1,437 pupils. 15,189 pupils were enrolled at classes at 14 technical colleges during 1936. The university has 17 professors, 44 full time lecturers and an enrolment of 1,283 (961 males, 322 females). 118 degrees were conferred during the year.

The public expenditure on education, science and art during 1936-37 was 2,020,872*l.*

Immigration.

The arrivals into the State during 1937 from places outside the boundaries numbered 69,103, and the recorded departures to all countries 67,932, showing an excess of arrivals of 1,171.

Government.

The constitution is regulated by the Letters Patent of 6th June, 1859, and Act 31 Vict., No. 38. The Legislature is formed of one House of Parliament the Legislative Assembly. The members are elected. There is no property qualification required for membership in the Legislature. The voting for members is by ballot. The Elections Act Amendment Act of 1905 provides for male and female adult franchise on residential qualifications only, a three months' continuous residence in the State, and six months' within the Commonwealth, being the only proviso, subject to disqualifications for insanity, criminality, etc.

By the Electoral Districts Act, of 1931, the State is divided into 62 districts, each returning one member.

The Upper House, or Legislative Council was abolished by an Act passed in 1922 (12 Geo. V. c. 32). Its members were nominated by the Governor and held office for life.

Means of Communication.

Railways.—In relation to its size, population and development, Queensland ranks as one of the best served countries in the world so far as railway transport is concerned. With an area of 670,000 square miles and for a population of 1,000,000 there is a railway system of over 6,500 route miles—the largest route mileage of any system in the Commonwealth.

At 30th June, 1938, there were 6,467 miles of 3 ft. 6 ins. gauge, 30 miles of 2ft. gauge, and 69 miles of 4 ft. 8½ ins. gauge Government lines open for traffic.

These lines are divided for administration purposes into three divisional systems: Southern, Central and Northern, each in charge of a General Manager with headquarters at Brisbane, Rockhampton and Townsville, respectively, subject to the control of the Commissioner at Brisbane.

In addition, there are 99 miles of railways and tramways of 3 ft. 6 ins. gauge owned by private companies or local authorities, which are either worked by the Commissioner, or are subject to his inspection.

The Capital Account of the Government-owned railways (excluding the 69 miles of Uniform Gauge line) at 30th June, 1938, amounted to £39,252,299, the earnings for the twelve months ended on that date being £7,254,388. The deduction of working expenses amounting to £5,754,509 left a profit on working of £1,499,879, but after paying interest charges there was a deficit of £129,091. The percentage of expenses to earnings for the year was 79·3, whilst the return on capital (open lines) was equivalent to £3 17s. 9d. per cent.

The railways have been the principal medium by which the State has been developed and as Queensland possesses no inland navigable rivers they are the chief means of transport.

The rolling stock consists of 748 engines, 1,052 carriages, 205 rail motors and trailers, 18,663 wagons and 182 brake vans.

A glance at the accompanying map shows that the railway system of Queensland is so decentralised as in general to provide the most direct means of transport from the interior to the nearest port—a vital factor in the development of a country whose prosperity is largely dependent upon the efficient and economical marketing of its primary products.

All the main lines serving the interior of the State cross the Great Dividing Range, necessitating steep ascents. In the coastal areas the railways cross a large number of rivers and pass through country subject more or less to regular tropical rains and inundation by flood, whilst many lines traverse black soil country.

Digitized by Google

For the year ended 30th June, 1938, the number of passenger journeys made over the railways was 25,601,382, the earnings derived therefrom being £1,494,493. Suburban traffic accounted for 20,669,318 journeys and a revenue of £301,669. The tonnage of goods and livestock conveyed amounted to 5,000,683, the revenue from this traffic being £5,055,698.

The livestock carried comprised 2,056,121 sheep, 673,558 cattle, 433,432 pigs, 291,100 calves, and 31,536 horses. As the wealth of the State is derived principally from its primary industries, the products of these industries constituted the bulk of the commodities conveyed by rail. Of the total tonnage of goods and livestock carried 38·9 per cent. was agricultural produce, consisting chiefly of sugar cane, raw sugar, wheat, maize, other grains, hay and chaff, fruit and cotton.

Mineral traffic, comprising chiefly coal, coke, lead bullion, zinc concentrates, copper ore, etc., represented 26·4 per cent. of the tonnage carried, timber 10·5 per cent., wool 1·6 per cent., and general merchandise 12·9 per cent.

The 4 ft. 8½ in. gauge railway provides connection with the New South Wales system of that gauge and permits the transport of passengers and goods between Brisbane and the New South Wales system without the necessity for transhipment.

Modernly equipped trains, complete with sleeping, dining, and in some cases lounge cars, maintain regular timetables over all the principal routes, the most important being the Sunshine Express trains which provide the service between Brisbane and Cairns (1,043 miles).

On a number of country branch lines passenger, cream and parcels traffic is catered for by rail motor services. This form of transport is particularly suited to Queensland conditions, and both petrol and diesel units are in use although the former are being gradually replaced by the latter. The speedy, clean and comfortable travel which rail motor trains provide make them popular with passengers, and the low cost of operation enables the Department to give a more frequent service than would be possible with the use of steam trains.

Sea Transport. Queensland has many fine ports along its extensive coastline. Regular shipping services to and from these ports are supplied by both overseas and interstate vessels. The port of Brisbane, which accommodates the largest vessels comfortably in its dredged and improved river, is controlled by the State Treasury through a Department of Harbours and Marine. The other main ports (Gladstone, Rockhampton, Mackay, Bowen, Townsville and Cairns) are administered by Harbour Boards with members representing the towns and districts served by the Ports.

Practically all the capital expenditures of the Harbour Boards have been provided by the Government. The overseas cargo discharged and shipped at Queensland ports during 1936–37 amounted to 1,131,141 tons, of which 44 per cent. was dealt with at the port of Brisbane. Of the 1,163,768 tons of interstate cargo discharged and shipped 62 per cent. was dealt with at Brisbane.

Air Transport. Air services are in operation throughout the State from Brisbane to Mt. Isa, Brisbane to Sydney, Brisbane to Cairns, Cairns to Burketown or Cloncurry, Rockhampton to Mt. Coolon and Charleville to Cootamundra (New South Wales). The Empire flying boat service from London to Sydney passes through Brisbane and other Queensland ports. A social service of importance to Western Queensland was formed in May, 1928, when the Flying Doctor Service was commenced by the Australian Inland Mission.

Note.—Since records of transfers of goods from other States have ceased to be kept by the Customs authorities, no credit is given to Queensland for overseas goods consumed there; this accounts for apparent drop in Customs receipts. Also, no credit is given to Queensland for exports that go interstate and for transhipment oversea, which constitutes a large proportion of the Total Exports.

Governors of Queensland.¶

Sir Anthony Musgrave, G.C.M.G., 6th November, 1883, and 13th December, 1886.
Gen. Sir H. W. Norman, G.C.B., G.C.M.G., C.I.E., 1st May, 1889.
Gen. Sir H. W. Norman, G.C.B., G.C.M.G., C.I.E., 7th May, 1891.
Lord Lamington, K.C.M.G., 9th April, 1896.
Lord Lamington, K.C.M.G., 27th April, 1900.
Maj.-Gen. Sir H. C. Chermside, G.C.M.G., C.B., 24th March, 1902.
Lord Chelmsford, K.C.M.G., 30th Nov., 1905.
Sir W. MacGregor, M.D., G.C.M.G., C.B., 2nd December, 1909.

† Overseas only.

SOUTH AUSTRALIA.

Situation and Area.

That portion of the Continent of Australia bounded on the east by the 141st degree of east longitude, on the north by the 26th degree of south latitude, on the west by the 132nd degree of east longitude, and on the south by the Southern Ocean, was constituted a British Province by Act of Parliament, 4 and 5 William IV., c. 95, under the designation of SOUTH AUSTRALIA. In 1861, the territory known as "No Man's Land," about 80,000 square miles, lying between the boundaries of South and Western Australia, was added by Act 24 and 25 Vict., c. 44, making the western boundary the 129th degree of east longitude. The area contained within those limits is estimated to be 380,070 square miles.

The country known as the Northern Territory from the 26th parallel of south latitude to the Indian Ocean, between the 129th and 138th degree of east longitude, was also annexed to South Australia, but was on January 1st, 1911, taken over by the Commonwealth.

Kangaroo Island (90 m. by 25 m.; area 1,500 sq. m., 1,000 ft. highest point), Nuyts Archipelago, the Gambier, and other islands on the south coast, are included in the State.

Adelaide, the capital of the State, is situated about five miles from the eastern shore of St. Vincent's Gulf, in latitude 34° 57′ S. and longitude 138° 38′ E., and Port Adelaide, the principal port, is about seven miles north-west from the city, and connected therewith by rail.

Early History.

The south coast of the State was surveyed by Flinders in 1802, and Sturt in 1829 explored the Murray River to its mouth.

The province was founded on the Wakefield system of colonization under Act of Parliament 4 and 5 William IV. c. 95.

The first colonists landed at Kangaroo Island, but the settlement was almost immediately transferred to the mainland where the province was proclaimed at Glenelg on December 28, 1836.

Copper was discovered at Kapunda in 1842, at the Burra in 1845, and at Wallaroo in 1859.

Responsible government was established in 1856.

Sturt reached the Indian Ocean near the mouth of the Adelaide River in July, 1862, and the Northern Territory was annexed to South Australia in July, 1863.

Climate.

The rainfall at Adelaide averages 21 inches annually, mostly from May to October. It varies from 16 to 42 inches on the plains and hills respectively. The mean temperature 63°, the extreme range being from 32° to 116°.

The South Australian climate is very mild and healthy. The birth rate is 15 per 1,000 of population, and the death rate only 9. The infantile mortality is practically the lowest in the world, being only 33 per 1,000 births.

General Government.

The Parliament of South Australia consists of a Legislative Council and a House of Assembly, created by the Local Act No. 2 of 1855-56, which was proclaimed on October 25th, 1856. This Act, commonly called the Constitution Act, was passed by virtue of the Imperial Act 13 & 14 Vict., cap. 59.

The Legislative Council and House of Assembly, as originally constituted, consisted of 18 and 36 members respectively. By the Local Act No. 27 of 1875, the House of Assembly was increased to 46 members, representing 22 electoral districts. By Act No. 236 of 1881, six members were added to the Legislative Council, and the Colony was divided into four electoral districts for the purpose of Council elections. In 1882 the House of Assembly was further increased to 52 members, representing 26 electoral districts; and by Act No. 450 of 1888, the Northern Territory was created an electoral district, returning two members, thus raising the number to 54. By Act 779 of 1901, the number of members was reduced from 31st March, 1902, to 18 in the Legislative Council and 42 (representing 13 districts) in the House of Assembly. The Northern Territory having been transferred to the Commonwealth Government, the Electoral Districts then numbered 12, returning 40 members. By Act 1148 of 1913 the assembly Districts were altered, numbering 19, returning 46 members. Act 2336 of 1936 divided the State into 39 electoral districts, each returning one member.

The five electoral districts of the Legislative Council are—Central No. 1, Central No. 2, Southern, Midland and Northern, each returning four members. (*Vide* Section 10, Act 959 of 1908, and Section 15 of 1148 of 1913). Elections are conducted by ballot. (*Vide* Section 21, Act 959 of 1908.)

The quorum of the Council consists of ten members, including the President.

The qualification for a member of the Legislative Council is that he shall have attained the age of 30 years, that he be a subject of the King, and that he has resided in the State for three years. The qualification of a voter is that he shall be 21 years of age, a natural-born or naturalized subject of His Majesty, and have resided in South Australia six months. As to other qualifications, see Act 1148, 1913. Members of both houses are paid 400*l.* per annum.

The House of Assembly, which is liable to dissolution by the Governor, is elected for five years. The Constitution Act prescribes no other qualification as necessary for a member of the House of Assembly than that he shall be qualified and entitled to be registered as an elector. An elector's qualification to vote is that he shall be of full age, a natural born or naturalised subject of His Majesty, and have lived in South Australia for six months. The total number of electors in 1937 for the Legislative Council was 129,135 and for the House of Assembly 364,884, of whom approximately half are females. The session is usually from June to December.

Digitized by Google

The franchise for both Houses was extended to adult women by Act 613 of 1894.

Responsible government is carried on by six Ministers, members of the Legislature, who form the Cabinet, and are *ex-officio* members of the Executive Council. The ministry has a total salary of 7,750*l*. per annum.

Local Government.

There are 34 municipalities in the State, whose powers are regulated by the "Municipal Corporations Act, 1890." The governing body consists of Mayor (Lord Mayor for the City of Adelaide), Aldermen (Aldermen are at present elected for City of Adelaide and some of the Suburban Corporations only), and Councillors, elected by the ratepayers, who also elect the Auditors. The Council has power to levy rates for municipal purposes only on all house and land property within the municipal area, but the question of raising a loan must be submitted to a general meeting of the ratepayers, and a poll must be taken if demanded by six ratepayers. There are also 108 district councils having somewhat similar powers. The aggregate annual assessment of the property within the municipal areas and District Councils amounts to 8,546,808*l*. and rates collected 832,613*l*.

Population.

The population of the State at the census of 1911, was 408,558 persons, of 1921, 495,160 and of 1933, 580,949. This does not include full-blooded aborigines, of whom there are 1,740, exclusive of those living in a wild state. In 1933 there were 3,423 persons of foreign nationality, including 1,056 Italians. Immigration is controlled by the Commonwealth Government under the Immigration Restriction Act, No. 17 of 1901. The population of the State on 30th June 1938, was estimated to be 592,000.

The inhabitants of the City of Adelaide, including the suburbs, on 31st December, 1937, were estimated to be 318,190.

Production and Industry.

It may be roughly estimated that not more than 150,000 square miles of the area of the State are at present put to profitable use. Agricultural settlement has not extended 300 miles from the coast; and pastoral occupation may be said to have reached the State boundaries with the exception of the far north-west. Forty-nine counties have been proclaimed to 31st December, 1937, embracing 87,398 square miles, or 55,934,720 acres. The area outside the declared counties covers 292,672 square miles, or 187,310,000 acres. Of the area of the State, 16,040,935 acres have been alienated as follows:—11,265,385 acres sold; 4,327,843 acres alienated under system of deferred payments and 264,233 acres granted for public purposes. 266,983 acres have been dedicated for forest reserves. Pastoral leases cover 107,017,131 acres and other leases 20,046,959 acres, making the total area in occupation 143,105,025 acres. All land is surveyed by the Government prior to leasing, and is divided into farms of extent varying from 80 to 20,000 acres—the necessary reserves being made public for railways, highways, watering stock, etc.

Nearly half the total area of land cultivated is cropped with wheat (for grain, hay and fodder), of which 3,300,000 acres were cultivated in 1938. The total area under cultivation is about 7,500,000 acres. The following are the average yields of the main crops grown —Wheat, 33,000,000 bushels; oats, 2,400,000 bushels; barley, 6,000,000 bushels; hay, 600,000 tons and the estimated value of the crops averages 11,000,000*l*., or 19*l*. per head of population. The value of breadstuffs exported to oversea countries averages annually 5,000,000*l*.

Vine culture is an important and progressive industry; 55,000 acres of land are devoted to this purpose. Wine made averages 13,500,000 gallons annually, but a little more than half of this is used for distillation purposes. There is a considerable export trade to oversea countries, chiefly Great Britain. The slopes of the hills produce wines of a full-bodied character similar to those of Spain and Portugal, whilst those made in the more elevated districts resemble the lighter wines of the Rhine. Whilst the local demand is fully supplied at very cheap rates, a considerable export trade in wines of a higher character is carried on. The wines of South Australia have always been awarded prizes at the several Great International Exhibitions.

Considerable attention has also been paid to the drying of raisins and currants; of the former 250,000 cwts., and of the latter, 150,000 cwts. are made annually. 25,000,000 lbs. raisins and 14,000,000 lbs. currants were sent to oversea countries in 1937-38.

Almond trees (250,000) are of rapid growth, and large quantities of a superior description of soft-shell almond are gathered yearly for home consumption and for shipment. Apple trees, 1,000,000; apricot trees, 300,000; orange trees, 450,000; lemon trees, 40,000; pears, 170,000; plums, 240,000; peaches and nectarines, 180,000; cherries, 100,000; and also figs, quinces, raspberries, strawberries, gooseberries, walnuts, peanuts, etc. The principal kinds of fruits produced each season is as follows:—Apples, 1,000,000 cases; apricots, 400,000 cases; peaches, 150,000 cases; oranges, 700,000 cases; pears, 250,000 cases; and plums, 165,000 cases. The dried fruit production is as follows:—Apricots, 25,000 cwts.; apples, 800 cwts.; peaches, 5,500 cwts.; pears, 5,000 cwts.; and plums, 10,000 cwts.

Returned soldiers and others have been settled on irrigation blocks for fruit and vine culture and for dairying along the River Murray, and the area under irrigated culture has increased from 7,000 acres in 1914, to 43,000 acres in 1937.

The State possesses all the conditions requisite for the successful and profitable culture of the olive, 20,000 gallons of oil being expressed annually. Olive oil of the most delicate character has been expressed, and gained awards at the various Exhibitions. Its purity and superiority generally over the imported article of commerce has acquired for it a high position in the local market. 7,000 gallons of eucalyptus oil are distilled, and an export trade is being worked up.

Potatoes, onions, turnips, carrots, mangolds, pumpkins and melons, tomatoes, and practically all kinds of vegetables grow well in the State, their production being valued at 400,000*l*.

In 1851 the total area of land leased from the Crown for pastoral purposes was 15,000 square miles. In 1937 there were 170,000 square miles in pastoral occupation. During the same period the number of horses has increased from 6,500 to 197,000; of horned cattle from 75,000 to 324,000; and of sheep from 1,000,000 to 8,905,000; whilst the exports of wool have increased from 4,000 to 200,000 bales. In 1937-38, 22,500,000 lbs. of butter, and 15,500,000 lbs. of cheese; and 7,500,000 lbs. of bacon and hams were cured. In normal seasons, large quantities of butter, cheese, frozen meat, etc., are exported to Europe, in addition to tallow

Digitized by Google

and skins and hides. The value of pastoral and dairying products exported overseas averages 5,500,000*l.*

The keeping of bees is generally carried on in conjunction with other pursuits, and annually 4,000,000 lbs. of honey are produced.

South Australian wattle bark holds a high place in the market for tanning purposes, about 5,000 tons being stripped every year.

The number of factories (as statistically defined) in 1936-37 were 1,916 employing 40,710 hands and 256,123 horse-power installed. Wages paid 7,518,239*l.* Total value of Output 34,528,176*l.* and Value Added in Factories 12,271,563*l.* Value of land, buildings, plant and machinery, 17,263,895*l.*

The industries include steam flour mills, saw mills, foundries, agricultural implement works, iron and steel smelting and refining, electric light and gas works, breweries and distilleries, cycles and motor-body building, and factories for clothing, boots and shoes, saddlery, jams, aerated waters, soap and candles, fertilizers, joinery, brushware, glassware, etc.

Out of 19,029,535*l.* worth of produce exported overseas during 1937-38, the value of breadstuffs amounted to 7,724,783*l.*; while wool represented 3,287,598*l.*; fruits and wine, 2,024,714*l.*; butter, 470,363*l.*; meats, 467,499*l.*; cheese, 294,136*l.*; concentrates, 748,578*l.*; lead pig, 2,022,542*l.*; hides, 406,620*l.*; silver, 927,096*l.*

The chief imports are textiles, alcohol, tea, hardware, and machinery, manures, paper, oils, bags and sacks, timber and vehicles. The total external trade for 1937-8 was 22,600,000*l.* sterling, half of which is with the United Kingdom, the bulk of the remainder being with other British Countries, the United States, France, Italy and Japan. The total external trade reached 33,529,062*l.* in 1925-6.

The minerals produced during the year 1937 were valued at 2,764,291*l.*, the chief being salt 147,116*l.*, ironstone flux 2,146,376*l.*, gypsum 87,091*l.* and gold 48,734*l.*

Value of Production, 1936-37.

The gross value of production was—agriculture 13,022,000*l.*, pastoral, 6,157,000*l.*, dairying 2,155,000*l.*, poultry 816,000*l.*, mining 2,752,000*l.*, fisheries, forestry, etc. 970,000*l.* Total gross value of primary production 25,872,000*l.*

	£
Local Value (i.e., less marketing costs)	23,431,000
Net Value (i.e., less materials, etc., used)	19,413,000
Net Value of Factory Production ..	12,272,000
Total Net Value ..	£31,685,000

Currency and Banking.

The legal tender and usual currency is the same as in the United Kingdom. The Note Issue is controlled by the Commonwealth Bank.

Eight banking institutions in addition to the Commonwealth Government Bank and the State Bank carry on business within the State, all of which have establishments in the principal seaports and inland townships — numbering altogether 400 branches and agencies. Their names are: The Bank of Australasia; Union Bank of Australia, Limited; National Bank of Australasia, Limited; English, Scottish, and Australian Bank, Limited; Bank of Adelaide; Bank of New South Wales; Commercial Bank of Australia, Limited; and Commercial Banking Company of Sydney Limited. The average assets of the ten banks for June quarter, 1938, totalled to £33,995,393, the total deposits to £29,359,921, advances to £22,122,135, and investments in Government securities £6,878,024.

The State Savings Bank is managed by a Board of Trustees appointed by the Governor, and has 53 branches and 365 agencies. The number of accounts open on 30th June, 1938, was 580,169 and the total deposits amounted to 24,151,868*l.* Rate of interest paid to depositors, 2¾ per cent. on balances from 1*l.* to 500*l.*, and 2½ per cent. on balances from 500*l.* to 1,000*l.* The Commonwealth Savings Bank had 77,645 accounts at the same date with deposits 3,091,786*l.* Total savings banks deposits average 46*l.* per head of population. The State Savings Bank also conduct a penny bank department with 1,184 agencies at schools; 97,752 depositors and 151,941*l.* deposits.

A State Bank was established in 1925, with power to make advances to primary producers, and for homes and to conduct general banking business.

Practically 50% of the population have life assurance policies averaging 140*l.* per policy.

Education.

The University of Adelaide was founded by Royal Letters Patent in 1881, and an Act of the local Parliament in 1874. It was endowed by private munificence, aided by an annual grant of 5 per cent. on all sums contributed from private sources, and an endowment of land, the total receipts, including endowments, for 1937 being 167,532*l.* The University has the power of granting degrees in arts, law, medicine, dentistry, science, music, engineering and economics; the staff consists of 18 professors and 285 lecturers, etc., 16 being lecturers and assistants and teachers in the Conservatorium of Music. All classes are open to women. It had, in 1937, 1,201 undergraduates and post-graduates and 912 non-graduating students (exclusive of 235 students at the Conservatorium of Music), besides those attending extension lectures. Total expenditure, 158,577*l.*

The School of Mines and Industries was established in 1889. It is supported by an annual parliamentary vote of about 20,000*l.* and by school fees. Diplomas are awarded in mining, metallurgy, mechanical, electrical and civil engineering and other industrial and commercial subjects are taught. The staff consists of 126 teachers. The students number 5,011, including children from public schools receiving instruction in domestic economy. There are in addition ten Technical Schools in the country with 1,893 scholars; one School of Arts and Crafts, with 1,455 students, and Apprentice Classes, with 888 students, and a Junior Technical High School with 515 students.

Primary, secondary and technical education is provided for by the Education Acts, by which the management of public education is committed to a Minister of Education—a member of the Cabinet. The education is secular, but not to the exclusion of the Bible; free from January 1, 1892, and it has been compulsory since 1876. Since January 1, 1934 fees have been charged for students over 14 years receiving secondary education; the fee being adjusted according to the parents' ability to pay. In 1937 there were 1,090 schools, with 3,441 teachers and teachers in training, and 86,555 scholars. Included in these are 30 High (secondary) schools, with 288 teachers, and 6,005 scholars, and technical education is imparted at 38 Domestic Art Centres and 23 Woodwork Centres and also at a number of primary schools in addition to the technical schools mentioned above.

Digitized by Google

The expenses of the Education Department for payment of teachers, etc., grants to educational institutions and buildings, were during 1936-37, 1,162,109*l*. The net expenditure from loan money on school buildings on 30th June, 1937, was 1,836,186*l*.

Towards the maintenance of the South Australian Public Library, Museum, and Art Gallery, also country institutes (275 in number) the sum of about 15,000*l*. is annually granted by the Government in addition to special grants for buildings.

There are also 193 Private Schools with 1,011 teachers and 17,381 scholars.

Administration of Justice.

The legal tribunals of the State consist of a Supreme Court, presided over by the Chief Justice and four Puisne Judges; the Court of Vice-Admiralty, of which the Chief Justice is Judge; Circuit Courts at Mount Gambier, Port Augusta, and Gladstone, presided over by Judges of the Supreme Court. The Court of Insolvency previously controlled by the State was in August, 1928, taken over by the Commonwealth Government, and in South Australia there is a Court of Insolvency at Adelaide presided over by a Judge who is also a Stipendiary Magistrate, and there are Local Courts of Insolvency at Gladstone, Mount Gambier, Port Augusta and Wallaroo presided over by Stipendiary Magistrates. Local Courts of Civil Jurisdiction in all the principal towns throughout the State with full Jurisdiction, presided over by Stipendiary Magistrates, and Limited Jurisdiction, by Justices of the Peace; and Police Magistrates' Courts.

The number of persons convicted in the Supreme Court in 1936 was 171, approximately one in every 3,400 of the population.

Land Transfer.

The Statute known as the Real Property Act of South Australia affords a process by which the transfer of landed property may be accomplished in as easy and cheap a manner as any ordinary commercial transaction. There can be no question that the operation of the measure has been highly advantageous to the community.

Loans for Public Works.

Legislative sanction has been accorded from time to time for the raising of money by way of loan, for the prosecution of reproductive public works—such as railways, waterworks, harbour improvements, roads and bridges, and other public purposes.

Means of Communication.

There are 53,000 miles of roads defined in the settled districts, the greater portion of the cost of which has been defrayed from the General Revenue—no special toll or rate having been levied. Since 1926 the Commonwealth Government have contributed just over 200,000*l*. per annum towards the construction and maintenance of main roads. The aggregate number of miles macadamised is 14,490, and leading out from the capital city there are 1,000 miles of bituminous concrete and wood block and bitumen preparation roadways.

With the exception of a private railway of about miles the railways are constructed and worked by Government. The mileage opened for traffic State is 3,860, inclusive of the Port Augusta Alice Springs railway, 598 miles, and the East-West railway, 654 miles, which are controlled by the Commonwealth Government. Up to June 30th, 1938, the cost of construction and equipment of the State lines reached 28,475,805*l*. The receipts in 1937-38 were 3,299,084*l*. There is daily railway communication between Adelaide, Melbourne, Sydney, and Brisbane, and tri-weekly between Perth. At present the North-South railway reaches Alice Springs, 1,024 miles north of Adelaide, and Birdum, 316 miles south of Darwin, the intervening gap being 733 miles.

A regular air passenger and mail service is in operation between Adelaide and the other States. Air communication is maintained between Adelaide and various country centres.

The geographical position of South Australia necessitated early and earnest attention being devoted to the extension of the South Australian telegraphs, so as to afford communication with Melbourne, Sydney, Brisbane, Port Darwin, and Perth. To accomplish this South Australia, at her own risk, erected a line of telegraph, some 2,200 miles in length, at a cost of over 500,000*l*., across a continent which had only been traversed by an exploring party. An additional wire has been erected at a cost of over 50,000*l*. Postal and telegraph matters were taken over by the Commonwealth at date of Federation.

On the 30th June, 1937, there were 821 telegraph stations in the State. There were 570 telephone exchanges, with 41,467 connections. Post Offices number 784. Wireless Licences 99,209.

On the 30th June, 1938, there were registered 56,882 motor cars, 23,206 commercial vehicles, 11,802 motor cycles, total 90,136, equal to one vehicle for every 6¼ persons.

Internal water communication is afforded by the Murray River, on which steamers run for about six months of the year for 2,000 miles. There is regular and frequent communication by mail steamers and air mail with all parts of Australasia as well as with most other countries.

Lecturer, W. G. Tregenza, 305*l.*

School of Mines and Industries.

Principal, F. W. Reid, B.Sc., 771*l.*
Instructors, J. P. Wood, B.E., R. W. Parsons, M.E., L. L. Smith, B.E., A. H. Codrington, H. W. Gartrell, M.A., B.Sc., S. Moyle, M.A., B.Sc., G. H. B. Haskard, M.Sc., R. A. Laughton, A.S.A.S.M., F. M. Best, A.S.A.S.M., R. F. Canney, M.A., B.Sc., C. A. Goddard, H. S. Roberts, A.S.A.S.M., E. W. Hughes, A.R.S.M., P. E. Theel, J. D. T. Walters, F. J. Lykke, W. H. Slee, B.A., B.Sc., H. G. Burdon, A.F.I.A., F. A. G. Tucker and others.
Analysts, T. W. Dalwood, A.A.C.I., T. R. Frost, A.A.C.I., and H. W. Wheeler, B.Sc.
Curator of Museum, H. E. Hooper, A.S.A.S.M.

University of Adelaide.

Chancellor, Hon. Sir G. J. R. Murray, K.C.M.G., B.A., LL.M., Chief Justice.
Vice-Chancellor, Sir W. Mitchell, K.C.M.G., M.A., D.Litt.
Professors:
Classics, J. A. FitzHerbert, M.A.
Philosophy, J. McKellar Stewart, M.A., D.Phil.
Political Science and History, G. V. Portus, M.A., B.Litt.
English Language and Literature, J. I. M. Stewart, M.A.
Biochemistry and General Physiology, M. Mitchell, M.Sc.
Human Physiology and Pharmacology, Sir C. Stanton Hicks, M.D., M.Sc., Ph.D.
Mathematics, J. R. Wilton, Sc.D., D. Sc.
Engineering, R. C. Robin, M.E.
Physics, Kerr Grant, M.Sc., F.Inst.P.
Chemistry, A. Killen Macbeth, M.A., D.Sc.
Botany, J. F. Wood, Ph.D., D.Sc.
Geology and Mineralogy, Sir Douglas Mawson, O.B.E., B.E., D.Sc., F.R.S.
Music, E. H. Davies, Mus.Doc., F.R.C.M.
Anatomy and Histology, F. Goldby, M.A., M.D.
Law, A. L. Campbell, B.A., B.E.
Zoology, T. Harvey Johnston, M.A., D.Sc.
Economics (vacant).
Experimental Medicine, E. Weston Hurst, M.D., D.Sc.
Bacteriology, A. E. Platt, M.D.
Mining Engineering and Metallurgy, H. W. Gartrell, M.A., B.Sc.
Professor of Agricultural Chemistry and Director of the Waite Agricultural Research Institute, J. A. Prescott, D.Sc.
Professor of Entomology, J. Davidson, D.Sc.

Digitized by Google

Lecturers:
Classics (vacant).
English (vacant).
History, W. Oldham, Ph.D., M.A.
French, J. G. Cornell, M.A.
Economics, J. A. La Nauze, B.A.
Education, A. J. Schulz, Ph.D., M.A. (Also German).
Geography, C. A. E. Fenner, D.Sc.
Mathematics, H. W. Sanders, M.A., and J. W. Statton, B.Sc.
Electrical Engineering, E. V. Clark, B.Sc.
Civil Engineering (vacant).
Physics, R. S. Burdon, D.Sc.
Geology, C. T. Madigan, D.Sc., B.E.
Anatomy and Histology, C. S. Mead, B.A., M.B., B.S.
Biochemistry (vacant).
Chemistry, W. T. Cooke, D.Sc., and S. W. Pennycuick, D.Sc.

Also 58 assistant or part-time lecturers and 18 teachers of Music.

Waite Agricultural Research Institute:
Director (*and Waite Professor of Agricultural Chemistry*), J. A. Prescott, D.Sc.
Waite Professor of Entomology, J. Davidson, D.Sc.
Research Officers:
Plant Pathologist, D. B. Adam, B.Ag.Sc.
Plant Physiologist, A. H. K. Petrie, Ph.D., M.Sc.
Agronomist, H. C. Trumble, D.Sc.
Geneticist, I. F. Phipps, B.Ag.Sc., M.Sc., Ph.D.
Agrostologist, J. G. Davies, B.Sc., Ph.D.
Chemists, C. S. Piper, M.Sc., and R. J. Best, M.Sc.
And 12 Assistant Research Officers.

Registrar of the University, F. W. Eardley, B.A.
Librarian, W. A. Cowan, M.A.
Accountant, A. W. Bampton, A.I.A.S.A.

Public Library, Museum and Art Gallery.

General Secretary, H. W. Marshall, J.P.
Librarian, H. R. Purnell, F.L.A.

Inspector of Factories and Lifts, G. Redfern, 367*l.*
Senior Inspector of Shops, Inspector of Factories and Inspector of Inflammable Oils, C. C. Fort, 385*l.*

HARBOURS BOARD.

Chairman, Sir Wallace Bruce.
Deputy Chairman, S. Crawford.
Commissioner, H. T. M. Angwin.
General Manager, R. G. Peake, A.F.I.A., 1,021*l.*
Secretary, O. G. Olifent, 646*l.*
Accountant, C. J. M. Shepherd, 646*l.*
Assistant Accountant, S. T. Batty, 446*l.*
Chief Clerk, A. G. Pengilly, 385*l.*
Paymaster, R. E. Horne, 367*l.*
Chief Engineer, H. C. Meyer, 971*l.*
Engineer for Deepening, E. R. Bayer, 721*l.*
Engineer for Construction, E. H. Price, M.I.E.Aust., 671*l.*
Designing Engineer, F. Andres, 646*l.*
Chief Draughtsman, G. A. J. Manuel, 596*l.*
Chief Surveyor, W. R. Tuck, 596*l.*
Harbourmaster and Pilot, W. F. Baddams, 821*l.*
Harbour and River Pilots, P. M. McIntosh and F. J. Cormier, A. V. Perkins, S. E. Swain, A. G. Spiers and H. G. R. Malcom, 696*l.* each.
Port Superintendent, F. G. Cornish, 671*l.*
Harbourmasters (Outports), G. Simmonds, G. N. Baker, F. Wisdom, P. R. Angelin, W. H. Newby and others.
Wharfingers, K. Fotheringham, H. G. B. Searcy, S. G. Bohlmann and others.
Deputy Port Superintendent, Port Adelaide, A. C. Wilson, 471*l.*
Inspector of Dredging, F. Fettis, 521*l.*
Inspector, G. J. Stevens, 446*l.*
Superintendent of Coal-handling Plant, J. R. Veitch, 521*l.*

DEPARTMENTS UNDER CONTROL OF MINISTER OF AGRICULTURE.

Office of Minister of Agriculture.

Minister of Agriculture and Minister of Afforestation, Hon. A. P. Blesing, M.L.C.
Secretary, L. S. Smith, 646*l.*

Agriculture.

Director of Agriculture, W. J. Spafford, R.D.A., 1,221*l.*
Chief Agricultural Adviser, R. C. Scott, 721*l.*
Chief Horticulturist, A. G. Strickland, 721*l.*
Experimentalist, L. J. Cook, 571*l.*
Secretary, A. H. Greenham, A.C.U.A., 571*l.*
Accountant, J. W. McDonald, 471*l.*
Chief Clerk, P. D. Jeffery, 471*l.*
Poultry Expert, C. F. P. Anderson, 571*l.*
Chief Dairy Instructor, H. B. D. Barlow, R.D.A., 671*l.*
Editor, Journal of Agriculture and General Secretary Agricultural Bureau, H. C. Pritchard, A.F.I.A., 521*l.*

Agricultural College.

Principal, A. R. Callaghan, D.Phil., B.Sc. (Oxon.), B.S. Agric. (Syd.), 921*l.*
Lecturer on Physical and Chemical Sciences, A. R. Hiokinbotham, B.Sc., Dip. Ed., 571*l.*
Housemaster, etc., J. W. Goulter, 471*l.*
Superintendent of Orchard and Vineyard and Lecturer in Viticulture, etc., J. L. Williams, R.D.A., 446*l.*
Plant Breeder, E. J. Breakwell, 471*l.*

Woods and Forests.

Conservator, G. J. Rodger, 871*l.*
Secretary and Sales Manager, R. E. B. Brown, A.F.I.A. 671*l.*
Manager, Mt. Burr Mill, K. W. Ingram, 650*l.*
Investigation and Research Officer, M. A. Rankin, 596*l.*
Forester and Plans Officer, A. L. Pinches (Dip. For.), 546*l.*
Forester (Mount Burr), A. J. S. Adams, 521*l.*

Immigration Publicity and Tourist Bureau.

Director, Victor H. Ryan, O.B.E., 696*l.*
Deputy Director, A. J. Baker, 471*l.*
Manager, Government Motor Garage, F. P. Vanstone, 446*l.*

Stock and Brands.

Chief Inspector of Stock and Chief Veterinary Officer, C. A. Loxton, B.V.Sc., 771*l.*
Deputy Chief Inspector of Stock and Deputy Chief Veterinary Officer, R. H. F. Macindoe, L.V.Sc., 621*l.*
Secretary and Registrar of Brands, H. O. Laurenti, 496*l.*
Government Veterinary Officers, A. H. Robins, B.V.Sc. 571*l.*; C. T. McKenna, 571*l.*; W. S. Smith, 571*l.*

Highways and Local Government.

Commissioner of Highways, etc., D. V. Fleming, 1,150*l.*
Engineer for Highways, P. A. Richmond, 721*l.*
Secretary, R. A. Gibbins, 621*l.*
Accountant, R. V. Davis, 621*l.*
Superintendent of Road Work and Industrial Officer, W. J. Greenlees, 471*l.*
Assistant Engineers, J. N. Yeates, 496*l.*; C. B. Sieber, 446*l.*; F. D. Jackman, 446*l.*; J. F. Koerner, 496*l.*
Mechanical Engineer, P. W. Evans, 471*l.*
Chief Draughtsman, C. J. Peters, 471*l.*

Fisheries.

Chief Inspector, F. W. Moorhouse, M.Sc., 721*l.*

Chemistry.

Director, etc., C. E. Chapman, 846*l.*

PRODUCE.

Adelaide.

General Manager, G. A. W. Pope, 971*l.*
Assistant Manager, Light Square, W. D. Price, 521*l.*
Secretary and Export Officer, A. R. Willsmore, 521*l.*
Accountant, R. A. Green, 421*l.*
Engineer-in-Charge, Light Square, G. R. Stow, 446*l.*

London.

Trade Commissioner (also Agent-General), C. F. G. McCann.
Assistant Trade Commissioner, E. W. Heigho, 500*l.*

MINES.

Director of Mines and Government Geologist, L. K. Ward, D.Sc., B.A., B.E., 1,071*l.*
Chief Inspector of Mines and Deputy Director of Mines, L. J. Winton, B.E., 721*l.*
Assistant Government Geologist, R. W. Segnit, M.A., B.Sc., 621*l.*
Chief Clerk, Warden and Accountant, L. Bronner, 471*l.*
Inspector of Mines and Quarries, A. T. Armstrong, 471*l.*
Chief Engineer for Boring, C. F. Duffield, 496*l.*

FOREIGN CONSULS.

Albania, Albanian subjects under jurisdiction of Italian Consulate.
Argentine Republic, G. A. Noble (Vice Consul).
Belgium, Consul, G. J. Cowie.
Czechoslovakia Republic, R. H. Cato.
Denmark, Consul, J. H. Gosse.
France, Consular Agent, A. M. Moulden, O.B.E.
Finland, Vice-Consul, E. H. Fromen.
Germany, Dr. O. Seger.
Greece, O. Seppelt.
Deputy Consul for Greece, W. G. Coombs.
Hungary, "Protection of the Subjects and Affairs of Hungary," is assumed by the Royal Vice-Consul of Italy.
Italy, Vice-Consul R. Guiseppe Amerio.
Japan, Consul, F. L. Parsons.
Latvia, C. S. Toma.
Liberia, Vice-Consul, W. E. Coombs.
Netherlands, Consul, F. G. Scarfe.
Norway, Consul, Arthur McKay; Hon. Vice-Consuls, G. G. Edwards, Port Pirie; P. H. Sullivan, Wallaroo.
Peru, Honorary Consul, Señor don W. Rippon Snow.
Portugal, Vice-Consul, A. M. Ashwin.
Sweden, Consul, Sir J. W. Sandford; Vice-Consul, J. G. Sweeney, Port Pirie.
United States, Consul, C. A. Hutchinson.

TASMANIA.

General Description.

Tasmania, the smallest State of the Australian Commonwealth, is an island at the southern extremity of the continent of Australia, from which it is divided by Bass' Straits, 120 miles wide, Victoria being on the other side of the straits. It lies between 40° 33′ and 43° 39′ S. lat., and 144° 39′ and 148° 23′ E. long.

History.

Tasmania was discovered in 1642 by the Dutch navigator, Abel Jan Tasman, and by him named Van Diemen's Land, the name by which it was known down to 1853. It was not known to be an island until 1798. It was formally taken possession of by England in 1803, and made auxiliary to the penal settlement at Botany Bay, from which it was separated in 1825. The first free emigrants arrived in 1816, and the last convicts in 1853. Responsible government was introduced in 1856. Federation with the other Australian Colonies came into effect on the 1st of January, 1901.

Climate.

Captain Cook described the climate as "the finest in the world," and succeeding generations have endorsed the verdict. It is of the type of the south of England, rather warmer in summer, considerably milder in winter, and with much more sun at all times. The rainfall varies from 20 ins. on the East Coast to over 100 ins. on the Western Mountains. The mean temperature at Hobart in the three hottest months is 62°, about the same as London, and in the three coldest months 47° which is 8° warmer than London.

Means of Communication.

There is a mail and passenger service, two or three times a week, between Launceston and Melbourne, and twice a week between Burnie and Melbourne, and a weekly service between Hobart and Sydney.

A daily air service operates between Hobart and Melbourne carrying first class mail matter without surcharge.

Mail and passenger communication with Europe and America is chiefly via Melbourne and Sydney. In the apple season (February to May) direct steamers leave Hobart every few days for England; at other times of the year less frequently.

Post and telegraphs are controlled by the Commonwealth. There are 3,991 pole-miles of telegraph, and telegrams were sent in 1936-37 at the rate of 1·7 per head of the population. Telegrams within Australia cost 1s. 4d. for 16 words.

There are 16,217 telephone instruments connected, which is 70 per 1,000 of population.

There are 511 Post Offices in the State, and the number of letters, postcards and packets received and despatched in 1936-37 was approximately 180 per head, and of parcels and newspapers 30 per head.

Postage rates for all British Dominions are 2d. per oz. for letters, and for newspapers 1d. per 4 ozs.; for all other places, 3d. for first oz., 2d. for each additional oz. for letters, and 1d. per 2 ozs. for newspapers.

The receipts for Post and Telegraph and Telephone services in Tasmania in 1936-37 were 440,525*l.* and expenditure 424,573*l.*

Area.

The State contains 26,215 square miles (16,778,000 acres) of which 6,287,682 acres had been granted or sold up to December, 1936. Of the balance 2,477,839 acres are held under pastoral and timber leases and occupation licences, which return 10,390*l.* in rentals to the State; and 45,025 acres for Mining purposes which return an annual rental of 8,337*l.* Approximately 50 per cent. of the total area is still in the hands of the Crown, but a large proportion of this is unsuitable for settlement.

The adjacent islands are 55 in number, most of them being in Bass' Straits. The chief are the Furneaux group (including Flinders Island), Robbins Island, King Island, Bruny Island on the south, and Maria Island on the east coast.

Roads.

All roads are constructed by the State Government, mostly out of Loans; but the Federal Government, beginning with 1924, gives a subsidy in aid of special new constructions. The maintenance of main roads is also borne by the State,

Digitized by Google

partly out of a Motor Tax, while other roads are maintained by Municipalities. There are 610 miles of bitumen, 5,016 miles of metalled or gravelled, and 7,092 miles of other roads.

Railways.

There are 783 miles of railways in the State, constructed mainly on the three foot six inch gauge. Of these 651 belong to Government, and cost 2,033,045*l.* (capital was written down by 4,378,000*l.* from 1st July, 1936), and 132 to private companies costing 899,400*l.* The gross earnings of the government lines in 1936-37 were 478,666*l.* and working expenses 620,084*l.*, showing a loss on working of 6·96 per cent. of the capital cost, against an average rate of interest payable of 4·13 per cent.

Land.

There is little first-class Crown land now available for selection. Most of the accessible land of all kinds has been alienated, though only a small proportion has been cleared for cultivation. Bush land suitable for fruit-growing is readily obtainable at from 5*l.* to 10*l.* per acre. Cleared land can often be had for little more than the present expense of clearing.

Some 211,000 acres of land have been re-purchased by the Government for closer settlement, besides 106,000 acres for soldier settlement. These are now held under lease from the Crown with right of purchase.

Trade.

The chief Exports in 1936-37 were :—	£ (Australian)
Fruit, all kinds, and Jam	1,603,269
Zinc	1,879,019
Copper	648,790
Other Metals and Ores	876,115
Wool	1,083,895
Potatoes	435,118
Timber	508,982
Hides and Skins	298,980
Hops	136,671
Butter and Cheese	378,313
Woollen Goods	773,755
Wood Manufactures	89,121

Confectionery, Cement and Carbide of Calcium are other exports of growing importance.

Hobart does over one-half of the total trade, and Launceston over one-quarter. Burnie and Devonport are considerable exporters of farm produce to the mainland States.

Farming.

The land in crop in 1936-37 was 263,200 acres (10,900 acres decrease for previous decennium), including 32,283 acres of orchard. Conditions throughout the season were good and yields were higher than last year. The wheat production of Tasmania is insufficient for its own requirements. For the season 1936-37 a crop of 570,895 bushels of wheat was harvested from 21,317 acres, an average yield of 26·78 bushels per acre. Oats, grain and hay, and potatoes provide considerable surpluses for export to the mainland States. The average yield of oats per acre for the season 1936-37 was 34·22 bushels, and of potatoes 3·75 tons per acre. The season 1936-37 produced 4,611,000 bushels of marketable apples. This quantity represents a good crop, the average for the past decennium being 4,091,000 bushels. About 60 per cent. of this crop went to oversea countries, mainly to the United Kingdom, 35 per cent. to the mainland States, the balance being used in jam and drying factories and for local consumption.

Wool production in 1936-37 was valued at 1,204,000*l.* The number of sheep was 2,233,655, horses 30,971, pigs 40,021, and cattle 261,597.

Farming wages are about 15*s.* to 30*s.* and keep per week for permanent hands.

Mining.

Tasmania has a particularly rich and varied store of minerals, particularly in the west, north-west and north-east parts of the island. The most important mines are copper, silver-lead, silver-lead-zinc and tin, followed by coal, osmiridium and gold. Wolfram, asbestos, iron pyrites, bismuth and ochre are also produced, but in small quantities. Large and valuable deposits of iron ore and shale are being developed, but have not yet reached the producing stage. From 1880 to 1937 the State produced minerals valued at 66,371,429*l.*

The chief copper producer is the Mt. Lyell mine, one of the great mines of the world, which has produced over 315,480 tons of copper and has paid £5,755,319 in dividends. For 1937 the production of copper in Tasmania was 12,420 tons.

Tin is found in many parts of the island. The chief producer has been Mt. Bischoff, another of the great mines, which has produced tin to the value of over 5,000,000*l.*, and paid dividends of 2,566,500*l.* Substantial quantities are also got from the alluvial deposits of the north-east which are now more important than Bischoff.

Zinc is produced chiefly at the Electrolytic Works at Risdon, a suburb of Hobart, from concentrates brought from Broken Hill. A plant with an output of over 150 tons of zinc per day, using 45,000 electrical h.p., is in full operation. The quantity thus produced was 43,254 tons valued at 1,276,470*l.* Subsidiary works are in operation at Zeehan to treat the valuable complex ores near Dundas, which have hitherto resisted commercial treatment. Production from Tasmanian ores during the year was 23,481 tons valued at 525,824*l.*

Coal is widely distributed, but not generally of high quality as steam-coal. The production in 1937 was 91,121 tons. Valuable deposits of high grade steam-coal are now being developed at Recherche Bay in the extreme south.

Gold is regaining its position in mineral production. In 1937 20,276 ozs. were produced, worth 176,127*l.*

Osmiridium of high quality is a special Tasmanian product. It has been won by simple washing methods from the serpentine detritus in several localities now worked out. The output in 1937 was 586 ozs., valued at 9,077*l.*

Hydro-Electric Power.

The water power of the island is under process of steady development, under a State department. The first scheme of using the waters of the Great Lake (on the Central Plateau, at a height of 3,300 feet), is now an assured success. The present capacity is 81,000 horse power, 66,000 horse power at what is known as the Waddamana Power Station and 15,000 h.p. at the Shannon Power Station. For the year to 30th June, 1938, the revenue was 497,116*l.*

The Great Lake station supplies the Zinc works at Risdon and West Coast Works at Rosebery (electrolytic extraction of zinc, zinc-rolling and zinc oxide), the Carbide works at North West Bay, the Cadbury-Fry-Pascall Combine of chocolate manufacture at Claremont, the Goliath Cement

Digitized by Google

Works at Railton, and the requirements of Hobart and Launceston for tramways and general and domestic use.

Further large demands for power are certain in connection with wood-pulping, now that the old problem of turning the enormous waste of eucalyptus into paper has been solved. It is expected that in a few years the Australian consumption of paper of all kinds will be fully met.

The total cost to date of these schemes is approximately 5,878,000*l.* to 30th June, 1938 (including Tarraleah Power Development, in construction, £1,704,000). The total amount of power available in the State is not known, but 1,750,000 h.p. have been located.

Power is supplied for general industrial purposes from 5/8th penny per unit upwards. Very special terms are quoted for large blocks of power.

The Mount Lyell Hydro-electric plant at Lake Margaret, generating 10,000 h.p., supplies the Lyell mine. The Tarraleah Power Development will be 63,000 h.p. at first and later increased to 105,000 h.p.

Other Industries.

The principal other industries, apart from those for the satisfaction of the State's own requirements, are saw-milling, fruit-preserving (jam making, canning, drying, etc.), confectionery, wool manufacture, cement and calcium carbide.

Tasmanian ales have long enjoyed a good name throughout Australia.

Population.

The population, as determined on 31st March, 1938, is males, 119,519; females, 116,021. Total 235,540.

The birth rate has dropped from a pre-war average of 30 per 1,000 to about 20·7 per 1,000. The death rate of 9·5 per 1,000 is little less than the pre-war average, so that the rate of natural increase has declined considerably. The infant death rate in 1937 was 42 per 1,000 births.

Hobart on the river Derwent is the capital, and had, with the suburbs, a population of 64,900 at the 31st March, 1938. Launceston, on the Tamar, had 33,080.

Migration.

The population is swelled annually during the summer by about 20,000 visitors from the mainland cities. The permanent growth of population, however, is somewhat slower than in Australia as a whole. Tasmania has, in fact, since 1850 been a source of population for other parts of Australasia, and except for brief intervals there has been a steady outflow to those parts of the mainland which are in the state of most rapid development. On the other hand, Tasmania offers peculiar attractions to a certain type of settler, such as the retired officer or civil servant, possessing a pension or some private means. Though the cost of the necessities of food and clothing are no lower than in other States, the amenities of life are more accessible and come within the reach of very moderate incomes. In education at moderate expense and in bringing up of children generally, the island has great advantages. These circumstances coupled with an attractive and healthy climate, great beauty of scenery, and an easy-going and friendly temper in the people, have always, and increasingly in recent years, attracted a fair number of settlers of this type, which has balanced in part the loss of the younger native-born, who have set out to push their fortunes in other States and Dominions.

Banking.

The system of coinage is the same as in Great Britain. Commonwealth notes replace Bank of England and Treasury notes as legal tender.

There are seven cheque-paying banks operating in Tasmania, including the Commonwealth Bank. By an Act of 1925 weekly returns of assets and liabilities must be made by banks.

The Commonwealth Savings Bank operates throughout the State through the Post Offices, having taken over, by agreement, the State Savings Bank. There is also a Savings Bank managed by Trustees at Hobart, with branches in a few country towns, and one at Launceston, and a State Agricultural Bank. The deposits in Savings Banks at 30th June, 1938, were 7,691,508*l.* or 33*l.* 17*s.* 0*d.* per head of population.

Education.

The University of Tasmania, established in 1890 at Hobart, grants degrees in Arts, Science, Law, Engineering and Commerce.

Its revenue comes largely from the State, which, however, exercises no direct control, but half of the members of the governing body are elected by the members of Parliament.

The teaching staff comprises 8 professors, 29 lecturers and assistants, and during 1936 there were 197 students taking courses for degrees. Fourteen scholarships from public grant and private benefaction are tenable at the University; these cover tuition fees, and for country students add a maintenance allowance in most cases. The University also largely controls secondary education by conducting intermediate and leaving school examinations, and on the results of the latter most of the University scholarships are awarded.

Under the joint control of the Workers Educational Association and the University Tutorial classes were held at different centres in 1936. The number of effective students attending these classes was 266.

Secondary education is about equally divided between the Secondary schools (partly "Public," partly "Private") and the newer State High Schools, which are free. Of the former the principal are Hutchins School, Friends' High School, St. Virgil's College and Clemes College in Hobart, and the Church Grammar School and St. Patrick's College in Launceston; of the latter, full-course schools are working very successfully in Hobart, Launceston and Devonport.

The expenditure on State High Schools, apart from capital cost and repairs, is about 15*l.* per pupil.

Primary education is mostly in the hands of the State. It is free, compulsory and non-sectarian in State schools. A complete course of training at the Teachers' College has now been sufficiently long in operation to ensure an adequate supply of trained teachers for all requirements.

Tasmania was, in Australia, the pioneer State in the matter of medical inspection and treatment of school children.

Central Government.

The main lines of the present Constitution were laid down by a local Act in 1855. These have been amended from time to time and, of course, profoundly modified by Federation.

Parliament consists of two elected Houses. The Legislative Council of 18 members is elected by free-holders of 10*l.*, and lease-holders of 30*l.* annual value. Returned soldiers are also entitled to vote. Three members retire annually, and the Council cannot be dissolved as a whole.

Digitized by Google

The House of Assembly is elected on adult suffrage for a maximum of five years, and consists of 30 members returned for five six-member constituencies, which are the same as the Commonwealth electoral divisions. The system of voting is substantially the Hare system of the single transferable vote, with obligation to record at least three preferences. After an earlier partial trial it was applied to the whole State in 1909, and eight General Elections have been held under it. The system has given general satisfaction. The machinery has worked easily and the elector has been so little troubled by its supposed intricacy that the proportion of informal votes is smaller than that for a block vote in Federal Elections. For each of the eight elections, the system has given representation to parties in almost exact proportion to their strength. A number of amendments have been proposed to improve and safeguard proportional representation, but no serious proposal has been made for reverting to older methods. Casual vacancies, the bugbear of proportional representation, are filled from the results of the previous General Election, and this method has been found satisfactory in practice. Full information may be found in the departmental reports, and the detailed rules of the scrutiny in the Commonwealth Year Book, No. 6.

The power of the Upper House to amend money bills sent up from the Assembly has always been a matter of some doubt, and at the end of 1924 was successfully challenged by the House of Assembly in respect both of the Appropriation Bill and of an Income Tax Bill. The controversy on the subject was early in 1926 settled by a compromise, by which the Upper House gave up any claim to amend the Appropriation Bill or bills imposing a rate of Income Tax, but maintained full powers of amendment of other money bills.

Taxation.

The State imposes graduated taxes on incomes and on land and estates passing at death. Income Tax is much the most important and includes a considerable sum drawn from winners of Lottery prizes throughout Australia

Under the Land Tax Act the rates payable on unimproved values (without exemption) range from 1*d.* in £ on the first 2,500*l.* to 3¾*d.* on portions over 80,000*l.* Where the unimproved value of land used solely for agricultural, pastoral, horticultural, orcharding or dairying purposes does not exceed 3,500*l.* no tax is payable.

The Income Tax Act provides exemptions on incomes of less than 125*l.*, and in the case of married persons of 200*l.* Deduction from taxable amounts of 1*l.* for every 2*l.* by which the income is less than 500*l.* is allowed to married taxpayers, and £1 for every £6 by which the income is less than £400 to unmarried persons. A deduction of £39 is allowed in respect of each child under the age of 16 years wholly maintained by the taxpayer. The rates per £ on taxable incomes from business range from 3·00375*d.* to 60*d.*; and on incomes from property from 3·0055*d.* to 60*d.* The tax on Companies is 1*s.* 6*d.* in the £. In addition a Special Income Tax of 4*d.* in the £ is imposed on all incomes up to 312*l.* per annum without exemption rising to a rate of 1*s.* in the £ on incomes in excess of 1,500*l.* The Commonwealth also imposes taxes on income and land, and collects death duties.

Local Government.

There are 47 municipalities, under the Act of 1907, besides Hobart and Launceston, the constitutions of which are earlier and somewhat different. Police and Education are both centralised, but in other respects municipal powers and functions are of the usual type; the most important in the rural districts being the maintenance of roads, other than main roads. The Councils elect a Warden as Chairman, and appoint a Council Clerk as permanent executive official. The Councils are elected by the ratepayers, with votes varying in number from one to six, according to the annual value of their property. All rating is on capital value, and not, as with State taxation, on the unimproved value.

About half the municipalities undertake some measure of water supply. The lighting for a number of municipalities is now supplied by the State Hydro-Electric scheme. The rates vary from about 1*s.* 3*d.* in some purely agricultural districts, to from 3*s.* to 5*s.* in the towns and mining districts.

Succession of Governors & Lieutenant-Governors of Tasmania since 1893.

	From	To
Viscount Gormanston, K.C.M.G.	Aug. 8, 1893	Aug. 14, 1900

VICTORIA.

Situation and Area.

Victoria is situated at the south-east of the continent of Australia, and lies between the 34th and 39th parallels of south latitude and the 141st and 150th meridians of east longitude. Its greatest length, from Cape Howe to a point direct west to the South Australian boundary, is 493 miles, and its greatest breadth, from Cape Nelson direct north to the Murray River, is 290 miles. Its extent of coast line including the length around Port Phillip Bay, Western Port and Corner Inlet is about 980 geographical miles.

On the north and north-east Victoria is bounded by New South Wales, from which it is separated by the River Murray, and a direct line from the head waters of that stream, at Forest Hill, to Cape Howe. The length of this boundary is 1,175 miles. On the west it is bounded by South Australia, from which it is separated by a line, about 280 geographical miles in length, approximating to the position of the 141st meridian, extending from the Murray to the sea. On the south and south-east its shores are washed by the Southern Ocean, Bass Strait, and the Pacific Ocean.

The southernmost point in Victoria, and on the whole continent of Australia, is Wilson's Promontory, which lies in latitude 39° 8′ S., longitude 146° 26′ E.; the northernmost point is the place where the western boundary of the State meets the Murray, latitude 34° 2′ S., longitude 140° 58′ E.; the point furthest east is Cape Howe, situated in latitude 37° 31′ S., longitude 149° 59′ E.; the most westerly point is the line of the whole western frontier, which lies upon the meridian 140° 58′ E., and extends from latitude 34° 2′ S. to latitude 38° 4′ S., or 280 geographical miles.

The area of Victoria is 87,884 square miles, or 56,245,760 acres (nearly equal to that of Great Britain). The continent of Australia and the island State of Tasmania contains 2,974,581 square miles, of which Victoria occupies about a thirty-fourth part.

Early History.

It is believed that the first Europeans who sighted the Victorian coast were Captain Cook and the crew of His Majesty's ship *Endeavour*. On the morning of 20th April, 1770, land was sighted which Cook named Point Hicks in honour of Lieutenant Hicks who was the first to see it. This point is now known as Cape Everard. Cook then sailed along the eastern coast of Australia and on 23rd August, 1770, landed on Possession Island (off Cape York) and took possession, in the name of King George the 3rd, of the whole of the eastern coast from Point Hicks to Cape York.

On his return to England he reported the eastern part of Australia to be suitable for colonisation, and this led to a party of convicts being despatched there in 1788, under Captain Arthur Phillip, R.N. On the shores of Port Jackson, a few miles to the north of Botany Bay, Phillip established a permanent settlement, but for nearly ten years afterwards nothing was done towards the exploration of the southern shores of Australia. At length George Bass, a surgeon in the Royal Navy, started in a whale-boat, manned by six seamen, and, passing Cape Howe, coasted along that part of Victoria now called Gippsland, and rounding Wilson's Promontory—the southernmost point on the Australian Continent—entered Western Port on the 5th June, 1798. He, however, returned to Sydney without discovering Port Phillip Bay, which was first entered in February, 1802, by Acting-Lieut. John Murray, [illegible]

command of the armed brig *Lady Nelson*. In October of the following year an attempt was made to colonise the territory by Lieut.-Col. David Collins, of the Royal Marines, in command of a party of convicts. Collins, however, after the expiration of three months, abandoned Port Phillip as unfit for settlement, and for the next twenty years the district attracted but little attention. Then two explorers—Hume and Hovell—made their way overland from Sydney, and, on their return, gave a satisfactory report of the country, the result being that a convict establishment was soon afterwards founded on Western Port Bay, which, however, was in a short time abandoned, apparently on economic grounds. The first permanent settlement in Victoria was formed at Portland Bay, by Mr. Edward Henty, from Van Diemen's Land—as Tasmania was then called—who landed on 19th Nov., 1834 and soon commenced to till the soil, run and breed stock, and carry on whaling operations. Others followed, but the absence of good land in the immediate vicinity of the port, and the openness of the bay, which rendered it unsafe for shipping during the prevalence of certain winds, caused it to be considered an unsuitable site. The capital was eventually founded at the northern end of Port Phillip Bay by two parties, one led by John Batman, who landed on 29th May, 1835, and the other by John Pascoe Fawkner, whose party arrived at the site of Melbourne on the 29th August of the same year. Both of these were from Van Diemen's Land, and they were soon followed by others from the same island, and from Sydney, who brought stock with them, and commenced to push their way into the interior. These were met by Major (afterwards Lieutenant-Colonel Sir) Thomas Mitchell, who, entering from New South Wales on the north, and traversing a considerable portion of the (as yet) unknown territory, was so struck with its wondrous capabilities that he named it Australia Felix, a title the aptness of which a subsequent knowledge of the geniality of its climate, the excellence of its soil, and the then unsuspected richness of its mineral treasures, has proved to be fully justified. The reports of Sir Thomas Mitchell, and the success of the first settlers, caused great excitement, not only in Australian settlements, but in the mother country. Herds of sheep and cattle driven overland from New South Wales speedily occupied the best parts of the new territory. Every available craft capable of floating was put into requisition to bring passengers and stock from Van Diemen's Land, and after a time shiploads of emigrants began to arrive from the United Kingdom. Regular government was first established under Captain William Lonsdale, who, having been sent from Sydney to take charge of the district, landed on the 30th Sept., 1836; and on the 2nd March of the following year Sir Richard Bourke, the Governor of New South Wales, visited it, and named the metropolis Melbourne. Mr. Charles Joseph La Trobe arrived on the 30th Sept., 1839, having been appointed to the principal official position in the settlement under the title of Superintendent. This title was changed to that of Lieutenant-Governor, when, on the 1st July, 1851, it was separated from New South Wales, and created a separate colony under the name of Victoria. Shortly afterwards rich deposits of gold were discovered, which led to a great influx of population. After a time discontent arose amongst the diggers in consequence of the oppressive character of the mining regulations, which culminated in riots on the Ballarat goldfield towards the end of 1854. The disturbance was soon quelled, with some bloodshed on both sides, and the grievances complained of were afterwards redressed. A new constitution, giving responsible government to the colony, was proclaimed on the 23rd November, 1855.

Physical Features.

Victoria is traversed, with more or less regularity, throughout its entire length from east to west by a chain of mountains and lesser hills, completely dividing it into two parts, and known as the Dividing Range. The summit of this range runs generally at a distance of 60 or 70 miles from the coast. The streams to the north of it flow towards the River Murray, and those to the south of it towards the sea. The eastern part of the range, which divides the Gippsland district from that of the Murray, is named the Australian Alps; and that part which separates the County of Ripon from that of Borung, and extends into the County of Kara Kara, is named the Pyrenees. The higher peaks of the Dividing Range are situated in the north-east of the State, of which Mounts Bogong, 6,509 feet; Feathertop, 6,306 feet: Nelson, 6,170 feet; Fainter, 6,160 feet; and Hotham, 6,100 feet are the highest. They are covered with snow for several months in the year. The mountainous country is, for the most part, densely wooded to the very summits with fine timber, but the peaks above the winter snow line are quite bare, or only partially covered with dwarfed trees or shrubs. From near Kilmore eastward, for a distance of 200 miles, the mountains are generally steep but have been made accessible by good roads thus removing the barrier between the parts of the State north and south of them. From Kilmore westward the range rapidly dwindles, so that although presenting in places points of considerable height — such as Mount William (3,829 feet) and Mount Macedon (3,325 feet)—it is easily crossed. From Mount Macedon it becomes, as it stretches away to the Western district, a chain of hills, of no considerable altitude. That portion of the Murray basin commencing at Wodonga on the east as a point, and extending in the form of a regular triangle to a width of 200 miles along the western boundary of Victoria, has almost a flat surface, with a very slight inclination towards the Murray. The remaining country north and south of the Dividing Range and its spurs is moderately undulating; it is in some parts destitute of timber, but closely wooded in others. Besides the main Dividing Range, there are also other ranges extending in different parts of the country, many of them being spurs of the main chain. According to the most recent survey, there are in the State 8 mountains exceeding 6,000 feet in height; 39 between 5,000 and 6,000 feet; and 40 between 4,000 and 5,000 feet. There are, also, many peaks rising to upwards of 4,000 feet whose actual heights have not yet been determined.

Climate.

From its geographical position Victoria enjoys a climate far more genial to Europeans than any other State of Australia. In regard to heat the weather is never severely oppressive, except during the prevalence of hot northerly winds, and these occur only at intervals during the summer months. Over a period of 82 years ended in 1937, the mean temperature at Melbourne was 58·5°; the mean atmospheric pressure noted first at an Observatory, 91 feet above the sea level, and later at the Weather

Digitized by Google

Bureau 115 feet above sea level, was 30·013 inches; rain fell on the average upon 140 days in the year; the mean annual rainfall was 25·65 inches.

Population.

Although Victoria occupies no more than the thirty-fourth part of the Australian continent, it contains approximately 27·1 per cent. of the inhabitants of the whole continent. This satisfactory feature is due to the benefits to be derived from the climatic, agricultural and manufacturing advantages of Victoria. The estimated population at 31st March, 1938, was 1,865,957, viz., 921,876 males and 944,081 females. These numbers give a proportion of 102·4 females to 100 males.

Chief Cities and Towns.

Melbourne, the capital, on the 31st December, 1937, had a population of 1,024,000. The first settlers established themselves on the site of the present city in 1835.

The other cities are Geelong (39,900), Ballarat (38,270), Bendigo (29,920), Warrnambool (9,100), and Mildura (6,950). The chief towns are Castlemaine (5,280), Wonthaggi (6,550), Shepparton (5,900), Ararat (4,950), Hamilton (5,900), Maryborough (5,680), Stawell (4,800), Horsham (5,380), Wangaratta (4,850), Echuca (4,450), and Sale (4,340).

POPULATION OF VICTORIA FROM 1836 TO 1933.

Date of Enumeration.	Males.	Females.	Total.
May 25, 1836	142	35	177
Mar. 2, 1841	8,274	3,464	11,738

June 30, 1933	903,244	917,017	1,820,261

Means of Communication.

Melbourne, the metropolis of Victoria, is distant from Sydney by sea about 580 English miles, and by land 590 miles; from Adelaide by sea 510 miles, and by land 483 miles. It is connected with Sydney, Brisbane (1,306 miles), Adelaide and Perth (2,170 miles), by railway. Postal communication from Melbourne is maintained *viâ* Ceylon and Suez by sea and *viâ* Karachi by air, with England and a regular and frequent service to foreign countries is also maintained.

The post offices (official, semi-official, and non-official) in Victoria numbered 2,553 at 30th June, 1937.

The postal, telegraph and telephone revenue was 4,464,919*l.* in 1936-37, and the expenditure 3,296,513*l.*

The total number of telegrams handled during 1936-37 was 4,215,691. There are 187,753 telephones in use in the State, with 135,671 subscribers. The amount received on account of telegraphs and telephones during the year 1936-37 was 2,550,189*l.*

The transport facilities in the State consist of a network of railways and highways. The railways, with the exception of two small lines, are owned by the Government. Particulars relating to Government-owned railways are given hereunder:—The number of miles operated during 1937-38 was 4,728. In 1937-38 the gross receipts were 9,809,158*l.*, and the working expenses 7,900,054*l.*, while interest and expenses on loan indebtedness amounted to 2,151,057*l.* The revenue deficit for the twelve months was 241,953*l.* Capital expenditure up to 30th June, 1938, amounted to 50,529,000*l.*

Industry.

The main industry is grazing and agriculture, 7,266,000 acres being under cultivation in 1937-38. The chief products were wheat, grown on an area of 2,686,057 acres, producing 48,173,191 bushels; oats, 394,436 acres, producing 5,327,199 bushels; barley, 139,777 acres, producing 2,708,519 bushels; and hay, 1,079,039 acres, producing 1,244,935 tons. In 1936-37, 45,627 acres were planted with potatoes, producing 196,623 tons, 41,895 acres were devoted to the culture of the vine, producing 1,818,917 gallons of wine, 90,243 cwts. of raisins, 655,090 cwts. of sultanas and 152,202 cwts. of currants. A considerable area is devoted to the cultivation of fruit trees and vegetables; tobacco, hops, chicory and broom-millet are also grown. The dairy industry is an important source of production; in 1936-37 there were produced 154,769,391 lbs. of butter and 13,350,124 lbs. of cheese. At March, 1938, there were in the State, 359,106 horses, 1,880,429 cattle (including 952,906 milch cows), 18,863,467 sheep, and 285,259 pigs. The wool produced in 1937-38 amounted to 179,404,910 lbs., valued at 9,250,000*l.* The amount of gold raised in 1937 was 145,799 ozs., making a total since 1851 of 71,919,689 ozs. fine, valued at 307,783,177*l.* Enormous deposits of brown coal exist, and seams of true coal of good quality which have been discovered are being worked with success. The quantity of black coal raised in 1937 was 257,945 tons, valued at 171,369*l.*, and the quantity of brown coal raised was 3,393,919 tons valued at 325,950*l.* The chief exports are wool, butter, wheat and flour, fruits (all kinds), hides and skins, meats, and milk and cream. The value of these articles exported in 1937-38 represented approximately 91 per cent. of the total value of exports of merchandise. The chief imports are textiles and apparel, tea, timber, paper, oils, machines and machinery, and metals and metal manufacture. Approximately 91 per cent. of the oversea trade is done at port of Melbourne. The other ports are Geelong, Portland, Warrnambool.

The total value of imports and exports for each of the last ten years is shown hereunder:—

Imports Oversea (British Currency).

Shipping Entered and Cleared.

The following statement shows the total tonnage of vessels entered and cleared at Victorian ports during each of the last ten years :—

Year.	British Tonnage.	Total Tonnage.
1927-28	11,394,496	13,714,122
1928-29	11,170,450	13,613,397
1929-30	11,198,754	13,788,466
1930-31	9,860,759	12,400,024
1931-32	9,282,478	12,014,758
1932-33	10,361,341	13,363,049
1933-34	10,614,814	13,566,082
1934-35	11,613,682	14,842,537
1935-36	12,514,483	15,847,351
1936-37	13,018,938	16,168,644

Victoria, as a manufacturing centre, occupies a pre-eminent position in the Australasian group. Returns of statistics are collected from all factories employing four or more persons, or using machinery driven by power. The following is a statement of the number and nature of factories and persons employed therein during 1936-37 :—

Manufactories and Works, 1936-7.

Nature of Industry.	Number of Factories.	Number of Hands employed.
1. Treatment of non-metalliferous mine and quarry products	179	2,630
2. Bricks, pottery, glass, &c. ..	108	4,244
3. Chemicals, dyes, explosives, paint, oils and grease ..	236	7,342
4. Industrial metal, machines, implements and conveyances	2,511	48,194
5. Precious metals, jewellery, and plate	138	2,102
6. Textiles and textile goods (not dress)	351	25,467
7. Skins and leather (not clothing or footwear)	208	4,925
8. Clothing	1,832	37,953
9. Food, drink, and tobacco ..	1,456	25,902
10. Woodworking and basketware	694	7,289
11. Furniture, bedding, &c. ..	384	4,565
12. Paper, stationery, printing, bookbinding, &c.	665	13,350
13. Rubber	102	2,759
14. Musical instruments	14	96
15. Miscellaneous products ..	164	2,495
16. Heat, light and power ..	123	2,070
Total	9,165	191,383

The total number of all establishments is 9,165 of which 573 use steam or gas engines, 7,465 use electric power, and 500 oil, water, &c. They employ 191,383 hands, and the approximate total value of lands, buildings, machinery, and plant is 75,161,894*l.* The value of materials used was 78,233,032*l.*, and of articles produced or work done 142,692,192*l.* The wages paid amounted to 33,192,904*l.*

The estimated gross value of Victorian production in 1936-37 was as follows :—

	£
Agricultural Production	24,038,124
Pastoral and Dairying Production	34,966,868
Mining Production	2,448,262
Forest ,, ...	1,121,312
Miscellaneous Products	5,295,394
Total Primary Products ...	67,869,950
Manufacturing—value added during process	58,712,281
Total	126,582,231

Irrigation and Water Conservation.

Parliament has passed several measures with the view of promoting irrigation and water conservation upon a large scale. By the Water Act of 1905 all existing irrigation trusts, with the exception of the First Mildura Irrigation Trust, were abolished, and their works and duties transferred to the State Rivers and Water Supply Commission. In 1909 an Act was passed extending the authority of this latter body by giving it the general construction of works formerly entrusted to the Department of Water Supply and by imposing on the Commission all the duties formerly performed by the Water Supply Department. The capital expenditure on irrigation and water works controlled by the Commissioners on the 30th June, 1937, amounted to 23,782,466*l.* The Commission is empowered to levy rates on all lands capable of irrigation under their jurisdiction, the total area irrigated being 518,827 acres in 1936-37.

Banking and Currency.

The following banks had offices throughout the State during the June quarter of 1938 :—The Bank of Australasia ; of New South Wales ; of New Zealand ; Commercial of Sydney ; Commercial of Australia ; English, Scottish and Australian ; National of Australasia ; the Union of Australia ; Queensland National ; Ballarat Banking Co. ; Comptoir National D'Escompte de Paris ; Bank of Adelaide ; and The Commonwealth Bank of Australia.

The liabilities at that period amounted to 145,874,777*l.*, and assets to 154,392,305*l.*

There are also 213 branches, and 373 agencies of the State Savings Bank. The total number of accounts open (including 198,349 School Bank Accounts) on the 30th June, 1938, was 1,628,621, and the amount on deposit was 68,142,031*l.* (including 288,866*l.* and 2,458,465*l.* to the credit of School Bank Accounts and Deposit Stock Accounts respectively).

A branch of the Imperial Mint is established at Melbourne. The value of gold bullion issued during 1937 was 1,191,787*l.* Coinages of silver and bronze to the value of 742,500*l.* and 29,800*l.* respectively were issued by the Mint during the year.

Education.

Education establishments in Victoria are of four classes, viz., the University, for superior education. State schools, for primary and secondary education ; registered schools for primary and secondary education ; and technical schools for instruction in the various arts. The Melbourne University was established under a special Act of the Victorian Legislature in 1853.

Digitized by Google

and Royal Letters Patent were issued on the 14th March, 1859, declaring that all its degrees except those of divinity should be recognised in the United Kingdom and the British colonies and possessions. Affiliated to the University are four Colleges—Trinity, Ormond, Queen's, and Newman—connected with the Church of England, the Presbyterian, the Methodist, and Roman Catholic Churches respectively. The number of students attending lectures at the University during 1937 was 3,559. From the date of the opening of the University to the end of 1937, the total number of students who matriculated was 21,438, and 15,566 direct degrees were conferred during the same period. The technical schools, which are controlled by the Education Department, number 28, there are also 2 Agricultural Colleges and 1 School of Horticulture. The principal of these is the Melbourne Technical College, established for the purpose of providing advanced technical instruction and is open to women as well as men. The gross enrolment of pupils at senior technical schools, excluding those at agricultural and horticultural colleges, was 22,345.

Primary education since 1st January, 1873, has been free, secular and compulsory. Attendance at school is compulsory for children between the ages of 6 and 14. In 1936 there were 2,600 State primary schools, with a total enrolment of 250,070 scholars, instructed by 7,397 teachers. The average attendance was 179,420. The State intermediate and secondary schools numbered 149 with a total enrolment of 34,136 scholars, instructed by 1,096 teachers. In 1936-37 the cost of public instruction to the State, including grants to the Melbourne University but excluding interest on loans, was 3,176,511*l.* There is no local control over the schools.

The registered schools are for the most part under the control of private persons or proprietary bodies, usually connected with some religious denomination. These receive no State assistance. According to the returns for 1936, there were 519 registered schools in Victoria, with 2,556 teachers, and an attendance of 73,084 scholars. Of these schools the Roman Catholic denomination had about 61 per cent.

Municipal Government.

A complete system of local self-government exists in Victoria. The municipalities are of two kinds, urban and rural, the first being called cities, towns and boroughs, and the second shires. Each municipal district is a body corporate, with perpetual succession and a common seal. The governing body is a Council, the members of which are elected by the ratepayers. The Council of every municipality is required to make and levy each year a general rate equally in respect of all rateable property within the municipal district. No such rate made in any one year shall exceed the amount of 3*s.* in the £1 of the net annual value of such property as estimated under the provisions of the Local Government Act, or be less than 6*d.* in the £1 of such value. The ratepayers if they so desire may have the rate imposed on the unimproved value of the land. In 1936-37 fourteen municipalities were rated on this method. In 1936-37 there were 57 cities, towns, and boroughs and 138 shires. The number of ratepayers was 621,135; the annual value of the rateable property was assessed at 32,860,956*l.*, representing a value in fee simple of 630,085,550*l.*; the total income in 1937 was 6,127,949*l.*, and the expenditure was 6,195,191*l.*; whilst their loan indebtedness amounted to 12,673,970*l.* (excluding 1,732,809*l.* due to the Country Roads Board).

The harbour of Melbourne is under the control of the Melbourne Harbour Trust, created by Act in 1876. The revenue of the Trust in 1937 was 846,258*l.*, and its expenditure 894,543*l.*, including capital expenditure 52,078*l.* The outstanding debt of the Trust at the end of 1937 amounted to 4,179,632*l.*

The Melbourne Water Supply Works are under the control of the Melbourne Metropolitan Board of Works, which body also controls the sewerage system of the metropolis. In 1936-37 the Board's ordinary revenue was 2,005,170*l.*, and its ordinary expenditure 1,954,403*l.* Capital expenditure amounted to 579,306*l.*; whilst there were loans outstanding at 30th June, 1937, amounting to 25,145,460*l.* The expenditure on the sewerage works completed and in course of construction amounted to 13,612,488*l.* up to the 30th June, 1937.

There are also two Fire Brigade Boards, supported by equal contributions by the Government, the Municipalities and the Insurance Companies. In 1936-37 their revenue amounted to 234,852*l.*, their expenditure to 253,961*l.*, excluding 268*l.* loan expenditure, and their debt to 226,010*l.*

The first Melbourne tramways were constructed by a Trust at a cost of 1,705,794*l.*, provided for by loans secured on the rateable property of the Municipalities. The debt was gradually extinguished by a sinking fund, contributed by the Melbourne Tramways Company, a public company, to which the lines were let for a period of 30 years. The lease expired on 1st July, 1916, when the balance of the outstanding debentures (450,000*l.*) was paid off. A Board, consisting of five members, was nominated by the Government to take over and operate the cable tramways from 1st July, 1916, to 31st October, 1919, or such earlier date as might be proclaimed by the Governor-in-Council. This Board was on 1st November, 1919, superseded by another Board of seven members appointed under authority of the Melbourne and Metropolitan Tramways Act, 1918. On 2nd February, 1920, the electric tramways systems were vested in the Board. The capital cost of the various activities under the control of the Board amounted to 8,409,353*l.*, at 30th June, 1937, of which 744,139*l.* was for Cable Tramways, 7,516,723*l.* for Electric Tramways and 148,491*l.* for Motor Omnibuses. The Board is empowered to borrow up to 5,500,000*l.*, this being in addition to the transferred liabilities attaching to the tramways vested in it.

In 1936-37 ordinary revenue was 2,188,241*l.* and ordinary expenditure 2,187,145*l.* The loan liability at 30th June, 1937, was 4,689,356*l.*

Government.

The Government of Victoria consists of a Governor appointed by the Crown, who is the official head of the Legislature, and assents in the name of the Crown to Acts passed by the Parliament. There is a Legislative Council, or Upper House of Parliament, consisting of 34 members elected for 17 Provinces, and an Assembly, or Lower House, consisting of 65 members returned by 65 Electoral Districts. The Constitution was established by an Act passed by the Legislature of Victoria, 1854, to which Her Majesty assented, in pursuance of the power granted by Act of the Imperial Parliament (18 & 19 Vict., cap. 55).

The constitution of the two Houses and the qualification of Members and Electors have been amended on several occasions; and a Reform Act received the Royal Assent on 26th November, 1903. By this Act the number of Members of both Houses was reduced, the franchise for the Upper House broadened, and the property qualification

Digitized by Google

for membership reduced, and several other reforms made. In 1907 an Act was assented to abolishing the separate representation of railways and public officers in the Parliament of the State—one of the provisions of the Reform Act of 1903. Officers in the service of the Government are, however, prohibited from using any influence in respect to any matter affecting their remuneration or position in the public service.

The Adult Suffrage Act of 1908, assented to on 31st March, 1909, places women on an equality with men as electors for the State Legislature.

One of the two Members of Council returned or each of the Electoral Provinces retires in rotation at the expiration of every three years, so that the tenure of seats is six years. The property qualification of members is possession of freehold property at an annual value of 25*l*. The property qualifications of Electors of Members of Council is possession of freehold property rated in some municipal district at not less than 10*l*. per annum, or occupation of freehold or leasehold property of not less than a 15*l*. annual rating. Graduates of Universities within the British dominions, matriculated students of the University of Melbourne, barristers and solicitors, legally qualified medical practitioners officiating ministers of religion, certified school-masters, and officers of the army and navy when not on active service, also have votes for the Legislative Council. By an Act assented to on 10th December, 1935, voting at Legislative Council elections was made compulsory. The functions of this House differ very slightly from those of the House of Lords. Money Bills may be either accepted or rejected, but they may not be altered. By the Reform Act of 1903 the Council was empowered to suggest alterations in these Bills.

The Constitution Act Amendment Act 1922 provides for the reimbursement of expenses of members of the Legislative Council at the rate of 200*l*. per annum.

The Constitution (Reform) Act, 1937, provides that in the event of a disagreement between the Houses the Governor may dissolve the Council. If after such dissolution the Houses still disagree the Governor may convene a joint sitting of members of both Houses. If the Bill is then carried by an absolute majority it shall be deemed to have been duly passed.

The principle of single voting is observed in elections for either House of Parliament.

An Act was passed in 1857 to abolish the property qualification required of members of the Legislative Assembly, and universal suffrage exists so far as the election of that body is concerned. The duration of the Assembly is, in ordinary circumstances, three years, but it may be dissolved by the Governor at any time. Vote by ballot has been in operation since 1856, and by an Act passed in October, 1900, provision was made for voting by post in certain cases. Voting at Legislative Assembly elections was made compulsory by an Act assented to on 23rd December, 1926.

All members of the Legislative Assembly, who are not in receipt of official salary out of the Consolidated Revenue, are paid 500*l*. a year "for reimbursing their expenses in relation to their attendance in Parliament."

An Act was passed in December, 1903, limiting the amount which may be expended by candidates for election expenses to 400*l*. and 150*l*., for the Council and the Assembly respectively. The purposes for which such expenditure may be incurred are defined by the Act.

Victorian Finance.

The public revenue and expenditure of the State, the public debt at the end of the financial year and the average rate of interest payable thereon in London and Australia are shown for each of the past ten years in the following statement:—

Year.	Public Revenue.	Public Expenditure.	Public Debt. Amount outstanding on 30th June.	Average rate of Interest payable in:— per annum, London.	Australia.
	£	£	£	%	%

DEPARTMENT OF THE MINISTER OF JUSTICE.

Solicitor-General, The Hon. A. A. Dunstan, M.L.A. (paid as Premier).

Judges of County Courts, Courts of Mines, and Chairmen of General Sessions, J. S. Wasley, H. C. Winneke, H. C. G. Macindoe, A. W. Foster, W. H. Magennis, J. A. Richardson, and L. E. B. Stretton, 1,500*l.* each.

Police Magistrates, Coroners, and Wardens of the Goldfields of Victoria.

J. W. K. Freeman, 950*l.*; C. McLean, 900*l.*; E. E. O'Grady, A. Noonan, F. E. Williams, D. T. Wilkins, R. H. Mohr, R. E. Stapleton, J. F. Meehan, H. L. Jackson, A. R. Hill, A. C. Tingate, D. G. Blair, H. R. Pyvis, E. J. M. Steedman, R. H. Beers, 800*l.* each; D. M. Addison, I. W. Williams, H. C. Mohr, E. J. E. Nicholas, J. R. Burke, 776*l.* each; T. W. Hammond, J. L. Kent, H. B. Wade, 752*l.* each; I. Horan, D. J. Duggan, 728*l.* each.

Coroners.

Melbourne, A. C. Tingate, P.M. All Police Magistrates are Coroners of Victoria at the respective places at which they are stationed.

DEPARTMENT OF TREASURER.

Treasurer, The Hon. A. A. Dunstan, M.L.A.
Director of Finance, A. T. Smithers, 1,250*l.*
Accountant, T. Forristal, 663*l.*
Assistant Accountant, J. B. Clarke, 624*l.*
Receiver and Paymaster, Melbourne, A. E. Gavin, 637*l.*
Inspector of Charities, C. L. McVilly, 1,000*l.*
Chief Clerk, Treasury, and Secretary, Superannuation Board, L. G. Wilson, 741*l.*
Comptroller of Stamps, D. D. Paine, 900*l.*
Secretary, Tender Board, H. E. Johnson, 624*l.*

Income and Land Tax Office.

Commissioner of Taxes, R. W. Chenoweth, 1,050*l.*
Assistant Commissioner of Taxes, R. C. Webster, 663*l.*
Deputy-Commissioner of Income Tax, D. C. Stevenson, 663*l.*

Pensions.

Paying Officer of Pensions, H. M. Craig, 429*l.*

Government Printer.

Government Printer, H. J. Green, J.P., 900*l.*
Printing Overseer, T. Rider, 594*l.*

FARMERS' DEBTS ADJUSTMENT BOARD.

Chairman, J. E. Don, 1,200*l.*
Members, H. A. C. Corlett, and H. L. Simpson, 800*l.* each.
Secretary, W. R. Mann, 715*l.*

HOUSING COMMISSION.

Chairman, J. N. O'Connor, 1,150*l.*
Members, F. O. Barnett, W. O. Burt and Miss F. Penington, 400*l.* each.
Secretary, J. H. Davey, 455*l.*

DEPARTMENT OF LANDS AND SURVEY.

Commissioner of Crown Lands and Survey, The Hon. A. E. Lind, M.L.A.
Secretary for Lands, W. McIlroy, 1,000*l.*
Chief Clerk (Acting), W. J. Smart, 637*l.*
Accountant, R. R. Neal, 715*l.*
Surveyor-General, D. G. Pearson, 800*l.*
Chief Draughtsman, V. E. Anderson, 676*l.*
Director of Melbourne Botanical Gardens, F. J. Rae, 800*l.*, with quarters.

* CLOSER SETTLEMENT COMMISSION.

Chairman, N. H. Malcolm, 1,100*l.*
Members, J. A. Aird, 1,100*l.*; W. Murray, 800*l.*; and J. Ford and M. F. Cockburn (part-time), 350*l.* each.
Secretary, J. E. Hunter, 637*l.*

FORESTS COMMISSION.

Chairman, A. V. Galbraith, 1,000*l.*
Members, W. W. Gay and T. W. Newton, 800*l.* each.
Secretary, G. K. Cookburn, 689*l.*
Accountant, C. M. Ewart, 624*l.*

DEPARTMENT OF AGRICULTURE.

Minister of Agriculture, The Hon. E. J. Hogan, M.L.A.
Director of Agriculture, H. A. Mullett, 1,100*l.*
Secretary, J. A. Day, 598*l.*
Accountant, J. P. Cardiff, 637*l.*
Superintendent of Agriculture, J. Brake, 800*l.*
Superintendent of Horticulture, J. M. Ward, 800*l.*
Superintendent of Live Stock, Chief Veterinary Inspector and Chief Inspector of Stock, R. J. de C. Talbot, 800*l.*
Superintendent of Dairying, J. M. Kerr, 800*l.*
Senior Veterinary Officer, W. D. Shew, 650*l.*
Chief Inspector of Agriculture, P. Ryan, 676*l.*
Chief Inspector of Horticulture, F. M. Read, 598*l.*
Agricultural Research Chemist, W. R. Jewell, 900*l.*
Government Analytical Chemist, W. C. Robertson, 624*l.*
Biologist, S. Fish, 650*l.*
Experts—Viticulture, D. G. Quinn, 455*l.*, *Sheep and Wool*, N. A. Bowman, 559*l.* *Poultry*, H. F. Clinton, 343*l.* *Potato*, J. T. Ramsay, 507*l.*
Agricultural Economics Officer, J. Keane, 676*l.*
Chief Engineer and Works Manager, Cool Stores, J. Hepburn, 650*l.*
Manager, Beet Sugar Factory, F. J. Pywell, 775*l.*

MILK BOARD.

Chairman, J. T. Packer, 1,000*l.*
Members, E. G. Finch and G. C. Webber, 3*l.* 3*s.* per sitting.
Secretary, M. H. Rankin, 507*l.*

DEPARTMENT OF PUBLIC WORKS.

Commissioner of Public Works, The Hon. Sir George L. Goudie, M.L.C.
Secretary, C. C. Gale, M.C., M.V.O., 1,000*l.*
Chief Clerk and Accountant, J. M. Dooley, 767*l.*
Chief Engineer and Engineer-in-Charge Ports and Harbours, D. S. Stevenson, 800*l.*
Chief Architect, P. E. Everett, 900*l.*

DEPARTMENT OF MINES.

Minister of Mines, The Hon. E. J. Hogan, M.L.A.
Secretary, G. Brown, 1,000*l.*
Director, Geological Survey, W. Baragwanath, 800*l.*

MELBOURNE HARBOUR TRUST.

Chairman of Commissioners, G. Kermode, M.C.E., M.Inst.C.E.
Secretary, A. C. Cook.
Assistant Secretary, S. R. Kimber.
Treasurer, G. S. Bell.
Harbour Master, A. P. Symons.
Engineer, J. B. O. Hosking.
Dockyard Manager, C. S. Mackinnon.

* In the Closer Settlement Act, 1938, which has passed its second reading stage in the Legislative Assembly, it is provided that the present Closer Settlement Commission shall be dissolved and cease to exist and that the chairman and other members of the Commission shall go out of office.

DEPARTMENT OF EDUCATION.

Minister of Public Instruction, The Hon. Sir J. R. Harris, K.B.E., M.D., M.L.C.
Director of Education, A. Sietz, 1,250*l.*
Chief Inspector of Primary Schools, W. H. Ellwood, 850*l.*
Chief Inspector of Secondary Schools, Julia T. Flynn, 900*l.*
Chief Inspector of Technical Schools, E. P. Eltham, 900*l.*
Chief Medical Inspector, Dr. Eileen Fitzgerald, 741*l.*
Secretary, A. F. Graham, 689*l.*
Accountant, R. C. Potter, 741*l.*

DEPARTMENT OF PUBLIC HEALTH.

Minister of Health, The Hon. Sir J. R. Harris, K.B.E., M.D., M.L.C.
Commission of Public Health:—
Chairman and Chief Health Officer, Dr. H. N. Featonby, 1,000*l.*
Secretary, C. H. Robinson, 663*l.*

VICTORIAN RAILWAYS.

Minister of Transport, The Hon. H. J. T. Hyland, M.L.A.
Commissioners (Chairman), H. W. Clapp, 3,500*l.*; N. C. Harris and M. J. Canny, 1,750*l.* each.
Secretary, E. C. Eyers, 1,250*l.*
Comptroller of Accounts, L. J. Williamson, 1,150*l.*
General Superintendent of Transportation, M. A. Remfry, 1,500*l.*
Assistant General Superintendent of Transportation, R. G. Wishart, 1,100*l.*
General Passenger and Freight Agent, J. McClelland, 1,200*l.*
Chairman, Staff Board. D. Cameron, 1,000*l.*
Chief Engineer for Railway Construction and Chief Engineer of Grain Elevation Board, R. W. McCall, 1,250*l.*
Chief Engineer of Way and Works, J. M. Ashworth, 1,500*l.*
Assistant Chief Engineer of Way and Works, A. G. Fletcher, 1,150*l.*
Chief Mechanical Engineer, A. C. Ahlston, 1,500*l.*
Assistant Chief Mechanical Engineer, H. N. May, 1,150*l.*
Chief Electrical Engineer, H. P. Colwell, 1,400*l.*
Asst. Chief Electrical Engineer, C. G. H. McDonald, 1,050*l.*
Comptroller of Stores, H. S. Sergeant, 1,100*l.*
Superintendent of Refreshment Services (Acting), A. W. Keown, 850*l.*
Chief Medical Officer, Dr. A W. Bowman, 1,000*l.*

TRANSPORT REGULATION BOARD.

Chairman, A. J. Fraser, 1,250*l.*
Members, W. H. Kendell and J. Jeffrey, 800*l.* each.
Secretary, F. P. Mountjoy, M.C., 600*l.*

MELBOURNE AND METROPOLITAN BOARD OF WORKS.

Chairman, D. Bell, 1,500*l.*
Secretary, F. L. King, 1,450*l.*
Treasurer, J. G. McNicoll, 1,200*l.*
Engineer of Sewage, E. F. Borrie, 1,500*l.*
Engineer of Water Supply, A. E. Kelso, 1,500*l.*

LICENSING COURT AND LICENCES REDUCTION BOARD.

Chairman, D. Hearder, 1,000*l.*
Members, R. Normand and J. L. Harty, 900*l.* each.
Registrar and Secretary, A. W. Dixon, 520*l.*

STATE RIVERS AND WATER SUPPLY COMMISSION.

Commissioners, L. R. East, 1,500*l.* (*Chairman*), W. A. Robertson and H. Hanslow, 1,000*l.* each.
Secretary, P. J. O'Malley, 900*l.*
Accountant, W. Lambert, 712*l.*

COUNTRY ROADS BOARD.

Chairman, F. W. Fricke, 1,550*l.*
Members, W. L. Dale and A. D. Mackenzie, 1,200*l.*
Chief Engineer, L. F. Loder, 1,000*l.*
Secretary, R. F. Jansen, 845*l.*
Accountant, E. J. Hicks, 806*l.*

ELECTRICITY COMMISSION.

Chairman, G. G. Jobbins, M.I.E.E., M.I.E. (Aust.), J.P., 2,100*l.*
Members, D. J. McClelland, M.C.E., C. A. Norris, C.B.E., F.I.A., and Andrew W. Fairley, J.P., 250*l.* each.
Manager, R. Liddelow.
Secretary, W. J. Price, Dip.Com.(Melb.), J.P.
Chief Engineer, Power Production Department, E. Bate, B.Sc., Whit.Sch.
Engineer and Manager, Electricity Supply Department, W. H. Connolly, E.E.E., A.M.I.E.
General Superintendent, Yallourn, R. D. Dixon.
Engineer in Charge of Briquetting and Research, Dr. H. Herman.
Engineer in Charge of Coal Supply, R. J. McKay.

STATE ACCIDENT INSURANCE OFFICE.

Insurance Commissioner, W. H. Holmes, 1,100*l.*
Chief Clerk, E. J. Ryan, 702*l.*

LONDON AGENCY.

Agent-General for Victoria in the United Kingdom (Office, Melbourne Place, The Strand, W.C.2), The Hon. A. L. Bussau.
Secretary and Accountant, A. H. Wright, I.S.O.

FOREIGN CONSULS.

Argentine Republic, Vice-Consul, Carlos N. Keppel.
Austria, H. Del Cott, Consul.
Belgium, Consul, R. Vanderkelen.
Brazil, Vice-Consul, H.A. Sheppard, R. Sheppard, Consular Agent.
Chile Republic, Consul, C. W. Le Plastrier.
Colombia, United States of, Consul, M. Lyle.
Czechoslovakia, Consul, E. H. Peacock.
Denmark, Consul, P. J. Holdenson; Vice-Consul, E. N. Belcher.
Finland, H. M. H. Sleigh (Vice-Consul).
France, Consul, C. Claudon.
Germany, Consul, Dr. R. W. Drechsler.
Greece, Consul, A. Lucas; Deputy-Consul, A. A. Nicolaides.
Italy, Consul, Dr. E. Arrighi.
Japan, Consul, D. Y. Syme; Vice-Consul, P. J. Black.
Latvia, Consul, R. G. McComas.
Netherlands, Consul, F. H. Wright, V.D.
Norway, Consul, J. A. Schreuder; Vice-Consul, J. Howard.
Panama, Consul, V. J. Kelson.
Peru, Hon. Consul, C. N. Mackenzie.
Poland, Consul, T. M. Burke.
Portugal, Consul, W. L. Jack.
Salvador, Consul, V. N. T. Karagheusian.
Spain, Vice-Consul, Sir S. J. Morell.
Sweden, Consul, G. W. Petre; Vice-Consul, G. T. Pihl.
Switzerland, Consul, J. A. Pietzcker.
United States, Consul, Walter A. Foote; Vice-Consuls, R. H. Hunt, W. W. Signor.
Uruguay, Consul, H. P. Ogilvie.
Yugoslavia, Acting Consul, W. H. Downing.

WESTERN AUSTRALIA.

Situation and Area.

Western Australia comprises nearly one-third of the Australian continent, namely, all that portion west of the 129th meridian. The total area is 975,920 square miles (more than half the area of European Russia, and over one-fourth that of Europe). The city of Perth, the capital, is in lat. 31° 57′ S., long. 115° 51′ E.

Coast Line.

The Southern and Western coast lands are to a great extent of a more or less flat and sandy character, though mostly protected by rocky cliffs and headlands, or dunes; there are here comparatively few natural harbours or other indentations, until the Kimberley Division is reached, where the character of the coast changes, and it becomes bold and broken, and fringed with numerous islands. The total length of the coast line, not including minor features, is estimated to be 4,350 miles.

Bays, Gulfs, &c.

The principal inlets, beginning from the north, are: Cambridge Gulf, Napier Broome Bay, Vansittart Bay, Admiralty Gulf, Montague Sound, York Sound, Brunswick Bay, Camden Sound, Collier Bay, King Sound, Beagle Bay, Roebuck Bay, Lagrange Bay, Port Walcott, Nickol Bay, Exmouth Gulf, Shark Bay, Champion Bay, Cockburn Sound, Koombana Bay, Geographe Bay, Flinders Bay, King George Sound, Bremer Bay, and Esperance Bay. With the exception of Princess Royal Harbour (the inner harbour of King George Sound), the principal anchorages used to the south of the 19th parallel of latitude are open roadsteads, which, as a rule, are only partially protected; but the holding grounds of these are fairly good, and accidents seldom happen to vessels properly found. Fine harbours have, however, been artificially provided at Fremantle, at the mouth of the Swan River, and at Bunbury, in Koombana Bay.

Capes.

The principal capes are: Capes Domett and Dusséjour at the entrance of Cambridge Gulf; Cape Londonderry, which is the most northerly point of the State, with Cape Talbot, on the same peninsula; Cape Bougainville, lying between Admiralty Gulf and Vansittart Bay; Cape Voltaire, which is the western boundary of Admiralty Gulf; Cape Torrens, at the entrance to York Sound; Cape Lévêque, the western boundary of King Sound; Cape Bruguières, to the west of Nickol Bay; North-West Cape, which forms the western boundary of Exmouth Gulf; Cape Cuvier, at the northern extremity of Shark Bay; Cape Inscription, at the north end of Dirk Hartogs Island, so named because of an inscription plate placed there by Dirk Hartogs in 1616; Steep Point, situated on the southern entrance to Shark Bay, which is the most westerly point of the Continent; Cape Vlaming, being the Western extremity of Rottnest Island; Capes Naturaliste and Leeuwin at the south-western extremity of the Continent, and Point D'Entrecasteaux, West Cape Howe, Bald Head, Cape Riche, Hood Point, Cape le Grand, and Cape Arid on the Southern coast.

Tides.

As would naturally be expected with so extensive a coast line the tides are very varied, little or no rise and fall being experienced on the South and South-Western coasts, whilst from Shark Bay northwards they increase rapidly, though not uniformly in range, attaining at Derby, in King Sound, a Spring rise of 34 feet.

Islands.

The islands which occur on the coast are, as a rule, small and unimportant, those best known being Garden and Rottnest Islands off Fremantle; the Houtman Abrolhos, near Champion Bay, on which guano is found; Dirk Hartogs and other islands in Shark Bay, used for pastoral purposes; Dampier Archipelago and the Montebello Group off the North-West coast; the Lacepedes, on which are guano deposits, and the Buccaneer and Bonaparte Archipelagos, for the most part unexplored, off the Kimberley or extreme Northern coast; and the Archipelago of the Recherche, off the southern coast, between Esperance and Israelite Bay.

Rivers.

The principal rivers are: in the North, the Ord, with its tributaries, the Denham, Bow, Negri, and Panton; the Pentecost, with its tributary, the Chamberlain; the Durack, Drysdale, King Edward, Prince Regent, Charnley, Isdell, and the Fitzroy, with its tributaries the Margaret and Hann Rivers and Christmas Creek. In the North-West the De Grey, with its tributaries, the Oakover, Shaw, and Strelley; the Yule, the Fortescue, and the Ashburton, with its tributaries, the Henry and Hardy. Then, falling to the Western Coast, the Minilya, the Gascoyne, with its tributary, the Lyons; the Wooramel, the Murchison, with its tributary, the Sanford; the Chapman, Greenough, the Irwin, the Moore; the Swan, on which is situated the capital of the State, and which, inland, is called the Avon; the Murray, the Collie, and the Preston. And lastly, on the Southern Coast, the Blackwood, Donnelly, Warren, Deep, Frankland, Denmark, Hay, Kalgan, Pallinup, Gairdner, Fitzgerald and Phillips Rivers.

Mountains.

In the Kimberley District the principal range of hills is the King Leopold range. The highest point in it is Mount Broome, 3,040 feet. In the North-West the highest range is the Hamersley, between the Fortescue and Ashburton Rivers, with Mount Bruce (4,024 feet) in the vicinity. The Darling range, which extends from Yatheroo in the North to Point D'Entrecasteaux in the South, a distance of about 300 miles, attains its highest elevation, 1,910 feet above the level of the sea, at Mount Cooke in the Cockburn Sound District. In the South, the loftiest range is the Stirling range, the highest point of which is Bluff Knoll (3,640 feet). Between it and the coast, and parallel with both, extends the less elevated Porongorup range.

Lakes.

There are no lakes of any considerable importance in the State. Between the Darling range and the coast there are a few salt-water lagoons, and many fresh-water lakes, the majority of which are nothing more than swamps during the dry season and are of but minor economic importance. The so-called lakes in the interior of the State, which are frequently of very considerable area, are, except after the occasional heavy rains, merely immense salt marshes or clay-pans.

Contour of the Country.

highest country here is principally of limestone and sandstone formations. Much of the North-West Division is an elevated region exceeding 1,000 ft. above sea-level, with ranges of high hills which, generally speaking, are of a similar character to those of the Kimberleys. The north and north-western parts of the State contain extensive areas of good pastoral country. A large proportion of the South-West Division, which is mainly a broken tableland, having an average elevation of 800 to 1,000 ft., may be described as a vast forest, principally timbered with the Eucalypts, jarrah, karri, wandoo, tuart, marri (or red gum), most of which timbers are of great commercial value. From some points on the Western sea-board settlement has extended for about 500 miles inland. That portion of the interior enclosed by the 19th and 30th parallels of latitude and the 123rd and 129th meridians is to a very large extent unexplored, but from information furnished by gold prospectors and other travellers, this area may be described as a great tableland, with an altitude of from one to two thousand feet above sea level, the surface of which consists partly of sand dunes, varied by wide stretches of clayey soils and ranges. Between the 30th parallel of latitude and the Great Australian Bight, much of the country is an immense treeless limestone plain, which supports the drought-resistant native fodder shrubs, salt-bush and blue-bush, and forms a portion of the Eucla sub-artesian basin.

Early History.

The first authentic record of European explorers visiting any portion of Western Australia is contained in the words cut into the tin plate, now in the State Museum at Amsterdam, which was nailed on the 25th October, 1616, by Dirk Hartogs, the commander of the Dutch vessel *Eendragt*, to a post erected on Point Inscription on what is now called Dirk Hartogs Island. Other vessels successively visited, or were driven by stress of weather to the West coast of the Continent, notably the *Leeuwin* in 1622, the *Batavia* (Capt. Pelsart) in 1628, the *Limmen* (Capt. Tasman) in 1644, and the *Geelvinck* (Capt. de Vlaming) in 1696. The first Englishman, however, to land on these coasts was William Dampier, who, in 1688, in the *Cygnet*, landed at King Sound. French navigators followed during the next century and after, viz., de St. Alouarn, in *Le Gros Ventre*, in 1772, d'Entrecasteaux, in *La Recherche*, in 1792, Baudin, in the *Géographe*, in 1801, de Freycinet, in the *Uranie*, in 1818, and De Bougainville, with the vessels Thétis and Espérance, in 1825. In 1791, Vancouver, in the *Discovery*, took formal possession of the country about King George Sound. In 1801, Matthew Flinders, in the *Investigator*, explored the Southern coast of the Continent, which, at his suggestion, subsequently received the name of Australia; whilst from 1818 to 1822 Philip Parker King, first in the *Mermaid* and afterwards in the *Bathurst*, explored and carefully charted its northern coasts.

In 1826 the Government of New South Wales sent 20 convicts and a detachment of soldiers to King George Sound and formed a settlement then called Frederick Town. In 1827 Captain James (afterwards Sir James) Stirling, in H.M.S. *Success*, surveyed the coast from King George Sound to the Swan River, and in May, 1829, Captain Fremantle (afterwards Sir Charles Fremantle, G.C.B.), in H.M.S. *Challenger*, took possession of the territory. In June, 1829, Captain Stirling founded the Swan River Settlement, now the Commonwealth State of Western Australia, and the towns of Perth and Fremantle, and was appointed Lieutenant-Governor.

Large grants of land were made to the early settlers, and agricultural and pastoral occupations were pursued by a small population with varying success, until, in 1850, the Settlement was in a languishing condition, and the inhabitants' petition that it might be made a penal settlement was acceded to. Between 1850 and 1868, when transportation ceased, 9,718 convicts were sent out. The Imperial convict establishment was transferred to the Colonial Government on the 31st March, 1886.

Constitution and Government.

In 1870 the constitution, which was what is called "Representative," was established by Act 33 Vict., No. 13. The Governor was assisted by an Executive Council composed of the principal officers of the Government, and the Governor also had power to appoint two unofficial members to the Executive Council. There was also a Legislative Council, consisting then of three official members of the Executive Council, three unofficial nominees of the Governor, and 12 elected members.

Responsible government was granted to Western Australia in October, 1890, and the first Ministry was sworn in on 29th December, 1890.

The Legislature consists of two Houses: the Legislative Council, consisting of 30 members, and the Legislative Assembly, of 50 members.

Both Houses are elective.

By the Parliament (Qualification of Women) Act, 1920, it has been enacted that a woman shall not be disqualified by sex or marriage for being elected to, or sitting and voting as a member of the Legislative Council or the Legislative Assembly.

Legislative Council.

Provinces.—The State is divided into 10 electoral provinces, each returning 3 members.

Tenure of Seat.—6 years.

Qualification of Member.—Any person who is (1) 30 years of age, and free from any legal incapacity; (2) a natural born subject of His Majesty and a resident in the State for at least 2 years; or (3) naturalised for 5 years, and a resident in the State during that period.

Qualifications of Electors.—"The Constitution Acts Amendment Act, 1899," has extended the right to vote equally to both sexes. The qualifications of an elector are as follows:—is not under 21 years of age, and not otherwise disqualified; is a subject of the King, either natural-born, or having been naturalised for at least 12 months; has resided in the State for 6 months; and in the province for which enrolment is claimed has freehold property of the clear value of £50, or is a householder or a leaseholder in respect of property of the clear annual value of £17, or a ratepayer of property of the annual rateable value of £17, or a Crown leaseholder paying a rental of £10 per annum.

Legislative Assembly.

Districts.—There are 50 electoral districts for the Legislative Assembly, each represented by one member.

Tenure of Seat.—The members of the Assembly are elected for a period of 3 years.

Qualification of a Member.—Any person, 21 years of age, who has resided in the State for 12 months, is not subject to any legal incapacity, is a natural-born subject of the King, or naturalised for 5 years, and has resided in the State for 2 years.

Digitized by Google

Qualifications of Electors.—Subject to certain qualifications every person not under twenty-one years of age, who—

(*a*) is a natural-born or naturalised subject of His Majesty; and

(*b*) has resided in Western Australia for six months continuously; and

(*c*) has resided in the district for which he claims to be enrolled for a continuous period of one month immediately preceding the date of his claim,

is entitled to be enrolled as an elector, and when enrolled, and so long as he continues to reside in the district for which he is enrolled, to vote at the election of a member of the Legislative Assembly for that district. No person can be a registered voter in more than one electorate.

The claiming of enrolment is compulsory.

The Governor is advised by the following responsible Ministers, who form the Cabinet:—The Premier, Treasurer and Minister for Forests; the Minister for Lands and Immigration; the Minister for Mines and Health; the Minister for Works and Water Supplies; the Minister for Agriculture and Education; the Minister for Employment and Labour; the Chief Secretary and Minister for Police; the Minister for Justice and Railways, and one Honorary Minister.

Western Australia is represented in the Federal Senate of Australia by six members and in the House of Representatives by five members.

Local Government.

Municipalities.—There are 21 Municipalities in the State, which function under the Municipal Corporations Act, 1906, and its amendments.

Municipal Councils are allowed to levy general rates, not exceeding 2*s.* 6*d.* in the £, and a lighting rate not exceeding 6*d.* in the £ upon the Annual value, and may levy a loan rate sufficient to pay interest and sinking fund on money borrowed for specific purposes.

All license fees, tolls and dues, etc., under the Municipal Corporations Act, 1906, are appropriated by the Council of the Municipality.

Licence fees for vehicles under the Traffic Act, 1919-35, are collected by Municipalities, except within the Metropolitan Area, where the Commissioner of Police collects them and pays them into a Traffic Trust Account which is distributed to the Councils within that area by the Minister for Works, in order to obtain a more proportioned allocation.

The Municipal Council in towns where the population does not exceed 1,000 consists of a Mayor and six Councillors: where the population is between 1,000 and 5,000, of a Mayor and nine Councillors; where the population exceeds 5,000, a Mayor and 12 Councillors or 3 for each ward, and if there are more than 4 wards the number is proportionately increased—the Mayor being elected annually by the ratepayers, by whom also the Councillors are elected for a term of three years.

Road Boards.—The number of Road Boards in the State is 127, which administer the Road Districts Act, 1919-34.

Road Boards may levy rates of not less than ½*d.* in the £, and not more than 4*d.* (except with the consent of the Minister to meet special cases, when a rate up to 6*d.* in the £ or, in the case of Metropolitan Boards, up to 9d. in the £ may be levied), on the unimproved Capital value of land and, on the annual value, a rate of 6*d.* up to 2*s.* in the £.

Boards may also strike a loan rate to pay interest and sinking fund on money borrowed for specific purposes.

Representation on a Road Board consists of not less than 5, or more than 13 members, including a Chairman, who is elected by the members at the first meeting of the Board.

All Licence Fees, fines, etc., under the Road Districts Act and Dog Act are appropriated by the Board, and included in its Local Revenue.

Vehicle Licence fees under the Traffic Act 1919-35, are, as in the case of Municipalities, collected by Road Boards, with the exception of those Districts within the Metropolitan Area, where the Commissioner of Police collects the fees, which are paid into the Traffic Trust Account, to be distributed by the Minister for Works, among the Boards in that area.

Municipal Authorities are invariably created Health Authorities and Road Boards are generally created Health Boards and Vermin Boards and levy rates and carry out the functions provided in the respective Health and Vermin Acts.

Both Authorities (Road Boards and Municipalities) are entrusted with powers to undertake the supply of electricity, gas, water, and other public utilities under their respective Acts.

Population and Chief Towns.

The total population of the State on the 30th June, 1938, was estimated to be 460,000, excluding full-blood aboriginals. According to the 1933 Census the population included 9,212 persons (7,978 Males and 1,234 females) of Foreign Nationality, 3,031 being Italians; 1,581 Yugoslavs; 929 Greeks; 672 Chinese; and 528 Japanese.

The Capital and seat of Government is Perth (population, including Fremantle and the various suburbs within the Metropolitan Area, estimated to be, at 31/12/37, 215,700). It is picturesquely situated on the right bank of the Swan River estuary. King's Park (approximately 1,000 acres), on a hill overlooking the city and the wide estuarine reaches of the river, is one of unique natural beauty. The chief ports are:—Fremantle (26,191), Albany (4,430), Bunbury (5,650), Geraldton (4,725), and Broome (with a considerable floating population of pearlers, mostly Asiatics). The chief centre of the agricultural districts is Northam (4,875), of the goldfields areas Kalgoorlie (including Boulder), with a population of 17,310, and of the coal mines, Collie (3,785).

Land Development.

Of the total area of the State, 33,469,882 acres only were, on the 30th June, 1938, alienated or in process of alienation, while 205,992,155 acres were leased, viz., 202,022,987 for pastoral, and the balance for other purposes. No less than 385,126,763 acres were still unoccupied, with large areas comparatively unexplored. At present, the whole of the coast line, a length of 4,350 miles, not including minor features, from Eucla in the south to Cambridge Gulf in the north, may be said to be more or less settled, for a distance inland varying from one hundred to, in some places, five hundred miles, though a considerable portion of the land taken up, especially in the Kimberley, Eucla, and interior goldfields districts, has not yet been stocked or occupied.

North of the Murchison River large tracts of rural lands are only held on lease from the Crown for pastoral purposes. The South-west corner of the State, however, where, in recent years, cultivation eastward from the older settlements has been extensive, has become one of Australia's important wheat producing areas, and agriculture here has progressed at an almost phenomenal rate, the wheat harvest having increased from 2,460,823 bushels in 1909 to 53,504,149 bushels in 1931. Since that year generally low prices have had the effect of restricting the area sown, and the 1937-38 crop amounted to only 36,091,600 bushels. Under the stimulus of better prices (not unfortunately sustained) the area sown this

Digitized by Google

season increased by ten per cent., but owing to less favourable growing conditions it is not anticipated that the crop will exceed that of the 1937-38 season The total area of land under cultivation for the season ended 28th February, 1938, was 14,009,537 acres, viz., under crop 4,164,736 acres, under permanent artificially sown grasses 755,872 acres, new ground cleared during the season and prepared for next season's crops 208,844 acres, land in fallow 2,817,784 acres, area of other cleared land, previously cropped now used for grazing or lying idle, 6,062,301 acres; in addition there were 1,667,069 acres of ring-barked or partially cleared land; beyond this, the traveller's way still lies for the most part through savannahs or forests, varied by open sand plains covered in the season with shrubs and flowering plant in infinite variety and beauty. Western Australia is famed for "bush flowers." The flora of the South-west is of unusual richness and diversity of form, at least three-quarters of the plants being endemic.

The Agricultural Bank, established under the "Agricultural Bank Act, 1894," had, to 30th June, 1938, advanced a total amount of 9,724,492*l*. The Industries Assistance Board, established in 1915, had, to 30th June, 1938, advanced to assisted settlers a total amount of 13,438,157*l*. Under the Government Scheme for Soldier Settlement, advances made to 30th June, 1938, amounted to 6,051,351*l*. Up to the same date, 5,213 returned soldiers had been assisted.

Industry.

One of the principal industries, as in the case of the other Australian States, is wool-growing. Sheep (of which on 31/12/37 there were 8,738,063, a reduction during the past two years of more than 2,000,000 through drought losses) are depastured in all parts of the State. The export of wool in the year ended 30th June, 1938, was 56,157,748 lbs. valued at 3,161,540*l*. A considerable quantity of wine is made, about four hundred thousand gallons annually. To show the advance of the wheat (and flour) industry it may be pointed out that in 1907 the export of wheat was valued at 96,675*l*., that of flour at 34,565*l*. In 1910 the figures were respectively 406,326*l*. and 25,427*l*., and for the year ended 30th June, 1916, 1,023,362*l*. and 213,991*l*. The figures for 1937-38 were 4,833,666*l*. and 804,706*l*. Another progressive industry is fruit-growing, especially apples, which latter are already exported in considerable quantities. The exports of fresh fruit rose in value from 925*l*. in 1907 to 32,274*l*. in 1913, whilst the figures for the five years ended 30th June, 1934, 1935, 1936, 1937 and 1938 were 369,515*l*., 448,058*l*., 501,988*l*., 362,020*l*. and 328,124 respectively.

The principal forest area lies between south latitude 31° and 35°. Western Australian Jarrah is well known throughout the world for its extraordinary durability, and is in great demand for paving, railway sleepers, piles for bridges, harbour works, etc., and is being used in increasing quantities for the manufacture of furniture and office fittings. There is a large export of this and other timbers, especially Karri, of which large quantities are used for superstructural purposes. The forests are worked under a system of permits issued by the Government, and the State itself operates several large saw mills. A vigorous reforestation policy is being carried out in order that the timber industry may be maintained for all time. The export of local timber for the years ended 30th June, 1934, 1935, 1936, 1937 and 1938 were respectively 484,241*l*., 631,228*l*., 675,932*l*., 699,613*l*. and 932,394*l*. Sandalwood is still abundant, and was exported to Asiatic countries to the value of 75,424*l*. in 1933-34, 66,474*l*. in 1934-35, 44,916*l*. in 1935-36, 75,670*l*. in 1936-37 and 22,884*l*. in 1937-38.

At Broome and on the north-west coast generally, during the year ended 31st December, 1937, a fleet of 87 schooners, cutters, and luggers were employed on the pearling banks, giving occupation to 14 white, 27 aboriginal, and 592 Asiatic pearlers. The export of pearls and shell amounted to 173,109*l*. in 1937-38.

For a long period lead and copper mines were held and worked in the Northampton Mining District, some 30 miles north of Champion Bay, but of late years little continuous work has been done in them. Activities have, however, recently recommenced. Copper occurs also in several other districts, notably Mt. Margaret, Phillips River, and West Pilbara, but little is being mined at present.

The other mineral resources of Western Australia were almost unknown, and quite undeveloped until five decades ago. Gold was found in considerable quantity in the Kimberley goldfield in 1887, and this attracted a large number of experienced miners to Western Australia. The result was the discovery of gold in great quantities elsewhere.

After the discovery and opening up of the Central and Eastern Goldfields of Western Australia, gold-mining became for the time being the principal industry of the State, and so rapidly did the annual output of gold increase for a number of years, that it placed Western Australia at the head of the gold-producing States of the Commonwealth—a position it still occupies, producing 1,000,647 fine ozs., i.e., approximately 72 per cent. of the total gold output during 1937.

The value of gold produced up to the end of December, 1937, was 205,056,038*l*. During 1937 the Australian Currency value of the gold production was 8,743,755*l*.

There is good coal in the south-west corner of the State, and evidence of its existence in the vicinity of Champion Bay and the Irwin river. Coal is also said to exist in the Kimberley district. On the Collie Coalfield, situated in the Wellington district, several companies are successfully working coal-leases. The output in 1937-38 was 584,533 tons.

At the end of 1888 large deposits of stream tin were discovered at Greenbushes, on the Blackwood river. Considerable quantities of tin have also been raised near Marble Bar and at other centres in the Pilbara Goldfield.

Silver is found, mostly together with other minerals, and extracted in conjunction with gold. Other metals and mineral products found are antimony, gadolinite, bismuth, tantalite, lead, arsenical ore, asbestos, copper, alunite, bauxite, phosphates, salt, iron-ore, felspar, glauconite, mica, wolfram and scheelite, zinc, graphite, magnesite, molybdenite, gypsum, manganese, pyritic ore, also limestone and ironstone.

Currency and Banking.

The system of coinage is similar to that of Great Britain. Currency is allied to sterling and is at present at a discount of 20 per cent. The note issue is controlled by the Commonwealth Bank.

The following banks have establishments in the State: The National Bank of Australasia, Limited, Union Bank of Australia, Limited, Bank of New South Wales, the Commercial Bank of Australia, Limited, the Bank of Australasia, the Commonwealth Bank of Australia, the English, Scottish and Australian Bank, Limited, the Bank of Adelaide.

The deposits in the banks during the quarter ended 30th June, 1938, averaged 21,323,317*l*.

The Commonwealth Bank of Australia commenced business in Western Australia on 20th January, 1913. The average deposits for the

Digitized by Google

quarter ended 30th June, 1938 (included above), amounted to 6,282,747*l.*, excluding Commonwealth Savings Bank Deposits.

The State Government Savings Bank, established in 1863, was taken over by the Commonwealth Bank on 1st November, 1931.

Branches of the Commonwealth Savings Bank were opened in this State at the beginning of 1913, and the amount due to Depositors on 30th June, 1938, was 12,037,486*l.*

A branch of the Royal Mint exists in Perth. The total value of sovereigns and half-sovereigns minted since the foundation in June, 1899, was, on 30th June, 1938, 106,751,535*l.*

Education.

Government Primary Schools exist in all parts of the State, and are under the control of the Minister for Education. The whole cost of the schools is borne by the Government, and the staffs are appointed by the Education Department.

Attendance at school is compulsory for all children between the ages of six and fourteen, and only in cases of poverty or sickness on the part of the parents is exemption granted to children between the ages of twelve and fourteen. General religious teaching, exclusive of dogmatic or polemic theology, is included in the course of instruction given, whilst representatives of various denominations are admitted to give instruction during school hours to the children of adherents.

The number of Government Primary Schools open in 1937 was 886. The average enrolment for the year was 57,674, and the average attendance 53,021.

Where an average attendance of eight children cannot be maintained, the Department pays an annual grant (from 12*l.* to 13*l.* 10*s.*) for each child if the parents secure a suitable teacher and provide him or her with suitable accommodation.

Children in isolated localities are taught by correspondence.

Children who complete satisfactorily the primary course may pass to a District High School for a five years' Secondary Course, or to the upper classes of a Central School for a two or three years' course.

Four courses—General (including Commercial), Professional, Industrial, and Domestic—are provided in the classes at the Central Schools.

The five years' course in the Government High Schools is divided into two sections. The work of the lower section is, with very few exceptions, common to all students. In the upper section there is a considerable amount of specialisation.

Manual training in woodwork is included in the course of all the larger Primary Schools. In the Central Schools and High Schools metalwork is also taken.

Domestic work—Cookery, Laundry and Housewifery—is included in the course of all the larger Primary Schools, and also in the course of the Central Schools and High Schools.

Technical Schools are established in the principal centres. They include advanced work in Science, Trades Classes, Commercial Classes, Art Classes, Domestic Classes, etc. There is also a School of Mines at Kalgoorlie and Wiluna.

A School of Agriculture and an Agricultural College, leading up to a Diploma in Agriculture, are provided.

The University in Perth provides courses for Degrees in Arts, Science (including Agriculture), Engineering and Law, and for Diplomas in Education, Commerce, Journalism and Agriculture. Adult ucation is a feature of the University. A box system operates for country students. Evening extension lectures and summer vacation courses are held.

Scholarships are provided by the Government to enable pupils from the Primary Schools to pass to the Secondary Schools. Thirteen exhibitions are offered each year for the University.

A number of scholarships is offered each year to enable children from country schools to attend District High Schools or the Narrogin School of Agriculture.

Scholarships for children of fallen or disabled soldiers are also offered. They are tenable at Secondary Schools, District High Schools, Narrogin School of Agriculture, Technical Schools, School of Mines, and the University.

Private Schools are open to Government inspection, and must be declared efficient. The Government Secondary School Scholarships may be held at non-Government Secondary Schools.

The total Government expenditure upon education during 1937-38 (apart from the University and the cost of buildings) was 758,670*l.* The amount expended on buildings was 67,593*l.* There was also a grant of 40,715*l.* to the University. The aggregate expenditure upon Education was therefore 866,978*l.*

Means of Communication.

Division.	Main Line.
	Miles
1. EASTERN RAILWAY— Fremantle to Perth and Northam, including Belmont, Upper Darling Range (Karragullen), Mundaring Weir, Clackline-Toodyay-Miling lines, and Parkerville loop	219
2. SOUTH-WESTERN RAILWAY— From East Perth Junction southward to Bunbury and Northcliffe, including the Canning Race-course line, Armadale-Fremantle, Pinjarra-Narrogin, Dwellingup-Railway Mill, Brunswick-Narrogin, Bowelling-Wagin, Boyanup - Busselton - Flinders Bay, Wonnerup-Nannup, and Donnybrook-Katanning lines	815
3. GREAT SOUTHERN RAILWAY— Spencer's Brook to Albany, including York-Bruce Rock-Merredin, Brookton-Corrigin, Narrogin-Bruce Rock, Yilliminning-Merredin, Wagin-Newdegate, Lake Grace-Hyden, Katanning-Pingrup, Tambellup - Ongerup and Elleker-Normalup lines	1,074
4. EASTERN GOLDFIELDS RAILWAY— From Northam to Kalgoorlie and Laverton; Coolgardie-Esperance, Kalgoorlie-Boulder-Brown Hill-Kamballie and Malcolm-Leonora lines	776
5. EAST NORTHAM-MULLEWA RAILWAY— Including the Goomalling-Merredin, Wyalkatchem - Lake Brown - Southern Cross, Amery-Kalannie and Burakin-Bonnie Rock lines	670
6. NORTHERN RAILWAY— Geraldton to Meekatharra and Wiluna, including Narngulu-Walkaway, Mt. Magnet - Sandstone, Cue - Big Bell, Geraldton-Ajana, and Wokarina-Yuna lines	673
7. HOPETOUN-RAVENSTHORPE RAILWAY—	34

Digitized by Google

These lines have numerous sidings, totalling in all 448 miles.

On the 1st July, 1913, the Government took over the Perth Electric Tramways which now have a total length of route of 37 miles, together with 13 miles of Trolley Bus overhead line.

There are 277 miles of private railway open for general and passenger traffic, also several other private railway lines, mostly constructed by timber companies in the south-western portion of the State, having a total length of some 600 miles.

Since 1917 the Transcontinental Railway (4ft. 8½ in. gauge) from Kalgoorlie to Port Augusta, unites the railway systems of Western and South Australia, a distance of 1,051 miles.

The earnings of the Government railways for the year ended June, 1938, were 3,677,850*l.*, and the working expenses 2,709,914*l.* The total cost of construction has been 26,286,115*l.*

Of electric telegraph on the 30th June, 1938, there were 18,370 miles of wire. During 1936-37 the revenue received by the telegraph branch was 145,603*l.*; telephone receipts amounted to 395,334*l.*; and postal and other revenue of the post and telegraph department to 497,957*l.*; expenditure on posts, telegraphs and telephones for year ended 30th June, 1937, was 911,309*l.* There is telegraphic communication with Europe and the rest of the world by Cable and Beam Wireless, *via* South Australia and New South Wales, and Victoria respectively, also *via* the Beam, an overseas Telephone service with some 50 countries. Postal facilities are provided at all towns and settlements throughout the State.

The ordinary telephone service uses 166,353 miles of wire, in addition to telephone and telegraph controlled by State Government Railways, Private Railways and State Forests Department.

A high-power wireless station is situated at Applecross, between Perth and Fremantle. Stations of lower power have been erected at Esperance, Geraldton, Broome and Wyndham.

A thrice-weekly air mail service connects the State with the United Kingdom.

The steamers of the P. and O. and Orient Companies carry mails to and from the United Kingdom and Europe, etc., whilst mails to and from South Africa are mainly forwarded direct by steamers of various lines as opportunity offers. Mails are despatched to and received from other Australian States, New Zealand and Polynesia, by the Trans-Australian Railway and Airmail services. Local steamers supply coastal communication and an Aerial mail service is maintained to the Northern and Central parts of the State. Letters from England reach Perth in about 26 days *via* France, and by London-Singapore-Australia Air Mail Service, in 10 days.

Postal statistics for the year ended 30th June, 1938, give the following as the number (each counted once) of letters, packets, etc., despatched to places within the Commonwealth, and received from and despatched to places beyond the Commonwealth:—

	Within the Commonwealth.	From and To Beyond Commonwealth.
Letters, Post Cards and Letter Cards	52,030,000	5,824,500
Newspapers	8,521,800	3,617,800
Parcels	685,600	33,000
Registered Articles	578,072	67,872

Fremantle is a modern port situated within the estuary of the Swan River and efficiently equipped with up-to-date appliances enabling rapid and economical despatch to shipping. It is the western terminal port of the trans-Australian railway, is the first and last port of call in Australia for all mail and other vessels using the Suez route and for many on the Cape route, and is the chief port in Western Australia.

The greatest draught at which vessels may be navigated in the harbour is 35 feet during high water or the last quarter flood, and 33 feet at low tide.

Fremantle is an important fueling port for coal or oil and all other provisions are obtainable. Ordinary repairs can be effected but there is no dock at the port.

The cargo handling equipment and general port facilities are equal to the best in Australia. For the year ended 30th June, 1938, the number of vessels which used the port was 810 of an aggregate gross tonnage of 6,297,750 tons, while for the same period the tonnage of cargo handled, excluding live stock, was 1,258,743 tons.

Department of Native Affairs.

It was estimated that the native population of the State on 30th June, 1938, was, including half-castes, 26,484, of whom 16,484 are in touch with civilisation and the remainder in those portions of the State as yet uninhabited by the white man.

The natives are still assisting, to no small extent, in the development of the Northern portion of the State, and, had it not been for their assistance in the past, this work would not have proceeded so satisfactorily as it has done.

Approximately 3,597 natives are engaged throughout as stock-boys, shepherds, station-hands, domestic servants, etc., all of whom are engaged under permit in accordance with the provisions of the Native Administration Act, 1905-1936.

Generally speaking the natives are not hostile. Some years ago cattle killing by natives was very prevalent, and the State spent a considerable amount of money in apprehending offenders and maintaining them in prison while undergoing sentence. To minimise these depredations amongst settlers' stock, the Government established three Cattle Stations in the Kimberleys in order to breed cattle with which to supply the natives with meat and so prevent them from killing cattle belonging to pastoralists. The scheme has proved most successful.

Other Settlements have been established both in the North and in the South, while some 74 Ration Stations are maintained by the Department. One large Settlement has been established for some years on the Moore River, about 90 miles north of Perth, especially for aged and indigent natives, and children requiring the care of the Department. The male adults who are capable of working are employed on farm and garden work, and the women assist with domestic duties. For the young children there is a modern kindergarten and the other children at the Settlement attend school and are trained in various ways for subsequent employment. Adjacent to the Settlement is a village for adult natives. They live in cottages equipped and furnished with all conveniences, including electric light and a reticulated water supply. In addition the village has a community kitchen, together with a hall for recreation purposes. The Settlement establishment includes a sewing room, in which the girls and young women are taught to sew and manufacture garments for indigent natives throughout the State. There are ten religious Mission Stations, six in the North and four in the South. Seven of these Missions, including one school, are subsidised by the State. A home for quarter-caste children has been established near Perth and this is also subsidised by the Department.

There are 118 Protectors of Natives, including two women, scattered throughout the State. These

Digitized by Google

officers assist in the administration of the "Native Administration Act," and generally look after the welfare of the natives.

The total expenditure of the Department of Native Affairs for the year ended 30th June, 1938, was 50,965*l.* 9*s.* 8*d.*

The policy of the Department is in the direction of inducing the natives to support themselves by their own labour with a view to their taking their place in due time as responsible citizens of the community, and an endeavour is made to render all Native Stations self-supporting. Approximately 16,000 are more or less directly in touch with the Department, the social work of which, relating as it does to almost every phase of human endeavour, is a feature of the administration. In the northern districts of the State there are four well-equipped native hospitals, and at the two chief Native Stations there are clinics in charge of trained nurses.

Approximately 20,927*l.* was spent, during the year mentioned, in direct relief in the shape of food, clothing and medical attendance, while a considerable sum was spent upon buildings and improvements at Stations.

Climate.

The climate of Western Australia, though hot in the north and central areas, is one of the finest and healthiest in the world. The average death-rate during 1937 was 8·95 per 1,000. The average rainfall at Perth is 34·81 inches (for 62 years), and the mean temperature is 64·4°F. The rainy season extends from May to October, except in the North-West and far North, which are tropical regions having a Summer rainfall.

Governors of Western Australia.†

Sir W. C. F. Robinson, G.C.M.G., 20th Oct., 1890.
Alexander Campbell Onslow, Administrator, 21st Sept., 1891.
Sir W. C. F. Robinson, G.C.M.G., Gov., 9th July, 1892.
Sir Alexander Campbell Onslow, Kt., Administrator, 18th Mar., 1895.
Sir Gerard Smith, K.C.M.G., Gov., 23rd Dec., 1895.
Sir Alexander Campbell Onslow, Kt., Administrator, 23rd Mar., 1900.
Edward Albert Stone, Administrator, 4th Mar., 1901.
The Hon. Sir Arthur Lawley, K.C.M.G., Gov., 1st May, 1901.
Sir Edward Albert Stone, Kt., Administrator, 14th Aug., 1902.
Admiral Sir Fredk. G. D. Bedford, G.C.B., 24th March, 1903.
Sir Gerald Strickland, Count della Catena, K.C.M.G., 31st May, 1909.
Major-General Sir H. Barron, K.C.M.G., C.V.O., 17th March, 1913.
Rt. Hon. Sir William Grey Ellison-Macartney, P.C., K.C.M.G., 9th April, 1917.
Sir Francis Alexander Newdegate, K.C.M.G., 9th April, 1920.
Sir Robert Furse McMillan, Kt., Lieutenant-Governor, 7th June, 1921.
Sir Francis Alexander Newdegate, K.C.M.G., 14th December, 1922.
Sir Robert Furse McMillan, Kt., Lieutenant-Governor, 17th June, 1924.
Col. Sir William R. Campion, K.C.M.G., D.S.O., 12th July, 1924.
Hon. J. A. Northmore, Administrator, 9th June, 1931.

† For Governors previous to 1890, see Colonial Office List for 1898.

Hon. Sir John A. Northmore, K.C.M.G., Lieutenant-Governor, 30th June, 1932.
Hon. Sir James Mitchell, K.C.M.G., Lieutenant Governor, July, 1933.

Registrar General and Government Statistician.

Registrar General, Government Statistician, Registrar of Friendly Societies, and Government Actuary, Samuel Bennett, 1,180*l.*
Deputy Government Statistician and Deputy Registrar General, W. L. Wilson, 534*l.*

Prisons Department.

Comptroller-General of Prisons (also Under-Secretary), F. J. Huelin.
Superintendent, Fremantle Prison, D. R. Jones, 582*l.* and quarters.
Surgeon, Fremantle Prison, Dr. A. R. Bean.

Harbour and Light Department.

Manager and Secretary Navigation Act, V. W Ward, 630*l.*
Engineer Surveyor, W. Davison, 534*l.*
Harbour Master Albany, P. T. Robertson, 607*l.* and quarters.
Harbour Master, Bunbury, J. Donaldson, 606*l.* and quarters.
Harbour Master, Geraldton, A. A. Crane, 558*l.* and quarters.
Harbour Master, Wyndham, H. Griffiths, 558*l.* and quarters.

Mental Hospitals Department.

Inspector-General of the Insane and of Institutions for Inebriates, and Medical Superintendent, Jas. Bentley, 1,290*l.*, including quarters, etc.
Deputy Medical Superintendent, E. J. T. Thompson, 824*l.*, including quarters, etc.
Assistant Medical Officer, A. Walters, 666*l.*, including quarters, etc.
Resident Medical Officer, "Heathcote" Mental Reception Home, Dr. A. O. Barkley, 666*l.*, including board and residence.
Managing Secretary, D. G. Stewart, 558*l.*, including residence.

Wyndham Meatworks.

General Manager, J. J. Farrell, 1,400*l.*
Asst. Manager, H. J. Harler, 800*l*

State Shipping Service.

Manager (Acting), H. W. Ward, 780*l.*
Accountant and Asst. to Manager (Acting), T. E. Owen, 450*l.*

State Saw Mills and State Brickworks.

General Manager, E. B. Sinclair, 1,150*l.*
Asst. General Manager, S. D. Gomme, 800*l.*
Accountant, S. P. Hall, 607*l.*

State Hotels.

General Manager, J. R. Campbell, 780*l.*
Clerk in charge, T. J. Parkinson, 462*l.*

Department of Native Affairs.

Commissioner of Native Affairs and Asst. Under-Secretary, A. O. Neville, J.P., 699*l.*
Deputy Commissioner of Native Affairs, F. I. Bray, 438*l.*
Manager, Moola Bulla Native Station, A. T. Woodland, J.P., 498*l.*, quarters and board.
Manager, Munja Native Station, H. Reid, 482*l.* plus board and quarters.
Superintendent and Matron respectively, Moore River Native Settlement, A. J. and Mrs. Neal, 390*l.*, plus board and quarters.
Clerk-in-charge and Inspector, C. F. Taylor, 330*l.*

Bunbury Harbour Board.

Chairman, F. W. Roberts.
Secretary, C. Donaldson.

Fremantle Harbour Trust.

Chairman, Tom Carter.
Secretary and Accountant, R. J. Cox.

Fire Brigade Board.

President, J. R. Campbell.
Secretary, J. Price.

State Implement Works

Manager and Mechanical Engineer, F. E. Shaw.
Works Manager, P. Butterworth.

Public Health Department.

Commissioner of Public Health, and Principal Medical Officer, R. C. E. Atkinson, 1,300*l.*
Bacteriologist and Pathologist, Dr. W. S. McGillivray, 880*l.*
Under-Secretary Public Health Department, F. J. Huelin, 1,000*l.*
Wooroloo Sanatorium Medical Officer, R. M. Mitchell, 1,200*l.*, including quarters, etc.
Medical Officers of Schools, E. M. Stang, 660*l.*; Ruth Anderson, 630*l.*
Dental Officers of Schools, A. G. McKenna, 606*l.*; E. J. Turnbull, 534*l.*, and Miss E. M. R. Ross, 486*l.*
Chief Health Inspector, W. H. Berry, 486*l.*
District Medical Officers and Quarantine Officers.

Police Department, W.A.

Commissioner, D. Hunter, 1,000*l.* and allowances.
Chief Inspector, G. V. Purdue, 600*l.* and allowances.
Inspector and Secretary, C. Treadgold, 530*l.* and allowances.
Traffic Branch Inspector, S. Campbell, 480*l.* and allowances.
Criminal Investigation Branch, Inspector J. Doyle, 530*l.* and allowances.
Liquor Inspection and Weights & Measures Branch Inspector, T. Tetterington, 500*l.* and allowances.
Inspectors, V. Houston, W. Carroll and S. J. Thompson, 530*l.* and allowances; H. B. Clements, A. G. S. Timms, M. Leen, 500*l.* and allowances; S. H. Read, F. H. Pike, G. Drysdall and J. Nicholson, 480*l.* and allowances.

The above rates are subject to basic wage fluctuations.

Chief Ordnance Officer, J. H. Beavis.
Chief Clerk (vacant).

THE NORTHERN TERRITORY.

Area and Population.

The first attempt at settlement in North Australia was made in 1824.

Upon the extension of New South Wales westward to the 129th meridian in 1827, the portion of North Australia subsequently known as the Northern Territory was included within that colony, and in 1863 was annexed by Royal Letters Patent to the province of South Australia. With the adjacent islands, it was transferred to the Commonwealth on 1st January, 1911.

The total area of this Territory is 523,620 square miles, or 335,116,800 acres. Its length from north to south is about 900 miles, while its breadth from east to west is 560 miles. Its eastern boundary, dividing it from Queensland, is the 138th meridian of east longitude; and its western boundary, separating it from Western Australia, the 129th meridian. Its southern boundary is the 26th parallel of south latitude, dividing it from South Australia. The northern boundary is the coast line of those parts of the Indian Ocean known as the Timor and Arafura Seas at about the 11th parallel of south latitude. The length of coast line is about 1,040 miles. The Territory includes a number of islands most of them being small and of little importance. The best known are Melville Island, Bathurst Island and Groote Island.

In 1881 there were 670 Europeans in the Territory, and at the Census of 30th June, 1933, there were 3,306. The Chinese population, at its maximum during the years of railway construction, 1887 and 1888, has gradually dwindled, the number recorded at the Census of 1923 being only 462. Japanese, first recorded in 1884, increased up to the year 1898, falling again after five years, the number at the Census of 1923 being 91. The highest recorded population, excluding aborigines, was 7,533 in 1888. The estimated population on 30th June, 1936, was, exclusive of full-blood aboriginals, 5,675.

The interior of the Territory is the most thickly populated by the natives, but it is believed that they are dying out. In the regions remote from contact with other races the native has maintained his primitive simplicity, and furnishes an interesting subject of study to the anthropologist and the ethnologist. At the census of 1933, full-blood aboriginals in the employ of whites, and those who were living in a civilised or a semi-civilised condition in the vicinity of European settlements, were enumerated—the males being 3,127, females 2,720; total 5,847. The number of full-blood natives in the Northern Territory is estimated at 18,643.

Historical.

Exploration and Colonisation.

(i.) *Coastal Surveys.* The coast was surveyed by King in 1818, and by Wickham and Stokes in 1838 and 1839. Port Darwin, the site of Darwin, the present capital, was discovered in the latter year.

(ii.) *Exploration of Interior.* Leichhardt traversed a great deal of the country in 1844-5, journeying from Queensland to Port Essington. Gregory started from Point Pearce in 1855, and reached Brisbane. Minor explorations were also successfully undertaken.

(iii.) *Crossing the Continent.* In 1861, Sturt began his transcontinental journey from Adelaide, and reached the north coast in July, 1862. His track has become the main route, and along it the telegraph line is constructed.

(iv.) *Demarcation of Boundaries.* Upon the extension westwards of New South Wales, in 1827, the Territory was included in that colony, and remained so until 1863, when it was added to South Australia, which in 1836 had been created a separate province.

(v.) *The Military Settlement.* A military post was formed on Melville Island in 1824. This was transferred in 1827 to Raffles Bay, and a few years later to Port Essington. Little public attention was given to the station, and no attempt at colonisation was made. It was abandoned in 1849.

Control by South Australia.

(i.) *Transfer.* As a result of representations to the Imperial Government by South Australia, the Territory was incorporated with that State in 1863, and administered through a Government Resident located at Port Darwin up to 31st December, 1910. Early attempts at settlement failed. Ultimately, Port Darwin was chosen for the site of the capital, and Palmerston (now officially named Darwin) founded.

(ii.) *Land Legislation.* The South Australian Government's land legislation was framed to attract settlers, viz., low rents with easy entry and unencumbered holding over long periods; or grant of fee simple at low price. Special arrangements were made to foster tropical agriculture, including the establishment of botanic gardens at Port Darwin, for observation and experiment. Large "runs" were established on the northern well grassed and watered pastures.

(iii.) *Mining.* The survey and construction of the overland telegraph revealed the auriferous nature of the country, and gold and other minerals were discovered in various localities. The Government regulated the area of claims and the conditions upon which they were held.

(iv.) *Cessation of Supervision by South Australia.* Progress was not as marked as was desired, the Territory being thought capable of more rapid development. Accordingly the Federal and State Governments agreed upon a surrender by the latter as from 1st January, 1911, since which date the Territory has been a dependency of the Commonwealth.

Digitized by Google

Transfer to Commonwealth.

(i.) *The Agreement.* An agreement of transfer, afterwards ratified by the representative Parliaments, was made between the two Governments. In accordance with a proclamation issued in the terms of the Commonwealth Acceptance Act (No. 20 of 1910), the transfer was effected on 1st January, 1911.

(ii.) *The Northern Territory Acceptance Act.* By the Commonwealth Act, the agreement was ratified and approved, and the Territory was accepted together with the Palmerston and Pine Creek Railway; laws and courts of justice remained in operation, powers and functions of magistrates and officials remained vested; estates and interests continued upon the same terms; trade with Australian States was declared free. The Commonwealth assumed responsibility for the State loans in respect of the Territory, paying the interest yearly to the State, providing a sinking fund to pay off the loans at maturity, and paying off the deficit in respect of the Territory. It also purchased the Port Augusta to Oodnadatta railway, and agreed to complete the construction of the trans-continental railway from Port Darwin to Port Augusta.

(iii.) *The South Australian Surrender Act.*—The State Act approved and ratified the agreement surrendering the Territory.

(iv.) *The Northern Territory (Administration) Act, 1910.*—The Act provided for Government authorising the appointment of an administrator and officials. South Australian laws applicable to the Territory at the date of the transfer were declared to continue in force as laws of the Territory and certain Commonwealth Acts to apply. Power was given to the Governor-General to make Ordinances having the force of law.

(v.) *Administration.*—A Resident Administrator, vested with authority in internal affairs, was appointed by the Minister for External Affairs in February, 1912.

Division into North Australia and Central Australia.

The *Northern Australia Act*, 1926, provided for the division of the Northern Territory for administrative purposes into North Australia and Central Australia, separated by the twentieth parallel of South latitude. This division took effect on the 1st March, 1927.

Reversion to Northern Territory.

The *Northern Australia Act*, 1926, was repealed by the Northern Territory (Administration) Act, 1931. As from the 12th June, 1931, the division of the Northern Territory into the separate Territories of North Australia and Central Australia was repealed.

The Hon. C. L. A. Abbott, who is the Administrator of the Northern Territory, has his headquarters at Darwin. The Government Secretary, Mr. L. H. A. Giles, also has his headquarters at Darwin, and a District Officer, Mr. V. G. Carrington, is stationed at Alice Springs in the Southern portion of the Territory.

Subject to any Ordinance made by the Governor-General under the Northern Territory (Administration) Act, 1910, the South Australian laws in force at the date of acceptance continue in force in the Northern Territory.

A Supreme Court with original and appellate jurisdiction has been established. A Sheriff, a Registrar-General, and a Health Officer are provided for, also the registration of births, marriages and deaths, and of deeds and documents. Custody and control of aborigines with extensive powers of supervision are vested in the Chief Protector. Provision is made for the control of fisheries and pearl fishing. Crown lands are classified, and their mode of acquisition, entry and holding defined. By the Crown Lands Ordinance 1931–1938, the Administrator is charged with the general administration of Crown Lands in the Territory. The prevention and eradication of diseases in plants have been provided for. Under the Stock Diseases Ordinance the Chief Inspector of Stock has wide powers in regard to the movement of stock, control and prevention of diseases, etc. In 1915, a town council was constituted for Darwin and provision made for assessment, rates, etc. The Council was abolished and the Civic Administration of the town transferred to the Northern Territory Administration in April, 1937.

Mining is encouraged by the provision of rewards for the invention of new processes, and the discovery of valuable deposits and of new mineral fields; subsidization of the industry and the issue of prospecting licences are also provided for. Provision has been made for the issue of licences to search for mineral oil, and leases of land for the working of the industry. A Board is constituted for the purpose of making advances to settlers, who intend to improve and stock their holdings, to purchase farm implements, plant, etc., or to pay off mortgages, the rate of interest and terms of repayment being set out. Provision has also been made for the compensation of injured workers, for controlling the sales, etc., of necessary commodities, for the appointment of a Public Trustee, and for the imposition, assessment and collection of a tax upon incomes.

Parliamentary Representation.

By an Act of Parliament passed in 1922, the Northern Territory elects a member of the House of Representatives. The member for the Northern Territory is entitled to vote only on the disallowance of Ordinances relating to the Northern Territory. He may, however, take part in any debate in the House.

Physiography.

Tropical Nature of the Country.—The territory is within the torrid zone, with the exception of a strip 2½ degrees wide, which lies south of the Tropic of Capricorn.

Contour and Physical Characteristics.—The low flat coast line seldom reaches a height of 100 feet. Sandy beaches and mud flats, thickly fringed with mangroves, prevail. Sandstone, marl, and ironstone form the occasional cliffy headlands. The sea frontage of more than 1,000 miles is indented by bays and inlets, and intersected by numerous rivers, many of which are navigable for considerable distances from their estuaries.

Inland, the country is generally destitute of conspicuous landmarks. From the coast there is a general rise southwards to the vicinity of the 17th or 18th parallel of south latitude, where the higher lands form the watershed between the rivers that flow northwards to the sea, and those that form the scanty supply of the interior systems. Towards the centre of the continent the land over a wide area is of considerable elevation, and there are several mountain ranges, generally with an east and west trend.

Climate.

On the northern coast, as in the tropics generally, there are two main climatic divisions—the wet season, November to April, and the dry season, May to October. The changes of season are uniform and regular. Immediately after the

Digitized by Google

vernal equinox, the wet season is heralded by the cessation of the east-south-easterly monsoon, which gives place to calm and light variable winds. Intensely hot weather prevails for a few days, thunder-clouds gathering and increasing daily until they burst in heavy thunderstorms accompanied by hurricanes, and increasing in strength and frequency until the end of November, when they become of almost daily occurrence, about an inch of rain falling during each storm. During December the north-west monsoon sets in gradually, with rain nearly every day, and increasing in force until about the end of January. At this period of the year the wet season penetrates into the heart of the continent. This monsoon dies away at the autumnal equinox, and is succeeded by light and variable winds till the end of April, when the dry season commences with the setting in of the south-east monsoon. Nearly the whole of the rainfall occurs in the summer months.

Fauna and Flora.

Native Animals.—The ordinary types of Australian fauna inhabit the territory. As elsewhere on the continent, the higher *Theria* are rare. There are many genera of marsupials, and individuals are numerous. The birds also are typically Australian, with brilliant plumage, and not generally gifted with song. Crocodiles and fresh-water tortoises frequent the northern rivers. There are some species of snakes, mostly non-venomous, the most numerous being the harmless python. Frogs abound, the water-holding frog being common in Central Australia. The rivers contain many varieties of freshwater fish. The molluscan fauna of the coast is mostly carnivorous, the vegetable feeders being very poorly represented, probably on account of the dearth of seaweed. Land and freshwater shellfish are not abundant. Among insects, many beautiful butterflies thrive in the warm damp atmosphere. Beetles also are strongly represented. The white ant is a pest, very few timbers being immune from its ravages. Anthills in the Territory sometimes attain a height of twenty-five feet and a diameter of ten feet. Another destructive insect, particularly active and mischievous inland, is the borer. Mosquitoes and sandflies are very troublesome, particularly from January to April. There are not many crustaceans.

Imported Stock.—Buffalo thrive in the coastal districts, but their numbers have been greatly reduced through indiscriminate shooting for the sake of the hides. Timor ponies have also been introduced. Sheep-breeding has so far not been a success, but cattle thrive well.

Protection of Fauna.—Ruthless destruction of native birds is prohibited. An Ordinance gives the Administrator power to declare that any bird is protected; and provides that permits to export protected birds, or the skins or eggs of such birds, will only be issued subject to such conditions as the Administrator directs.

Flora.—The vegetation is tropical, many of the forms belonging to the Malayan and Oceanic regions. The timber trees are not of great commercial value, but in the coastal regions tropical vegetation grows luxuriantly to the water's edge. The indented arms of the coast are thickly fringed with the mangrove. On the ranges, pines, fig trees, and orange trees flourish. The Roper River drains extensive forest lands. Leichhardt pines and palms form the vegetation of the tableland, which stretches across the Territory about the 14th degree of south latitude. On the higher steppes there are a few varieties of eucalyptus, and many fibre plants are also indigenous. On the wide expanses of plain country of the interior there is little vegetation, tree growth being very scanty, consisting chiefly of stunted eucalypts, such as the gimlet gum, black box, and desert sheoak. In the north-western districts there is an almost entire absence of lichens and mosses, though ferns are plentiful in the vicinity of the Victoria River. The following orders are well represented:—*Euphorbiaceæ*, *Compositæ*, *Convolvulaceæ*, *Rubiaceæ*, *Goodenoviaceæ*, *Leguminosæ*, *Urticeæ*.

Production.

Agriculture.—Up to the present agriculture has not made much progress in the Territory, although it has been proved that various industrial plants thrive. Peanuts, rice, tobacco, coconuts, mangoes, cotton, and various fodder plants can be grown. Expense of harvesting at present appears to be against the economic production of rice. Trial plantations of tobacco and cotton have given promising results. Good crops of peanuts are being obtained. Much of the coastal area is suitable for coconuts, but except at the Mission Stations and one or two small isolated plantations, little attention has been devoted to planting.

Pastoral.—The spacious, well-grassed "runs" of the Northern Territory are suitable for horse and cattle breeding. It is anticipated that the cattle trade with the East will develop. Large numbers are overlanded to neighbouring States, which also take considerable quantities of horse and cattle hides. The estimated number of stock on 31st December, 1936, was:—

Cattle, 855,398; horses, 31,056; goats, 17,306; sheep, 11,162; pigs, 490; donkeys, 1,503; mules, 530; camels, 310.

Dairying as an industry is non-existent. The abundant indigenous herbage is, however, well suited for stock, and the making of hay and ensilage would ensure the development of the industry.

Mining—Gold, tin, wolfram, copper, tantalite, silver-lead and mica are mined. Both alluvial and reef gold are found, and there are several batteries and cyanide plants. The total mineral production in 1936–37 was valued at 127,849*l.*, which included tin concentrates valued at 7,696*l.*, gold valued at 92,474*l.*, mica valued at 11,003*l.*, wolfram and wolfram concentrates 16,349*l.*, copper ore to the value of 101*l.*, and tantalite valued at 226*l.*

Pearl Shell and other Fisheries.

In 1884 mother-of-pearl shell was discovered in the harbour of Port Darwin. Difficulty in working, principally through heavy tides and muddy water, retarded the development of the industry for many years. Subsequently, however, the opening up of new patches led to a revival, but the war gave the industry a setback. During the year 1936–37 there were 34 boats working from Darwin.

The territorial waters abound in marketable fish, and despite inadequate transport facilities a commencement has been made with a trade in fish, dried or otherwise preserved.

The value of sea products exported from Darwin overseas during 1936-37 was as follows:—

Pearl Shell	£19,849
Fish, dried & salted	285
Bêche-de-mer ..	679

NOTE.—These figures do not include shipments to Australian States.

Digitized by Google

Commerce and Shipping.

No record is kept of the direction of trade between the Commonwealth States and Territories. It is, therefore, impossible to give the total imports and exports of the Northern Territory. The figures for imports from and exports to outside Australia for 1926-27, and following years are given below.

Period.	Annual Imports.	Annual Exports.	Period.	Annual Imports.	Annual Exports.
	£	£		£	£
1927-28	30,387	29,265	1933-34	28,335	6,309
1928-29	32,069	53,720	1934-35	39,870	27,500
1929-30	38,883	58,471	1935-36	13,758	42,530
1931-32	9,884	20,624	1936-37	58,120	26,645
1932-33	4,125	10,427	1937-38	44,703	6,053

Shipping, Darwin Harbour, 1936-37.

48 overseas and coastal vessels berthed, 45,619 tons of cargo including 35,000 tons of crude oil were discharged; 3,429 tons of cargo including 666 tons of crude oil and 126 tons of coal were shipped.

Internal Communication.

Railways.—Under the Northern Territory Acceptance Act, No. 20 of 1910, the Commonwealth is to extend the railway running from Port Darwin southward, to a point on the northern boundary of South Australia.

The Commonwealth, also, is to construct or cause to be constructed as part of the Transcontinental Railway, a railway from Oodnadatta to connect with the Northern part of the Transcontinental Railway.

The Railway from Port Augusta to Oodnadatta has been constructed for many years, but recently in accordance with the Railways (South Australia) Agreement Act, No. 2 of 1926, it was extended to Alice Springs.

Alice Springs is situated 293 miles from Oodnadatta and 981 miles from Adelaide. The railway from Port Augusta to Alice Springs, a distance of 771 miles, is owned and operated by the Commonwealth, being vested in the Commonwealth Railways Commissioner under the provisions of the Commonwealth Railways Act, 1917-25.

The railway from Darwin southward is now open for public traffic as far as Birdum, a distance of 316 miles. The Northern Territory Railway Extension Act, No. 11 of 1923, provides for the construction of the railway as far as Daly Waters, an additional 44 miles beyond Birdum, but it is not proposed to continue this extension for the present. The distance between Birdum and Alice Springs is 638 miles.

Posts.—Postal communication is maintained by vessels belonging to Burns, Philp & Co., which maintain a monthly service between the Territory and the Eastern States. In addition the vessels belonging to the State Steamship Service of Western Australia give a service once every 60 days between Fremantle and Darwin. Inland the northern part of the territory receives its mail *via* Darwin or by means of the aerial services, while the southern districts are served *via* Adelaide and Alice Springs. A shipping service from Burketown, Queensland, to the McArthur and Roper Rivers in the Northern Territory is in operation, while a further shipping service is conducted between Darwin and the Victoria and Daly Rivers. The Empire Air Mail Service between Great Britain and Australia passes through Darwin and provides mail service twice each week between Darwin and the Southern capitals. A weekly air mail service also operates between Adelaide and Darwin.

Telegraphs.—The transcontinental telegraph line, covering a length of 2,230 miles, was completed on 2nd August, 1872, at a cost of nearly half-a-million sterling. The line runs in a northerly direction from Adelaide to Darwin, whence telegraphic communication is provided with Asia and Europe, *via* Banjoewangie (Java), Singapore and Madras.

Between Darwin and Banjoewangie the submarine cable is duplicated. High-power wireless stations have been constructed by the Federal Government at Wave Hill, in the Territory, and at Camooweal, just over the Eastern boundary, in Queensland. A number of pedal wireless transmitting and receiving sets have been installed at the Police Stations in the outlying districts of the Territory. These are available for the transmission of messages for the general public.

Land Tenure.

The Crown Lands Ordinance, 1931-1938, repealing all previous Acts and Ordinances, may be summarized as follows:—

(i.) *Pastoral Leases.* A pastoral lease may be granted for such term, not exceeding 42 years, as the Administrator determines. The rental for the first period is fixed by the Administrator and is subject to re-appraisement on such dates as are specified in the lease or are prescribed. A lessee must within five years stock the land to the extent provided in the lease, and keep the land so stocked during the continuance of his lease.

(ii.) *Agricultural Leases.* Agricultural lands are classified, and the maximum area which may be included in any one lease is as follows:—Division A, Cultivation Farms, Class I, 1,280 acres, Class 2, 2,560 acres; Division B, Mixed Farming and Grazing, Class I, 12,800 acres, Class 2, 38,400 acres. Agricultural leases are granted in perpetuity, and the rent for the first period is fixed by the Administrator, and is re-appraised every 21 years. The lessee must—(*a*) in the case of lands for mixed farming and grazing, stock the land to the extent prescribed by the regulations and keep it so stocked; (*b*) establish a home within two years and reside on the leased land for six months in each year in the case of land for cultivation, and for four months in each year in the case of land for mixed farming and grazing; (*c*) cultivate the land to the extent notified by the Administrator; and (*d*) fence the land as prescribed.

(iii.) *Leases of Town Lands.* Leases of town lands are granted in perpetuity, the rental being fixed every fourteen years. Such leases must, in the first instance, be offered for sale by public auction, and if not so sold, may be allotted by the Administrator to any applicant, at the rental fixed by the Administrator. The lessee must erect, within such time as is notified, buildings to the value specified in the conditions of sale.

(iv.) *Miscellaneous Leases* The Administrator may grant a lease of any portion of Crown lands, or of any dedicated or reserved lands, for any

Digitized by Google

other prescribed or approved purpose. Such leases are for a term not exceeding 21 years, and may be offered for sale by public auction, or granted to any applicant at an annual rental fixed by the Administrator.

(v.) *Grazing Licences.* Licences may be granted to any person to graze stock on any vacant Crown lands or on any reserved or dedicated lands for such period, not exceeding one year, as is prescribed, and at the rent and on the conditions prescribed.

(vi.) *Occupation Licences.* Licences may be granted for any period not exceeding five years, and on prescribed rentals and conditions, for the purpose of drying or curing fish, or for any manufacturing or industrial purpose, or for any prescribed purpose.

(vii.) *Miscellaneous Licences.* The Administrator may grant licences for miscellaneous purposes for a period not exceeding twelve months on prescribed terms and conditions.

(viii.) *Leases to Aboriginals.* The Governor-General may grant to any aboriginal native, or to the descendant of any aboriginal native, a lease of Crown lands not exceeding 160 acres for any term of years upon such terms and conditions as he thinks fit.

Freehold.

Under the Crown Lands Ordinance, 1931-1938, provision is made for the granting of freehold in respect of:—(*a*) Town lands; (*b*) agricultural lands; (*c*) garden lands; and (*d*) tropical lands.

The following is a summary of the freehold provisions of the Ordinance.

Town Lands. The holder of any existing Town Lease or of a Town Lease that may hereafter be granted, may, at any time, apply for a grant in fee simple of the lands included in the lease, and the grant may be made, provided that, in addition to complying with the conditions of the lease, the lessee has—securely fenced the land; erected on the land a residence of the value of at least 50*l*., within the first twelve months of the lease; resided on the land continuously for twelve months immediately prior to the application; and paid the purchase money and all moneys due in respect of the land. The purchase price fixed by the Administrator with the approval of the Minister shall not in any case be less than 5*l*. per block.

Agricultural Lands. Agricultural Lands consist of any lands within an area declared to be an agricultural area for the purposes of the Ordinance. The holder of any existing Agricultural Lease or of any Agricultural Lease that may hereafter be granted, may at any time apply for a grant in fee simple of the lands, or portion of the lands, included in the lease. A grant of the fee simple may be made, provided that the applicant, in addition to complying with the conditions of the lease, has—securely fenced the land over which the fee simple is required; cultivated not less than one-tenth of that land; stocked and kept stocked the land as directed by the Administrator; erected a residence and buildings on the land of the value of at least 50*l*.; and paid the purchase money and all moneys due in respect of the land. The purchase price fixed by the Administrator with the approval of the Minister shall in no case be less than 2*s*. 6*d*. per acre. The maximum area of agricultural lands which may be granted in fee simple to any one person is 1,280 acres of Class 1 lands, or 2,560 acres of Class 2 lands. Where the lands included in an agricultural lease, or leases, include both Class 1 and Class 2 lands, the maximum area that may be granted in fee simple shall be the maximum area that could be so granted if the lands were all of the same class. For this purpose one acre of Class 1 lands shall be deemed to be equivalent to two acres of Class 2 lands.

Garden Lands. Garden lands consist of Crown Lands or dedicated or reserved lands within ten miles of a town, which have been declared by the Administrator to be Garden Lands. Leases of Garden Lands may be granted for vineyards, orchards or gardens, but for no other purpose. The maximum area of a lease of garden lands may not exceed ten (10) acres. The holder of a lease of garden lands may at any time apply for a grant in fee simple of the land or any portion of it. A grant of the fee simple may be made, provided the lessee has—complied with the conditions of the lease; fenced the land; cultivated and kept under cultivation at least one-third of the area for a period of not less than two years prior to the issue of the grant; erected on the land a residence and buildings of the value of at least 50*l*., and is permanently residing on the land; and has paid the purchase price, which shall be not less than 10*s*. per acre.

Tropical Lands. Tropical Lands consist of areas north of the 16th parallel of South latitude which have been declared by the Administrator to be tropical lands, for the purposes of the production of cotton or tropical products. Any *Company* incorporated or registered in the Northern Territory may, upon entering into an agreement in the prescribed form, hold an area of tropical lands, not exceeding, in the aggregate, 20,000 acres, for a term of 14 years. Every such agreement shall be laid before both Houses of Parliament, and no transfer of any agreement shall be permitted by the Minister except to a Company, but not to a Company which would thereby hold more than 20,000 acres of tropical lands. If the Company fails to comply with any of the terms, conditions, or provisions of the agreement, the Minister may resume the whole or any portion of the lands, and, on such resumption, all improvements (except tenant's fixtures), upon the land resumed will become the property of the Crown. The agreement will provide that the Company shall use the land for the growth of cotton or other tropical products, and that it shall plant, during the first three years of the term, one twenty-fifth of the land, and keep cultivated the said one twenty-fifth of the land so planted, and, during the last four years of the term it shall cultivate and keep cultivated at least one-fifth of the land. The Company will also be required, after the first seven years of occupation, to pay an annual rental of 1½*d*. per acre per year or portion of a year thereafter until the completion of the purchase or other determination of the agreement. The Company will be entitled to a grant of the land in fee simple at any time during the term of the agreement, on payment of 2*s*. 6*d*. per acre, and provided that it proves to the satisfaction of the Minister:—That it has spent 10*s*. per acre in the aggregate in cultivation and for necessary plant and machinery; that it has produced from the land two hundred pounds weight of cotton, or tropical products of an equal amount in value, for every acre held under the agreement; and that it has cultivated one-third of the land.

Miscellaneous. Miscellaneous provisions of the Ordinance provide, *inter alia*, that:—

Digitized by Google

(*a*) A husband and wife shall not hold jointly in fee simple a greater area of land than the maximum area which may be granted to any one person under the Ordinance; (*b*) no person shall be entitled to hold in fee simple, for his own use and benefit, whether by grant from the Crown or by transfer from any person, a greater area of any lands than the maximum area which may be granted to him in the name of the Crown in pursuance of the Ordinance; (*c*) no alien shall be entitled to acquire any land in fee simple; (*d*) no application from an alien for the fee simple of any land shall, therefore, be accepted unless it is accompanied by the statutory declaration of the alien that he has resided in the Northern Territory continuously during the period of 12 months immediately preceding the application and intends to apply within five years after the date of the application for a certificate of naturalisation; (*e*) the grant of any land in fee simple shall be subject to the following reservation:—A reservation to the Crown of all minerals and mineral substances in or upon the land, including gold, silver, copper, tin, metals, ores and substances containing metals, gems, precious stones, coal, shale, mineral oils, and valuable earths and substances, together with the right to authorise any persons to enter upon the land to mine, work for, win, recover and remove them or any of them, and to do all things necessary or convenient for those purposes.

Area held under Leases, Licences and Permits.

Particulars, 30/6/1937.	Square Miles.
Pastoral Leases and Grazing Licences	214,644
Other Leases and Licences ..	517
Total	215,161

On the 30th June, 1937, the areas held under leases and licences were:—Pastoral leases, 178,466 square miles; pastoral permits, 696 square miles; agricultural leases, 120 square miles; grazing licences, 35,482 square miles; miscellaneous leases (including water leases), 398 square miles; mining leases and protected mining leases, 18,879 acres.

There were also 67,253 square miles under reserve for aboriginal natives of Australia, and 1,609 square miles under Mission Station leases.

PAPUA.

Situation and Area.

Papua (formerly called British New Guinea) is composed of a portion of the island of New Guinea, and of a number of islands, most of which lie to the south-east of New Guinea. The boundaries of the Territory are as follows:—"The S. and S.E. shores of New Guinea, from 141° E. long. eastward as far as East Cape, thence N.W. to 8° S. lat. in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8° S. parallel to 147° E. long., then in a straight line N.W. to the intersection of 6° S. lat. and 144° E. long., and continuing W.N.W. to the intersection of 5° S. lat. and 141° E. long., thence proceeding Southward along the 141st meridian of E. long. to its intersection with the right bank of the Fly River, thence by the right bank of the Fly River bearing Southerly to its intersection with the meridian 141° 1′ 47·9″ of East longitude, thence by the said meridian bearing South to a point on the Southern coast of the Island of New Guinea at the middle of the mouth of the Bensbach River, together with the Trobriand, Woodlark, D'Entrecasteaux and Louisiade groups of islands, and all other islands lying between 8° and 12° S. lat. and between 141° and 155° E. long., and not forming part of Queensland; and including all islands and reefs lying in the Gulf of Papua to the north of 8° S. lat."

New Guinea, the largest island in the world if Australia is excluded, lies some 80 miles to the north of Queensland, between 0° 0′ and 12° 0′ S. lat., and between 130° 50′ and 154° 30′ E. long. Its greatest length is 1,490 miles, and its maximum breadth 430 miles; its area being about 234,768 square miles. The islands which lie near Papua, and which form part of that Territory, number, great and small, about two hundred. Of these the principal ones are: Kiriwina (in the Trobriand group of D'Entrecasteaux), Woodlark, Normanby, Goodenough, Fergusson, St. Aignan, Rossel and Sudest.

History.

The island of New Guinea was discovered in 1511 by Antonio de Abrea, and it was touched at by several of the early navigators. The islands lying to the south-east of New Guinea were visited by Torres in 1606, and by French navigators towards the close of the eighteenth century. The waters that are adjacent to the islands, and to the south-eastern coasts of New Guinea, have at different periods been partly surveyed and mapped by British warships.

The whole island to the west of 141° E. long. is claimed by the Dutch as suzerains of the Sultan of Tidore. The Dutch have established a post on the south coast of New Guinea, known as Merauké, which is in charge of a Resident. It is a little to the West of the S.W. extreme of the Anglo-Dutch boundary. That portion of the island which lies to the eastward of 141° E. long. and to the north of British New Guinea belonged to the German Empire and is now administered by the Australian Government, under a mandate issued by the Council of the League of Nations. The Government of Queensland annexed that portion of the island not claimed by Holland to the British Empire on the 4th of April, 1883, but this proceeding was not ratified by the Imperial Government. The Intercolonial Convention held at Sydney in November and December, 1883, passed resolutions urging the annexation of Eastern New Guinea, and undertook to recommend their respective Legislatures to provide for defraying a part of the cost of a Protectorate if one were established by the Imperial Government. On the Australasian colonies agreeing to guarantee 15,000*l.* a year to meet the cost, a Protectorate was proclaimed by Commodore Erskine on the 6th November, 1884, over the south-east coast of New Guinea and the adjacent islands.

Digitized by Google

General Sir Peter Scratchley was appointed Special Commissioner for the Protectorate, and arrived in 1885, but he succumbed, in the Protectorate, to malarial fever in November of the same year. He was succeeded by the Hon. John Douglas, C.M.G., formerly Premier of Queensland. At the Colonial Conference held in 1887, the Colonies of Queensland, New South Wales and Victoria undertook to guarantee £15,000 a year for ten years, for defraying the cost of administering the territory now forming the Possession, on the understanding that Her Majesty's Sovereignty would be proclaimed over it. By the Queensland British New Guinea Act, 1887, that colony undertook to be responsible for the payment of the £15,000 a year. The territory was annexed to the Crown by the newly appointed Administrator, Dr. (afterwards Sir W.) Macgregor, on 4th September, 1888.

The Imperial Government contributed some £52,000 towards the founding of the Possession. The local revenue raised in the Possession was formerly paid over to Queensland, for distribution amongst the guaranteeing colonies, in reduction of their contribution of £15,000 a year, but is now kept and expended by the Government of the Possession.

At the end of 1901 the Government of the Commonwealth agreed to take over the Possession as a territory of the Commonwealth, and brought proposals before the Federal Parliament (which were adopted) for providing towards the expenses of administration a sum not exceeding £20,000 a year. The provision ran from 1st July, 1901, and was subject to revision at the end of five years. On the 1st Sept., 1906, a Proclamation was issued by the Governor-General of the Commonwealth of Australia, under the provisions of the Papua Act, 1905, declaring British New Guinea a Territory of the Commonwealth, under the name of "Papua." The above Act provides that there shall be paid out of the Consolidated Revenue Fund of the Commonwealth towards the revenues of the Territory in each financial year, such sum, if any, as the Parliament appropriates for that purpose. In 1937-38, £42,500 was paid by the Commonwealth Government as a grant to the Administration.

Description and Formation.

Papua extends from east to west upwards of 800 miles, and about 200 from north to south towards either end, but is only about 50 miles deep behind Freshwater Bay, near the middle of the portion of the Territory that is situated on the island of New Guinea. The total coast line of the Territory has been computed at 3,664 statute miles, 1,728 on the mainland and 1,936 on the islands. The total superficial area is about 90,540 square miles, of which about 87,786 are on the mainland of Papua, and 2,754 made up of many islands.

With the exception of the low coral islands of Kiriwina, Nada, part of Murua, and a few others of small dimensions, the islands are mountainous and principally of schistose formation, the highest, Goodenough, 8,000 feet. The eastern end of the Territory is also mountainous, and as the mountains extend westward they rise and coalesce to form a great central chain, which attains its greatest altitudes in the Owen Stanley range, the highest point of which is Mount Victoria, 13,200 feet, and in Mount Scratchley, the Wharton Range, and Mount Albert Edward, the latter about the same height as Mount Victoria. Further west the main range becomes more broken and lower, while pursuing nearly the same general trend towards the north-west as it had in the more eastern part of the colony. The western end of the Territory is for nearly 300 miles generally low and swampy until a long distance from the coast is reached. The mountains near the east end, on the mainland, are of igneous origin; the great masses of the central part of the main range are all schistose, while in the west sandstone predominates, but there are outcrops of igneous formation, such as Mount Yule, upwards of 10,000 feet high. On the Fly River, near the point of junction of Papua, Dutch New Guinea and the mandated Territory of New Guinea, there are limestones with fossil corals, and these are also met with at many other places in the low and swampy regions of the western end of the colony and elsewhere. The whole Territory is remarkably well watered. The great mountains, and by far the larger portion of the lower country, are all covered by forest.

Rivers.

The majority of the principal rivers open into the Gulf of Papua. They have a general direction towards a point near the middle of the Gulf. The two largest are the Fly and the Purari. The Fly spreads out its head branches over a large area in the centre of the island, comprising considerable portions of the three different territories. Its course is about 620 miles from the sea to the boundary of Papua. The influence of the tide is felt for six or seven score of miles up the Fly. It is navigable by a steam launch for over 500 miles.

The Purari River is the second in point of size, and seems to start from the southern side of the Bismarck range of Kaiser-Wilhelmsland. It is navigable by steam launch for 120 miles. The Vailala, the Tauri and the Lakekamu also rise in the Mandated Territory of New Guinea. The Angabunga River has its origin from the western spurs of Mount Albert Edward; the Vanapa from the Owen Stanley Range, the Wharton Chain and the southern slopes of Mount Albert Edward; the Brown from the Owen Stanley Range east of Mount Victoria. On the north-east coast the rivers are all small, except four that open into the sea between Cape Nelson and the boundary of the Mandated Territory of New Guinea. These are, proceeding northwards, the Musa, Kumusi, Mambare, and Gira. Each of them pursues a course from the central main range towards the north-east until it enters the sea. The Gira rises from the eastern spurs of Mount Albert Edward, and is smaller that the other three, all of which are nearly of the same size.

Climate and Natural Resources.

As Papua lies between five and eleven and a half degrees of south latitude, the climate of the lower part of the country is warm. It is outside the range of the hurricanes that pervade the southern part of the Western Pacific. At Port Moresby, the seat of Government, and situated near the middle of the Territory, the average temperature for the year 1937-38 at 9 a.m. was 80°9. The average maximum readings for the same period, 86°1; the average minimum readings, 75°7. The hot season is from November to May; the hottest months are January and February; the cold season is from June to October, the coldest month is August. During the hot season winds on the south coast are from the north and west, and are unsteady; during the cold season they are from the south-east, and are much more regular.

At Port Moresby the rainfall for the year 1937-38 was 34·53 inches. At Rigo during the same period the rainfall was 30·56 inches, and at Kikori 219·07

inches; these represent the minimum and maximum rainfalls near the coast. It is much greater, but undetermined, on the central mountain ranges. On the south coast the climate is rather comfortable than oppressive during the cold season. It is generally agreeable at an altitude of 2,000 feet, a height that can be reached on foot in one day from Port Moresby. At 5,000 to 6,000 feet it becomes distinctly cold at night, the thermometer sometimes reading 55° F.; at 10,000 feet ice is met with in the early morning. Above that the grass is often covered with hoar frost, and the cold is severe.

Malarial fever, as a rule quite mild, is not rare in the low parts of the country. About the time of the change of seasons inflammatory diseases of the chest have always frequently occurred amongst the natives, and more recently the country has suffered from influenza. The mortality from this latter complaint has been estimated to be about two per cent. of the population.

The obstinate scaly ringworm, so common in many parts of the Pacific, occurs frequently amongst the natives. Plague, smallpox and cholera have not been met with since the country has been occupied by Europeans. Yaws is prevalent amongst the natives, and is now being dealt with by means of salvarsan compounds. Dysentery, once very prevalent in epidemic form, seldom occurs now. Europeans suffer from cancer much as they do in non-tropical countries, but cases of cancer amongst the natives are exceedingly rare. As in other parts of the tropics, the natives, with the exception of the dry Port Moresby area, are frequent carriers of ankylostomiasis (hookworm). Syphilis is practically unknown amongst the natives, but gonorrhœa occurs in most districts. Granuloma inguinale occurs especially in the west, east and northern parts of the Territory.

The climate is favourable to the cultivation of all tropical products. The coconut palm bears well everywhere, and is common anywhere along the coast line, but in the far interior it is not met with. Cotton would be specially suited to the dry climate of the central district. Tobacco, in certain localities, of superior quality, and sugar cane seem to be indigenous or to be long domesticated; there are several native trees and plants that yield good classes of rubber. There are some good varieties of timber, including sandal wood, ebony, and cedar. Tea, cocoa, and coffee thrive well, but are not indigenous; the latter has been introduced and propagated. The climate is very congenial to rice and maize and all kinds of tropical fruit. The mineral deposits comprise gold, which exists over a large area; osmiridium, which has been found from the Gira River to the Owen Stanley Range; and in the Purari sandstone district there is coal. Indications of petroleum have been located at scattered intervals over an area of country covering about 1,500 square miles between Yule Island and the Purari Delta, in the Gulf Division of Papua. Quantities of oil and inflammable gas have been met with in the test bores put down, but not in sufficient bulk as yet for commercial purposes.

The marine resources comprise pearl-shell and pearls, trepang, sponges, trochus, snail and turtle shell.

Fauna and Flora.

There are no dangerous wild beasts in the Territory; wild swine are common. There are several varieties of wallaby, phalanger, and echidna. There are no hares or rabbits; deer are found in the vicinity of Port Moresby, they were introduced many years ago and are apparently doing well; the most dangerous creature is the crocodile. Many lives are lost each year through these amphibians and by snake-bite. The snakes are nearly related to those of Australia. The birds include the cassowary, many birds of paradise, a great variety of pigeons, the hornbill, the black and the white cockatoo, geese, many species of ducks, quails, and on the mountain tops snipe and woodcock.

The flora is as varied as the climate. On the tops of the highest mountain chains there are many species of grasses: several kinds of buttercup, forget-me-nots, daisies, rhododendrons, heaths, and other flowers of temperate climates. The forest there is principally cypress. From seven to ten thousand feet it is chiefly myrtaceous, often covered by trailing bamboo or mixed with pandanus. From two to five thousand feet the evergreen oaks are common. On the low lands there are several varieties of hardwood trees, afzelic bijuga, calophyllum, etc. Native cloth is made by beating out the bark of the paper mulberry, of the bread fruit tree, or of certain trees of the nettle family. Fibre is obtained from the banana, the coconut, from the bark of many saplings, and the best of all from the aerial roots of certain species of pandanus. Most of the trees and flowers that are met with in the tropical islands of the Pacific, or in North Queensland, occur also in Papua.

The People.

The races of Papua are now known to be very diverse as regards physical type and language. As regards culture there is less difference. When Europeans first arrived, the inhabitants used stone, wood and bone implements, but no metals. They cultivated the taro, yam, sweet potato, the banana, and on the coast, the coconut. Weaving and the use of the potter's wheel were unknown.

There are believed to be three constituent elements in the native population of Papua. The first is the Negritto, a short dark race. After the Negritto probably came a race called "Papuans," who are dark but taller than the Negrittoes. Subsequently the Melanesians settled along the coast, and are now so mixed with the Papuans that it is difficult to distinguish them. They were of medium height and light-skinned, and probably were the first seamen of the Pacific and travelled in out-rigger canoes.

The present day population of Papua consists of these three elements mixed together in varying proportions.

The European population of Papua at 30th June, 1938 was 1,488. A census of a portion of the indigenous population has been taken and the total number of natives actually counted is 230,962, chiefly residing on the coasts. In the past the total population had been estimated at 275,000 but the expedition of Messrs. Hides and O'Malley from the Strickland River to the Purari River in the first half of 1935 revealed a large population in that tract of country hitherto unknown. A base has been established within that area from which Government patrols are being carried out, and in due course a census of the population will be completed.

The country and people have no history, and but few current well-defined traditions. These refer to only local movements and actions of tribes within the last four or five generations.

A large part of the interior of Papua is still in the stone age, much of it is in a stage of transition in which the stone axe and the steel tomahawk are used side by side. The abori-

Digitized by Google

ginal methods of house-building, of canoe-making, of pottery manufacture, of cultivation, are still generally maintained. Nearly all the coast line and considerable part of the interior has been brought under missionary influence. The whole of the territory has practically been explored and most of it brought under Government control.

Five missionary societies are established in the Territory. They are the London Missionary Society, which has for its field the south coast of New Guinea; The Society of the Sacred Heart, which is established at Yule Island, and along the banks of the St. Joseph River (Angabunga) extending to the Main Range; the Methodist Missionary Society of Australasia, which extends its influence over all the archipelagos; the Church of England Mission, which has as its field the north-east coast of New Guinea, the last-named constituting the Diocese of New Guinea, organised under a Bishop of the Church of England; and the 7th day Adventist, whose sphere of influence is comprised in the Central Division and is bounded on the North by the Brown River, on the South by the Laloki River and on the East by a line bearing approximately north-east from the coastal village of Kaile to the Main Range. The two first-named societies were in New Guinea before annexation was proclaimed: the last two have come there since the proclamation of sovereignty. The native population take readily to civilisation in most great matters, while they often cling tenaciously to their own habits and customs in smaller and less important things.

Mode of Government.

Papua had formerly the constitution of a Crown colony, regulated by Royal letters patent of 8th June, 1888, under which the Government was carried on by an Administrator, with the advice and assistance of an executive and a legislative council. The correspondence of the Administrator of British New Guinea with the Secretary of State passed first through the Governor of Queensland, and afterwards through the Governor-General of Australia. By Letters Patent, of 18th March, 1902, provision was made for placing the Possession under the authority of the Commonwealth, and for the revocation of the Letters Patent governing the Constitution as soon as the Commonwealth Parliament had provided by law for the future government. Provision was made by the Papua Act, 1905, proclaimed on the 1st September, 1906, as above stated. There was no form of Government among the native population, the Polynesian system of chiefs being practically unknown; patriarchal authority did not extend beyond near family relatives, and even then was only loose. A certain measure of chiefly influence is being created now by a few men under Government authority, but control over the natives is being best acquired by the gradual creation of a force of village policemen. The Administration has at its disposal an armed constabulary, consisting of about 300 natives, enrolled from many different districts. Special laws have been passed for the protection of the native population, and for dealing with lands. A code consisting of a series of simple regulations, which are from time to time being added to, has also been passed for the benefit of the native population. The courts of the Territory consist of the Central, Petty Sessions, and Native Magistrates' Courts.

Magisterial Divisions.

The Territory is divided into eight magisterial divisions, in each of which there is a resident magistrate, who is also invested with the executive authority of dealing in the first instance with any administrative matter that may arise. Besides these there are assistant resident magistrates in certain more populous districts. The Central Court, which possesses the jurisdiction of an ordinary Supreme Court, sits wherever there is occasion. The principal seat of Government is at Port Moresby. This place is centrally situated. It is easy to approach the harbour, which is large, commodious, and sheltered from all winds. Port Moresby is not well watered, but it is very picturesque, and comparatively healthy. The immediate neighbourhood is not well suited for ordinary cultivation on account of the rather scanty rainfall. Port Moresby is a port of entry.

Samarai, the next place in importance, is an island of some sixty acres situated two miles from the south-east end of the mainland. There is no native village on that island. It is a port of entry, and the headquarters of the Resident Magistrate of the district. There is good anchorage there, but no convenient water supply. It is the port from which miners, pearl fishers, etc., generally obtain their supplies. Like Port Moresby, the neighbourhood of Samarai is very picturesque. Its rainfall is nearly three times as great as at the former place.

The third port of entry is the island of Daru, the headquarters of the Resident Magistrate for the Western Division. It has a good and safe harbour, with an approach that presents no difficulty. It is the only harbour Papua possesses in the west, and the island supplies the best building sites obtainable in that part of the country. It is visited by many boats engaged in the pearl-shell fishery of Torres Straits. Kwaiapan Bay, Woodlark Island, in the extreme east of the Territory is the fourth Port of Entry.

Industries.

There are no European manufactories in the Territory.

The chief industry worked by Europeans is agriculture, principally cocoanuts, para rubber and sisa hemp. Two plantations, one in the Central and the other in the Eastern Division, now produce desiccated coconut. Cotton is still in the experimental stage. Gold mining is carried on and petroleum of good quality has been obtained in the Gulf Division, but not as yet in commercial quantities. Gold to the value of 45,933*l.* in 1933–34, 68,922*l.* in 1934–35, 81,034*l.* in 1935–36, 87,003*l.* in 1936–37, and 108,141*l.* in 1937–38 was declared at the custom house for export. The gold-bearing country is extensive, but it is for various reasons very difficult to prospect. There are also indications of auriferous reefs, and several crushing plants have been established. There were exported:—*Pearls*, 5,742*l.* in 1934–35; 2,395*l.* in 1935–36; 1,966*l.* in 1936–37; and 2,400*l.* in 1937–38. *Trochusshell*, 16,922*l.* in 1933–34; 11,750*l.* in 1934–35; 13,609*l.* in 1935–36; 12,581*l.* in 1936–37; and 8,578*l.* in 1937–38. *Bêche-de-mer*, 1,643*l.* in 1933–34; 4,455*l.* in 1934–35; 1,802*l.* in 1935–36; 3,939*l.* in 1936–37; and 1,363*l.* in 1937–38. *Rubber*, 61,324*l.* in 1933–34; 79,031*l.* in 1934–35; 89,467*l.* in 1935–36; 124,174*l.* in 1936–37; and 129,448*l.* in 1937–38. Since 1907 coconuts have been largely planted by white settlers, the acreage being 47,921 in 1933, 49,033 in 1934, 47,642 in 1935, 48,188 in 1936, and 45,207 in 1937. There is also a very large area of native-owned coconuts, the product of which is extensively used as an article of food. The value of copra exported was 42,990*l.* in 1933–34; 57,597*l.* in 1934–35; 100,681*l.* in 1935–36; 191,808*l.* in 1936–37; and

Digitized by Google

91,116*l.* in 1937–38. There are large sago fields in the Territory, but this article has not yet been worked for export. Hemp and mangrove bark are also exported.

External Trade and Customs.

The customs tariff is comparatively a light one; *ad valorem* duties do not exceed 10 per cent. From the 1st July, 1935, the general duty which had been imposed on all goods imported into the Territory, whether dutiable or free, at the rate of 4 per cent. on the value of such goods as if all goods were subject to *ad valorem* duty, was reduced to 2½ per cent. Preference is given in the Tariff to Australian wines and timber. The external trade is chiefly with Queensland and New South Wales. The external trade, imports and exports, as entered at the customs, amounted to 469,740*l.* in 1933–34; 564,042*l.* in 1934–35, 672,972*l.* in 1935–36, 976,057*l.* in 1936–37, and 1,067,090*l.*

A service from Sydney is carried on by steamers belonging to Burns, Philp and Co. under contract for the conveyance of mails and passengers. The coasting and general inter-island trade is carried on by means of 2 small steamers and some small cutters or luggers, many of which are manned exclusively by Papuans. A weekly air mail service, subsidised by the Government of the Commonwealth of Australia, has been established between Sydney (Australia) and the Territories of Papua and New Guinea and a regular aerial mail and passenger service is in operation between Port Moresby and Wau in the Mandated Territory of New Guinea. The aeroplanes engaged in the latter service connect with the inward and outward bound mail steamers from and to Australia. Planes have also been used for the carriage of stores and passengers in Papua between Port Moresby and Kokoda, and Port Moresby and the Lakekamu where mining and dredging operations are in progress. There are suitable substantial wharves for working cargo at Port Moresby and Samarai, at which places all manner of supplies are obtainable at reasonable prices. Tracks have been cut in many directions, and the natives are becoming accustomed to travel alone or with Europeans over great areas. During the prevalence of the south-east trades, travelling by small boat is uncomfortable and difficult west of Yule Island, where there is no barrier reef; but east of that the coast is largely protected. East of Yule Island harbours and good anchorages are numerous. In the interior travelling is done always on foot, but in the central district horses can be used on many tracks.

There are 2 wireless stations maintained by Amalgamated Wireless (Australasia) Ltd., one at Port Moresby and the other at Samarai.

NORFOLK ISLAND.

Norfolk Island is the principal of three small islands lying 930 miles E.N.E. of Sydney, and 630 miles from Auckland, in 29° 3′ 45″ S. latitude; and 167° 58′ 6″ E. longitude, the other islets being Phillip and Nepean Islands. They comprise altogether about 15 square miles, and were discovered in 1774 by Captain Cook. They remained uninhabited until 1788, when a penal settlement was formed there. This was removed in 1855, and in 1856 the inhabitants of Pitcairn Island were brought to the group, about 194 persons settling there, with their cattle, sheep, and pigs. The Pitcairn Islanders were the descendants of the Mutineers of H.M.S. "Bounty," who occupied Pitcairn in 1790, and were removed at their own request to Norfolk Island. Of these 40 returned to Pitcairn. The total population at 30/6/37 was 1,085, consisting of 575 males and 510 females. The chief occupation is agriculture. The cultivation of bananas has dwindled and only 965 cases were exported during 1936-1937.

There was formerly but little regular administration, the community being presided over by two of the leading inhabitants as unpaid magistrates, with a simple code of laws. The island was on the 24th June, 1856, placed under the control of the Governor of New South Wales, who was given power to appoint officers, make laws and grant lands. On 1st July, 1914, the island was made a territory of the Commonwealth. It is now under the control of the Territories Branch, Prime Minister's Department, Canberra. In August, 1935, an Advisory Council was created for the purpose of advising the Administrator in relation to any matter affecting Norfolk Island, including the making of new ordinances or the repeal or amendment of existing ones. The Council consists of 8 members elected by adult franchise. The island is divided into 4 wards, and each ward is represented by 2 members. Candidates who poll the highest number of votes in each ward are elected for 2 years and those who receive the next highest number of votes hold office for one year. An election is held on 31st July each year to elect 4 members to replace the retiring ones. An alternate 12 and 30 days' shipping service in the Territory is maintained by the vessels of Burns Philp & Co., Ltd., 7 Bridge Street, Sydney, under contract with the Commonwealth Government for the maintenance of shipping services to the Pacific Islands. On one voyage the SS. *Morinda* leaves Sydney, calls at Lord Howe Island and Norfolk Island and then proceeds to the New Hebrides, returning to Sydney by the same route. The same vessel then makes a short trip to Norfolk Island and returns to Sydney, calling at Lord Howe Island on both the outward and inward voyages. The journey from Sydney to Norfolk Island occupies 4 days.

There is a resident doctor. Education is free, and there is a Central School with one branch. The School course ranges from the Kindergarten to the Intermediate certificate (New South Wales) standard, with a two years superprimary course according to the requirements of a High School of the Rural Science type. The village is Kingston.

The following goods imported into the Territory are subject to Customs duty: spirits, ale, beer, wine, tobacco, oils, sugar, molasses, biscuits, candles, confectionery, dried fruits, jams, jellies, and preserves. Preference is given in the tariff to Australian wines, tobacco and dried fruits.

No duties are chargeable on goods imported into Australia from the island, if the goods:—

(a) are the produce or manufacture of Norfolk Island;
(b) are shipped direct from Norfolk Island to Australia; and
(c) are not goods which if manufactured or produced in Australia would be subject to any duty of Excise.

Registration fees are payable in respect of motor vehicles and dogs.

Administrator, Major-General Sir Charles Rosenthal, K.C.B., C.M.G., D.S.O., V.D., 800*l*.
Chief Magistrate, Colonel F. R. M. Crozier.
Government Medical Officer, Colonel R. F. Baird, M.R.C.S., L.R.C.P., D.T.M.
Rector, Rev. W. K. Deasey.
President, Advisory Council, W. McLachlan.
Registrar of Lands, J. McWhinney.
Registrar of the Court of Norfolk Island, J. McWhinney.
Official Secretary and Collector of Customs, E. J. C. Stopp.
Postmaster, G. H. Wickstead.

THE AUSTRALIAN ANTARCTIC TERRITORY.

situated south of the 60th degree of South longitude and lying between the 160th degree of East longitude and the 45th degree of East longitude was placed under the authority of the Commonwealth of Australia. An Act was passed in June, 1933, by the Commonwealth Parliament declaring acceptance of the territory as a territory under the authority of the Commonwealth by the name of the Australian Antarctic Territory; and the Order in Council was brought into operation on 24th August, 1936 by a Proclamation issued on that date by the Governor-General.

THE TERRITORY OF NEW GUINEA.

(FORMERLY GERMAN NEW GUINEA.)

In 1884, Germany declared a Protectorate over Kaiser Wilhelm Land (the north-eastern part of the Island of New Guinea) and the adjacent Islands of the Bismarck Archipelago, and in later years the Protectorate was extended to the German Solomon Islands, Nauru, and to the Marshall, Caroline, Mariana and Pelew groups, North of the Equator.

The control and development of Kaiser Wilhelm Land was from 1885 to 1899 vested in the German New Guinea Company, which, to all intents and purposes, constituted a Government in itself, and issued its own coinage, but in 1899, the Imperial German Government again assumed control, making annual grants from the Imperial Treasury towards the cost of administration. The seat of Government was at Rabaul in New Britain.

That portion of German New Guinea, which, has, since the 12th September, 1914, been administered by Australia, consists of Kaiser Wilhelm Land, the Bismarck Archipelago, and Buka and Bougainville (Solomon Islands). At the meeting of the Council of the League of Nations in December, 1920, a mandate to administer these territories was issued to the Commonwealth. The islands North of the Equator are administered by Japan.

The Mandate gave to the Government of The Commonwealth of Australia full powers of administration and legislation over the territory of New Guinea subject to the Mandate as an integral portion of the Commonweath of Australia, and permitted the Government of the Commonwealth to apply the laws of the Commonwealth to the Territory, subject to such local modification as circumstances might require.

The New Guinea Act 1920 of the Commonwealth of Australia declared that the territories and islands specified in the Act, being the former German possessions described in the Mandate, should be a Territory under the authority of the Commonwealth by the name of the Territory of New Guinea, and enacted that, except as prescribed in that Act or any Act, the Acts of the Commonwealth of Australia should not be in force in the Territory unless expressed to extend thereto or unless applied to the Territory by Ordinance made by the Governor-General under that Act. The Act also authorised the Governor-General to make Ordinances having the force of law in the Territory.

From the ninth of May, 1921, the commencement of civil administration, until the second of May, 1933, the Governor-General of the Commonwealth in Council made Ordinances having the force of law in and in relation to the Territory. The New Guinea Act 1932, which amended the New Guinea Act 1920-1926, created an Executive Council and a Legislative Council. The Legislative Council is comprised of the Administrator and eight official, and seven nominated non-official, members. Subject to the provisions of the New Guinea Act 1920-1935, the Legislative Council has power to make Ordinances for the peace, order, and good government of the Territory. The first sitting of the Legislative Council for the Territory was held on the ninth of May, 1933, at Rabaul.

Geographical Description.

The Mainland of New Guinea is the North East part of New Guinea, having an area of about 70,000 square miles, nearly one third of the whole Island of New Guinea, the balance of which is divided between Holland (Dutch New Guinea), and the Commonwealth of Australia (Papua). It is divided into three districts namely, Sepik, Madang and Morobe, the most important of the three being Morobe, with head-quarters at Salamaua. The largest goldfield of the Territory is located in the vicinity of Wau in the Morobe district.

Possessing a long, but little indented coast line, the Mainland has few good harbours, the best being probably Madang and Vanimo Harbour, Sek Harbour, Hatzfeldt Harbour, Monumbo Harbour, and Finsch Harbour, though Morobe Haven is a well protected little port. Aitape is practically an open roadstead, and here, as is the case generally right along the coast, shipping, when desiring to anchor during heavy weather, is forced to do so under the lee of one of the many islands which dot the coast.

In respect of rivers, however, the three districts are more fortunate. The Sepik River in the Sepik district is a fine stream which rises in the Victor Emmanuel Range and has its mouth situated about 70 miles south east of Aitape. For vessels of up to about 600 tons it is navigable for a distance of over 400 miles from its mouth, whilst vessels of greater size have covered a distance of over 200 miles. The Ramu or Ottilien River, a long but smaller river than the Sepik, rises in the Bismarck Ranges in the Madang District and discharges at a spot not many miles South East from the mouth of the Sepik. In the Morobe District is the Markham River, which is smaller than the two above-mentioned streams. It flows into the Huon Gulf.

The whole of the Mainland is very mountainous some peaks rising to a height of about 13,000 feet. One or two of the islands along the coast are also mountainous, Vulcan Island being an active volcano. The mainland is believed to possess considerable mineral wealth. Extensive goldmining operations are being carried out in the Morobe District, and a goldfield is also being worked in the vicinity of Wewak in the Sepik District.

A policy of intensive patrolling is pursued by the Administration with a view to the bringing under control of the hitherto unknown inland areas, and Government stations and police posts have been established throughout a large area of the mainland. Early in 1938 an Administration party commenced a protracted patrol of the unexplored area westward of Mt. Hagen to the border of Dutch New Guinea and northward to the Sepik River.

Digitized by Google

The Bismarck Archipelago consists of New Britain, New Ireland, the Admiralty Islands and all the smaller adjacent groups of islands such as Lavongai and the Duke of York Group.

New Britain, a long, narrow crescent shaped island is the largest and most important island of the Archipelago.

The area of the island is estimated at 14,600 square miles and as the mean breadth is only 50 miles, its extreme narrowness can be easily realized. A high and very rugged range of mountains runs from one end of New Britain to the other. The island has been crossed by patrols at the northern and western extremities and also near the centre from Cape Beechy on the south coast to Bangula Bay on the north coast, the same patrol crossing also from north to south, travelling a distance of 90 miles. No hostile natives were encountered. By means of the vigorous system of patrols now in operation, and the development of roads into the interior, the exploration of the island is being progressively continued.

The highest peak in New Britain is an active volcano, The Father, 7,500 feet high, on the north west coast, near which are the two mountains, the North and South Son. Close to Rabaul are three peaks, the Mother and the South and North Daughter, the first named being an extinct volcano.

Volcanic action is very evident throughout New Britain, especially in the north, where, close to Rabaul, are found the Matupi Sulphur Springs situated at the foot of the Mother in Matupi Harbour. Vulcan Island which lies on the south side of Blanche Bay, made its appearance in one night, in 1878, during an eruption from Mount Mother, when violent earthquakes were also experienced.

Serious volcanic disturbances took place at Rabaul on 29th May, 1937, and the following days. Vulcan Island, in Rabaul Harbour, erupted on Saturday, 29th May, emitting dense volumes of smoke and covering Rabaul with volcanic dust. Matupi, about 2 miles from Rabaul also erupted on 30th May. Both volcanoes continued active until the morning of 3rd June. Heavy deposits of pumice dust and mud fell on Rabaul breaking countless trees and blocking streets which became quagmires. The harbour became impassable owing to a thick layer of floating pumice. Most of the buildings in Rabaul were unharmed structurally, but they were covered thickly with volcanic dust.

It was necessary to evacuate the European, Asiatic and native population from Rabaul to Kokopo, about 20 miles away.

The volcanoes practically completed active eruption on 3rd June and a commencement was then made with the task of cleaning the roofs and clearing the streets of Rabaul.

The residents of the town were permitted to return there and take up residence from 10th June, 1937. Two Europeans were lost as a result of the eruptions. A Chinese trader on the North coast was killed when his store collapsed during the heavy storm which followed the eruptions. There were heavy casualties amongst the native population in villages in the vicinity of Vulcan Island. Exhaustive check failed to account for a total of 424 natives comprising adults and children of both sexes.

Unlike the Mainland, New Britain is fortunate in possessing several good harbours, the best being Simpson Harbour, the inlying portion of Blanche Bay; others are Jacquinot Bay, Arawe, Linden Harbour and Powell Harbour on the south-east and south coasts and Rein Bay and Talasea Harbour on the north coast.

There are no rivers of any importance in the Island, those that do exist being short rapid-flowing streams.

Rabaul is situated upon Simpson Harbour, which is horse-shoe in shape, with good depths, well protected from winds and weather, and affords a most excellent anchorage for oversea shipping.

The bulk of the white population of New Britain has grouped itself in or near Rabaul, though settlers with cocoanut plantations, have operated at various suitable points practically round the whole coast line.

New Ireland lies close and practically at right angles to the northern end of New Britain. It is a long narrow Island, very mountainous, without any rivers of size, and geologically older than New Britain. The volcanic appearances so definite in the latter island are not evident in New Ireland. Its coast line is fairly unbroken and its best harbours are at Kavieng, Namatanai and Muliama on the north and east coasts and Kalili on the west coast. Crossings of the island have been made from time to time in several places, and here and there very fair roads exist.

The whole of New Ireland is included in one District under the control of a District Officer stationed at Kavieng, which is a substantial little tropical town with good Government Buildings. A Government Wharf capable of berthing overseas ships has been built.

For some years, concern has been felt at the rapid decrease of the native population of New Ireland. This was believed to be to a great extent attributable to the fact that too many men were being recruited for labour in other parts of the Territory; and for several years some parts of the island were closed against recruiting.

The Admiralty Islands comprise a small group lying about 380 miles to the north west of Rabaul, and constitute the district of Manus, with headquarters at the principal port, Lorengau, situated on the north east corner of the island of Manus, which is the largest of the group and of the same rugged mountainous type as its neighbours, New Britain and New Ireland, though apparently free from volcanoes. What rivers exist are naturally small and unimportant. Several useful though small harbours provide good anchorages for small shipping which touches at these islands.

To the north west of the Admiralty Islands, at a distance of about 200 miles, are the three small groups, the Ninigo, Hermit and Anchorite Islands, better known as the North Western Islands. A particularly fine type of native is found inhabiting these Islands. The groups contain no harbours, excepting in the lagoons at The Hermit and Ninigo Groups; and in most cases depths ranging to about 200 fathoms are found close inshore, rendering it impossible for vessels to anchor while loading copra, of which a fair quantity is produced.

It is in the waters adjacent to the Admiralty Islands that most of the shell fishing in the Territory is carried on, trochus and gold-lip being obtained in large quantities.

The Solomon Islands.—The portion of the Solomon Islands included in the Territory consists of the islands of Bougainvillo and Buka, which constitute the district of Kieta, their total area being about 4,100 square miles.

These two islands are very mountainous, particularly Bougainville, where there are found several volcanoes. Mount Balbi, a peak in the Emperor Range in the centre of the Island, with a height of over 10,000 feet, is a dormant volcano,

Digitized by Google

whilst Mount Bagana, in the Crown Prince Ranges is at the present time an active crater.

There are several good harbours along the coast, the principal being Kieta on the East coast of Bougainville. This is a very well protected bay, almost landlocked, with its entrance protected by a well defined coral reef. Shipping of fair draught finds a suitable anchorage close inshore to the little town of Kieta. Other good harbours are found at Raua and Tinputs, also at Carola Haven on Buka Island.

Industry Trade and Customs.

The Territory comprises some 24,000,000 hectares of land, most of which is capable of cultivation under tropical staples. Of this area, 294,745 hectares are alienated. The total area of plantations, exclusive of native reserves, was at 30th June, 1937, 197,230 hectares. The area under cultivation at that date was 95,946 hectares.

In the many islands of the Archipelago and the North-East New Guinea, land of all kinds is to be met with, from coral atolls to granite peaks. A considerable portion is flat and comparatively low lying, with soil ranging from sand to light sandy loam, usually overlying a sub-soil of broken coral ideal for coconuts, with which much has been planted.

Larger islands, while they frequently have a margin, or at least stretches of soil similar to the above, rise into undulating foot-hills, with or without peaks and headlands. On these the soil is of a heavier nature, ranging from sedimentary deposits to rich, and in some cases, comparatively recent, volcanic soils. Still larger islands, which often have a range of hills as a backbone, and areas of swamp near the coast, have soils grading from light sand to rich heavy clays. Many of these are well watered with creeks and rivers, in the valleys of which the richest of alluvial soils are to be met with, capable of growing anything.

Not only is the Territory particularly favoured in the matter of soils and rainfall, but the fact that it is outside the cyclone and hurricane belts, enables agricultural industries to be undertaken with greater security than many places afford.

At present the Territory is largely dependent upon agriculture, *i.e.*, the cultivation of coconuts for the manufacture of copra and desiccated coconut. There are at present some 460 coconut plantations opened, owned and worked by Europeans, of an average area of between four and five hundred acres scattered through the Archipelago.

Other staples being cultivated to a smaller extent are, in about the order mentioned, cocoa, coffee, kapok, tobacco and arrowroot, often in conjunction with coconuts or each other.

The mineral wealth of the islands can only be surmised. Gold was discovered in February, 1926, at Edie Creek, 65 miles (35 air miles) south-west of Salamaua, the Port of the Goldfields. Salamaua is situated on an isthmus of a bay in Huon Gulf, on the mainland of New Guinea. The amount of gold exported from the 9th May, 1921 to 30th June, 1937, was 1,941,729 ozs., valued at 9,242,781*l*. Nearly all the production was obtained from alluvial mining. For the production of gold, six dredges have been transported in sections from the coast to the goldfields by aeroplanes, and are now in operation. Promising lodes have, however, been discovered. Access to the field is difficult, as it is situated at an altitude of 6,600—6,800 feet, and the journey from the coast by road occupies seven days. The journey by air takes about one hour, and several companies are operating air services. Mineral oil has been found although as yet not in commercial quantities. Sulphur is obtainable, whilst it is believed that copper and nickel deposits exist. The transport difficulty has proved a very effectual bar to the efforts of prospectors up to the present; and it is only with the expenditure of considerable capital that any venture is likely to be successful until the country has been opened up.

The shell fishing industry is one that cannot be overlooked when assessing the commercial value of the colony. Large quantities of trochus, green snail, gold-lip and black-lip are obtained yearly and the revenue obtained therefrom, which includes a royalty, is considerable. The value of marine products exported from the Territory during the year ended 30th June, 1937, amounted to 28,360*l*.

The import tariff is largely on a 10 % *ad valorem* basis. Export duties are levied on copra, trepang, tortoise shell, mother of pearl shell and the feathers of certain birds. No export duty on copra is levied when the London price is less than £10 per ton which, on the basis of the present assessment of price for duty purposes, is equivalent to £5 15s. 0d. per ton, Rabaul.

Climate and Health.

The climate, and particularly the rainfall over so widely spread a group of islands, must naturally vary considerably in different parts. Generally speaking, the rainfall is plentiful and reliable. A N.W. monsoon period between December and February; and a S.W. between March and November are experienced. The latter, during which steady trade winds occur, and the islands are seldom without a breeze, constitutes the cooler and more pleasant portion of the year. No especial dry belts exist, and droughts of more than a few months' duration are unknown.

The average rainfall for the Territory may be taken as 100 to 125 inches per annum. The following are the averages for the districts:—

Rabaul, New Britain	88·28 inches
Gasmata, South New Britain..	223·77 ,,
Talasea, North New Britain ..	171·21 ,,
Kavieng, North New Ireland..	120·71 ,,
Namatanai, South New Ireland	141·47 ,,
Madang, Central New Guinea	141·26 ,,
Sattleberg, South New Guinea	176·55 ,,
Wewak, North New Guinea ..	87·99 ,,
Kieta, Bougainville Islands ..	122·62 ,,
Manus, Admiralty Islands ..	150·95 ,,

The following are results of observations taken at Rabaul, the capital, on the Island of New Britain, about 4½ degrees south of the equator.

Shade temperature—	
Average monthly mean ..	.. 82·85° F.
Yearly average rainfall ..	.. 88·28 ins.

Many settlers, after a few years, affirm that the climate is pleasant, and certainly the lure of the tropics is no myth to those who have the temperament. For all this, the climate is tropical, and is not to be treated with disdain. Reasonable care and the exercise of common sense, with due attention to hygiene, are necessary to avoid the effects of malaria and other tropical ailments that any neglect of precautions render practically inevitable.

Digitized by Google

Malarial fever offers the principal obstacle to white colonists in this territory, some parts of the islands being more subject to the ravages of the fever than others. The efforts of the Australian medical authorities have met with great success, and the percentage of people suffering regularly from malaria has gradually decreased from year to year. In Rabaul, where much work has been performed on sanitation and bush clearing around the town, the malarial carrier, the anopheline mosquito, has been almost eliminated, with the result that malaria cases are at present few and far between. The man who suffers is of course the planter living in places remote from the activities of the medical authorities. Elephantiasis makes an appearance occasionally amongst the native population; and, as is the case in most tropical countries, dysentery and tubercular diseases yearly claim a number of victims from the colored races.

Constant care has to be exercised to prevent the introduction of epidemic diseases, such as smallpox, influenza or measles, the latter of which, while comparatively harmless among white races, becomes calamitously destructive among the careless living slightly clad natives.

Native Population.

Head-taxes are collected every year and a census is taken regularly in the parts of the Territory under Government influence. The total enumerated native population at 30th June, 1936, was 542,394. The non-native population at that date was 5,897.

Generally speaking the New Guinea aborigine is of a good type, well built, and, when civilised, very amenable to discipline. As a rule he is fairly stolid, though flashes of brilliance are found amongst members of some of the tribes. In every island the different branches or tribes appear to be innumerable, and even at short distances it is found that great physical differences occur in the types; while tribes only ten or twelve miles from each other often speak totally different dialects. The result is that interpretation is very difficult for travellers or for the natives amongst themselves, but throughout the colony the use of "pidgin" English has become so established, that even the Germans spoke "pidgin" English to their labourers. Natives are recruited for many purposes; they make good plantation labourers, boats' crews, or domestic servants, whilst many who have received special training have become adept artisans. The German Government had commenced a technical school for natives at Rabaul. This school has been continued by the Australian Authorities who have also established an Elementary School.

Work of this nature is also carried out by the Missions.

Communications.

A regular subsidized shipping service between Sydney (Australia) and New Guinea is maintained by vessels of Burns, Philp & Co. Ltd., pursuant to an agreement with the Commonwealth Government.

In addition vessels from Europe, Australia, U.S.A. and the East call at Rabaul.

Between Rabaul and the various islands small steamers maintain a regular service, carrying mails and stores to the outlying districts, and loading with copra, etc., for transhipment to Rabaul. Radio-telegraphic communication is maintained throughout the group by a number of wireless stations.

Besides the direct air services inaugurated between the coast and the goldfields in the Morobe District, an air service was established in 1931–32 between Port Moresby, Papua, and the New Guinea goldfields reducing the time occupied by the journey from Australia by about 7 days. A weekly air-mail and passenger service has also been inaugurated between Australia, Papua and New Guinea, the terminal points being Sydney and Rabaul. This service is subsidised by the Government of the Commonwealth of Australia.

Civil Administration.

The Civil Administration came into force on the 9th May, 1921:—

Administrators since 1921.

1921, Brigadier-General E. A. Wisdom, C.B., C.M.G., D.S.O., V.D.
1933, Brigadier-General T. Griffiths, C.M.G., C.B.E., D.S.O.
1934, Brigadier-General Sir W. R. McNicoll, K.B.E., C.B., C.M.G., D.S.O., V.D.

Executive Council.

The Administrator, Brigadier-General Sir W. R. McNicoll, K.B.E., C.B., C.M.G., D.S.O., V.D.
Government Secretary, H. H. Page.
Treasurer, H. O. Townsend.
Director of District Services and Native Affairs, E. W. P. Chinnery.
Director of Public Health, Dr. E. T. Brennan.
Director of Agriculture, G. H Murray.
Crown Law Officer, G. G. Hogan.
Director of Public Works, C. R. Field.
Secretary for Lands, Surveys, Mines and Forests, E. P. Holmes.
Non-Official Member, J. C. Mullaly, O.B.E.

Legislative Council.

The official members of the Executive Council and 7 non-official members appointed by the Governor-General of Australia:—
J. C. Mullaly, O.B.E., W. E. Grose, B. B. Perriman, N. P. H. Neal, R. L. Clark, R. C. A. Ollerenshaw, F. G. Lewis.
Clerk of the Legislative Council, G. E. Walker.

Central Administration.

Administrator, Brigadier-General Sir W. R. McNicoll, K.B.E., C.B., C.M.G., D.S.O., V.D., 1,800*l.*
Government Secretary, H. H. Page, 900*l.* to 1,000*l.*
Chief Clerk, S. A. Lonergan, 534*l.* to 600*l.*
Registrar-General and Official Trustee, J. L. Street, 708*l.* to 780*l.*

Police and Prisons.

Superintendent of Police, J. Walstab, 780*l.* to 852*l.*

Judiciary.

Chief Judge, F. B. Phillips, C.B.E., 1,400*l.*
Judge, Vacant.

Crown Law Office.

Crown Law Officer, G. G. Hogan, 900*l.* to 1,000*l.*
Legal Assistant, I. Shoobridge, 684*l.* to 756*l.*
" " (*Relieving*), P. J. Woodhill, 636*l.* to 708*l.*

Department of the Treasury.

Treasurer, H. O. Townsend, 900*l.* to 1,000*l.*
Accountant, H. E. Robinson, 684*l.* to 756*l.*
Superintendent of Stores, J. E. Savage, 636*l.* to 708*l.*

Department of Public Health.

Director, Dr. E. T. Brennan, 1,100*l.* to 1,200*l.*
Medical Officers, 800*l.* to 1,000*l.*; Drs. H. C. Hosking, E. A. Holland, B. A. Sinclair, C. M. Deland, R. W. Cooper, M.B.E., N. V. McKenna, G. H. McQueen, A. V. Price, H. S. Roberts, A. G. Schroeder, R. W. Schuch.
Medical Officer and Government Pathologist, T. C. Backhouse, 800*l.* to 1,000*l.*
Dispenser, J. B. Cruise, 552*l.* to 618*l.*

Department of District Services and Native Affairs.

Director and Anthropologist, E. W. P. Chinnery, 900*l.* to 1,000*l.*
Assistant Director, R. Melrose, 780*l.* to 852*l.*
District Officers, Grade 2, E. Taylor, M.B.E., D. Waugh, G. W. L. Townsend, E. W. Oakley, J. I. Merrylees, W. B. Ball, O.B.E., 708*l.* to 780*l.*
District Officer, Grade 1, J. H. Jones, 618*l.* to 708*l.*
Assistant District Officers, G. Ellis, H. A. Gregory, J. H. McDonald, H. E. Woodman, F. W. Mantle, H. L. Downing, N. Penglase, J. L. Taylor, D. H. Vertigan, K. C. McMullen, A. F. Kyle, J. K. McCarthy, H. L. R. Niall, A. A. Roberts, W. E. Sansom, K. W. T. Bridge, A. A. Bloxham, W. J. Read, J. R. Rigby, R. M. Farlow, M. J. P. A. Pitt, 516*l.* to 600*l.*

Department of Lands, Surveys, Mines and Forests.

Secretary, E. P. Holmes, 804*l.* to 900*l.*
Assistant Secretary, L. C. Roberts, 570*l.* to 636*l.*
Warden, E. A. Feldt, 708*l* to 780*l.*
Geologist, N. H. Fisher, 708*l.* to 780*l.*
Forest Officer, J. B. McAdam, 516*l.* to 600*l.*

Department of Agriculture.

Director, G. H. Murray, 1,100*l.* to 1,250*l.*
Entomologist, J. L. Froggatt, 780*l.* to 852*l.*
Economic Botanist, R. E. P. Dwyer, 708*l.* to 780*l.*

Department of Public Works.

Director, C. R. Field, 804*l.* to 900*l.*
Assistant Architect, W. L. MacGowan, 570*l.* to 636*l.*

Customs Department.

Collector, T. L. McAdam, 732*l.* to 828*l.*
Harbour Master, C. J. R. Webb, 570*l.* to 636*l.*

DOMINION OF CANADA.

THE DOMINION.

The Provinces of Ontario, Quebec (formerly constituting the Colony of Canada), New Brunswick and Nova Scotia, were, by the Imperial Act, 30-31 Vict., c. 3, formed into one Dominion. This Act was brought into force on July 1st, by Royal Proclamation, bearing date the 22nd May, 1867. Its essential provisions are given below.

The Governor-General of Canada was, by Letters Patent of 1st April, 1870, appointed Governor of Rupert's Land. The admission of Rupert's Land into the Dominion of Canada after the 15th July, 1870, was provided for by Order in Council of the 23rd June, 1870, and the Province of Manitoba was erected out of this Territory by a Canadian Act, 33 Vict., cap. 3, and made a Province of the Dominion 15th July, 1870.

By Order of Her Majesty in Council, dated 16th May, 1871, issued on the authority of the British North America Act, 1867, on Addresses from the Houses of Parliament of Canada and the Legislature of British Columbia, that Colony was incorporated in the Dominion, the union taking effect from the 20th of July, 1871.

Prince Edward Island was admitted by Order in Council, bearing date 26th of June, 1873, on the 1st of July in that year.

By an Act passed in 1876, the portion of the N.W. Territories lying to the north of Manitoba was created into a separate district, under the name of the District of Keewatin, but under the control of the Lieutenant-Governor of Manitoba.

By a Canadian Act, 38 Vict., cap. 49 (1875), the territories formerly known as "Rupert's Land" and the North-Western Territory (with the exception of the portion forming the Province of Manitoba) were placed under the jurisdiction and control of a Lieutenant-Governor and Council, separate and distinct from Manitoba.

On the 31st of July, 1880, in compliance with the prayer of an address from the Parliament of Canada, dated the 3rd of May, 1878, Her Majesty issued an Order in Council annexing to the Dominion of Canada from the 1st of September, 1880, such British Possessions in North America (other than Newfoundland) as were not previously included in the Dominion.

By Minute of Council of May 17th, 1882, the districts of Assiniboia, Saskatchewan, Alberta, and Athabaska, were created, and by Order in Council October 2nd, 1895, modified by Order in Council 18th December,

Digitized by Google

1897, the remaining territory was subdivided into the districts of Ungava, Franklin, Mackenzie, and Yukon, the last-named being made a separate territory, distinct from the North-West Territories, under special regulations by chapter 6 of the Acts of the Federal Parliament, 1898.

By chapters 3 and 27 of the Act of 1905 the four provisional districts of Alberta, Assiniboia, Saskatchewan, and Athabaska were formed into the two provinces of Alberta and Saskatchewan, and were admitted into the Dominion as such on the 1st September, 1905. The dividing line runs north and south. Alberta has an area of 255,285 square miles, and Saskatchewan of 251,700 square miles.

By Federal Act passed in the Session of 1912, the boundaries of the Provinces of Ontario, Quebec, and Manitoba were extended, the whole of Ungava being transferred to Quebec and parts of Keewatin to Ontario and Manitoba. The area of Quebec was reduced by 112,400 square miles as a consequence of the Labrador Boundary Award, made on March 1st, 1927, by the Judicial Committee of the Privy Council.

Situation and Area.

The Dominion of Canada occupies the northern half of the American continent (except Labrador, Newfoundland, and Alaska, the latter belonging to the United States), stretching from latitude 49° to beyond the polar circle, and including the islands of the northern archipelago lying in the Canadian sector. It comprises an area computed at 3,694,863 (land and *fresh* water) square miles (39 times the area of the United Kingdom, over three times that of British India). The nine Provinces of the Dominion (including territory added to the Provinces of Ontario, Quebec and Manitoba) comprise 2,003,230 square miles of land and 174,875 square miles of fresh water. The Dominion includes the islands of Anticosti, Prince Edward Island, and Cape Breton on the east, and Vancouver and Queen Charlotte Islands on the west.

History.

Particulars as to the history of each province will be found in the following pages, but it may here conveniently be stated that the north-east coast of the Dominion seems to have been first discovered by the Norse seamen of the middle ages. Cabot reached Labrador in 1497, and the fisheries off this coast were frequented early in the sixteenth century. In 1535 Cartier wintered on the St. Lawrence and claimed the country on behalf of France, and others followed. The whole territory became British by the Treaty of Paris, 1763.

Constitution.

The Executive Government is vested in the Crown, and is exercised by a Governor-General appointed by the King. The Governor-General is assisted by his Cabinet which, as in England, is a Committee of the Privy Council, formed of the principal Members of the Government. The capital of Canada is Ottawa in Ontario.

The supreme legislative power is vested in a Parliament, consisting of the King, a Senate, and a House of Commons. The Senate now consists of 96 members nominated for life by the Governor-General, and so chosen that 24 represent Ontario, 24 Quebec, 24 the Maritime Provinces, and 24 the Western Provinces. The qualification for Senator is the possession of property worth $4,000, age of not less than thirty years, British nationality and residence within the province for which he is appointed. The House of Commons consisted originally of 181 elected members, which number has been increased by additions on the accession of new provinces, and by the increase in population, and is at present 245; 82 representing Ontario, 65 Quebec, 12 Nova Scotia, 10 New Brunswick, 17 Manitoba, 16 British Columbia, 4 Prince Edward Island, 17 Alberta, 21 Saskatchewan, and 1 the Yukon Territory. The basis on which the number of members allotted to each province is regulated, is that Quebec shall always have 65, and the other provinces a proportional number according to their population at each decennial census. There is no property qualification. Each member of the Senate receives $4,000 per annum, and each member of the Commons a maximum of $4,000 per session, with certain deductions for days of non-attendance. A Parliament lasts five years if not sooner dissolved. Election is by ballot.

For each province there is a Lieutenant-Governor, appointed by the Governor-General, and holding office during pleasure, but not removable within five years of appointment, except for cause assigned. He receives a salary fixed and provided by the Dominion Parliament, and is assisted by an Executive Council or Cabinet possessing the confidence of the Provincial Assembly.

Each province has a "Legislative Assembly," and in Quebec there is also a "Legislative Council," forming a second chamber. The Provincial Legislatures possess the power of altering their constitutions. The territory not comprised within any province (Yukon and the North-West Territories) is very thinly inhabited. The Yukon Territory is governed by an appointed Gold Commissioner and an elective council of three members. The Northwest Territories are governed by a Commissioner and six councillors appointed by the Governor-General in Council.

The Dominion Parliament has exclusive legislative power in all matters except those specifically delegated by the constitution to the Provincial Legislatures. The Canadian Constitution is in this respect the reverse of that of the United States. Among such general matters may be named public finance, trade regulation, postal service, currency, coinage, banking and navigation matters, defence, the law relating to crimes, bankruptcy, copyright, patents, naturalisation, and Indian affairs.

The powers of the Provincial Legislatures are confined to certain specified subjects, of which the chief are property and civil rights, the alteration of their own constitutions, direct taxation within the province and provincial loans, the management of provincial public lands, and of provincial and municipal offices, hospitals, gaols, &c., licences, local works, and the general civil law and procedure. With regard to education, they have full powers, subject only to certain provisions to secure protection to religious minorities. In agricultural, quarantine, and immigration matters, they possess concurrent legislative powers with the Dominion Parliament.

The Judges are appointed by the Governor-General in the superior, district, and county courts throughout the Dominion, except in the probate courts of Nova Scotia and New Brunswick.

Digitized by Google

By the provisions of the British North America Act and subsequent arrangements entered into from time to time, the Dominion is required to make certain annual payments to the individual Provinces. These payments (subsidies) fall into the following four classes :—

A. Interest on Debt Allowances.

By the terms of the Union of the Provinces in Confederation in 1867, the Dominion assumed all the outstanding debts and liabilities of the Provinces and undertook to pay, except in the case of Ontario and Quebec, interest at 5% on the amounts by which the actual per capita indebtedness of the Provinces fell short of a basic debt allowance calculated at approximately $25 per capita. On the subsequent entry of additional Provinces into Confederation, similar arrangements were effected regarding the assumption of their pre-Confederation indebtedness. From time to time, adjustments have been made in the basis of calculation of the debt allowances of the various Provinces and the Dominion pays interest at 5% per annum on the amounts by which the actual debts of the Provinces, on their entry into Confederation, fell short of the allowed debts as adjusted. The aggregate annual payment from the Dominion to the Provinces in respect of interest on debt allowances is $1,609,386.

B. Allowances for Government and Legislature.

Under the terms of the Union, annual grants of specific amounts were made to the various Provinces for the support of their Governments and Legislatures. These fixed amounts vary with the population of the Provinces according to the following scale, approved in 1907 :—

Where population is—	$
Under 150,000	100,000
150,000, but does not exceed 200,000	150,000
200,000 " " 400,000	180,000
400,000 " " 800,000	190,000
800,000 " " 1,500,000	220,000
over 1,500,000	240,000

The aggregate annual allowances presently paid under this head amount to $1,750,000.

C. Allowances per Head of Population.

Under the British North America Act of 1867, a grant of eighty cents per head of the population was allowed to each Province. The British North America Act of 1907 provided that the grant would be paid to each Province at the rate of eighty cents per head up to a population of two and one half million and at the rate of sixty cents per head for so much of the population as exceeds that number. The cost to the Dominion in the fiscal year ended March 31st, 1938, of the annual allowances paid to the Provinces per head of population was $8,095,070.00.

D. Special Grants.

In the case of all the Provinces with the exception of Ontario and Quebec, certain additional grants have been made in view of special circumstances obtaining, which, for the fiscal year 1938, amounted in aggregate to $5,505,879.90 as set out below—

Nova Scotia.—An annual grant of $875,000 since 1927, increased to $1,300,000 in 1935.

New Brunswick.—An annual grant of $150,000 since 1875 in consideration of repeal of lumber duties reserved to the Province by the B.N.A. Act of 1867, to which has been added special annual grant of $600,000 since 1927, increased to $900,000 in 1935.

Manitoba.—A special grant on the basis of population amounting, at present, to $562,500 per annum.

Prince Edward Island.—A special grant of $195,000 less a deduction of $39,120.10, plus an annual grant since 1927 of $125,000 increased to $275,000 in 1935.

British Columbia.—A special grant of $100,000 per annum, to which have been added special grants of $1,500,000 in 1936 and $750,000 in 1937.

Saskatchewan and Alberta—are currently receiving an annual sum as compensation for loss of revenue derivable from their Public Lands, based on their respective populations which amounts in the case of Saskatchewan, to $750,000, and in the case of Alberta to $562,500.

Bills passed by the Provincial Legislatures require the assent of the Lieutenant-Governor, and may be disallowed within a year by the Governor-General. Those passed by the Dominion Parliament require the assent of the Governor-General, and may be disallowed within two years by the King.

Provision was made in the Act constituting the Dominion for the admission into it of any of the other British possessions on the continent of North America, and they have all been since admitted except Newfoundland. Provision was also made for the construction of a railway from the River St. Lawrence to Halifax, and (in the Order in Council admitting British Columbia) for the construction of a railway from the Atlantic to the Pacific Ocean. Both these have been constructed.

Local Government.

In all the provinces local self-government has been developed to the fullest extent. In the complete form as adopted by Ontario, Manitoba, British Columbia, and other provinces, the whole municipal organisation comprises : (*a*) the townships, being rural districts of an area of 8 or 10 miles square (in the Prairie Provinces 6 miles square); (*b*) villages ; (*c*) towns. Such of these as are comprised within a large district, called a county, constitute (*d*) the county municipality ; (*e*) cities in the provinces of Manitoba and Ontario are established from towns when their population exceeds 10,000 and 15,000 respectively. In the other provinces they are incorporated under certain Municipal Codes and Acts. The townships and villages are administered by a reeve and councillors ; the towns by a mayor and councillors, and the cities by a mayor and aldermen. The governing body of the county municipality is composed of the members elected by districts containing one or more townships or villages, the presiding officer being styled "Warden." The Councils have powers to levy rates, create debts, promote agriculture, trade or manufactures, or railways, powers relating to drainage, roads, paupers, cemeteries, public schools, free libraries, markets, fire companies, preservation of the peace, &c.

The number of Municipalities in Canada, by Provinces in 1936, was :—

Prince Edward Island	8
Nova Scotia	69
New Brunswick	40
Quebec	1,540
Ontario	937
Manitoba	174
Saskatchewan	857
Alberta	606
British Columbia	79

Nearly 3 million of the people are of French extraction, mostly residing in Quebec, where French is the language generally spoken.

The total population includes 122,920 Indians, living chiefly in Ontario, British Columbia, and the North-West Territories. About 113,000 of these are under the supervision of Government agents, and have large districts reserved for them, where they live mainly by hunting, fishing, and traffic in furs. According to the census of 1931 there were 46,519 Chinese in Canada, many of whom (27,139) were in British Columbia, and 23,342 Japanese, of whom 22,205 were in British Columbia. There were also 6,000 Esquimaux along the northern coasts.

The number of immigrants arrived during the year ended 31st March, 1938, was 15,645, of whom 2,972 were British, and 5,643 were from the United States.

The population of the chief towns, according to the final figures of 1931 census, was as follows:—

Montreal	818,577
Toronto	631,207
Winnipeg	218,785
Vancouver	246,593
Ottawa	126,872
Hamilton	155,547

The imports for home consumption from the United States in 1937-38 were $487,328,980.

$67,298,908 of dutiable goods were imported from the United Kingdom.

Industry.

The main industry of the Dominion is agriculture, an enormous quantity of cereals and dairy produce being raised and exported. "Homesteads" of 160 acres can be obtained on varying terms in the different provinces; about 32 per cent. of the population is engaged in agriculture. In 1936 there were 2,573 butter and cheese factories and 22 factories producing condensed milk and cream. In 1937 the quantity of creamery butter made was 246,387,300 lbs., valued at $63,217,300, and the quantity of cheese made was 128,444,300 lbs., valued at $17,845,300. The value of land, buildings and plant was $65,065,535 in 1936. The number of persons employed in factories during 1936 was 16,260, and the amount paid for salaries and wages was $15,577,826.

* The financial year ends on March 31st.
‡ Coin and bullion not included.

Canadian manufacturing has grown steadily to reach the stage indicated by the table which follows. The utilization of hydro-electric power in Ontario and Quebec, which lack coal, is an important phase of the recent development. In the Dominion as a whole, 8,112,751 horse power had been developed up to Jan. 1st, 1938, about 80 per cent. of it in Quebec and Ontario.

Immigration.

The immigration policy of the Government of Canada is administered by the Department of Immigration and Colonization, with headquarters in Ottawa. Canadians prefer that settlers should be of a readily assimilable type, related to one or other of the great races now inhabiting the country, and thus prepared for the assumption of the duties of democratic citizenship. There are strong prohibitions against undesirable classes; special legislation is also in effect with regard to the immigration of Orientals, the latter problem being fundamentally economic rather than racial.

The policy for many years prior to the summer of 1930 was one of encouragement to agriculturists and female domestic help. An important change in immigration regulations was made by Order in Council on August 14, 1930, when immigration, except of British from the Mother Country or a Dominion and of U.S. citizens coming from the United States, was limited to two classes—(*a*) wives and unmarried children under eighteen years of age, joining family heads established in Canada and in a position to look after their dependents; (*b*) agriculturists with plenty of money to begin farming in Canada. This limitation applies to the whole continent of Europe as well as to many other countries. Regulations have not been changed affecting immigration from the British Isles, Oversea British Dominions or the United States, but a policy of no solicitation has been rigidly adopted.

For many years the immigration regulations have contained a general provision that immigrants coming to Canada must have sufficient funds to look after themselves until employment is secured. This regulation was not always strictly enforced when times were good and work was plentiful. It is now strictly enforced as a protection both to the immigrant and to Canada.

In 1938 immigration increased to 15,645.

Products.

The total yield of field crops in Canada in 1938 is estimated at the following figures:—

			per acre.
Wheat	348,100,000	bushels:	13.4 bushels
Oats	377,315,000	,,	29.0 ,,

Digitized by Google

The provisional estimate of the root and fodder crops in Canada for 1938 was as follows :—

		per acre.
Potatoes . . .	35,774,000 cwt., averaging	69 cwt.
Turnips, etc. . .	37,970,000 ,, ,,	200 ,,
Hay and Clover .	13,959,000 tons ,,	1.58 tons
Alfalfa	2,058,000 ,, ,,	2.40 ,,
Fodder corn . .	4,408,800 ,, ,,	9.58 ,,
Sugar Beets . .	527,000 ,, ,,	11.0 ,,

The fisheries of the seaboard provinces are very extensive, British Columbia leading in recent years, and large quantities of dried, pickled and canned fish and lobsters are exported. There are also important fisheries in the Great Lakes and other inland waters. The value of the yield of all fisheries in the calendar year 1937 was $38,976,294 and the number of persons employed in connection with the fisheries was 83,850, including 13,883 persons employed in fish canning and curing establishments.

Minerals.

The principal minerals produced in 1937 were gold (exclusive of premium), 4,096,213 fine ounces, $84,676,235 ; copper, $68,917,219 ; nickel, $59,507,176 ; coal, $48,752,048 ; lead, $21,053,173 ; zinc, $18,153,949 ; asbestos, $14,505,791 ; natural gas, $11,674,802 ; sand and gravel, $10,492,696 ; silver, $10,312,644 ; cement, $9,095,867 ; stone, $6,933,841 ; platinum, $6,752,816 ; petroleum, $5,399,353. The total value including the premium on gold was $457,359,092.

The pulp and paper industry made satisfactory progress in 1937 ; there were 98 mills in operation, and the value of pulpwood exported, pulp exported, and paper manufactured was $229,789,483

A century ago the value of the furs exported was greater than that of any other product. Canada is still one of the great fur preserves of the world ; furs to the value of $14,830,397 were exported in the fiscal year 1937-38.

The value of lumber production in 1936 was $61,965,540. The timber on about two-thirds of the forest area is either too small or too far from transportation facilities to be worked profitably under present conditions.

Shipping.

The arrivals and clearances show, in the fiscal year 1936-37, a total tonnage of 186,007,918 tons. Engaged in the sea-going trade, 62,948,011 tons ; 91,421,172 tons engaged in coasting trade, and 31,638,735 tons engaged on inland waters between Canada and the United States.

The number of vessels on the Register Books of the Dominion on 31st March, 1938 was 9,283 with a net tonnage of 1,344,760. Of this number 6,649 were steamers, with a net tonnage of 878,451. The estimated number of men and boys (inclusive of masters) employed in 1936 was 44,649.

Sea-going shipping figures in 1936-37 were as follows :—

Nationality.	Entered.		Cleared.	
	No. Vessels.	Tons Register.	No. Vessels.	Tons Register.
British ..	4,736	13,576,404	4,845	13,723,327
Canadian	11,709	6,584,276	12,196	6,750,196
Foreign ..	8,903	10,984,385	9,095	11,329,423
TOTAL..	25,348	31,145,065	26,136	31,802,946

The inland international shipping traffic on the Great Lakes is also very important.

On March 31st, 1937, the number of lights shown was 1,959, lightships 11, and fog-alarm stations, 13 ; the number of fog whistles, hand fog horns, fog bells, etc., was 386 ; the number of gas buoys, whistling buoys, bell buoys, and submarine bells, 614 ; the number of light keepers and engineers of fog-alarms, with masters of lightships, was 1,227.

Railways.

Railways.—The total railway single-track mileage in Canada in 1937 was 42,727 miles. On the same date the capital liability was $2,698,540,122. Of this amount $1,164,089,333 represents stocks, and $1,534,450,789 funded debt.

During the year 1937 the steam railways carried 22,038,709 passengers and 92,478,281 tons of freight. The total earnings during the year were $355,103,271. The operating expenses were $300,652,548 as against $283,345,968 in the previous year.

The mileage operated, gross earnings, operating expenses and net operating revenue of the two large systems of Canada, are as follows :—

Canadian National (exclusive of 1,762 miles in the United States)	21,793
Canadian Pacific ...	16,719 miles of single track.

(This includes duplications where both Railways operate over joint tracks, etc).

The total single track mileage operated in Canada was 42,727.

1937.

	Gross Earnings.	Operating Expenses.	Net Operating Revenue.
Canadian National ...	$165,082,489	$153,711,912	$11,370,576
Canadian Pacific	151,504,803	121,811,430	29,693,373
Totals ...	$316,587,292	$275,523,342	$41,063,949

The Canadian National lines and the Canadian Pacific comprise 90% of the total mileage in Canada and form three transcontinental systems. The Canadian Pacific main line extends from St. John to Vancouver, about 3,367 miles. The Canadian National has practically two complete lines across the continent from Halifax to Vancouver and St. John to Prince Rupert.

Telecommunications.

Telegraphs.—There were in 1937 53,001 miles of telegraph line, and 369,411 miles of wire in operation in Canada, of which 11,789 are owned and operated by the Dominion Government ; 13,456,330 land messages were sent in 1937 (not including weather and shipping reports), and the number of offices was 4,761. Canada ranks seventh in actual telegraphic mileage among the various countries of the world, and first with respect to the number of offices in proportion to population. There is direct cable communication with Great Britain, Newfoundland, and Bermuda, and also a deep-sea cable between Vancouver Island and the United States. In the latter part of 1902 telegraphic communication was opened up between Canada and the Australian Colonies by the Pacific Ocean Cable.

Wireless Communications.—There were 1,042,308 licences in force at March 31st, 1937, of which 1,038,500 were for private receiving stations. Of the remaining 3,808, ship stations numbered 319, leaving 3,489 coast and land stations, 2,821 of which were amateur experimental stations and 80 broadcasting stations.

Digitized by Google

Wireless "beam" stations are operated at Montreal, Quebec, for direct communication with Great Britain and Australia, and a station at Louisburg, N.S., provides a long distance service to ships.

The telephone is very generally used. On the 31st December, 1936, there were 1,266,228 telephones and 5,197,042 miles of telephone wire in use. The revenue amounted to $59,770,591, and the operating expenses to $51,938,102. On December 31st, 1936, the capital liability of telephone companies in Canada was $271,571,376 of which $111,239,775 are stocks and $160,331,601 are funded debt.

Canals.

There are six important systems of Government canals, affording, with the St. Lawrence River connections, magnificent inland communications. From Lake Superior to the sea there is water passage nowhere less than 14 feet deep. The aggregate length of inland navigation rendered available by the canals is 3,000 miles, the St. Lawrence system alone having a length of 2,384 miles. The receipts for the year ending March 31st, 1937, were $1,003,765, which are from water and other rentals, the canals being free of tolls, and the working expenses including repairs were $2,392,341. The sum of $261,867,311 has been expended on the construction, enlargement and repairs of these canals, including the amount expended on the Sault St. Marie Canal to connect Lakes Superior and Huron, which was opened in the season of 1895. The new Welland Ship Canal between Lakes Erie and Ontario, with (at present) a 25 foot channel but 30 foot locks, was officially opened in 1932, although open to traffic with restricted draught, early in 1930, allowing the largest Upper Lake steamers to proceed through Lake Ontario and as far as Prescott on the St. Lawrence.

Total vessel tonnage through the canals during 1937 was 21,431,713, carrying 67,334 passengers, and 23,351,000 tons of freight.

Currency.

The denominations of money in the currency of Canada are dollars and cents. The cent is one-hundredth part of a dollar. Subsidiary coins of the denominations of 1 cent, 5 cents (both silver and nickel), 10 cents, 25 cents, 50 cents and one dollar are in use. The monetary unit is the gold dollar equivalent to 25.8 grains of gold, nine-tenths fine. The Currency Act provides for gold coins in the denominations of $2.50, $5.00, $10.00 and $20.00, which are legal tender. The British and United States gold coins are also legal tender, but only at the par rate of exchange. The legal equivalent of the British sovereign is 4.86⅔ dollars. The privilege of issuing notes is restricted to the Bank of Canada and the chartered banks. It is intended that the Bank of Canada will ultimately have the sole right to issue notes and the latest revision of the Bank Act provides for a gradual withdrawal of the right of note issue by the chartered banks.

The Bank of Canada issues notes, which are legal tender, in denominations of $1, $2, $5, $10, $20, $25, $50, $100, $500, and $1,000. They may be issued in any amount, so long as the Bank maintains a reserve in gold coin or bullion of at least 25 per cent. of its note and deposit liability. Under the terms of the Bank of Canada Act, the Bank is required to sell gold in bars of 400 ounces to any person tendering legal tender. This obligation is at the present time suspended by Order-in-Council. The exportation of gold from Canada is prohibited except by license issued by the Minister of Finance to the Bank of Canada or a chartered bank.

The Ottawa Mint was established in 1908 as a branch of the Royal Mint, in pursuance of The Ottawa Mint Act, 1901. In December, 1931, control of the Mint was passed over to the Canadian Government and since that time has operated as the Royal Canadian Mint. The Mint issues silver, nickel and copper coins for circulation in Canada, and for a time coined $5 and $10 Canadian gold coins and British sovereigns. No gold coins have been struck since 1919. In 1935, on the occasion of His Majesty's Silver Jubilee, the Royal Canadian Mint issued a silver dollar bearing the effigy of the King. Gold refining is one of the principal activities of the Mint.

In 1937 3,933,453 fine ozs. of gold was received for treatment, and 3,937,910 fine ozs. were issued. Coin issued: bronze, $105,400; nickel, $251,100; silver, $1,322,200.

Banking.

Commercial banks in Canada are known as chartered banks and are incorporated under the terms of the Bank Act which imposes strict conditions as to capital, notes in circulation, returns to the Dominion Government, types of lending operations and other matters. There are now in operation ten chartered banks incorporated under the provisions of the Bank Act, with 3,336 branches in Canada and 145 branches in other countries. These banks are

Ontario—(Headquarters).

Bank of Toronto-
Dominion Bank.
Canadian Bank of Commerce.
Imperial Bank of Canada.
Bank of Nova Scotia.

Quebec—(Headquarters).

Bank of Montreal.
Banque Canadienne Nationale.
Banque Provinciale du Canada.
Royal Bank of Canada.
Barclay's Bank (Canada).

The Bank Act is subject to revision by Parliament every ten years, the last revision having taken place in 1934. Bank charters expire every ten years and are renewed at each decennial revision of the Bank Act. The chartered banks make detailed monthly and yearly returns to the Minister of Finance and are subject to periodic inspection by the Inspector General of Banks, an official appointed by the Government. The strength of the banking system is revealed by the fact that there have been no failures since 1923.

The following are some particulars (in dollars) of the ten chartered banks as at August 31st, 1938: Capital paid up, $145,500,000; reserve fund, $133,750,000; notes in circulation, $98,661,488; total on deposit in Canada, $2,417,838,291, elsewhere, $400,442,302; liabilities to the public, $3,039,699,201; total assets, $3,334,356,596.

Bank debits in the clearing house centres of Canada for 1937 amounted to $35,166,061,138, against $35,928,606,743 in 1936. Of the transactions of 1937, Toronto had over 34 per cent.; Montreal over 30 per cent.; Winnipeg 8 per cent.; Ottawa 4 per cent.; and Vancouver 5 per cent.

Government post office savings banks have been in operation since 1868. The post office savings banks had on March 31st, 1938, deposits amounting to $22,587,233.

The deposits in the Quebec Savings banks, incorporated under the terms of a special Dominion Act, amounted to $77,535,147 on August 31st, 1938.

The Bank of Canada Act, passed in 1934, provided for the establishment of a central bank for the Dominion. This Bank commenced operations in 1935,

Digitized by Google

with a paid-up capital of $5,000,000. The shares are held by the public and a limitation of 50 shares ($50 par value) per person is in force. The shareholders must be British subjects ordinarily resident in Canada and shares must not be held by or for the benefit of any chartered bank or director, officer or employee thereof. By an amendment to the Act passed at the 1936 session of Parliament, the capitalization of the Bank was increased to $10,100,000 by the sale of $5,100,000 Class "B" shares to the Minister of Finance. The original shareholders are now designated Class "A". By a further amendment to the Act passed at the 1938 session of Parliament the Class "A" shareholders of the Bank were paid $59·20 per share, plus the accrued dividend, and the shares were then deemed to have been cancelled. The Minister of Finance exchanged one hundred thousand of the one hundred and two thousand Class "B" shares for one hundred thousand new shares. The one hundred thousand Class "B" shares were cancelled, the remaining two thousand Class "B" shares being surrendered to the Bank of Canada for cancellation by the Minister of Finance towards reimbursing the Bank the amount by which payments made by the Bank to the holders of Class "A" shares, excluding any amount paid by way of dividend, exceeded the par value of such shares. The reimbursement was completed by a cash payment to the Bank of $820,000. As a result of these changes the Minister of Finance on behalf of the Dominion of Canada is the sole registered owner of the capital stock of the Bank. The Bank has the sole right to issue legal tender notes. Under the Bank Act of 1934 the maximum amount of chartered bank notes outstanding on and after the opening of the Bank of Canada at any time was not to exceed the amount of unimpaired paid-up capital of the chartered bank, and was to be reduced by 5% of that amount on the 1st of January of each of the next five years and by 10% on the 1st of January of the succeeding five years, remaining on and after the 1st of January, 1945, at 25% of the amount of unimpaired paid-up capital until Parliament further enacts. The chartered banks are required to maintain, in the form of deposits with and notes of the Bank of Canada, a reserve of not less than 5 per cent. of their deposit liabilities in Canada. The Bank of Canada is required to maintain a reserve in gold coin or bullion of not less than 25 per cent. of its note and deposit liabilities. All gold held in Canada by the chartered banks was transferred to the Bank of Canada along with the gold held by the Government as a reserve against Dominion notes outstanding at the time of the commencement of operations of the Bank of Canada. The liability of the Dominion notes outstanding at the commencement of business of the Bank of Canada was assumed by the Bank. The following are some of the particulars of the Bank of Canada as at September 30th, 1938. Notes in circulation, $175,421,600; chartered bank deposits, $211,484,706; gold coin and bullion, $181,033,260 (valued at current market price); securities $203,737,488.

Post Office.

The number of offices on March 31st, 1938, was 12,421. The net revenue for the year ended March 31st, 1938, was $35,546,161, and the expenditure $32,296,805. At the end of 1937, there were 4,340 rural mail delivery routes, on which were erected 266,856 boxes.

On March 31st, 1938, there were 6,840 Money Order offices; Orders issued, 14,554,010, value $144,445,972.

The mail communication with Great Britain is now an average of four times a week via Montreal or Quebec and New York in summer, and twice a week via Halifax or Saint John and New York in winter. With the West Indies there is a weekly mail service via Halifax and from two to three trips per week via United States ports. There is a through service twice daily across the continent from Halifax on the Atlantic to Vancouver on the Pacific coast by the Canadian Pacific and Canadian National Railways, at least a semi-monthly direct steamship service with New Zealand and Australia via Vancouver and San Francisco. With Japan and China there is a direct connection by steamer from Vancouver at least once a week throughout the year.

Air mail services link up the important cities of Canada with air-mail routes in the United States. As much as 48 hours can be saved on mail delivery between Western and Eastern Canada by their use.

The rates of postage are as follows:—

Letters.—To Canada, Great Britain and all other places in the British Empire, France, Spain, United States, and all other places in North and South America, 3 cents for the first oz., 2 cents for each additional oz.: other countries, 5 cents for the first oz., 3 cents for each additional oz.

Postcards.—Canada, Great Britain and all other places within the Empire, France, Spain, United States and all other places in North and South America, 2 cents each; other countries 3 cents each.

Newspapers.—To Canada, United States and Mexico, and (if published in Canada) to United Kingdom and British Colonies, France, Spain and North and South America 1 cent per 4 oz.; in all other cases 1 cent per 2 oz.

There is a direct parcel post to the following countries: Argentina, Australia, Bahamas, Barbados, Belgium, Bermuda, Brazil, Br. Guiana, Br. Honduras, China, Colombia, Cuba, Denmark, Egypt, Fiji, France, Germany, Great Britain and Northern Ireland, Grenada, Holland, Hong Kong, Irish Free State, Italy, Jamaica, Japan, Leeward Is., Mexico, Newfoundland, New Zealand, Norway, Philippine Is., Poland, St. Lucia, St. Pierre and Miquelon, St. Vincent, Sudan (Anglo-Egyptian), Sweden, Trinidad and Tobago, Union of South Africa, and Venezuela.

Air Mail.—Canada, 6 cents for first oz., and 5 cents for each additional oz. over the main air routes.

Governors-General since Confederation.

INTERNATIONAL JOINT COMMISSION.

Canadian Section.

Chairman, Hon. Charles Stewart.
Commissioners, Sir William Hearst, K.C.M.G., Geo. W. Kyte, K.C., $7,500 each.
Secretary, L. J. Burpee, $7,620.

HIGH COMMISSIONER FOR THE UNITED KINGDOM.

High Commissioner, Sir Gerald Campbell, K.C.M.G., 2,500*l.* and representation allowance 2,500*l.*
Senior Secretary, S. L. Holmes, M.C., 500*l.* to 1,100*l.* and representation allowance 750*l.*
Assistant Secretaries, P. Mason, I. M. R. Maclennan, 275*l.* to 625*l.* and representation allowance 500*l.*
Registrar, A. W. Baney, 85*l.* to 350*l.* and allowance 300*l.*

ACCREDITED REPRESENTATIVE IN CANADA FOR THE UNION OF SOUTH AFRICA.

D. de Waal Meyer.

DIPLOMATIC REPRESENTATIVES OF OTHER COUNTRIES IN CANADA.

Minister for the United States,
Minister for France, Count Robert Dampierre.
Minister for Japan, Baron Tomii.
Minister for Belgium, Baron Silvercruys.

III. THE PROVINCES.

ONTARIO AND QUEBEC (OLD CANADA).

History.

It is claimed that Sebastian Cabot discovered Cape Breton Island in 1497, but the first discoverer of Canada, properly so called, was Jacques Cartier, who having spent some time in Gaspé Harbour took possession of the country by setting up a cross, on the 24th July, 1534. In 1535 he sailed up the St. Lawrence which he named the River of Hochelaga, the name applied by the Indians to the region about the Lachine Rapids.

In 1608 Quebec, the first settlement, was founded. During their early days and for a considerable time after, the French settlers were few in number, suffered great hardships, and were much engaged in conflicts with the Indian tribes, the aboriginal inhabitants. The principal incentives to their colonisation were the profits of the fur trade and missionary zeal.

In 1759 Quebec succumbed to the British forces under General Wolfe; and in 1763 the whole territory of Canada was ceded to Great Britain by the Treaty of Paris. It may be mentioned that for three years, from 1629 to 1632, Quebec had been in English possession, having been captured by David Kirk, but was retroceded to France by the peace of *St. Germain-en-laye*.

From 1763 to 1774 Canada was governed in the main by military authority. In the latter year a nominee council was established by Act of the Parliament of Great Britain. By the same Act the Roman Catholics were given the free exercise of their religion; the Catholic clergy were declared entitled to receive their accustomed dues and rights, but with respect only to those professing the Catholic religion; and in civil cases it was declared that resort should be had to the Laws of Canada for the decision of the same.

In 1791 an Act of Parliament was passed (31 Geo. III., cap. 31), authorising the Crown to issue a proclamation dividing Canada into two Provinces, Upper Canada (now Ontario) and Lower Canada (now Quebec), and establishing a constitution for each. As the form of government was similar in each Province, a description of that of the Lower Province will suffice. By the Act in question the Legislative authority was vested in a Legislative Council appointed by the Crown, and in a House of Assembly elected by the inhabitants; the Lower Province was under a Governor, whilst the Upper was under a Lieutenant-Governor. Both the Houses of Assembly thus created, and especially that of Lower Canada, were in constant conflict with the Executive Government from the end of the American War, in 1814, until the Canadian Rebellion of 1837-8. The risings in both Provinces were caused by Governor after Governor attempting to rule by the aid of Executive Councils not possessing the confidence of the Provincial Assemblies. The rebels were suppressed with very little difficulty. Afterwards the constitution of Lower Canada was suspended, and Lord Durham was sent out from England as Governor-General, with special powers and instructions to report on the affairs of the country. He recommended a Union of the Provinces, and indeed foreshadowed the larger confederation, which has since been adopted. In accordance with Lord Durham's recommendation, the two Provinces were re-united by Act 3 & 4 Vic., cap. 35, and the Legislative Bodies of the united Provinces were consolidated: the new Legislative Council was to consist of not less than 20 members (it used in fact to exceed double that number); the members were appointed for life. Subsequently, by 17 & 18 Vict. c. 118, the Canadian Legislature was empowered to alter the Constitution of the Legislative Council. This power was utilised in 1856 by an Act of Canada which made half of the Legislative Council elective for terms of eight years. This modification was an important one, for it was because of the dissatisfaction caused by the behaviour of the elected Councillors that, on the creation of the Dominion of Canada in 1867, the new Senate was made appointive. The new House of Assembly, created in 1840, consisted of 84 members, there being an equal number from each Province. Municipal Institutions were established in Canada in 1841.

Constitution.

The constitution of Canada in operation under this union was defined in its main features under title I. of the Local Consolidated Stat., 1859. Canada was divided into 125 electoral districts and boroughs, returning in all 130 members to the House of Assembly, 65 for Upper Canada, and 65 for Lower Canada; whilst the Legislative Council consisted of 48 elected members, and 22 members nominated under the old constitution.

In 1854 the question of the "Clergy Reserves" was settled by the application of the property to municipal purposes, vested interests being respected. In the same year seignioral tenure was abolished in Lower Canada.

As years passed, increasing difficulty was experienced in the conduct of public affairs owing to the antagonism of the members for Upper and Lower Canada. Things having come almost to a "deadlock" about 1864, an escape from the difficulty was sought in a project for the union of all the British North American provinces, which, after negotiation, was agreed to, and embodied in the "British North America Act, 1867."

There is an elected Legislative Assembly in each Province (Ontario, 90 members: Quebec, 85 members), elected for four years in Ontario and

Digitized by Google

five years in Quebec by general suffrage, with no property qualification. Members in Ontario are paid mileage and $20 per day for 30 days, or a maximum of $2,000. Members in Quebec receive $2,500 for each session of more than 30 days. Quebec also possesses a Legislative Council or Upper House of 24 members, who hold their seats for life, nominated by the Lieut.-Governor in Council. The members are paid $2,500 as sessional indemnity.

Industry.

The industrial wealth of Ontario is derived, primarily, from its farms, its forests, mines, and fisheries; secondarily, from its manufactures. In 1934, the value of the farm land, buildings, implements, production, and live stock of the province was estimated at $1,586,015,000. There are over 23 million acres of cleared farm land occupied and over 30,000,000 acres still available. The farms average 119 acres in extent, of which 82% are owned by the occupants. The average value of farm products per acre is greater than in any other province, and the total production of field crops was placed at $131,141,000 in 1934. Dairying and the breeding and feeding of live stock are combined with general farming. The gross value of the manufacturing production of the province was $1,255,325,000 in 1934.

All the fruits usually grown in the temperate zone may be produced in Ontario, not only successfully, but in a very high degree of excellence. Apples constitute the principal crop, but tender fruits such as peaches, pears, plums, and grapes, are very extensively grown in the Niagara peninsula. The canning and preserving of fruits and vegetables is a well established industry. Total commercial apple crop in 1934 was estimated at 425,000 barrels.

The value of the output of the mines and mineral industries of Ontario in 1936 was $184,670,391 as compared with $159,580,955 in 1935. The value of the gold produced in 1936 was $83,308,180 as compared with $78,068,169 in 1935. In 1936 the quantity of nickel produced was 169,739,393 lbs. and of copper 287,914,078 lbs., which were valued at $43,876,525 and $26,898,920 respectively. The quantity of cement produced was 1,542,463 barrels, worth $2,180,895. Natural gas, amounting to 10,006,743 m.c.ft., was produced in 1936, with a total value of $6,054,294, silver 5,218,354 oz., valued at $2,325,850, crude petroleum 165,494 barrels worth $348,767, as well as 1,365,606 lbs. of arsenic valued at $42,491.

Education.

In Ontario the central control is vested in the Minister of Education, who is a member of the Provincial Cabinet. General regulations are framed by him with the approval of the Cabinet for the elementary (public and separate) the continuation and high schools (including collegiate institutes) and the Vocational schools, all of which number (day and evening schools) 7,672, with 703,000 scholars in 1936. The schools are under the control of local boards of trustees, are required to have only certificated teachers, and are efficiently inspected. There is a provincial (non-denominational) university (Toronto), with an affiliated university college, and five theological colleges are also affiliated. There are also two non-denominational and two denominational universities in the Province, and numerous high schools or colleges (private foundations) for boys and girls. Ample provision is made for the instruction of the deaf and the blind. There is also a well-equipped agricultural college, now affiliated with the provincial university. Schools are attached to the reformatories for juvenile offenders of both sexes. Education, elementary and secondary, is free and is practically compulsory up to 16 years of age in urban centres. In rural sections it is compulsory up to 14 years. Public libraries receive Government grants.

Climate.

The climate is dry, bracing, and very healthy, although the range of temperature is great. The mean temperature at Toronto is 45°, at Montreal 41°; the extreme range at Toronto being from 7° below zero to 91°. The average annual rainfall at Toronto is 25 inches; at Montreal 29 inches, principally from May to September. The snowfall between December and March is about 122 inches on the average at Montreal.

PROVINCE OF ONTARIO.

Lieutenant-Governors since 1897.

ONTARIO.

1897 Hon. Sir Oliver Mowat, G.C.M.G.
1903 Sir William Mortimer Clark, K.C.
1908 Hon. Sir John Morison Gibson, K.C.M.G., K.C.
1914 Sir John Strathearn Hendrie, K.C.M.G., C.V.O.
1919 L. H. Clarke.
1921 Hon. Colonel H. Cockshutt.
1926 Hon. W. D. Ross.
1932 Hon. H. A. Bruce.
1937 Hon. Albert Matthews.

SEAT OF GOVERNMENT, TORONTO.

The Province is represented by 24 Members in the Senate and 82 Members in the House of Commons of Canada.

The population at the 1931 census was 3,431,683.

Provincial Revenue and Expenditure.

	Gross Ordinary Revenue.	Dominion Subsidy.	Gross Ordinary Expenditure.
1936-7	$94,877,218.48		$85,563,279.94

Lieutenant-Governor, The Honourable Albert Matthews, $10,000.
Official Secretary, M. Johnston.

EXECUTIVE COUNCIL.

President of the Council and Treasurer, Honourable Mitchell F. Hepburn.
Secretary and Registrar, Honourable H. C. Nixon.
Minister of Lands and Forests, Honourable P. Heenan.
Minister of Education, Honourable L. J. Simpson, M.D.
Minister of Highways, Honourable T. B. McQuesten, K.C.
Minister of Mines, Honourable Paul Leduc, K.C.
Minister of Health, Honourable H. J. Kirby, K.C.
Minister of Labour, Honourable N. O. Hipel.

Official Guardian, Percy D. Wilson, K.C.
Accountant, Thomas Yorath.
Surrogate Registrar, W. S. Anderson.
Registrar of Bankruptcy, F. G. Cook.

PROVINCE OF QUEBEC.

Quebec is growing rapidly through its agriculture, its industry, and its forests. The municipalities of the Province have a total area of 25,796,733* acres, which is about one-ninth of the total area, excluding the northern part (formerly Ungava), which was annexed in 1912.

Most farmers own their farms, and the chief products are hay, oats, and potatoes.

The value of the field crops for the year 1937 is estimated at $81,629,000, compared with $88,000,000 for the year previous to the war (1913).

The raising of beef cattle is a business of considerable importance in the Eastern Townships, and throughout the Province mixed farming is a general practice.

Dairying is one of the most important industries on the farm. The total yield of all dairy products in 1936 was $52,287,000. The butter of the Province of Quebec is renowned for its flavour, and has taken first prizes in International competitions, and the cheese commands the highest prices paid on the Montreal market by exporters to Europe.

In industrial development Quebec has made rapid progress. The census of 1911 showed that the total value of manufactured products for 1910 was $350,901,656; since then the growth has been quite phenomenal. A statement published by the Dominion Bureau of Statistics shows that the industrial production of Quebec for 1936 had a gross value of $863,687,389.

Amongst the most important industries are the following: pulp and paper, central electric stations,

* Provincial Municipal Statistics, 1936.

Digitized by Google

non-ferrous smelting and refining, cotton yarn and cloth, women's factory clothing, tobacco, cigars and cigarettes, butter and cheese, slaughtering and meat packing, petroleum products, men's factory clothing, leather boots and shoes, silk and artificial silk.

To those interested in the mining industry, the Province of Quebec offers an attractive diversity of geological formations, including the Keewatin, Laurentian and Huronian, containing gold, silver, asbestos, lead, nickel, copper, iron, zinc, phosphate, mica and granite.

In the Eastern Townships are located the well renowned mines of asbestos. Their production, which had a value of only $2,677,829 in 1910, reached in 1937 a production estimated at $14,505,541. The Province produces also several of the so called "War minerals," such as pyrite, molybdenite, magnesite, the mining of which received a very strong impetus during the hostilities. Copper, with a production estimated at $12,378,737 in 1937, is now the 3rd mineral in Quebec, while gold ranks first (excluding production of structural materials and clay products), with a production valued at $14,718,428 par value in 1937.

While land values, both in town and country, show a steady improvement in this Province from year to year, Quebec has never experienced the speculative crises that have characterized real estate transactions elsewhere, especially during the years previous to the war. During the war, production was greatly intensified in the Province, and every fiscal year ended with a material surplus. Quebec was the only Province where the moratorium was not imposed during the hostilities, and its credit, on the foreign markets, instead of diminishing, during the last years was increasing, and, hence, has largely escaped the financial stringency of the after-war readjustment.

The entire primary school organization in the Province of Quebec is under the immediate control of the Superintendent of Public Education, who is under the Provincial Secretary. The Superintendent is assisted by an English Secretary and a French Secretary, who have the rank of deputy-minister. The Council of Public Education is vested with advisory powers, and it is divided into two Committees, a Roman Catholic and a Protestant, and each of these Committees have the right to make the regulations in regard to the organization and discipline of their respective schools. These powers include the adopting of a programme of studies, the authorization of text books, the issuing of diplomas and all such matters as directly affect the internal management of the schools. The local control is vested in local elective boards. The schools are maintained partly by local taxation and fees, and partly by grants from the Provincial Government. There were, in 1936, 9,112 schools, with 700,259 scholars. There are included in the total given above forestry schools, dairy schools, trade schools, technical schools, schools for agriculture, normal schools, a school for higher commercial studies and classical colleges, and four universities—two protestant: McGill University (Montreal) and Bishop's College (Lennoxville), and two Catholic: Laval University (Quebec) and Montreal University (Montreal).

In 1898, the schools' revenue was $3,055,771; ten years later, it amounted to $5,148,887; in 1935-36 it was $21,799,511.

The average cost of education per pupil in the Province of Quebec has increased rapidly; in 1900, it was $9·87; in 1910, $15·72; in 1936, $49·23.

Population (1931 census figures): 2,874,255, an increase of 21·76 % over the 1921 figures.

Lieutenant-Governors since 1898.

1898 Sir L. A. Jetté, K.C.M.G., appointed for a second term in 1903.
1908 Sir C. A. P. Pelletier.
1911 Sir François Langelier, K.C.M.G.
1915 Sir Pierre Evariste Le Blanc, K.C.M.G.
1918 Rt. Hon. Sir Charles Fitzpatrick, P.C., G.C.M.G.
1923 Hon. L. P. Brodeur.
1924 Hon. N. Pérodeau.
1929 Sir Lomer Gouin, K.C.M.G.
1929 Hon. H. G. Carroll.
1934 Hon. Es.-L. Patenaude, K.C.

SEAT OF GOVERNMENT, QUEBEC CITY.

The Province is represented in the Council by 24 Councillors, and in the Assembly by 90 Members.

Lieutenant-Governor, Hon. Es.-L. Patenaude, K.C.
Aide-de-Camp, Lt.-Col. D. B. Papineau, The R.C.R. (ret.).

NOVA SCOTIA.

Situation, Area, and Population.

Nova Scotia is a peninsula (and the Island of Cape Breton) between the 43rd and 47th parallels, connected with New Brunswick by an isthmus about 17 miles wide; its length is about 386 miles, and its breadth about 100 at its widest, with much variation. The island of Cape Breton, separated by the Strait of Canso, forms part of the Province. The Province is 21,428 square miles in area, a small part of which consists of lakes, rivers, and inlets of the sea. The population at the census of 1931 was 512,846.

History.

Nova Scotia was first discovered by the Norsemen and rediscovered by John Cabot in 1497; it was colonised by the French in 1598; was taken by the English, and a grant of it made to Sir W. Alexander by James I. in 1621. In 1632 it was restored to France, with Quebec, by the Treaty of *St. Germain-en-laye,* but again ceded to England at the Peace of Utrecht in 1714. After the Peace of Aix-la-Chapelle, in 1748, a settlement of disbanded troops was formed there by Lord Halifax, and the city which now bears his name is the capital of that province. Cape Breton was not finally taken from the French until 1758. From 1784 to 1819 it formed a separate colony.

Description.

Halifax is the capital; population at the census of 1931 was 59,275. Its harbour is open at all seasons, and is not surpassed by any in the world, affording safe anchorage for at least 1,000 ships. A dry dock and ship-building plant is also situated at Halifax capable of accommodating the largest ships.

There are many other fine harbours which are able to afford shelter to the largest vessels. There is no point in the province distant over thirty miles from a good seaport.

Some of the other chief towns are: Annapolis, Antigonish, Dartmouth, Digby, Glace Bay, Kentville, New Glasgow, Truro, Yarmouth, Pictou, Windsor, Sydney Mines, North Sydney, Amherst, Lunenburg, and Liverpool.

Extensive iron and steel works are established at the City of Sydney and New Glasgow.

Minerals of almost all kinds abound. The production of some of the principal minerals, that are at present mined, for the fiscal year 1937, is as follows:—

Coal ..	.. 6,382,368 tons (tons of 2240 lbs.).
Coke ..	.. 408,521 tons.
Tar ..	.. 6,312,288 Imp. gallons.
Gypsum	.. 1,023,257 tons.
Gold ..	.. 20,923 ounces.
Salt ..	.. 47,249 tons.

There are large deposits of other minerals which have not, as yet, been commercially mined.

The greater portion of the inhabitants are engaged in mining, fishing, agriculture and the growth of fruit, for which the province is well adapted. Apples of different varieties and of very superior quality are extensively grown and exported to England and other parts of Europe. The 1937 crop was estimated at 2,250,000 barrels.

A considerable quantity of wood pulp is manufactured and exported, principally to England; the conditions prevailing are well suited for this industry, which is rapidly growing.

The fisheries of the province are very valuable. Their value in 1937 was $6,015,186. There are many establishments for canning and preserving lobsters and drying and preserving other fish.

The timber trade is carried on to a considerable extent. England is the chief customer, but shipments are also made to other parts of Europe. Spruce and pine are the principal kinds of timber manufactured and exported. The estimated value of the primary forest products in 1937 reached the sum of $8,500,000.

There are a number of shipyards for the building of wooden vessels, and there are plants for the construction of steel ships at New Glasgow and at Halifax. A large mill for the manufacturing of steel ships' plates is operating at Sydney.

The climate is remarkably healthful and more temperate than that of any other part of the Dominion.

Constitution.

Nova Scotia is represented in the present Dominion Parliament by 10 Members in the Senate and 12 Members in the House of Commons.

The local government is administered by a Lieut.-Governor, advised by an Executive Council of seven members (six of whom are departmental heads), responsible to the Legislature, which consists of a House of Assembly of 30 representatives elected every five years.

Education.

The present system of elementary education was established by law in 1864. The central control is vested in the Council of Public Instruction—a body identical in membership with the Executive Council of the Province. The local management of schools is vested, so far as the ordinary school sections or districts are concerned, in a Board of Trustees chosen by the ratepayers of the section or district, though in certain cases the board may be increased by two appointees of the Government. But in incorporated towns, the powers of trustees are exercised by a Board of Commissioners partly appointed by the Town Council and partly by the Government.

In 1937 there were 3,346 classrooms in operation, with a gross attendance of 116,656. Education is compulsory, *i.e.*, non-attendance exposes to pecuniary penalties between the ages of 7 and 14 in rural schools and 6 and 16 in towns and cities.

Under "The Technical Education Act," of 1907, evening technical schools and coal mining schools have been established in all the larger industrial centres in order to produce a class of educated, skilled workmen for the various manufacturing and mining industries. A central institution called "The Nova Scotia Technical College" has been established at Halifax, where instruction of a college grade is provided in mining, civil, mechanical and electrical engineering. The principal of this college is the Director of Technical Education.

Beginning with the school year 1935–36 free text books Grades I to VIII inclusive were provided by the Department of Education. The free books become the property of the school trustees to be preserved for use in succeeding years.

Facilities for Teacher-training have been provided in the three Nova Scotian Universities, and the training taken at the Universities is the equivalent of that taken at the Provincial Normal College, Truro, for purposes of teacher's licence.

NEW BRUNSWICK.

Situation, Area, and Population.

New Brunswick is situated between 44° 40′ and 48° 5′ N. lat., and 63° 30′ and 69° W. long.; its area is 27,985 square miles, or about 17,910,400 acres. It is connected with Nova Scotia by a low isthmus. The population in 1931 was 408,219 (census figures).

History.

New Brunswick was part of the ancient French Province of Acadia and was ceded to England by the Treaty of Utrecht in 1713. Great Britain, however, did not obtain full possession of the country until after the fall of Quebec in 1759. It was first colonised by British subjects from New England in 1762, and in 1783, at the close of the Revolutionary War, it received a large body of Loyalists from the Thirteen Colonies. In 1784 it was separated from Nova Scotia, of which it had formed a part.

Climate.

The mean temperature of Fredericton is about 40°, the extreme range being from 21° below zero to 90°. The average annual rainfall is 32·1 inches, and the snowfall 94·0 inches, the latter extending from December to March inclusive.

Constitution.

New Brunswick is represented in the Canadian Senate by 10 Members, and sends 9 Members to the House of Commons.

There is a Legislative Assembly of 48 Members, elected under a liberal franchise. An Act was passed in 1891 abolishing the Legislative Council from the end of the then present Parliament, and the Council came to an end with the dissolution of 1892.

Members receive $1,000 per session, and their travelling expenses.

Industries.

Coal is abundant. Recent valuable discoveries of oil have been made; copper and gypsum exist in large quantities. There are also several salt springs, and antimony, iron, and manganese have been found in considerable quantities. There are also vast deposits of rich bituminous shale, which is likely to have a good commercial value. A great portion of the country is covered by dense forests of fine timber, the cutting and working of which —or "lumbering"—furnishes remunerative employment to many. Extensive development of the pulp and paper industry, in which the water powers are being utilized, is in progress. Live-stock raising and dairying feature the agricultural activities. Wheat, Indian corn, barley, buck-wheat, and oats, are the principal cereals raised. Potatoes are the most valuable field crop. Apples and plums of excellent quality are largely grown, also strawberries, raspberries, and other small fruits. The fisheries are extensive, both sea and river. Some of the finest salmon fishing in the world is to be had in this province. Fredericton, 65 miles inland, is the capital (pop. 8,830 (1931)), but Saint John, on the mouth of the river of the same name, is the leading commercial centre (pop. 47,514 (1931)). Other cities and towns are Moncton (20,689 (1931)), Campbellton (6,505), Edmundston (6,430), Chatham (4,017), Dalhousie (3,974), St. Stephen (3,437), Newcastle (3,383), Bathurst (3,300), Woodstock (3,259).

Education.

A system of elementary education was established by Act, 1871. The central control is vested in a Board of Education, and the local management is in the hands of Boards of School Trustees. Education is free between the ages of 6 and 20. There were in 1931 2,473 schools and 84,170 scholars, exclusive of technical schools and private schools.

The University of New Brunswick, Fredericton, is the Provincial University. Other universities are Mount Allison University, Sackville, N.B., St. Joseph's University, Memramcook, N.B. and St. Thomas College, Chatham, N.B.

Lieutenant-Governors since 1902.

Provincial Establishment.

Director of Educational Services, Fletcher Peacock, M.A., LL.D.
Chief Superintendent of Education, A. S. McFarlane, M.A., LL.D., $4,000.
Comptroller-General, E. J. Cormier, $3,400.
Clerk of the Executive Council, J. B. Dickson, $2,100.
Deputy Provincial Secretary-Treasurer and Deputy Registrar General, W. B. Trites, $3,300.
Deputy Minister of Agriculture, J. K. King, $3,300.
Deputy Minister of Lands and Mines, G. H. Prince, $3,300.
Deputy Minister of Public Works, A. W. Barbour, $3,000.
Chief Medical Officer, Dr. W. Warwick, $4,000.
Deputy Attorney General, J. Bacon Dickson.
Director of Federal and Municipal Relations, James H. Conlon.

Judicial Establishment.

Chief Justice of New Brunswick, Hon. J. B. M. Baxter, $10,000.
Chief Justice King's Bench, Hon. J. H. Barry, $10,000.
Puisne Judges, Hon. W. C. H. Grimmer, Hon. C. D. Richards, Hon. A. T. Le Blanc, Hon. W. H. Harrison, Hon. J. H. A. L. Fairweather, $9,000 each.
Local Judge in Admiralty of the Exchequer Court, Hon. L. P. D. Tilley, $1,000.
Judge of the Court of Marriage and Divorce, Hon. W. C. H. Grimmer, $500.
County Court Judges, Hon. A. R. Slipp, J. L. Ryan, A. W. Bennett, J. A. Barry and L. P. D. Tilley, $5,000 each.
Registrar of the Supreme Court, H. Lester Smith, $3,300.

MANITOBA.

Area and Situation.

Manitoba became a Province of the Canadian Federation by legislative enactments taking effect on the 15th July, 1870. It is bounded on the north by the 60th parallel of latitude; on the west by the Eastern boundary of the Province of Saskatchewan; on the south by the United States; on the east by the western boundary of the Province of Ontario to Hudson's Bay, and by Hudson's Bay for a distance of 300 miles.

The area of Manitoba is 246,512 square miles, of which 219,723 square miles are land and 26,789 water.

Description.

The Southern and Northern parts of Manitoba are quite dissimilar. The Northern two-thirds are mostly rock surfaced; agriculture is confined to the Southern part. The soil there is a rich, black loam, the surface deposit showing a high content of nitrogen, phosphoric acid and potash. It is peculiarly adapted to the growth of cereal grains, and wheat possessing a high percentage of gluten is produced.

Manitoba No. 1 Northern, because of its superior milling qualities, is in great demand by millers, and has made the Prairie Provinces of Canada famous. Winnipeg is now the leading grain market on the Continent. There is a steady trend toward diversified agriculture in Manitoba and but few farmers now confine their activities solely to grain growing.

The principal agricultural exports of the country are wheat, beef, cattle, bacon, poultry and dairy products. In 1937 agricultural production included:—

Manitoba Field Crops, 1937.
(Exclusive of Native Hay and Native Pasture).

	Area Acres	Yield Per Acre Bus.	Total Yield Bus.	Average Price Per Bus.	Total Value.
Wheat	2,872,000	16·7	48,000,000	$0·97	$46,560,000
Oats	1,410,000	30·5	43,075,000	0·39	16,799,000

Fodder Corn	64,500	4·26	275,000	5·00	1,375,000
Total	6,421,600				$90,930,000

Digitized by Google

The average yield of wheat per acre for ten years is 13·85 bushels per acre. Good farms within easy reach of a railway may be purchased at from $5 to $20 per acre.

The growth of Winnipeg, the principal city, is remarkable. In 1871 it contained about 241 inhabitants; in 1896, 35,000; and in 1931 (census figures) 218,785. The other chief cities and towns of the province are Brandon, St. Boniface, Portage la Prairie, Neepawa, Emerson, Carman, Selkirk, Minnedosa, Morden, Manitou, Dauphin, Transcona, Souris, Virden, and The Pas. Population of Manitoba, 1931 census figures, 700,139.

Several brick manufacturing plants have been established throughout the province. Cement for building purposes is manufactured on a large scale. Hard wall plaster is extensively produced. A sand suitable for glass is found in great quantities. Gold, copper and other valuable minerals have been discovered in great quantities in different parts of the province, particularly in the new territory North of the Saskatchewan River, also to the East of Lake Winnipeg. Development is proceeding apace, and Manitoba, hitherto regarded as an agricultural province, gives every promise of becoming an important mining province.

Manufacturing industries are becoming numerous in Winnipeg. Statistics of manufacturers for the whole province for 1936:—1,011 industrial establishments, with a capital of $118,515,841; employees 22,507; wages and salaries $24,490,299; cost of material used $74,374,078; and gross value of products $122,050,502.

The Winnipeg Hydro Electric System on the Winnipeg River, 77 miles from the City, develops 105,000 h.p. and also develops 48,000 h.p. at Slave Falls, 6 miles below, where 96,000 will ultimately be developed. The Winnipeg Electric Company has a development of 37,800 h.p. at the Pinawa Channel of the Winnipeg River, also develops about 60,000 h.p. at Seven Sisters site where the ultimate installation is to be 225,000 h.p. at which time the Pinawa plant will be closed, and has a development of 168,000 h.p. at Great Falls.

The cost of electricity in Winnipeg for power is from 31/3 cents to 8/10 cent gross per kilowatt hour with discounts ranging from 10 to 60 per cent; and the net cost per kilowatt hour for domestic purposes is 3 cents to ·829 cent.

Railway Facilities.

In the year 1879 there was no railway in the whole of the country between Lake Superior and the Rocky Mountains. In 1937 there were in the province of Manitoba 5,919 miles of single track steam railways in operation, not including industrial track, yard and sidings. These railways afford easy access to market from all parts of the Province.

Climate.

In 1937 the extreme range was 37° below zero to 97°. The climate is bracing and healthy. The average annual precipitation at Winnipeg is 20·37 inches. Total precipitation for 1937 was 19·82 inches.

Constitution.

Manitoba is represented by 6 members in the Dominion Senate and 17 members in the House of Commons.

The Province has a Legislative Assembly of 55 members elected by adult suffrage, for 5 years. The Legislative Council or Upper Chamber was abolished by a local Act passed in 1876. The members of the Legislative Assembly are paid $1,674·00 per session.

Education.

By the "Public Schools Act" of 1890, a system of schools was established throughout the Province. This Act provides "that all public schools shall be free schools, and that every person between the ages of 6 and 21 years shall have the right to attend some school." Attendance is compulsory to the age of 14.

In 1937 there were 2,063 school houses employing 4,458 teachers and with an enrolment of 140,542 pupils. There are 15 junior high schools, 136 one-room high schools, 38 two-room high schools, 23 collegiate departments and 27 collegiate institutes. Normal schools are provided for the training of teachers.

There is one University, The University of Manitoba, with four faculties, namely, Arts and Science (including Pharmacy), Medicine, Engineering and Architecture, Agriculture, Home Economics and Commerce. The enrolment in 1937–38 was 2,697 in regular courses, and in addition 1,435 in Summer School and Extension courses. The following colleges are affiliated: St. Boniface, St. Paul's and St. Mary's (Roman Catholic), St. John's College (Church of England), United Colleges (United Church) and Brandon College (non denominational). Law is taught in Manitoba Law School, which is under the direction of trustees jointly appointed by the University and the Law Society of Manitoba.

Finances.

Fiscal year ending 30th April, 1937:—

Total Revenue.	Dominion Subsidy.	Expenditure.
$16,932,889	$1,703,091·38 and special subsidy 750,000·00	$16,427,700

Lieutenant-Governors since 1895.

1895 Hon. J. C. Patterson.
1900 Sir D. H. McMillan, K.C.M.G.
1911 Sir D. C. Cameron, K.C.M.G.
1914 Sir James Aikins, Kt.
1926 Hon. T. A. Burrows.
1929 Hon. J. D. McGregor.
1934 Hon. W. J. Tupper, K.C.

Seat of Government—Winnipeg.

Lieut.-Governor, Hon. W. J. Tupper, K.C.
Private-Secretary, R. Chrystal Irving.

Executive Council.

Premier, President of Executive Council, Provincial Secretary and Railway Commissioner, Hon. J. Bracken.
Attorney-General, Minister of Telephones and Telegraphs and Municipal Commissioner, Hon. W. J. Major, K.C.
Minister of Public Works and Labour, Hon. W. R. Clubb.
Minister of Health and Public Welfare, Hon. I. B. Griffiths.
Minister of Agriculture and Immigration, Hon. D. L. Campbell.
Minister of Education, Hon. Ivan Schultz.
Minister of Mines and Natural Resources, Hon. J. S. McDiarmid.
Provincial Treasurer, Hon. S. S. Garson, K.C.

Deputy Provincial Treasurer, R. McN. Pearson.
Deputy Minister of Agriculture and Immigration, J. H. Evans.

General Election—July 27th, 1936.

BRITISH COLUMBIA.

Situation and Area.

British Columbia is the western province of the Dominion of Canada, situated on the north-west coast of North America, and comprising the territory bounded on the north by the 60th parallel, on the east by the 120th meridian to the 54th parallel, and the Rocky Mountains to the 49th parallel, on the south by the United States, and on the west by the Pacific Ocean to the 55th parallel and Alaska to the 60th parallel.

The length of the coast line in a direct line north and south, is 541 miles, but the total length, following the sinuosities of the coast, is 4,334 miles, exclusive of islands. The coastline of Vancouver Island is 1,884 miles, and the length 285 miles. The area (including Vancouver Island and Queen Charlotte Island) is 366,255 square miles. The distinguishing physical features of British Columbia are the rich valleys which produce in abundance all kinds of agricultural produce and intersect the country in parallel lines, the general direction being north and south; the extensive plateaux of the central interior; the vast forests of commercial timber; the great mountain ranges, and the deeply indented seaboard. The population, at the census of 1891, was 98,173; 1901, 178,657; 1911, 392,480; 1921, 524,582; 1931 (census figures), 694,263.

History.

Vancouver Island was granted to the Hudson's Bay Company under certain conditions in 1849, and the same year it was made a Crown colony. British Columbia was constituted a Crown colony in 1858, in consequence of the large immigration on the discovery of gold in the Thompson and Fraser Rivers. In 1866 the colonies of British Columbia and Vancouver Island were united under the former name, and in 1871, British Columbia entered the Dominion of Canada as a Province. The Province is represented by six

Digitized by Google

members in the Senate, and fourteen members in the House of Commons of Canada.

Constitution.

The Provincial Government is administered by a Lieutenant-Governor and an Executive Council, or Cabinet, of nine Ministers, members of the legislative assembly of 48 members, on the British system of ministerial responsibility. The House of Assembly is elected for five years, every male and female adult (British subjects) having resided six months in the Province and duly registered, being entitled to a vote. In 1917 the franchise was extended to women. Members of the Legislature receive a sessional indemnity of $2,000, and a mileage allowance for travelling expenses.

Crown Land and Surveys.

The area of the Province of British Columbia is 234,403,200 acres (new official estimate given by the Chief Geographer).

Of this area 15,062,684 acres are Crown Granted, of which 6,639,841 acres are included in railway grants, about 6,189,098 acres are in process of alienation, which includes about 4,355,329 acres held at the present time under timber licenses and leases and 918,652 acres under grazing or coal leases.

About 23,000,000 acres are estimated to be available for agriculture and 160,000,000 acres for grazing purposes, and 13,790,763 acres are under park and forest and game reserves.

A total of 33,498,386 acres have been surveyed, 9,000,000 acres of which are surveys of timber areas 500,000 of mineral claims and 189,800 acres of coal Petroleum and natural gas leases.

Approximately 4,600,000 acres of surveyed land is available for free pre-emption. Geographic and land maps can be obtained on application to the Department of Lands; also maps, handbooks, and descriptive matter from the Bureau of Provincial Information.

Agriculture.

Agriculture in British Columbia has progressed steadily during the past four years. Mixed farming, stock raising, dairying, fruit-growing, poultry raising and truck gardening are the principal sources of agricultural production in the province. Preserving of fruit and vegetables has become quite an industry in the last year or two. The total value of farm products in 1937 was $50,024,542; live stock $4,139,000; poultry products $4,359,000; dairy products $12,842,650; fruits $7,656,319; vegetables †$2,473,991; field crops $16,613,250; hops $475,700; grains $5,688,500; wool $155,000; honey $214,121.

Mining Industry.

The total mineral production of British Columbia in 1937 amounted in value to $74,475,902*, towards which gold contributed $17,680,972*; silver $5,075,451; coal $6,139,920; copper $6,023,411; lead $21,416,949; zinc $14,274,245.

Detailed reports are obtainable from the Bureau of Mines, Victoria.

Shipping, 1937.

* Canadian Funds.

Revenue and Expenditure, 1937-38.

Receipts.	Expenditure.
$26,469,341.†	$26,390,594.†

Forest Wealth.

The stand of merchantable timber in the Province of British Columbia is estimated to reach the enormous total of 276 billion feet board measure which is over half the total of all Canada.

British Columbia occupies an especially advantageous position for supplying the overseas markets. It has vast quantities of timber unsurpassed in size, quality, and suitability for the manufacture of all kinds of dimension timber, lumber, piling, railway ties, pulp, paper and other products. The principal export timber trees of British Columbia are Douglas Fir, Western Red Cedar, Western Hemlock, and Sitka Spruce or Silver Spruce. The total production from British Columbia forests during 1937 was $80,872,000,* including sawn lumber to the value of $40,638,000,* shingles $6,875,000,* pulp and paper $17,214,000.*

Water Resources.

There is probably no area on the continent of America so favoured in water power resources as between six to eight million horsepower is known as available for development. The total power developed is 718,497 horsepower. The development of hydro-electric power has been left to private enterprise, but the administration of the water resources is vested in the Water Rights Branch of the Dept. of Lands. Electrical energy for the Cities of Vancouver and New Westminster and the adjoining municipalities in the Frazer river delta is supplied from the two Buntzen-Coquitlam stations and the three Alouette-Stave-Ruskin stations with a total of 202,000 h.p. developed and an ultimate capacity of 343,000 h.p. In addition there is under construction the Bridge river development with an ultimate capacity of 600,000 h.p. which will also serve this area. The City of Victoria and the lower end of Vancouver Island is served from the Jordan river and Goldstream developments of 40,000 h.p.

In the interior the chief water power developments are on the Kootenay river where 226,000 h.p. furnishes electrical energy, mainly for electrolytic refining of metals at Tadanac, as well as serving many towns in the southerly portion of the Province. The principal industrial developments on the Coast are at Powell River and Ocean Falls where some 100,000 h.p. is utilized in pulp and paper mills.

In regard to irrigation, such is largely practised south of the 51st parallel of latitude. Water has been recorded for upwards of 600,000 acres of lands, of which approximately 100,000 have been brought under cultivation. The fruit areas depend to considerable extent upon irrigation. The largest and one of the most important of these is the Okanagan Valley, which now has a well-established fruit and vegetable industry. Through cooperation in production and marketing, those areas dependent upon irrigation are becoming very attractive.

Fisheries.

The commercial fisheries of British Columbia are of considerable importance. Salmon, halibut, and herring are the principal food fishes, and cod, oolachans, pilchard, clams, oysters, shrimps, etc., are also produced in large quantities. The canning of salmon has been an important industry for half a century; 1937 pack, 1,508,577 cases. The whale fisheries are also a not unimportant branch of the fishing industry.

* Provincial figures. † Estimate.

Digitized by Google

Value of total production, 1937, $16,155,439, being nearly half the total for the Dominion.

Iron and Steel.

Large iron deposits, magnetite, limonite, and hæmatite, exist, with large metallic iron content and sufficiently free from impurities to be within the "Bessemer limit." Anticipations are that steel and iron will be developed in the near future.

Railways.

British Columbia has 4,097 miles of steam railway in operation (single track mileage). Electric railways have mileage of 224 miles, including about 100 miles of interurban roads. The Canadian Pacific Railway, the Canadian National Railways, and the Pacific Great Eastern Railway, are the main railways of the Province, with various branches of the Canadian Pacific and Canadian National Railways extending through the southern and south-western portions of the Province, and additional lines entering the Province from the United States.

Education.

A complete system of free and compulsory education was established by Act No. 16 of 1872. The central control is vested in the Council of Public Instruction, composed of members of the Executive Council. The Minister of Education directs the general management of the schools through the Superintendent of Education. In each rural school district three trustees are elected to attend to the local affairs of the school, and in municipal school districts seven, five or three (according to grade, whether cities of the first, second or third class, or district municipalities) trustees are elected for this purpose.

There were at the end of June, 1937, 105 high schools, with 22,338 scholars in the Province, 20 junior high schools and 43 superior schools. The number of school districts in operation is 763 with 4,125 teachers, and 118,431 pupils. In addition there were 2,049 students at the University of British Columbia; 171 at Victoria College, 215 at the two Normal Schools; 7,901 attending night schools, and 2,687 pupils in correspondence classes. The schools are free and non-sectarian. The highest morality must be inculcated, but no religious dogma or creed is permitted to be taught. Schools are established wherever there are 6 children between the ages of 7 and 15 years available for school purposes.

Lieutenant-Governors since 1900.

1900 Sir Henri Joly de Lotbinière, K.C.M.G.
1906 J. Dunsmuir.
1909 T. W. Paterson.
1914 Sir Frank Stillman Barnard, K.C.M.G.

Local Judge in Admiralty of the Exchequer Court, Hon. A. Martin.

PRINCE EDWARD ISLAND.

Situation and Area.

This island, which was admitted into union with the Dominion of Canada on the 1st July, 1873, is situated almost wholly between 46° and 47° N. lat., and between 62° and 64½° W. long. Its area is 1,397,990 acres, or 2,184 square miles; it is about 150 miles long, and 34 its greatest breadth. It was discovered by Jacques Cartier, 1534; it was first settled by the French, but was taken from them in 1758. It was annexed to Nova Scotia in 1763, but, on the petition of the inhabitants, was constituted a separate Colony in 1769.

The population at the last census (1931) was 88,038.

Description.

The climate is milder than in the neighbouring provinces, and is considered very healthy. The island is generally well wooded and watered, and the soil is fertile.

Besides the usual domestic industries of an agricultural people, there are numerous grain mills, and establishments for canning and preserving lobsters, fish, etc. Many cheese and butter factories have been established. The breeding and raising of silver and black foxes in captivity is an important industry, there being approximately 600 fox ranches in the province.

The waters adjoining comprise by far the most valuable section of the fishing grounds of America, and are very largely resorted to.

Digitized by Google

The chief towns are Charlottetown (12,361) and Summerside (3,759). A line of railway traverses the island, belonging to, and worked by, the Dominion Government. It is 210 miles in length, including branches. A railway is constructed through Belfast and Murray Harbour (about 50 miles), and one of the longest bridges in Canada is erected across the Hillsboro' River, over which trains and carriages run. Branch railways are built to Montague, Vernon River Bridge and Borden.

Constitution.

Responsible Government was established in Prince Edward Island in 1851. There is a Lieutenant-Governor, appointed by the Governor-General, an Executive Council (the Cabinet) of 9 members, and a Legislative Assembly of 30 elected members. Each member receives a payment of $400 per annum.

The island is divided into three counties, King's, Queen's, and Prince, each of which elects ten representatives to the Assembly. The island is also represented in the Dominion Parliament by four members in the Senate and four in the House of Commons.

Education.

A system of general education is established by law. The central control is vested in a Board of Education of eight members, presided over by the Minister of Education. The local management is in the hands of a chief superintendent. Education is free, non-sectarian, and compulsory between the ages of 7 and 13 years. There were in 1937, 478 schools, with 18,146 pupils. There is one higher college amalgamated with the normal school, and local high schools have been established in Summerside and Montague. In addition to the above there is also a Roman Catholic University not under the control of the Government, and six private schools.

Finance.

There is a provincial tax on Land, Incomes and personal Property, also a Succession Duty. There is a road tax in the country, and municipal rates in the towns.

Total Ordinary Revenue for the year ended 31st Dec., 1937 .. .. $1,821,268
Total Ordinary Expenditure same year $1,942,041
Dominion Subsidy same year $647,181·88 (included in above receipts).

Lieutenant-Governors since 1899.

1899 P. A. McIntyre.
1904 D. A. Mackinnon, K.C.
1910 B. Rogers.
1915 A. C. Macdonald.
1919 M. Mackinnon.
1924 Hon. F. R. Heartz.
1930 Hon. C. Dalton.
1933 Hon. G. D. DeBlois.

SEAT OF GOVERNMENT—CHARLOTTETOWN.

King's Printer, F. L. Dillon.
Collector of Customs at Charlottetown, L. Goodwin.

PROVINCES OF SASKATCHEWAN AND ALBERTA.

By a Canadian Act, 38 Vict., cap. 49, the territories formerly known as "Rupert's Land" and the North-Western Territory, were, with the exception of such portions thereof as form the Province of Manitoba and the district of Keewatin, called and known as the North-West Territories, and were created into a Government entirely separate and distinct from Manitoba. The Act was put into force by Proclamation of 7th October, 1876. The Territories were governed by a Lieutenant-Governor, aided by an Executive Council.

By chapters 3 and 27 of the Acts of 1905, the two provinces of Alberta and Saskatchewan were formed out of the southern portion of the Territories, and were admitted into the Dominion as such on the 1st September, 1905. The dividing line runs North and South being meridian 110 West of Greenwich.

SASKATCHEWAN.

Saskatchewan, called after the river of the same name, meaning "rapid current," has an estimated area of 251,700 sq. miles, and a population in 1936 (census figures) of 930,893 persons, an increase of 9,108 over that of 1931. It lies between 102°–110° West and 49°–60° North, with Manitoba on the East and Alberta on the West. The Government consists of a Lieut.-Governor, an Executive Council and a representative Assembly of 52 members. The Province is represented in the Dominion Parliament by 21 members in the House of Commons, and 6 in the Senate. The seat of Government is at Regina (named in honour of Queen Victoria).

Saskatchewan has a total of 161,088,000 acres of which 5,323,520 are under water. It is estimated that 93,458,000 acres of its total land area of 152,304,000 acres is suitable for agriculture. A provincial land scheme is in operation whereby Crown lands are made available for homestead entry by British subjects, resident in Saskatchewan for twelve months prior to making application, upon meeting certain requirements, details of which are available on application to the Dept. of Natural Resources, Regina.

While agriculture is Saskatchewan's basic industry, with wheat, oats, barley, rye, flax and corn being grown abundantly, mixed farming is becoming more and more the popular thing throughout many of the province's areas. Marked development is seen in Saskatchewan's mining and fishing industries, and an almost phenomenal progress has been recorded during the past two and three years. Coal, gold, copper, zinc, silver, sodium sulphate, refractory clays and natural gas are annually on the increase. Whitefish, trout, pike, pickerel, sturgeon and goldeye are the most important species of fish that are landed yearly. Fur trading, forestry, water-power and transportation are also important Saskatchewan industries.

Particulars of the principal agricultural products in 1937:—

Estimate of Acreage, Yield, Production and Price, also Total Value of Grain and Other Crops of Saskatchewan, 1937.

The Province is traversed by seven lines of steam railway, with a total (including branch lines) of 8,791 miles of track.

The University of Saskatchewan located at Saskatoon grants degrees in arts, science, pharmacy, accounting, agriculture, law, and engineering. The summer school offers courses for degrees for teachers and courses leading to various degrees. There are also courses in biology, bacteriology, and subjects leading to degrees in medicine and dentistry. The University has an Extension Department for the conveyance of information to those unable to attend the University.

PROVINCE OF ALBERTA.

Alberta, as noted above, was created a Province by an enactment of the Parliament of Canada, taking effect September 1st, 1905, out of the territory acquired from the Hudson's Bay Company. Previously it formed part of the North-West Territories. The total area of the Province is 255,285 square miles, including about 6,485 square miles of water. The Government is vested in a Lieut.-Governor, an Executive Council, and a Legislative Assembly composed of sixty-three (63) members elected by the people, for five years. The Executive Council consists of eight Members. The seat of Government is at Edmonton.

The population of Alberta increased from 73,022, in 1901, to 588,454, in 1921, to 731,605 in 1931, and to 772,745 in 1936.

Alberta has about 87 per cent. of the coal resources of the Dominion, and 21 per cent. of the coal resources of North and South America. It has some anthracite, and very large supplies of domestic, also steam and coking coal. Coal beds cover a large part of the area of the province. The production of coal mines for 1937 was 5,551,682 tons.

It has valuable fish and timber resources in the centre and north, and is noted for its game of all kinds.

The total area in field crops, 1937, was 13,408,600 acres. Of this over 11,000,000 was in grain.

	Acres.	1937 Yield. Bush.	Value.
Wheat ..	7,834,000	74,000,000	72,520,000
Oats ..	2,789,000	77,000,000	27,720,000
Barley ..	995,300	22,100,000	9,945,000
Rye ..	155,000	1,185,000	818,000
Flax ..	20,000	124,000	186,000

Millions of acres of free lands are open for entry, chiefly in the northern part of the province.

The dairy production in 1937 was worth $17,137,900. The province has a large outside market for surplus creamery butter.

There are 5,740 miles of steam railway in operation (Dec. 31, 1935). The Government of Alberta own, control, and operate practically all the telephone system of the Province, mileage of wire consisting of approximately 290,000 miles.

There is a University of Alberta at Edmonton.

There were, in 1937, 3,827 school districts, with 5,935 classrooms and 167,950 pupils.

Revenue and Expenditure (Year ended March, 1937).

	Receipts.	Expenditure.
1936-37	$20,743,045·72	$20,665,192·83

NORTHWEST TERRITORIES.

Reconstituted 1st September, 1905. Area 1,309,682 Sq. Miles. Population 1931 Census, 9,723.

Seat of Government, Ottawa.

The Northwest Territories comprise the territories formerly known as Rupert's Land and the Northwestern Territory, except such portions thereof as form the provinces of Manitoba, Saskatchewan and Alberta and the Yukon Territory, together with all British territories and possessions in North America and all islands adjacent thereto, not included within any province, except Newfoundland and its dependencies. For administrative purposes the Territories were subdivided into the provisional districts of Mackenzie, Keewatin and Franklin by Order in Council of the 16th March, 1918. The Northwest Territories are governed by the Commissioner, the Deputy Commissioner and five councillors appointed by the Governor General in Council. The Commissioner in Council has power to make ordinances for the Government of the Territories under instructions from the Governor General in Council or the Minister of Mines and Resources, subject to any Act of Parliament of Canada applying to the Territories, respecting such matters as direct taxation to raise revenues, establishment and tenure of territorial offices, maintenance of municipal institutions, administration of justice, issue of licenses, education, public health, property and civil rights, and generally all matters of a local nature.

Territorial Council.

(Appointed by the Governor-General in Council.)

Commissioner, Charles Camsell.

Deputy Commissioner, Roy Alexander Gibson.

Members of the Council, Austin Louis Cumming, Kenneth Robinson Daly, Harold Wigmore McGill, Oscar Douglas Skelton, Stuart Taylor Wood.

Dominion Officials.

Director, Lands, Parks and Forests Branch, Roy Alexander Gibson, Ottawa.

Stipendiary Magistrates, Mackay Meikle, John Edward Gibben, Omer St. Germain, James Alfred Urquhart.

Sheriff, Mackay Meikle, Fort Smith.

Registrar, Land Titles, K. R. Daly, Ottawa.

Legal Adviser, W. M. Cory, Ottawa.

Public Administrator (Mackenzie District), H. Milton Martin, Edmonton, Alta. *(Franklin and Keewatin Districts)*, W. M. Cory, Ottawa.

Agent and Superintendent, Wood Buffalo Park and Mining Recorder, Mackay Meikle, Fort Smith.

YUKON TERRITORY.

ORGANIZED JUNE 13TH, 1898. AREA, 207,076 SQ. MILES. POPULATION 1931 CENSUS, 4,230.

SEAT OF GOVERNMENT, DAWSON.

The Yukon was created a separate Territory in June, 1898, by Act of Parliament (The Yukon Act). By amending legislation provision is made for a local Government composed of a Chief Executive, styled Commissioner (since classified Controller), also an Elective Legislative Council of three members with a three-year tenure of office. The Controller administers the Government of the Territory under instructions from the Governor-General in Council or the Minister of Mines and Resources. The Controller in Council has power to make ordinances dealing with the imposition of local taxes, sale of liquor, preservation of game, establishment of territorial offices, maintenance of prisons and municipal institutions, issue of licenses, incorporation of companies, solemnization of marriage, property and civil rights, administration of justice, and generally all matters of a local and private nature in the Territory.

TERRITORIAL COUNCIL.

(Three members elected 1937, for 3 years).

Dawson District, John A. McDonald, Granville.
Whitehouse District, G. W. Wilson, Whitehorse.
Mayo District, Ernest J. Corp, Keno.

TERRITORIAL OFFICIALS.

Treasury Department.

Territorial Treasurer, P. Powell.
Superintendent of Roads and Public Buildings, J. H. McNeill.

Education Department.

Superintendent of Schools, Ronald Hulland.

NEWFOUNDLAND.

Situation and Area.

Newfoundland is an island situated between 46° 37′ and 51° 39′ N. lat., and 52° 35′ and 59° 25′ W. long., on the north-east side of the Gulf of St. Lawrence; the greatest length from north to south is 350 miles, and average breadth about 130; its estimated area is 42,000 square miles, or one-third of that of the United Kingdom. Population, 284,844 (Census 1935).

Labrador.

Labrador, discovered by the Norseman Lief, son of Eric the Red, in A.D. 1,000, and (in 1497) by Cabot, was early frequented by Basque, and subsequently by Breton fishermen. Population, 4,264. It became British on the conquest of Canada (1759). In 1763 the Atlantic coast was annexed to Newfoundland, but was temporarily re-annexed to Quebec from 1774 to 1809. The first judicial court was established in 1824; it was revived in 1863 and again in 1909. During the summer months several Justices of the Peace are upon the coast.

By the decision, on March 1st, 1927, of the Judicial Committee of the Privy Council, the Atlantic watershed of the Labrador peninsular, including the basin of the Hamilton, was awarded to Newfoundland. This decision was the outcome of a dispute between Canada and Newfoundland as to the ownership of this region, which had lasted for 25 years and was ultimately by agreement submitted to the arbitrament of this Tribunal. Canada claimed that the "Coast of Labrador" which was attached to Newfoundland in 1763, was merely a strip of seaboard necessary for carrying on of the fisheries prosecuted there, and suggested that Newfoundland should only be awarded a strip one mile deep following the sinuosities of the seaboard. Newfoundland, however, contended that the word "coast" should be interpreted in its larger sense as a region or country, such as "the Gold Coast" or the "Coromandel Coast," and that this should embrace the whole territory to the height of land. This contention was upheld by the Tribunal which fixed the boundary as follows: "A line drawn due north from the eastern boundary of the bay or harbour of Blanc Sablon as far as the fifty-second degree of north latitude, and from thence westward along that parallel until it reaches the Romaine river, and then northward along the left or east bank of that river and its head waters to their source and from thence due north to the crest of the watershed or height of land there, and from thence westward and northward along the crest of the watershed of the rivers flowing into the Atlantic Ocean until it reaches Cape Chidley," at the entrance to Hudson's Strait. The remainder of the Labrador peninsula forms part of Canada. The area is about 112,000 square miles (equal to that of the United Kingdom), with a coast line of some 600 miles. The outside coast line is bleak, but the shores of the bays and rivers are well wooded, and in some cases densely so, the timber being high and sound, the temperature of the interior being, as a rule, like that of northern Canada. There are about 4,700 permanent inhabitants (some 750 Eskimo, the remainder of British descent), occupied in the fisheries and in trapping. The population is greatly increased in summer by fishermen and sportsmen, over 1,000 vessels being employed. Battle Harbour (Strait of Belle Isle) is the chief port, amongst the other villages being the Moravian Mission stations (commenced 1770) at Hopedale, Nain, Okkak, Hebron, Ramah, and Killinek. The Customs duties are those of Newfoundland.

History.

The island was discovered by John Cabot in 1497; it was as early as 1500 frequented by the Portuguese, Spanish, Basque and French, for its fisheries. Sir Walter Raleigh and others, in the reign of Queen Elizabeth, attempted to colonise this island, but were not successful. In 1583 Sir Humphrey Gilbert formally took possession of the Island in the name of Queen Elizabeth, and it was incorporated into the realm of England. In 1623, Sir G. Calvert, afterwards Lord Baltimore, established himself in the Peninsula of Avalon, the south-east part of the island, and appointed his son Governor. In 1634 a party of colonists was sent over from Ireland, and twenty years after some English colonists arrived, having emigrated by means of a Parliamentary grant.

The French, about 1620, established a station at Placentia; and for many years the French and English settlers were constantly annoying each other. At the Peace of Utrecht in 1713, subsequently ratified by the Treaty of Paris, the exclusive sovereignty of Newfoundland was acknowledged to belong to Great Britain, certain rights being granted to French fishermen, the extent of which long remained in question between the two nations. The French possess the small islands of St. Pierre and Miquelon, and the district is resorted to annually by a French fishing fleet from St. Malo, Granville, St. Brieuc, Bordeaux, Quimper, St. Nazaire, &c. They claimed the exclusive right to fish along the coast from Cape John on the east coast round the north to Cape Ray on the west coast, upon which they were allowed temporary structures for drying the fish. That this right was an exclusive one was never admitted by Great Britain, which also contended that it did not include a right to the lobster fishery. By the declaration attached to the Treaty of Versailles in 1783, the King of Great Britain undertook to remove the fixed fishery settlements on the part of the coast to which the French rights extend. A proposal for the settlement of all the questions was agreed to in 1885 by commissioners representing France and England, but was rejected by Newfoundland. An agreement for the reference to arbitration of the lobster fishery question was signed in 1891, but the law approving it did not pass the French Chamber. Pending the arbitration, the *modus vivendi*, which had been adopted in 1890, limiting the erection of new factories, was renewed. The Colony reluctantly passed legislation in 1891 for enforcing it for three years, but rejected the draft permanent Bill for giving effect to the treaty obligations in the session of 1892. The Act was first continued to 31st December, 1895, then to 31st December, 1897, and in 1897 it was further

Digitized by Google

continued to 31st December, 1898. By legislation passed in each subsequent session the Act of 1891 was continued until the 31st day of December.

The dispute was finally settled by the Anglo-French Convention of the 8th April, 1904, in connection with other outstanding questions between the two countries. Under that Convention, France renounced the privileges under Art. xiii of the Treaty of Utrecht (*see* Cd. 1952). The arrangement has been of great benefit to the Colony, since it removed an obstruction to local development, to mining and other industrial enterprises, over some two-fifths of the whole coast line.

Industries.

The industries of the island are fishing, agriculture, mining, lumbering, and manufacturing. The fisheries are of course confined to the sea coast as are also most of the agricultural operations. Mining is at present centred at Buchans, Red Indian Lake, in the interior of the island, and at Bell Island, in Conception Bay. Lumbering is carried on in wooded regions in the interior and near the sea coast, and paper making is located at Grand Falls and Bishop's Falls, in the interior, and at Corner Brook, on the shore of Bay of Islands.

Up to the last decade dried cod (965,699 cwts. valued at $4,189,734 in 1936-37) was the largest export, but gradually since 1925 paper (298,406 tons, valued at $13,202,114 in 1936-37) has superseded it in value. Other large exports are salmon, herrings, lobsters, cod liver oils and meal, seal oil and skins, whale oil, iron ore, copper, lead and zinc concentrates, and timber.

Copper has been worked for export at Tilt Cove, Little Bay, and Betts Cove, on the N.E. Coast, and at York Harbour, on the W. Coast; iron pyrites at Pilley's Island and Baie Verte, on the N.E. Coast; and asbestos in the interior from Port-au-Port, on the W. Coast. Immense beds of hematite iron ore have been laid bare at Bell Island, and large quantities are being exported. Buchan's Mine, Red Indian Lake, in the interior, has proved to be one of the greatest mineral discoveries of recent years. The ore is complex, containing zinc, lead, copper, silver and gold. Many millions of tons of ore are in sight giving values of approximately $35 per ton. The mine is in the producing stage and concentrates are shipped regularly to the smelting plants of the American Smelting and Refining Company. Promising areas are held by the Porcupine Goldfields, Ltd., in the same locality, and ore similar to that of Buchan's has been discovered on their holdings. Large areas in this neighbourhood are being investigated by other companies drawn to Newfoundland through the widespread interest created by the Buchan's discovery.

There are good signs of the revival of the copper industry. Successful operations at Great Gull Lake would help to bring about the reopening of Tilt Cove and other mines in Notre Dame Bay.

An examination of the gold bearing areas was made during the summers of 1934 and 1935 and reports have been issued by the Department of Natural Resources.

Other deposits, metallic and non-metallic, are chromite, molybdenite, limestone, slate, gypsum, coal, oil shale, cement rock, marble, and building stone.

The establishment of large and well-equipped paper mills at Grand Falls, in the interior, by the Anglo-Newfoundland Development Company, has opened up a very large industry. The paper and paper pulp is shipped to the United Kingdom and used in the principal London printing offices. A model town has been laid out which is well lighted, watered, and drained. It is very picturesquely situated, and is on the line of the Newfoundland railway through the interior, while a private line of rail connects the works with Botwood, the principal port on the Exploits for summer shipments. The Paper Plant at Grand Falls has been enlarged from the original three Paper Machines to six, thus increasing production to 500 tons of paper per diem.

The Albert Reed Company, of London, have completed a large pulp mill at Bishop's Falls, about nine miles from Grand Falls, where pulp is being manufactured for English mills. This company have also installed machinery for the manufacture of paper. At Lomond, in Bonne Bay, on the West Coast, the St. Lawrence Lumber and Pulp Co. are erecting large mills for the manufacture of lumber and pulp.

The Mill at Bishop's Falls has since been acquired by the Anglo-Newfoundland Development Company, and the pulp produced there is pumped to Grand Falls and used in the manufacture of newsprint.

The Humber development scheme, launched by the Newfoundland Power and Paper Co., Ltd., with the full sanction of the Newfoundland Government, was designed to utilize water power capable of developing hydro-electric energy of 250,000 horse power, and to involve the employment of more than 1,500 people, and the making of a new town at Corner Brook of about 7,000 people in the western portion of the Island. The mills were to have a producing capacity of 400 tons of finished paper daily. Apart from the power required for the mills, a surplus was estimated sufficient for all local or domestic purposes on the whole of the west coast, and also for the large mining areas in that part.

The scheme received support from both the British and Newfoundland Governments, the British Government guaranteeing £2,000,000 under the Trade Facilities Act. Early in 1927 it became known that this enterprise was in financial difficulties and that its owners were trying to dispose of it. Eventually they interested the International Paper Company of New York, one of the largest American paper-making companies, which in turn effected an agreement with the Newfoundland Government, ratified by the Legislature in September, 1927, whereby the International acquired the enterprise, and undertook its enlargement, under certain concessions from the Colony.

The maximum capacity of the mill is 600 tons newsprint per diem. The output at the present time is about 500 tons per diem.

The cod fishery is the staple industry, and after this in importance rank the fisheries for salmon, seal, herring and lobster. Haddock is taken in substantial quantities. The cod appears off the coast early in May, and the fishery extends north for over 1,000 miles, including the coast of Labrador, the grounds varying in depth from 50 to 600 feet. The home consumption is estimated at about 100,000 quintals and the export in 1936-37 was 965,699 cwts. valued at $4,189,734; 30 bank cod go, on an average, to one quintal. A fair average of fish (general run) per quintal would be 80. The export is mainly to Portugal, Spain, Brazil, Italy, Greece, the British West Indies, the United States, and the United Kingdom.

The chief imports are flour, textiles, woollens and cottons, hardware, cutlery, salt pork, molasses, butter, and salt. These are obtained mainly from Canada, the United Kingdom, and the United States.

Currency and Banking.

Branch banks of the Bank of Montreal, Bank of Nova Scotia, Royal Bank of Canada, and Canadian Bank of Commerce have been opened in St. John's,

Digitized by Google

branches of the Bank of Nova Scotia in Harbor Grace and in 10 other towns; branches of the Bank of Montreal at Bay of Islands, Grand Falls, and 2 other places, and 4 branches of the Royal Bank of Canada at various points.

The legal tender currency (*see* Act IV of 1895) is British sterling, United States gold, and Colonial coins. Silver is legal tender to the extent of $10, and copper to the amount of 25 cents. Accounts are kept in dollars and cents. Exchange $4.86⅔ to the pound sterling.

In the Government Savings Bank deposits in 1935 were $2,343,378.

Means of Communication.

There is a railway from St. John's to Carbonear, 84 miles in length, the property of the Government. The total approximate cost of construction was $2,500,000. A branch line has been constructed by the Government, connecting with Placentia. Its length is 27 miles, and it was built at a cost of $525,000. The railway to the Exploits River, a distance from Whitbourne of 200 miles, was built at a cost of $3,120,000. The line from Exploits, *via* Bay of Islands and Bay St. George, to Port-aux-Basques (a distance of 285 miles approximately) is completed, the cost being $4,446,000. Branch lines to Carbonear, and Lewisport, N.D.B., are also completed. The total length of these lines, with branches, is about 638 miles. A branch line to Bonavista is in operation. By the transinsular railway regular connection is made with the continent thrice weekly in summer, and twice weekly in winter, the intervening strait being crossed in the first-class passenger steamer "Caribou" which makes the passage in six hours. About 750 miles of postal and 1,700 miles of district roads are maintained.

A "good roads" policy was adopted in 1925 and as a result there has been built in the last ten years 650 miles of Highroads. 465 miles of other roads have been improved. There are 60 miles of Asphalt macadam retread.

Concrete bridges have been substituted for wooden bridges to the number of 250, varying in length from 15 feet to 1,140 feet, and hundreds of wooden culverts have been replaced by concrete culverts.

There are 2,494 miles of Postal Telegraph lines and 1,547 miles of Postal Telephone lines. There are 151 Postal Telegraph Stations, 93 of which are internal point to point Wireless Stations, also 10 Wireless Stations along the Labrador Coast.

Cape Race and Fogo wireless stations, operated by the Marconi Wireless Co., have constant communication with ships at sea. Cape Race has also a Navigation direction finding station available to ships crossing the Atlantic. The cable, laid in 1905 between Port-aux-Basques and Canso in Nova Scotia, gives quick communication with both America and Europe. This cable was sold to the Commercial Cable Company in 1922. The Anglo-American cables start for Europe (at Hearts' Content) and America (at Placentia). The Commercial cable landed at St. John's, the Direct (now "Imperial") cable at Harbor Grace, and the Western Union at Bay Roberts, and all connect with both Europe and America. Constant connection by water with Montreal, Halifax, Boston and New York is made by private lines of steamers. The Furness-Withy Line of steamers runs between Liverpool and St. John's, and between St. John's, Halifax, and Boston, U.S.A., making about sixteen trips each way annually, monthly in winter, and at intervals of about three weeks in summer. The south and west coast has a weekly steamer service from Argentia, P.B., one steamer makes trips from St. John's to the Labrador Coast with mails and passengers during the summer at intervals of eight to ten days, and another makes fortnightly trips between St. John's and Cape Norman in the north of the island, calling at all the important intermediate settlements. Smaller steamers ply on Placentia and Notre Dame bays, while another steamer visits each week the ports in the Straits of Belle Isle. All these steamers make close connection with the railway.

The rates of postage are as follows:—

	Letters.	*Newspapers.*
For delivery in Town in which posted	2 cents per oz.	1 cent per 4 ozs.
Within Newfoundland	4 cents 1st oz.; 2 cents each additional oz.	1 cent per 4 ozs.
United Kingdom . Dominions, Colonies and U.S.A. . .	5 cents 1st oz.; 3 cents each additional oz.	1 cent per 2 ozs.
St. Pierre . . .	10cents 1st oz.; 3 cents each additional oz.	1 cent per 2 ozs.
All other Countries.	7 cents 1st oz.; 3 cents each additional oz.	1cent per 2 ozs.

Climate.

The climate is milder than that of Canada; the mean temperature at St. John's is about 42°, the extreme range being from 0° to 81°. There is an almost total absence of spring, the summer setting in very suddenly in June. The rainfall in 1937 was 55 inches. Two-thirds of the inhabitants are descended from British settlers, English being everywhere spoken, but about one-third belong to the Roman Catholic religion, and a small number of these are of French extraction. The last of the aboriginal inhabitants died out about 1829; they were of the Beothuck tribe.

Customs.

The Customs Tariff of Newfoundland is mainly on an *ad valorem* duty basis, although many items bear a specific rate, such as Beef, Pork, Sugar, Tea, etc. It is the chief revenue producing agent. There is Empire preference, and upon all goods imported directly from Jamaica a reduction of 25 per cent. on regular Customs rates is allowed.

Currents and sultana raisins purchased in and imported directly from Greece are admitted free of duty.

Education.

The Government system of Education rests upon the Education Act of 1927 and Amendment thereto of date April 6th, 1935. The Central Administration is vested in the Department of Education, which functions under the direction of a Commissioner for Home Affairs and Education. The Executive Official of the Department is the General Superintendent of Education. Other officials are Chief Executive Officer and Research Officer. A staff of twelve District School Supervisors has been appointed. These visit the schools as frequently as possible to advise and assist teachers and members of local School Boards. Under the Amendment referred to above a Committee of six has been appointed to serve as a channel of communication on Educational matters between the heads of the several religious denominations and the Commissioner for Home Affairs and Education.

Digitized by Google

The schools are operated upon a denominational basis, and fees may be charged at the discretion of the local school authorities. In addition to the grant for the maintenance of Elementary Schools, Special Grants are made for the following services:—Secondary Education, Adult Education, Industrial Education, the Training of Teachers, and Summer School Courses. The erection and maintenance of school-buildings is mainly the responsibility of the local school units, but assistance is given annually in the form of a small grant from the Government.

In commemoration of the Jubilee of His Majesty King George V. the Department has instituted three Scholarships, to be known as the King George V. Jubilee Scholarships. Each is of the annual value of $250·00 and tenable for two years. The holders of these Scholarships are required to pursue their studies at the Memorial University College.

In 1893 an Act was passed appointing a Council of Higher Education, with powers to adopt necessary rules and regulations for the purpose of fostering Higher Education in the Colony.

A new Curriculum embodying the latest in Educational thought has been constructed for the schools of Newfoundland. It is now in the hands of all teachers, and work of an experimental nature is being carried on in selected schools.

A general Training School for Teachers was opened in 1921, and in September, 1925, the first real attempt at University work was made, when the Newfoundland Memorial University College was opened, an institution which gives two years' University work. The Training School for Teachers now forms an integral part of the College.

Chief Towns.

The capital is St. John's, with 39,886 inhabitants. Other towns of importance are Harbor Grace with a population (1935 census) of 2,215; Bonavista, 4,022; Corner Brook, 6,374; Carbonear, 3,367; Twillingate, 3,203; Grand Falls, 4,244; Burin, 2,277, and Bay Roberts, 1,911. St. John's, which had similarly suffered in 1846 was almost completely destroyed by fire in 1892, the Cathedral and many Government buildings being burnt, with the public records which they contained. The city has been rebuilt in an improved manner.

The city of St. John's is governed by a Mayor and six Councillors elected under the provisions of the Municipal Act, 1921.

Constitution.

Newfoundland has had a Legislature since 1832, but it was the last of the North American Colonies to which responsible Government was conceded; it was established in 1855. In 1925, a Redistribution Act was passed by the Legislature establishing 37 Districts in the Colony instead of 18. In the same year an amendment to the Election Law extended the suffrage to women of twenty-five years and upwards. A further Redistribution Act passed in 1932, reduced the number of Districts to 24. The Government was administered by a Governor, aided by a responsible Executive Council in which the Governor presided, a Legislative Council of 24 members, and a House of Assembly of 27 members, the latter being elected by ballot under the new suffrage—that is, men of 21 years and upwards, and women of 25 years and upwards. In the registration of 1928, there were 66,255 male electors, and 52,343 female electors, making 118,598 electors registered on the Electoral Roll. Of the 24 Districts, 21 return 1 member each and 3 Districts return 2 members each. There is a property qualification for members, namely: Property exceeding $2,400.00 in amount or value, or a net annual income of $480.00. The ordinary duration of the restricted Session is about three months, and the Legislature generally meets about the middle of February.

Owing to the world depression and the inability of meeting the interest charges on the Public Debt, the Legislature in 1933 prayed H.M. The King to suspend the constitution and appoint six Commissioners, who, with the Governor as Chairman, would administer the Government until conditions again became normal. His Majesty thereupon appointed three Commissioners from Newfoundland, and three Commissioners from the United Kingdom. The new Government assumed office on the 16th February, 1934, and in the meantime there is no Legislative Council or House of Assembly.

P. J. Hanley, B.A.
H. G. Gough, B.A.

Department of Natural Resources.

Commissioner, Hon. R. B. Ewbank, C.S.I., C.I.E.
Secretary, Claude Fraser.
Director of Agriculture, H. K. McCharles.
Fisheries Officer, John T. Cheeseman.
Forestry Officer, Captain Jack Turner, M.C.
Director of Co-operation, G. Richardson.

Department of Justice.

Commissioner, Hon. L. E. Emerson, K.C.
Secretary, Brian E. S. Dunfield, K.C., B.A.
Assistant Secretary, H. P. Carter.
Second Assistant Secretary, G. B. Summers.
Third Assistant Secretary, H. G. Puddester.
Chief of Police, Patrick J. O'Neil, O.B.E., J.P.
Assistant Chief of Police, Llewellyn Strange.

Judicial Establishment.

Chief Justice and Judge of the Vice-Admiralty Court, Hon. Sir W. H. Horwood, Kt.
Judges, Hon. J. M. Kent, Hon. W. J. Higgins.
Chief Clerk and Registrar of the Supreme Court, W. R. Howley, C.M.G., K.C.
Sheriff of Newfoundland, John Cahill.
Central District Court Judge, Wm. J. Browne, K.C.
Clerk of the Peace, Hugh O'Neill.
District Magistrates:—
Bonavista, A. Squarey.
Burin, N. Short.
Corner Brook, A. J. Walsh, K.C.
Grand Falls, F. G. Bradley, K.C.
Holyrood, M. E. Hawco.
Placentia, M. Sinnott, O.B.E.
St. Anthony, H. W. Quinton.
Assistant Magistrates:—
Baine Harbour, Clarence W. Powell.
Bell Island, M. Hollett.
Bonne Bay, M. Lane.
Burgeo, G. Penney.
Carbonear, Leonard Ash.
Clarenville, J. B. Wornell.
Ferryland, T. J. Wade.
Greenspond, B. V. Andrews.
Harbour Breton, W. J. Linegar.
La Scie, F. M. Wells.
Springdale, Edward Russell.
St. Georges, J. Mulcahy.
St. Mary's, C. J. Greene.
Twillingate, B. J. Abbott.

Department of Public Utilities.

Commissioner, Hon. Sir Wilfrid Woods, K.C.M.G.
Secretary, Raymond Manning.
Accountant, C. B. Dicks.
Purchasing Agent, W. E. Curtis.
Surveyor of Shipping, D. M. McFarlane.
Chief Engineer, W. J. Robinson, O.B.E., A.M.I.C.E.
Assistant Engineer, H. Conroy, B.Sc.
Assistant Government Geologist, C. K. Howse.
Consulting Engineer, T. A. Hall, C.B.E.

Department of Public Health and Welfare.

Commissioner, Hon. J. C. Puddester.
Secretary, H. M. Mosdell, M.D.
Accountant, Lewis G. Crummey.
Business Manager, C. C. Oke.
Statistician, Wallace Halfyard.
Public Health Officers, Doctors J. St. Knight, O.B.E., L. R. Miller.
General Health Inspector, Dr. Alex. Bishop.
Superintendent General Hospital, Dr. E. L. Sharpe.

Foreign Consuls.

Argentine Republic.—Senor Don Saul Aguilar, Ottawa, Consul-General.
Belgium.—Baron E. K. de Meerendre, Consul-General, Montreal; Hon. R. B. Job, Newfoundland.
Brazil.—G. R. Williams, Vice-Consul; Consular Agent—J. S. Fowler.
Cuba.—J. E. Boggild, Consul-General, Montreal
Czechoslovakia.—Frantesek Pavlasek, Consul-General, Montreal.
Denmark.—Georg B. Holler; Consul-General at Montreal, for Canada and Newfoundland; Consul, J. W. Allan, St. John's.
Dominican Republic.—Hon. I. R. Randall, Consul (Honorary).
Finland.—Mons. Akseli Racanheimo, Consul-General; Olaf K. Olsen, V. Consul, St. John's.
France.—Mons. E. F. Rosset, Consul.
Germany.—Herr Erio Windels, Consul-General, Ottawa; R. S. Furlong, Consul (St. John's).
Greece.—Consul, A. E. Hickman, St. John's.
Hungary, Dr. Chas. Winter (Montreal), Consul-General.
Italy.—Signor Pavlode Simone, Consul at Montreal, for Newfoundland; Chas. McK. Harvey, Consul-General.
Latvia.—Olaf K. Olsen, Vice-Consul.
Mexico.—Senor Hermalao E. Torres (Consul-General, Montreal, for Newfoundland); Consul, Senor Javier Osarnio Canarena, Montreal.
Netherlands.—Mons. G. P. Luden, Consul at Montreal for Canada and Newfoundland; T. J. Kennedy, Consul (St. John's).
Norway, Canada (exc. of British Columbia) and Newfoundland.—Mons. Daniel steen, Consul-General, Montreal; Hon. Consul, Capt. Olaf K. Olsen, St. John's.
Poland.—Monsiers Jan Pawlica, Consul-General, Ottawa.
Portugal.—Consul, J. W. Allan, St. John's.
Spain.—Consul-General at Montreal; H. J. Wyatt, Consul, St. John's.
Sweden.—O. G. Lundquist, Consul-General at Montreal; Olaf K. Olsen, Honorary Consul, St. John's.
Switzerland.—Mons. Gaston Jacoard, Consul-General at Montreal, for Newfoundland.
United States of America.—Harold B. Quarton, St. John's, Consul-General for Newfoundland; Charles C. Sundell, Vice-Consul.
Yugoslavia—M. Milivoje Naumovic, Consul-General at Montreal.

NEW ZEALAND.

Situation and Area.

The Dominion of New Zealand consists of three principal islands, called respectively the North, the South, and Stewart Islands. There are several small islets (mostly uninhabited) within the boundaries of the Dominion: the chief of these are the Chatham Islands, 480 miles eastward of Banks Peninsula in 43-45° S. lat., 176-177° W. long. (Chatham and Pitt are the principal islands); and the Auckland Islands. The main group lies between 33° and 53° S. lat., and 162° E. long. and 173° W. long. The three principal islands extend in length 1,100 miles, but their breadth is extremely variable, ranging from 46 miles to 280 miles, the average being about 140 miles. The area of the North Islands and adjacent islets is 44,281 square miles, of the South Island 58,092 square miles, of Stewart Island 670 square miles, of Chatham Islands 372 square miles, and other islands, including the Cook Islands, 519 square miles, a total area of 103,934 square miles (twice the size of England).

In April, 1842, by Royal Letters Patent, and again by the Act 26 & 27 Vict., cap. 23, all islands between 162° E. and 173° W. long., and 33° and 53° S. lat., were annexed to New Zealand.

By Proclamation dated 21st July, 1887, the group called the Kermadec Islands, situated about 614 miles N.E. of the Bay of Islands, was annexed to New Zealand. These are a chain of widely separated islets, lying between 29° and 32° S. lat., and 177½° and 179° W. long. The principal are Raoul or Sunday, and Macaulay, the next in size being Curtis and L'Espérance. Raoul comprises 11 square miles, is covered with forest, and rises to a height of 1,723 feet.

The Protectorate over the Cook Islands was administered through the Governor of New Zealand until 1900; in October of that year the group was annexed to Her Majesty's Dominions, and resolutions were passed by the New Zealand Parliament for the extension of the boundaries of the Dominion to include the group as well as Niue (Savage) Island and other small islands. By proclamation finally fixing the date from which the boundaries of New Zealand are deemed to be extended, from the 11th June, 1901, the following islands are included:—Rarotonga, Mangaia, Atiu, Aitutaki, Mitiaro, Maukè, Manuae and Te Au-o-tu (Hervey Islands), Palmerston (Avarau), Niue (Savage), Pukapuka (Danger), Nassau, Rakahanga, Manihiki, Penrhyn (Tongareva), and Suwarrow.

An account of the Cook Islands is given below.

The principal Allied and Associated Powers, assembled at Versailles, decided that the islands of Western Samoa should be assigned under mandate to New Zealand; and a mandate was issued by the Council of the League of Nations in December, 1920, in favour of New Zealand.

Digitized by Google

The group which lies about 400 miles N.E. from Fiji contains several islands, of which Savai'i and Upolu are the largest. The total area is 1,133 square miles.

It was also decided that the phosphate island of Nauru (Pleasant Island), lying in 0·33° south latitude, and 166·55° east longitude, should be administered by New Zealand conjointly with the United Kingdom and Australia.

By Order-in-Council of 30th July, 1923, the coasts of the Ross Sea, with the adjacent islands and territories, were declared a British settlement under the name of the Ross Dependency. The dependency was placed under the jurisdiction of the Governor-General of New Zealand.

Arrangements were made in 1925 for the administration of the Tokelau or Union Islands, part of the colony of Gilbert and Ellice Islands, to be taken over by New Zealand. This transfer was effected as from February 11th, 1926, on the publication of the Union Islands Orders in Council, 1925, in the respective Government Gazettes. The islands are administered by the Administrator of Western Samoa on behalf of New Zealand.

Climate.

The climate is temperate and very healthy, the death rate in recent years being less than 9 per 1,000. The temperature is more equable than in the British Isles. While the summers are as cool as those of England, the winters are as warm as those of Italy. The mean annual temperature at Auckland (58°) is nearly the same as at Rome; at Wellington (55°) nearly the same as at Milan; at Dunedin (51°) nearly the same as at London. The extreme range of temperature at Wellington in 1937 was 42·9°, from 76·0° on the hottest day in summer to 33·1° on the coldest day in winter. Rainfall is over 200 inches annually on parts of the West Coast of the South Island, but as low as 20 inches in Central Otago and in parts of Canterbury. In the North Island rainfall averages over 100 inches per annum on the central mountain ranges, and up to 80 inches on the Taranaki Coast, parts of Hawkes Bay on the east coast, however, having only 35 inches per annum.

The average birth rate for the 5 years 1933–1937 was 16·6 per 1,000 living, and the average death rate for the same period 8·5. The birth rate in 1937 was 17·29 per 1,000; the death rate in that year was 9·08. New Zealand has the lowest rate of infant mortality in the world, a fact attributed to such matters as climate, virility of race, comparative absence of large industrial undertakings, and partly to legislative and educative measures. The average rate for the last 5 years was 31.6 per 1,000 births, and the rate for the year 1937 was 31.2.

History.

New Zealand was discovered in 1642 by the Dutch navigator, Tasman, who, however, did not land upon its shores. In 1769 it was visited by Captain Cook, who in that year, and during subsequent voyages, explored its coasts. The country subsequently became a resort for whalers and traders, chiefly from Australia, as well as a field for the labours of the Missionary Societies from 1814. In 1840 the native chiefs ceded the sovereignty of New Zealand to the British Crown by the Treaty of Waitangi, concluded by the British Consul, Captain Hobson, and the islands became a British colony.

The aborigines, called Maoris, are a remarkable people—a branch of the Polynesian race. According to their own traditions, their forefathers came about 750 years, or thirty generations ago, from Hawaiki, which was probably Hawaii in the Sandwich Islands, or Sava'i, in the Navigator, or Samoa, group. They were divided into about twenty different tribes, analogous to the clans of the Highlands of Scotland. There have been two Maori wars; the first lasted from 1845 until 1848; the second lasted from 1860, with little intermission, until 1870. But fully half the tribes have always been friendly to the English; and many of them fought on the side of the Colonial Government against their own countrymen. Permanent tranquility was established in 1871 throughout the country. An agitation amongst certain tribes in 1881, which threatened for a time to create a disturbance, was promptly quelled. Contrary to the results found in other civilised countries the Maoris in New Zealand are steadily increasing. This increase has been accompanied by a considerable dilution of blood through inter-marriage with Europeans. It is estimated that at most only 50 per cent. are now of pure Maori descent. The estimated Maori and half-caste population at 31st March, 1938, was 86,767, almost all of whom dwelt in the North Island.

Constitution.

The country was at first a dependency of New South Wales, but was created a separate Colony by the Charter of 16th November, 1840. Its settlement was largely effected by the New Zealand Company, with a royal charter, which was surrendered in 1850.

Down to 1847 the Executive and Legislative Councils were both nominated by the Governor, and a constitutional form of Government was established by the Imperial Statute 15 & 16 Vict., cap. 72. By that Act New Zealand was divided into six provinces, afterwards increased to ten, but subsequently reduced to nine—viz., Auckland, Taranaki, Wellington, Nelson, Canterbury, Otago, Hawke's Bay, Westland, and Marlborough—each governed by a Superintendent and Provincial Council, elected by the inhabitants under a franchise which practically amounted to household suffrage.

By an Act of the General Assembly, 39 Vict., No. XXI., passed in 1876, the provincial system of government was abolished. The powers previously exercised by superintendents and provincial officers were now exercised by the Governor or by local boards. The provincial system being abolished, provision was made for the division of the Dominion into counties and boroughs, and the necessary machinery for their self-government was provided.

A Central Legislature, called the General Assembly, was also established by the Imperial Statute of 1852, consisting of the Governor (now Governor-General), a Legislative Council, and House of Representatives. The Governor-General is assisted by an Executive Council, composed of the Responsible Ministers of the Dominion for the time being, according to the usual practice of Parliamentary Government. The Legislative Councillors are appointed by the Governor-General, and up to 1891 held their seats for life. Under the Act passed in that year, future appointments were made tenable for seven years only. The members of the House of Representatives are chosen by electors possessing a liberal franchise. Every elector, male or female, is qualified to become a member (the Women's Parliamentary Rights Act, passed in 1919, gives women the right to be *elected* to either house). The House of Representatives now consists of 80, including 4 Maori members elected by the natives. Legislation in 1934

Digitized by Google

provided for four-yearly Parliaments in place of three-yearly, but the three-yearly basis was restored by legislation in 1937. The session is usually from June to October.

Payment of Members of the Legislative Council is at the rate of 315*l.* a year. Members of the House of Representatives receive 450*l.* per annum.

The Electoral Act, 1893, extended to women (of both races) the right to register as electors, and to vote at the elections for members of the House of Representatives. In 1919 they were made elegible as members of the House of Representatives. The first woman member was elected in September, 1933.

The franchise for European representation is as follows:—Every adult person, other than aliens, lunatics, and certain criminal offenders, if resident one year in the Dominion and three months in an electoral district, is required to be registered as an elector.

The property qualification was abolished by "The Electoral Act Amendment Act, 1896," and residence alone now entitles a man or woman to have his or her name placed upon an electoral roll. Compulsory enrolment of electors was introduced in 1924.

For Maori representation every adult Maori resident in the district can vote, and no registration is required. There are four Maori electoral districts.

For most local bodies the qualification is a property or residential one. Women can vote and are eligible for election as well as men.

The control of native affairs, and the entire responsibility of dealing with questions of native government were transferred in 1863 from the British to the New Zealand Government. In 1865 the seat of Government was removed from Auckland to Wellington, on account of the central position of the latter city.

Local Government.

For the purposes of local government the Dominion is divided into 124 municipalities and 129 counties; the latter being sub-divided into 16 road districts and 63 town districts, besides River, Drainage, Water Supply, Local Railway, Harbour, Electric Power, Fire, and Rabbit Districts, a special Tramway District, a Transport District, and a Gas-lighting District. For the year ended 31st March, 1937, the total receipts of the above local authorities amounted to £20,226,593 and their expenditure to £20,222,715. Their outstanding loans at the same date amounted to £66,950,378 (net £57,463,370), including loans from the State Advances Office and Main Highways Board and also of £1,609,372 (net £457,514), inscribed by the Treasury under the now-repealed Local Bodies' Loan Acts and outstanding at 31st March, 1937. A class of local district not included in the statistical returns for which the above statistics are compiled consists of the Hospital Districts. The receipts of Hospital Boards for the year ended 31st March, 1937, amounted to £2,192,348 and the expenditure to £2,127,854.

Education.

A Government system of primary education was established in 1877. The central administration is vested in a Minister of Education, and the local control is in the hands of nine Education Boards, and of School Committees with functions subordinate to those of the Boards. Number of primary schools (called "public schools"), 2,378; scholars on roll, 203,266. Primary education is free, secular, and compulsory. There are also 16 intermediate schools or departments in operation, with a total enrolment of 4,387 pupils. In addition, for native (Maori) education there are 141 village schools maintained by the Government under the control of the Minister, eleven Native mission schools, and eight denominational boarding schools. Scholars on roll of village schools, 9,642 (including 1,089 Europeans); on the roll of mission schools, 632; and on roll of boarding schools, 501, of whom 188 hold Government free places. The cost of native school education in 1937–38 was £155,025. In the Chatham Islands five schools are maintained. The schools in Cook Islands and Western Samoa are subject to inspection at intervals by an Inspector of the New Zealand Education Department. During the year 1937, 306 private primary schools with a roll number of 27,931 were registered under the Education Act. A School Journal providing suitable reading matter is provided by the Department and issued free to all children in Government and registered private schools. A comprehensive system of physical education and schemes of dental and medical inspection are in operation in the primary schools, the latter now being under the control of the Department of Health. There were 1,344 students in training at four colleges in 1937 situated at Auckland, Wellington, Christchurch and Dunedin to qualify for teaching appointments. The number of adult primary school teachers in 1937 was 6,226. The total expenditure by the Government under the head of primary education was for 1937–38, £2,798,073. There is a system of contributory superannuation for teachers giving an annuity of one-sixtieth of the average of the final three years' salary for each year of service up to forty years.

Secondary education is provided at secondary schools, combined schools, district high schools and technical high schools, the numbers of operative schools under each heading in 1937, being 40, 6, 86, and 21 respectively, with a total roll number as follows:—Secondary schools, 14,101; district high schools (secondary departments), 4,389; combined schools 2,113; technical high schools and technical day schools, 7,833. In addition 55 private secondary schools were registered under the Education Act, and with two endowed schools the total roll number was 5,210. Of the total number of children in attendance at Government post-primary schools, 99 per cent. are holders of free places which carry free secondary education. Provision is made for manual instruction in both primary and secondary schools, cookery, dressmaking, woodwork, elementary agriculture, dairy-work, and the various branches of elementary science being included in the subjects taken. Instruction of a technical or vocational character is provided at a large number of technical schools and classes, besides the technical high schools mentioned above, the courses of instruction followed being commercial and general, industrial, domestic, agriculture, and art. The total number of students attending such classes in 1937 was 13,430, of whom 7,814 received free education.

For higher education there are four endowed colleges affiliated to the University of New Zealand, and each specializes in one or more directions. At Dunedin the special subjects are mining, medicine, dentistry, veterinary science, and domestic science; at Christchurch, engineering and technical science; at Wellington, law and science; at Auckland, commerce, engineering, and architecture. There is an agricultural college at Lincoln possessing a large endowment and an experimental farm of a very complete character. Another agricultural college

Digitized by Google

connected with the New Zealand University, Massey College, has been established at Palmerston North. The number of students on the books of the University Colleges was, in 1937, 5,010, of which number 2,005 were receiving wholly or partly free education. The number of students at the two Agricultural Colleges was 228. The total expenditure by the Government on university education in 1937-38 was 152,396.

The Child Welfare Act, 1925, provided for the creation of a special branch of the Education Department known as the Child Welfare Branch. The Act was designed to make better provision with respect to the maintenance, care, and control of children who are specially under the protection of the State, and to provide generally for the protection and training of indigent, neglected, or delinquent children.

An important section of the Act provided for the establishment of Children's Courts, to be presided over by Stipendiary Magistrates or Justices specially authorized to exercise jurisdiction in these courts. Honorary associates of either sex are appointed, whose function it is to consider all the facts concerning children brought before the Courts and to advise the presiding Magistrate or Justice as to what action should be taken. Child Welfare Officers are also appointed for the investigation of all cases coming before the Courts.

The Act gives very wide discretionary powers to the Magistrates of these special Courts in dealing with children. The ordinary procedure of requiring the child to plead, of taking evidence on oath, and, in fact, of hearing the particular charge may be dispensed with altogether. Wherever practicable the Children's Court is held in premises apart from the ordinary Police Court, and no newspaper is permitted to publish either the names of children appearing before these Courts or any particulars that are likely to identify the child.

The Children's Court may exercise jurisdiction over any young person under eighteen years of age charged with any offence. Such cases would be referred by a Stipendiary Magistrate or Judge of the Supreme Court.

In order to provide for the greater protection of infants of unmarried mothers and for the assistance and guidance of the mothers themselves, Child Welfare Officers, on being notified of such births, investigate each case and render such assistance as is required, either in placing the child in a suitable foster-home or in advising the mother in the matter of affiliation proceedings, or in assisting her in obtaining employment, etc.

An amending Act of 1927 raises the age of a "child" from sixteen to seventeen years, and provides for the registration and inspection of all private or denominational institutions where children are maintained apart from their parents or guardians.

In addition to the work in connection with the maintenance and education of destitute, neglected, and delinquent children committed by the Courts, the Child Welfare Branch (1) supervises all infants and young children under the age of six years who are living apart from their parents; (2) makes inquiry through its field officers, for the information of Magistrates, of all applications for the adoption of children and for widows pensions; (3) supervises all children and young persons placed under the field officers by order of the Court; and (4) provides for the maintenance, education, and training of all afflicted children who are deaf, blind, feeble-minded or have speech-defects.

The total number of children under the supervision of the State at 31st March, 1938, was 7,403 classed under the following headings:—

Boarded out, in receiving-homes, &c.	4,002
Under supervision	910
Infant-life protection	842
Deaf children	113
Feeble-minded children	263
Children dealt with as preventive cases	1,273

The expenditure in 1937-38 in connection with the Child Welfare Branch was 124,805.

For the financial year 1937-38 the total cost to the Educational Department of all services was £4,619,134.

Population.

The population of New Zealand in 1936 was found by the census to be 1,573,810 persons, including the Maoris, who numbered 82,326. The population of Cook and other Pacific Islands was 16,350 on census of 30th April, 1936, Western Samoa 55,946 on census of 4th November, 1936, and Tokelau Islands 1,170 on census of 4th November, 1936. The estimated population of New Zealand proper (including Maoris), on 30th June, 1938, was 1,604,244.

The population of the four principal urban areas estimated as at 1st April, 1938, was as follows:—

	1938. City.	Urban Area.*
Auckland	102,000	217,300
Wellington	116,400	154,400
Christchurch	92,500	134,100
Dunedin	64,800	82,500

* Includes City.

Industry and Trade.

All the productions of the temperate climates of Europe and Asia can be cultivated with success in New Zealand. There are extensive coal mines and gold fields. The total gold entered for exportation from the Dominion up to 31st December, 1937, was valued at N.Z. 102,682,874*l.* The wool exports in 1937 amounted to 282,339,148 lbs., valued at N.Z. 19,070,240*l.* In 1856 they amounted to 2,559,618 lbs., valued at 146,070*l.* The trade in frozen meat, which began in 1882, with an export of 15,244 cwt., valued at 19,339*l.*, had developed an export in 1889 of 656,822 cwt., valued at 783,374*l.*, in 1898, 1,551,773 cwt., valued at 1,698,750*l.*, in 1913, 2,578,693 cwt., valued at 4,449,933*l.*, in 1925, 3,414,205 cwt., valued at 11,174,567*l.*, and in 1937, 5,400,916 cwt., valued at N.Z. 14,689,618*l.* Butter exports rose from 172,583 cwts., valued at 740,620*l.*, in 1900 to 2,976,085 cwts., valued at N.Z. 16,986,477*l.*, in 1937. Cheese exports at the same time increased from 102,849 cwt. (229,111*l.*) to 1,647,255 cwt. (N.Z. 5,371,878*l.*). The live stock in New Zealand, 1938, preliminary returns was: horses, 279,324 against 137,768 in 1878; cattle, 4,507,227 against 578,430 in 1878; sheep (final figure), 32,378,774 against 13,069,338 in 1878; pigs, 755,222 against 207,337 in 1878. The total area of occupied holdings over one acre in extent in 1937 was 43,199,893 acres; in 1936-37 221,790 acres were in wheat (for threshing only), having a total yield of 7,168,963 bushels. Of an area of 315,704 acres under oats for all purposes 74,772 acres were threshed, giving a total yield of 3,525,430 bushels.

Digitized by Google

Auckland, Dunedin, Invercargill, Lyttelton, Napier, Nelson, Wellington, and Timaru are ports of registry, and had, on 31st December, 1937, 482 vessels registered, of 99,542 (net) tons in the aggregate.

The imports consist chiefly of textiles, apparel, hardware and machinery, sugar, tea, tobacco, alcoholic beverages, books, stationery, paper, motor vehicles and accessories, drugs and chemicals, and oils; and they are obtained almost entirely from the United Kingdom, Australia, the United States, Canada, Ceylon, India, Japan, Dutch East Indies, Pacific Islands, Germany, and France.

In 1937, 76 per cent. of New Zealand's exports went to the United Kingdom, 6 per cent. to other British countries, and 18 per cent. to foreign countries. Corresponding percentages for imports were 50, 24, and 26 respectively.

British preference is a marked feature of the Customs tariff, many items for instance being dutiable at 20 per cent. when of British origin and 40 per cent. when foreign. New Zealand has also reciprocal tariff agreements with Australia, Canada, British South Africa, Belgium and Germany. In accordance with an agreement entered into at the Imperial Economic Conference at Ottawa in 1932, goods the produce of the United Kingdom and certain other British Countries were made free of surtax as from 14th October, 1932. In addition, on certain items reductions in duty were made, and on certain other items additional preference was given to British countries by imposition of duty or an increased duty on foreign produce.

The Customs tariff was reviewed in 1934 as a result of investigation by a Royal Commission on the Tariff, and a comprehensive Customs Act (No. 14 of 1934) was passed in October of that year.

Approximately 47 per cent. of all imports are admitted duty free, subject (with certain exceptions) to a primage duty of 3 per cent. *ad valorem*, while two-thirds of the balance are subject to *ad valorem* duties and one-third to specific duties. Of imports from the United Kingdom in 1936, 53 per cent. came in free of duty, 81 per cent. received benefit of preferential tariffs against foreign goods; and 96 per cent. was either free or received benefit of preferential tariff against foreign goods.

Banking and Currency.

Of the following banks which have branches in the Dominion, the first two are New Zealand Institutions:—Bank of New Zealand, National Bank of New Zealand (Limited), Union Bank of Australia (Limited), Bank of New South Wales, Bank of Australasia, and Commercial Bank of Australia (Limited). The total amount of their deposits in New Zealand for the year 1937 (average of four quarters), was £66,842,692. The net note circulation at 27th December, 1937, was £11,679,389. There is also a Post Office Savings Bank established in the Dominion, having on 31st March, 1938, 928 branches; the amount deposited therein at that date was £63,146,930. The trustee savings banks number five, and the total amount to credit of depositors at March 31st, 1938, was £13,339,416.

The currency and legal tender was formerly British sterling, but New Zealand currency is at present at a discount as compared with sterling. The Reserve Bank of New Zealand commenced operations from 1st August, 1934. Reserve Bank notes are now legal tender and the note-issues of other banks have been called in. Section 8 of the Finance Act, 1932-33 (No. 2) empowered the Minister of Finance to arrange with the Master of the Royal Mint (England) for a special issue of silver and bronze coinage of distinctive design for circulation in New Zealand. The silver coins and the bronze half-penny are now in circulation.

All monetary values given in the New Zealand section are expressed in N.Z. currency unless the contrary is stated.

Government Life Insurance Department.

This department commenced to transact business in 1870. It is under the management of the Government Insurance Commissioner, and is conducted almost exactly on the same principles as those generally adopted by private mutual life offices.

It has canvassing agents, and pays its own expenses including postage and taxes. Besides its low premiums the Department makes a feature of its liberal and sympathetic administration.

Profits belong absolutely and entirely to the policyholders themselves and are distributed annually in the form of compound reversionary bonuses. The basis employed in the actuarial valuation—the most stringent in use by Australasian Offices, namely, the O.M. (British Offices) Tables with interest at 3% — indicates the strength of the Department and when taken in conjunction with the fact that the rate of interest earned on the funds, although fallen in sympathy with the general economic trend, is just over 4¼ % constitutes the best possible augury of future bonus prospects. The figures for the last five years in respect of new business, premium income, funds, and total business in force are as follows:—

Year.	New Business.	Premium Income.	Funds at end of year.	Business in Force.
	£	£	£	£
1933	1,295,656	649,082	8,965,061	23,574,469
1934	1,661,348	667,488	9,241,764	24,084,621
1935	2,005,995	668,946	9,578,673	25,051,292
1936	2,863,801	719,197	9,952,311	26,897,975
1937	3,431,940	765,146	10,349,248	29,409,136

State Fire and Accident Insurance.

Fire Branch.

In 1903 an Act was passed "to establish a State Fire Insurance Office and to make other provisions for the insurance and protection of insurable property in New Zealand against loss or damage by fire." The statute provided for the establishment of an office to be administered by a General Manager appointed by the Governor-General, and for the necessary staff.

The Board of the Office consists of the Minister of Finance, the General Manager, the Financial Adviser to the Government, and three other persons appointed by the Governor-General, of whom at least one must be an officer of the Public Service. The appointed members hold office for two years with eligibility for re-appointment.

The Department opened for business with branches and agencies throughout the Dominion in 1905. The opening of the office resulted in a reduction in the rates then current of 33⅓ per cent. on dwellings and the less hazardous risks, and of 10 per cent. on all others.

Under an Amending Act passed in 1922, the Board may, when and as often as it considers that the funds are sufficient to meet all the actual and contingent liabilities of the Department, declare a rebate to insured persons in respect of premiums thereafter becoming payable. The first rebate of 15 % was declared for a period of 12 months from 1st August, 1923. The rebate was reduced to 10 % during 1924-25 but increased to 12½ % at January, 1926. This rate remained until 1st September, 1933, when an additional rebate of 12½ % on dwellings situated in areas where there is adequate fire protection, and 7½ % on dwellings and farm risks situated in other

Digitized by Google

areas, was granted. As from the 1st December, 1936, the rebate in operation was made a permanent rating reduction from premiums, and, in addition, a further bonus to policyholders ranging up to 25 % was declared.

There is no liability on account of called-up capital, the sum of £2,000 originally advanced for preliminary expenses having been repaid in 1913. The funds and reserves as at the end of December, 1937, totalled £1,113,830. The net income and net losses for each of the five years to that date have been as follows :—

	Net Income, less Re-insurances.	Net Losses.
	£	£
1933	244,257	49,005
1934	244,376	54,751
1935	239,530	53,151
1936	245,419	43,517
1937	223,451	34,795

Accident Branch.

The Government Accident Branch, attached since 1925 to the State Fire Insurance Office, was opened in 1901, for the purpose of transacting Personal Accident Insurance and Employers' Liability Insurance. General accident business is undertaken, but the branch was opened more especially with a view to relieve employers of labour of the liability imposed upon them by "The Workers' Compensation for Accidents Act, 1900." This Act greatly extended the liability of employers, and gave to a workman the right of compensation for all injuries arising out of, and in the course of, his employment, not attributable to his own serious and wilful misconduct.

This liability has been extended by subsequent Acts, the principal amendments being in 1908, 1920, 1922, 1926 and 1936.

The present scale of compensation is as follows :—

(*a*) Where death results from the injury and the workman leaves any total dependants, the compensation shall be a sum equal to two hundred and eight times his weekly earnings, or the sum of 500*l*., whichever of those sums is the larger, but not exceeding in any case 1,000*l*.

(*b*) If the dependants are only partially dependent upon the workman's earnings, the compensation is to be such sum as is reasonable and proportionate to the injury to such dependants, but not exceeding the amount payable under paragraph (*a*).

(*c*) In either of the above cases the employer is also liable for medical and burial expenses not exceeding 50*l*., and an amount not exceeding this sum can be claimed where there are no dependants.

(*d*) Where a workman is totally incapacitated for work, he is entitled to a weekly payment of 66⅔% of his average weekly earnings, with a maximum of 4*l*. 10*s*. per week and a minimum of 2*l*. per week. Persons employed otherwise than by way of manual labour, whose earnings exceed 400*l*. a year, are excluded from the benefits of the Act.

(*e*) Where the workman is partially incapacitated only, the compensation is 66⅔ % of the loss of wages, with a maximum of 4*l*. 10*s*. per week.

(*f*) In addition to the compensation for incapacity, medical or surgical expenses are allowed, not exceeding 1*l*.

Weekly payments under paragraphs (*d*) and (*e*) above are not to extend over a longer period than six years, and the aggregate amount is not to exceed 1,000*l*.

The Department's policies cover the full liability of an employer to his workmen under the Workers' Compensation Act, and also suitably protect him against liability under the Deaths by Accident Compensation Act, and the Common Law.

Personal accident policies are also issued securing amounts for accidental death and permanent total or partial disablement, and weekly allowances during temporary disablement, whether caused by accident or sickness.

Under the Government Accident Insurance Amendment Act of 1924, the Department is authorised to underwrite all classes of Accident Insurance accepted by Accident Insurance Companies, and the office now accepts motor-vehicle (third party risk), motor car comprehensive, public risk, burglary, plate glass and fidelity guarantee insurance.

The premium income and claims of the Accident Branch during the last five years have been as follows :—

Year.	Premium Income.	Claims.
	£	£
Year ending 31st December, 1933	80,207	48,593
" " " 1934	84,727	62,035
" " " 1935	97,766	66,172
" " " 1936	113,649	76,471
" " " 1937	147,719	99,502

Public Works.

All the more important public works of New Zealand are in the hands of the Government and other public bodies, comparatively few having been undertaken by companies. In 1870 a great impetus was given to the development of the country by the inauguration of the "Public Works Policy," which provided for carrying out works in advance of settlement, and for immigration.

Roads.—The first public works initiated were roads, many thousands of miles having been constructed. Developments of motor road transport have since necessitated a change in the construction and maintenance of main roads. A Main Highways Board for the whole Dominion was established in 1923 under the authority of the Main Highways Act, 1922, and at 31st March, 1938, that Board controlled 12,136 miles of the main roads in the two Islands. The object of the change of policy was to make the construction and maintenance of main highways, suitable for modern traffic, more of a national than a local undertaking. Under legislation passed in 1936, the principal arterial routes, comprising some 4,000 miles of main highways, were classified as State Highways, the maintenance and improvement of which are financed wholly from the Main Highways Account.

Road and railway formation works are carried out under contracts, but principally by the co-operative system, under which the Government provides all materials and lets the work of construction to parties of labourers and artisans at rates fixed by Government officers on the ground. These rates are calculated so that an average workman will be able to earn the current rate of wages ruling in his trade in the district where the work is situated. Buildings and most of the large bridges are built by contract, let after inviting tenders through the Press; but the Public Works Department frequently erects

Digitized by Google

large road bridges and railway viaducts by day labour and on the co-operative system.

All the cities and principal towns are supplied with water at the cost of the corporations.

All the principal towns in the Dominion have gasworks, some of them belonging to private companies, but the majority to the corporations. The coal from Greymouth is stated to be one of the best in the world for making gas.

Railways.—At the end of the financial year, 31st March, 1938, there were 3,323 miles of Government and approximately 200 miles of private railways in operation in New Zealand.

The capital cost charged to the 3,323 miles of opened Government railways as at 31st March, 1938, is 54,205,496*l.*, or an average of 16,312*l.* a mile. This includes all charges connected with the construction and equipment of the lines. The actual expenditure is greater by 10,400,000*l.* written off in 1931–32.

The operating revenue from the Government railways for the year 1937–38 was 7,591,825*l.* and the operating expenses 7,291,785*l.* The gauge throughout is 3ft. 6in.

Telegraphs and Telephones.—Of telegraph and inter-urban telephone circuits there are 12,063 miles of pole line and 66,906 miles of wire. There are 309 Morse telegraph offices (including 29 equipped with machine printing apparatus), 1,688 telephone offices and 349 telephone exchanges, the latter having 188,587 connections with 16,334 miles of pole-line and 1,796 miles of cable (underground, aerial and submarine), the total length of wire involved being 581,231 miles. 1,021 public call offices (coin-in-the-slot telephones) are in use.

There are now 17 automatic exchanges in operation, covering 106,334 connections. In 1926 a four-core continuously loaded telephone cable was laid between the two Islands and in conjunction with the installation of carrier-current equipment and voice-frequency amplifiers on the main land-lines, refinements which have been introduced at a rapid rate in recent years, provides a most efficient inter-island telephone system. In order to cope with the growth of toll traffic an additional cable was laid between the North and South Islands in June, 1937. This cable is of the single-core, coaxial type designed for high-frequency carrier-current operation and is capable of carrying 23 telephone channels and 36 two-way machine printing telegraph channels. The facilities now provided enable all the important centres in each island to obtain reliable telephone communication one with another at any hour of the day or night. There are eight submarine cables, connecting the two islands of New Zealand; two Auckland-Sydney, and one Auckland-Brisbane, *via* Norfolk Island, connecting the Dominion with Australia, and one connecting Auckland with Suva (Fiji).

The Pacific cable, which was opened for traffic to Australia and Fiji in April, 1902, was completed to Bamfield, Vancouver Island, on the 31st October following, and opened for international traffic on the 8th December, 1902. The laying of the Auckland-Suva cable was completed in 1923. The duplicated cable between Suva (Fiji) and Bamfield (British Columbia) was opened for traffic in 1926.

On the opening of the Pacific cable for through traffic the ordinary rate to Great Britain was 3*s.* per word, Government messages 1*s.* 6½*d.*, and Press 1*s.* per word.

By successive reductions the rates to Great Britain and Ireland have been now reduced to 1*s.* 3*d.* per word ordinary rate, 10*d.* per word CDE rate, 7½*d.* for Government messages, 4*d.* for Press messages, and 3*d.* at deferred Press rate.

A system of deferred ordinary telegrams was introduced in 1912. These messages, which are transmitted after ordinary and press telegrams are accepted at one-half the ordinary rate.

A further class of cheap rate cable message is the Daily Letter Telegram which is subject to approximately 48 hours' delay during transmission, being delivered on the morning of the second day following the day of lodgment. The rate to Great Britain is 10*s.* 5*d.* minimum charge and 5*d.* for each word in excess of 25 words.

Until 1932, when the Wellington station was closed following the merger in 1929 in the London Company known as Cable and Wireless Limited, of the Pacific, Eastern Extension, Australasia and China and other Empire wireless and cable services, the terminal in New Zealand of the Eastern Company's cable from Sydney was maintained at Wellington. The Wellington station has now been removed to Auckland, and amalgamated with the cable station there. One of the two Wellington-Sydney cables has had its New Zealand terminal transferred to Auckland while a portion of the second cable has been taken up.

In the year ended 31st March, 1938, excluding the value of service messages, the telegraph revenue was 2,479,935*l.* (including telephone exchange and other telegraph receipts); number of messages 19,963,710. (of which number 19,933,844 were private or press messages). Ordinary telegrams are charged at a flat rate of one penny per word, with a minimum charge of sixpence, and letter-telegrams a flat rate of one shilling for twenty-four words and one penny for each additional two words. Letter-telegrams are delivered by post on the morning following the day of lodgment.

Wireless Telegraphy and Telephony.—There are 29 public radio stations in and around New Zealand which are under the control of the New Zealand Government, namely: Auckland, Wellington, Awarua, Jackson's Bay, Puysegur Point and Milford Sound on the mainland and in addition, Chatham Islands, Cuvier Island (temporary), Great Mercury Island, Moko Hinau (temporary), Portland Island and Stephens Island on the Islands of those names off the coast of New Zealand, Atiu, Aitutaki, Mangaia, Manihiki, Mauke, Penrhyn, Pukapuka and Rarotonga, in the Cook Group; Apia, Aleipata, Fagamalo, Salailua and Tuasivi, in Western Samoa; Atafu, Nukunono and Fakaofo, in the Tokelau or Union Group; and Niue Island. The small stations at Aitutaki, Aleipata, Atafu, Atiu, Fagamalo, Fakaofo, Nukunono, Pukapuka, Salailua, Tuasivi, Mangaia, Manihiki, Mauke, Niue, Cuvier Island, Great Mercury Island, Jackson's Bay, Moko Hinau, Milford Sound, Penrhyn, Portland Island, Puysegur Point and Stephens Island engage exclusively in point-to-point communication. By means of the Wellington, Apia and Rarotonga stations communication is maintained between New Zealand and the Pacific Islands.

In addition there are 72 wireless ship-stations registered in New Zealand.

A radio telephone service between New Zealand and Australia was opened in 1930 and now extends to Great Britain, Northern Ireland, Eire and the Isle of Man. Charges per minute are as follows:—

To Australia ..	10s. (minimum £1 10s.)	
Great Britain, N. Ireland, Isle of Man	£1 14s. (	„ £5 2s.)
Eire ..	£1 15s. (	„ £5 5s.)

This service is also available to most of the principal countries in Europe at slight increases on the rates mentioned; and also to the T.S.S. "Awatea"

Digitized by Google

engaged in the inter-colonial service, the charge being 3*s.* 4*d.* per minute with a minimum fee of 10*s.*

Broadcasting. The broadcasting service in New Zealand is controlled by the Minister of Broadcasting, under the Broadcasting Act of 1936. The stations operated by the National Service are designed to give coverage over the entire Dominion. There were 285,007 licensed radio listeners in New Zealand at 31st March, 1938, compared with 241,308 at 31st March, 1937. The license fee is 25*s.*

In addition to the National Stations, some private broadcasting stations are operating in the smaller centres. These receive no share of license fees, but a few in provincial centres are subsidised or assisted by the National Broadcasting Service.

A National Commercial Broadcasting Service with sole advertising rights is owned and operated by the Government. Four commercial stations are now in operation, one in each of the four main centres.

Tramways. Tramways have been established in most of the principal towns in New Zealand. Auckland, Dunedin, Christchurch, Wellington, New Plymouth, Invercargill, and Wanganui have electric tramway systems on the overhead principle. In Wellington and Dunedin there are cable tramways connecting with the higher levels. In Wanganui the higher levels of Durie Hill are reached by means of an elevator.

Electricity. The Dominion is particularly well supplied with available water power, the total available in sources of 1,000 h.p. or over being about 770,000 h.p. in the North Island, and 4,100,000 h.p. in the South Island. Of the total of the installed capacity in the power stations of the Dominion 278,905 k.w., or 99·6 per cent., is driven by water power, and the proportion is increasing each year.

The organisation of electric supply is based on generation and main or primary transmission by the Government, mainly by hydro-electric stations interconnected for better continuity of supply. Power thus generated and transmitted to main centres is sold by the Government in bulk to the retail distributing authorities which consist for the most part of Electric Power Boards, *i.e.*, local authorities specially set up for the purpose of carrying out the distribution of electricity.

For carrying out its policy of generation and main transmission the Government has eight hydro-electric plants in operation, viz.:—Lake Coleridge, 34,500 kilowatts; Horahora, 10,300 kilowatts; Arapuni, 103,500 kilowatts; Waikaremoana, 32,000 kilowatts; Mangahao, 19,200 kilowatts; Waitaki, 30,000 kilowatts; Monowai, 6,000 kilowatts; and Arnold River, 3,060 kilowatts.

Power is transmitted from Arapuni, Waikaremoana, Mangahao and Waitaki at 110,000 volts, Lake Coleridge, Monowai and Arnold River at 66,000 volts, and Horahora at 50,000 volts.

The retail electrical supply in the Dominion is now largely in the hands of electric power boards. Until 1915, when the Government scheme at Lake Coleridge commenced supply, the distribution of the power was carried out by local authorities and companies operating various power stations, subject to licences issued under the Public Works Act. On the Government entering into the business of generating electricity for sale in bulk, it was found desirable to delegate the responsibility for the retail distribution to the local authorities. The smaller local authorities had only a few hundred consumers each, and with annual revenue ranging from 1,000*l.* to 4,500*l.* each were found too small to take a comprehensive grasp of the commercial problems involved. The Electric Power Boards Act, 1918 (consolidated in 1925), set up new local authorities especially charged with the responsibility of electric power supply and its retail distribution. The areas to be constituted are determined by petition, which must be signed by at least 25 per cent. of the ratepayers in the proposed district. The Board is elected by the ratepayers of the various constituent areas of the district, and has full powers of borrowing for the construction of works and rating to make up any deficiency in the revenue. The areas of the power districts are intended to be large, and to include several constituent local districts, boroughs or counties. The Boards have wide powers to purchase energy from the Government when available, or to develop it from water power or any other source where such a supply is not available. In October, 1936, the Southland Electric Power district was taken over by the Government and the generating station at Lake Monowai, together with the transmission and distribution system, is now being operated by the Public Works Department. On the other hand, a new Electric Power District—the Bay of Islands—was gazetted in March, 1937, but the newly constituted Electric Power Board is not yet functioning as a supply authority. Up to March, 1937, forty-five Boards, excluding Southland, had been gazetted covering an area equal to 69·4 per cent. of the total area of the Dominion and containing 66·7 per cent. of the total population of the Dominion. The unimproved value of the land included in the above area equals 78·3 per cent. of the total unimproved value of the Dominion. Forty-one Boards have so far taken their loan polls, and have received authority from their ratepayers to borrow a total of 13,344,700*l.* Thirty Boards are distributing power purchased in bulk from the Government hydro-electric plants at Arapuni, Horahora, Waikaremoana, Mangahao, Lake Coleridge or Waitaki. One Board has taken over a large city steam power house as a stand-by plant, and has extended both the generating plant and the mains, but has further agreed to take the whole of its normal power from the Government's Arapuni plant, the first unit of which went into operation in June, 1929, and the sixth unit in February, 1938. Nine Boards have their own power stations in operation. Two others have arranged to purchase power in bulk from other authorities. Including the Government stations, there are 35 water power plants, 1 steam power plant, and 5 oil power plants, making a total of 41 main plants with a total installed capacity of 279,910 kilowatts, including the sixth unit of 21,600 k.w. at Arapuni. There are 46 stand-by plants with a total installed capacity of 99,338 kilowatts. The total population included in the various areas of electric power supply is 93·2 per cent. of the total population of the Dominion. The units sold per head of population supplied were 659. The total length of distribution lines, mostly overhead, is 24,407 route miles. Out of the 91 distributing authorities 79 showed a profit for the year ended 31st March, 1938, amounting to 889,848*l.*, after payment of working costs, interest and sinking fund and depreciation, and 12 showed a loss amounting to 11,254*l.*, making a net profit for the whole Dominion of 878,594*l.*

The total capital expenditure on Government schemes to 31st March, 1938, is 15,536,029*l.*

The total capital outlay on all plants in the Dominion in operation at 31st March, 1938, is 35,527,342*l.*, the units generated were 1,249,768,455, and the number of consumers 388,580.

Ports and Docks. The coasts of the Dominion are well marked with lighthouses and beacons, and all the ports are provided with wharves and jetties in proportion to the trade. Important works to afford shelter and increase the depth of water have been executed or are in course of construction at Thames, Gisborne, Waikokopu, Napier, Wanganui,

Digitized by Google

Patea, New Plymouth, Waitara, Nelson, Timaru, Westport, Greymouth, Hokitika, Wairau, Lyttelton, Oamaru, and Dunedin. There are graving docks at Port Chalmers, Lyttelton, and Auckland. At Wellington there are two patent slip-ways capable of taking up a two thousand ton ship. A floating dock having a deadweight lifting capacity of 17,000 tons has been installed.

Mail Communication.

Regular mail communication with Great Britain is maintained by connections with the Empire Air Service from Sydney to London. In addition, frequent exchanges of second-class mails and parcels are made via the Panama Canal and Cape Horn. Exchanges of mails by steamer are also made with North America, Australia, the East and the Pacific Islands.

Postage Rates.

The postage on inland letters is 1*d.* for the first ounce or fraction thereof, and ½*d.* for each additional ounce or fraction thereof. The postage on correspondence for delivery by air-mail within N.Z. is 2*d.* per ounce, and for overseas correspondence conveyed by air within N.Z. 1*d.* per ounce, plus ordinary overseas postage or overseas air-mail postage as may be required. The rates of postage on letters for overseas countries are as follow:

Great Britain and all Empire Countries, also Egypt, 1½*d.* each ½ ounce.
Foreign Countries, 2½*d.* first ounce; 1½*d.* each additional ounce.

The inland rate for newspapers is:—each copy ½*d.* for each 8 oz. or fraction thereof. The rate for newspapers printed and published in New Zealand, for British countries, is, for each newspaper, if not over 2 oz., ½*d.* (printed-paper rate), if over 2 oz., each copy 1*d.* for each 16 oz. or fraction thereof. The rate for newspapers for foreign countries and for newspapers not printed and published in New Zealand addressed to Great Britain, is for each newspaper: ½*d.* for each 2 oz. or fraction thereof. The inland parcel post rates are:—Not exceeding 3 lbs., 6*d.*; exceeding 3 lbs., but not exceeding 7 lbs., 1*s.*; exceeding 7 lbs., but not exceeding 14 lbs., 1*s.* 6*d.*; exceeding 14 lbs., but not exceeding 21 lbs., 2*s.*; exceeding 21 lbs., but not exceeding 28 lbs., 2*s.* 6*d.* For parcels of awkward size, there are special rates. A fragile fee of 1*s.* or 1*s.* 6*d.* (according to size of parcel) is charged on all inland parcels which the senders desire forwarded to destination in hampers.

DEPENDENCIES OF NEW ZEALAND.*

Cook Islands.

The Cook Islands were declared to be under British protection in October, 1888, by Captain Bourke, of H.M.S. "Hyacinth," and Manuae, Te Au-o-Tu and Takutea (at that time known as the Hervey Group) by Commander Nicolls, of H.M.S. "Cormorant," in June, 1889. The latter name has fallen into disuse, all of the Islands collectively being known as the Cook Group.

Until 1901 British authority was represented by a Resident who was paid by the Government of New Zealand, and reported direct to the Governor of that Dominion. The first British Resident, Mr. F. J. Moss, who was appointed in 1890, succeeded in 1891 in arranging for the establishment of an Elective Federal Parliament to make laws for the whole group. Each island, however, continued to enjoy self-government in such purely local affairs as it could properly manage for itself. The Federal Executive Council or Government was composed of the Arikis, who are also the principal landowners. The chief of these, Queen Makea, Ariki of Avarua, was the nominal head of the Government. A Supreme Court was established, and a law was passed regulating the sale of intoxicants, and imposing a general *ad valorem* duty of 10 per cent. on imports. All laws and administrative acts were subject to the approval of the Resident, who was also a Deputy and Judicial Commissioner for the Western Pacific, and Chief Justice of the High Court of the Cook Islands.

The Islands became part of the Dominion of New Zealand from the 11th June, 1901. The administration and laws were continued in force subject to the provisions of the Cook Islands Government Act, passed in that year.

In 1915 an Act was passed by the New Zealand Parliament consolidating the laws relating to the Cook Islands and Niue Island, and providing for the appointment of a member of the Executive Council of New Zealand as the Minister for the Cook Islands, who is charged with the administration of the government of the Islands. By the Cook Islands Amendment Act, 1932, the administration of Niue Island was transferred to the Minister of External Affairs.

The Act also makes provision for the constitution of Island Councils; for the establishment of public schools, Courts of Justice, Native Land Court, etc.

The census population of the Cook Islands at 30th April, 1936, was 12,246 (excluding Niue).

Minister for the Cook Islands, Rt. Hon. M. J. Savage, P.C.

Secretary, Cook Islands Department, Wellington, C. A. Berendsen.

Resident Commissioner at Rarotonga, H. F. Ayson

Rarotonga.

Distant from Auckland, 1,638 miles; circumference, 20 miles; height 2,100 ft.; area, 26 square miles; estimated population, 31st March, 1938, 5,488.

Rarotonga is the most fertile and valuable of the Cook group, and it has the largest population. The island has been exceptionally favoured by nature, not only with delightful scenic attractions, but also with a remarkably rich and productive soil.

The Polynesian people are very closely akin to the Maoris of New Zealand.

The seat and centre of the government of the Cook Islands—the double township of Avarua and Avatiu—is situated on the north or lee side of the island of Rarotonga, opposite two small openings in the coral reef. The former, where the residence of the Commissioner is situated, has the advantage of a boat harbour, where small craft can be moored in safety when the wind is not blowing in from the sea.

New Zealand postal notes apply in the Cook Islands and a government money-order office is in operation. Wireless stations are established at Rarotonga, Aitutaki, Mangaia, Atiu, Mauke, Manihiki, Penrhyn and Niue.

The total value of exports from the Cook Islands (excluding Niue) for 1937 was 86,333*l.*, and imports amounted to 86,534*l.* The principal items of export are fresh fruit, coconuts, copra, and pearl shell.

Receipts and payments of the Cook Islands (excluding Niue) for the year 1937-38: Receipts, 56,599*l.*; payments, 47,207*l.*

* A full account of these Dependencies will be found in the "New Zealand Official Year-Book," to which the Editors desire to express their acknowledgments.

Digitized by Google

Mangaia.

Distant from Rarotonga, 110 miles; circumference, 30 miles; height, 656 ft.; area, 30 square miles; estimated population, March, 1938, 1,552.

A government wireless station is established here.

Mangaia is the most southerly island of the Cook group.

Coconuts, bananas, oranges, limes, citrons and other fruits grow plentifully.

Resident Agent (Vacant).

Atiu.

Distant from Rarotonga, 120 miles; circumference, 20 miles; height, 374, ft.; area, 22 square miles; estimated population, March, 1938, 1,120.

A wireless station is erected at Atiu.

Atiu resembles Mangaia in formation, being a raised mass of coral with high jagged cliffs facing the sea.

On the highest point of the central ridge coconuts, bananas, oranges, and coffee grow with the utmost luxuriance; and the kumera, one of the most valuable of South Sea vegetables, yields large crops. The coconut-palm grows well everywhere, but especially so on the coral rock formation.

Resident Agent, D. Brown.

Mauke.

Distant from Rarotonga, 151 miles; circumference, 10 miles; height, about 60 ft.; area 5½ square miles; estimated population, March, 1938, 701.

Mauke is a low circular island about two miles across, lying to the north-east of Rarotonga. Like Mangaia and Atiu, it is surrounded by an unbroken fringing reef. It is marvellously fertile, and produce of considerable value and quantity is exported. There is a wireless station on the island.

Resident Agent, E. C. Vellenoweth.

Mitiaro.

Distant from Rarotonga, 142 miles and from Mauke 20 miles; circumference, 5 miles; height, about 50 ft.; area 6 square miles; estimated population, March, 1938, 279.

This island is a good instance of an elevated coral reef, thinly coated with sand and gravel of the same material. The greater part of the surface is not more than six feet above high-water mark.

Resident Agent, E. C. Vellenoweth.

Takutea.

Distant from Rarotonga, 120 miles; area, ½ square mile; population nil.

This island was presented to the Crown by the Ariki of Atiu to whom it belonged. It is a coral island, moderately fertile.

Aitutaki.

Distant from Rarotonga, 140 miles: circumference, 14½ miles; height, 450 ft.; area 7 square miles; estimated population, March, 1938, 1,843.

The name includes the island anciently known as "Ara-ura," and some seven or eight smaller islands on the vast barrier reef. Some of these are volcanic, and would seem to have been small peaks on the lip of an extinct volcano, now submerged.

The island itself is pear-shaped, about four miles by two, its highest part being 450 feet high.

Copra is the chief product, and some of the best oranges and pineapples are grown here.

The Aitutakians are naturally a hardy race, and industrious. They are said to be the best sailors in the Cook group. They make fans and mats, and are expert at plaiting various fibres for hatmaking.

A wireless station is erected on the island.

Resident Agent (Vacant).

Manuae and Te Au-o-Tu.

Distant from Rarotonga, 128 miles; area of Manuae, 2½ square miles.

These two small islands are situated about midway between Atiu and Aitutaki, and are owned by the people of the latter place. Census population 1936, 8.

Palmerston Atoll.

Distant from Rarotonga, 277 miles; area, 1 square mile; population, 100.

The Palmerstons are situated upon an irregular ring of coral reef, measuring outside about four miles and a half by two miles and a half, just awash with the tide. The narrow ring is about half a mile in width, and it supports eight little islets, nearly all covered with coconut palms. The largest of these is little more than half a mile in length and about a quarter of a mile wide.

Copra is the only article of export.

Resident Agent, J. Marsters.

Penrhyn.

Distant 740 miles from Rarotonga; area, 3 square miles; census population, 1936, 467.

This atoll is known to the Polynesians as Tongareva or Ma-ngaro-ngaro and is valuable by reason of the existence of pearlshell beds in the extensive lagoon. The lagoon is proclaimed a reserve for public pearlshell fishing, and regulations control pearlshell diving.

The coconut crop is considerable. Fresh water is very scarce, and large concrete tanks have been built by the Administration in the various villages for storage of rain water.

Resident Agent, V. Rasmussen.

Suwarrow.

Distant from Rarotonga, 525 miles; area, ½ square mile. It is at present uninhabited.

Suwarrow is an atoll with a splendid lagoon. Part of the anchorage has been gazetted as a naval reserve. The remainder of the Island is leased to private enterprise.

Manihiki and Rakahanga.

Distant from Rarotonga, 650 and 670 miles respectively; area, each 2 square miles; census population, 1936, Manihiki, 487; Rakahanga, 290.

Manihiki is nearly circular. The island occasionally suffers from drought and similar tanks to those at Penrhyn have been erected.

Rakahanga is also an atoll.

The Manihiki lagoon has been proclaimed a reserve for public pearlshell fishing, and regulations control diving as at Penrhyn.

The only industry is now that of copra-making.

Resident Agent, L. H. Trenn.

Pukapuka, or Danger Island.

Pukapuka is a small solitary atoll about three miles in diameter, which produces pearlshell. It is 720 miles from Rarotonga, and has an area of two square miles. Census population, 1936, 651.

Resident Agent, G. Henry.

Nassau.

This small island has an area of about 360 acres, of which 300 acres are under cultivation with coconuts. It lies a few miles distant from Pukapuka. The plantation belongs to the Burns, Philp (South Sea) Coy., Ltd. There is no

Digitized by Google

indigenous population. The present residents consist of labourers, introduced by the Company to work the plantation.

Education.

The control of education in the Cook Islands is by the Cook Islands Act, 1915, placed under the Minister for the Cook Islands. Four schools are established in Rarotonga. Schools are also established at Aitutaki, Mauke, Mitiaro, Pukapuka, Mangaia, Atiu and Palmerston. The instruction given in the Government schools is similar to that of the New Zealand State Schools but with a special syllabus suitable to the requirements of the people. The London Missionary Society is subsidised for conducting schools in the islands of the Northern Group.

Medical.

Under the provisions of the Cook Islands Act, 1915, all natives of the Cook Islands are provided gratuitously with such medical and surgical aid as is reasonably required and practicable. As a result of this beneficient policy the population is healthy and particularly free from the usual tropical diseases. The increase of births over deaths during recent years has reached a very high rate.

Trade of Cook Islands.

Oranges, bananas, tomatoes, and copra are the chief exports. Tomatoes are sent to New Zealand in winter and spring.

Direct steamer connection is given between the Cook Islands and N.Z. by vessels of the Union Steam Ship Co., of N.Z., Ltd.

NIUE.

By an act of the New Zealand Parliament passed in December, 1932, the control of the Island of Niue was transferred from the Minister for the Cook Islands to the Minister of External Affairs.

Minister of External Affairs, Rt. Hon. M. J. Savage, P.C.

Secretary for External Affairs, C. A. Berendsen, LL.M.

Resident Commissioner, Niue, W. M. Bell.

Distant from Auckland, 1,343 miles, and from Rarotonga, 590 miles; circumference, 40 miles; height, 200 ft.; area, 100 square miles; census population 1936, 4,104. Steamer connection with two New Zealand ports, Wellington and Lyttelton—thirteen trips each year are made. There is a wireless station at Alofi, the port of the island.

There are two Government schools conducted on the same lines as the Cook Islands schools.

Niue was placed under a separate administration by an Amending Act of 1903. It is a long, low island, fringed with a misty cloud of fine spray. The shores being too deep and steep to support a barrier reef, the coastline is deprived of its protection. It is fertile, but fresh water is very scarce.

The orange, the coconut, the banana, and other tropical products grow well, and the lemon flourishes on the rocky shores.

The natives of Niue are somewhat different in character from other Polynesians. They are very industrious. The girls and women plait hats, which are exported to New Zealand and Australia. They are keen traders but are averse to strangers obtaining a foothold in the island itself.

The exports for 1937 amounted to 23,321*l.*, and the imports to 29,309*l.* The receipts for 1937-8 amounted to 35,443*l.*, and payments to 22,311*l.* The principal exports were copra 10,825*l.*; hats and baskets, 346*l.* bananas, 10,283*l.*; and Kumeras, 1,451*l.*

Uruguay, Hon. Consul at Wellington, David Allan.

Yugoslavia, Hon. Consul, John Totich (Auckland).

THE ROSS DEPENDENCY.

The Ross Dependency, which was declared a British settlement and placed under the jurisdiction of the Governor-General of New Zealand by Imperial Order-in-Council of 30th July, 1923, is defined as "all the islands and territories between the 160th degree of east longitude and the 150th degree of west longitude which are situated south of the 60th degree of south latitude." The dependency includes Edward VII Land, and portion of South Victoria Land. There are no permanent inhabitants of the territory, but whaling is carried on extensively.

TOKELAU OR UNION GROUP.
BRITISH.

This Group consists of three islands, or groups of islets (Atafu, Nukunono and Fakaofo), and lies about 4 degrees due north of Apia, Samoa. Copra is the chief article of trade.

The Natives are Polynesians, numbering 1,219 in August, 1938, and the language is allied to that of Samoa. The islanders are ruled by their own Chiefs with the assistance of Native Village Committees. There are wireless stations at Fakaofo and Atafu.

An invitation from the British Government that the New Zealand Government should take charge of the Union Islands was accepted in 1925, and the administration of the Group was accordingly transferred from the High Commissioner for the Western Pacific to the Governor General of the Dominion on February 11th, 1926, by the publication of the Union Islands Orders in Council, 1925. The Islands are administered from Apia, Samoa, which is the nearest natural trading port and (since 1923) the port of entry for the Group.

WESTERN SAMOA.

The Territory of Western Samoa, formerly in the possession of Germany, was seized and occupied by New Zealand Troops on behalf of the Imperial Government on the 29th August, 1914. It remained in military occupation during the war, and was surrendered by Germany under the Treaty of Peace to the Allied and Associated Powers, by whom the mandate to govern the ex-German territory was assigned to the Dominion of New Zealand. The mandate was approved by the Council of the League of Nations in December, 1920.

On the 1st May, 1920, by Orders passed by the Governor-General of New Zealand in Council, provision was made for the Civil Administration of the Territory; and by the Samoa Act, 1921, of New Zealand, the constitution and legal system of the territory were settled.

Western Samoa is administered by an Administrator appointed by the Governor-General of New Zealand and responsible to the Minister of External Affairs (a member of the N.Z. Executive Council who is charged with the Government of the territory). There is a Legislative Council consisting of not less than four nor more than six official members appointed by the Governor-General, two elected European members, chosen by the votes of European population, and four native Samoan members appointed by the Governor-General. The Administrator, acting with the advice and consent of this Council, is empowered to make Ordinances for the peace, order, and good government of the Territory, subject to disallowance by the Governor-General. A High Court is established, and the Supreme Court of New Zealand is given jurisdiction over Western Samoa.

Minister for External Affairs at Wellington, Rt. Hon. M. J. Savage, P.C.

Secretary for External Affairs at Wellington, C. A. Berendsen.

Administrator of Samoa, A. C. Turnbull (acting).

The Territory consists of the Islands of Upolu, Savai'i, Apolima, and Manono, together with several small islets lying between the 13th and 15th degree S. Lat., and 171st and 173rd degrees West Long., situated some 130 miles North of Tonga and 450 miles N.E. of Fiji. The sailing distance from Auckland (N.Z.) is 1,560 miles, from Sydney 2,570 miles, and from San Francisco 4,400 miles.

The total area of Western Samoa is 725,000 acres. 143,630 acres are alienated, of which (apart from native cultivation) 18,926 acres are under cultivation. The main products for 1937 were copra, 13,340 tons (of which three quarters was produced by the Natives), cocoa, 1,253 tons (all European produced), and bananas 6,706 tons. Some 1,500 acres of hevea rubber are under cultivation, but owing to the market conditions export ceased temporarily in 1932. It was resumed in 1935 and in 1937 61 tons were shipped from the Territory.

The N.Z. Government motor-ship "Maui Pomare" maintains a four-weekly passenger and fruit carrying service to Lyttelton and Wellington, and there is also a four-weekly connection at Pago Pago (American Samoa), with San Francisco–Sydney service. Since September, 1936, the Union Steamship Coy's. m.v. "Matua" has maintained a 4-weekly service from Auckland, N.Z.

The bulk of other produce is carried direct to England and Europe by cargo steamers.

A radio station situated at Apia works directly with New Zealand, Honolulu and Fiji. There are four sub-stations within the Group, which work through the Apia Station.

and Savings Bank Office and a Branch of the Bank of New Zealand are in operation at Apia. British currency is in circulation.

Population.—

Estimated 31st March, 1938.

Europeans	397
Persons of part Samoan blood	2,770
Native Samoans	54,160
Chinese Labourers	328
Other Chinese	21
Melanesian Labourers	83
	57,759

Education.—Practically every Samoan can read and write his own language. Government Schools are maintained at Apia and Avele (Upolu) and Vaipouli (Savai'i), which, together with 78 subsidised schools and schools operated by the Missions, provide for 27,706 pupils.

Medical Services.—A Government Hospital is maintained at Apia, with a staff of European doctors and nurses; district hospitals have been established at Tuasivi (Savai'i) and Aleipata (Upolu) and 6 outstations, in charge of trained native practitioners or nurses, are distributed elsewhere. Dangerous fevers and reptiles are unknown.

Roads and Locomotion.—Roads radiate from Apia chiefly following the coast line. 25 miles of roads are tar-sealed. Motor traffic is rapidly developing both on land and on water, some 300 motor vehicles being registered. The coral lagoons form natural highways around many parts of the Islands.

Climate.—The climate is tropical and very equable. The wet season extends from December to March, the remainder of the year being pleasant, with trade winds blowing.

SOUTH AFRICA.

The Union of South Africa is constituted under the South Africa Act, 1909 (9 Edw. 7, ch. 9), passed by the Parliament of the United Kingdom, on the 20th September, 1909. In terms of that Act the self-governing Colonies of the Cape of Good Hope, Natal, the Transvaal, and the Orange River Colony became united on the 31st day of May, 1910, in a legislative Union under one Government under the name of the Union of South Africa, those Colonies becoming original provinces of the Union under the names of the Cape of Good Hope, Natal, the Transvaal, and the Orange Free State respectively.

The Act constituting the Union provides for the appointment by the Sovereign of a Governor-General, who, with an Executive Council (of which the members are chosen and summoned by him), administers the executive government of the Union as the Governor-General in Council. Departments of State are established by the Governor-General in Council, the Governor-General appointing not more than ten officers to administer them (increased to eleven by Act No. 34 of 1925 and to twelve by Act No. 13 of 1938). Such officers are King's Ministers of State for the Union and members of the Executive Council.

Pretoria is the seat of the administration of the Union, and Cape Town is the seat of the Legislature.

The first Parliamentary Election under the South Africa Act was held in September, 1910, and the Union Parliament was opened by H.R.H. The Duke of Connaught, K.G.

The Senate consists of forty members, eight nominated by the Governor-General in Council and thirty-two elected, eight for each province. The first election was made prior to the establishment of the Union by the two Houses of each of the Colonial Legislatures sitting as one body. The election of representatives and the filling of vacancies is carried out on the principle of proportional representation by the united choice of members of the Assembly and of the Provincial Council in respect of whose province the election or vacancy occurs. In addition 4 senators have been elected under the provisions of the *Representation of Natives Act*, No. 12 of 1936. These senators shall hold their seats for a period of five years notwithstanding any dissolution of the Senate. (For

Digitized by Google

further particulars see the section on Native Affairs.)

The first Senate automatically dissolved in 1920 and a new Senate was appointed early in 1921. This second Senate was dissolved on 19th August, 1929, and the elections for the third took place on the 6th September following.

Under the provisions of Act No. 54 of 1926 some fundamental alterations were made in the constitution of the Senate. All members, whether elected or nominated, may be required to vacate their seats on a change of Government. The Governor-General is also empowered under the Act to dissolve the Senate within 120 days of the dissolution of the Assembly.

The House of Assembly originally consisted of 121 elected members, 51 of whom represented the Cape of Good Hope, 17 Natal, 36 Transvaal, and 17 the Orange Free State. Provision is made in the South Africa Act for the taking of quinquennial censuses of the European population and for the appointment of a Delimitation Commission after each enumeration. The Commission's functions are to re-allocate the Constituencies in accordance with the number of male voters registered, the number of constituencies depending upon the number of males enumerated over 21 years of age (the female enfranchisement does not alter this principle in any way). The seventh Delimitation Commission which functioned in connection with the 1936 census made the following division ; Cape, 59 ; Natal, 16 ; Transvaal, 60 and O.F.S., 15 ; a total of 150. This is the maximum number provided for under the S.A. Act. Members of both Houses must be British subjects of European descent. (For members elected by the natives see the section on Native Affairs.)

Until the passing of Act 18 of 1930, enfranchising European women, and Act 41 of 1931, providing for European manhood suffrage throughout the Union, the qualifications of voters remained the same as in the Colonies at the time of union.

Under the South Africa Act no subsequent law is to disqualify any person in the Cape Province from voting, by reason of his race or colour, who could vote under the existing law, unless the bill is passed by both Houses sitting together in joint session, with a two-thirds majority of the total membership. [In the Transvaal and Orange River Colony the franchise was restricted to white men ; in Natal a native could obtain a vote, but under conditions which made this very difficult ; in Cape Colony any native could do so who had a certain property qualification and could write his name.] The enactment of the Representation of Natives Act 1936 and the consequent position of natives in relation to the parliamentary franchise is explained later in the section on "Native Affairs."

Provinces.

A Provincial Council in each province has power to legislate by ordinance on certain subjects specified in the Act, and on such other subjects as may be delegated to it. The specified subjects include direct taxation (limited by Act 1925 to specified sources of revenue) for provincial purposes, primary and secondary education, hospitals, municipal institutions, local works other than railways and harbours, roads, markets, game preservation, and other purely local or private matters. Loan expenditure for capital works, or of a non-recurrent nature, is covered by Parliamentary appropriation repayable over an agreed term of years and at such rate of interest as the Treasury may fix. In addition the Union Parliament may delegate the power of making Ordinances on any subject to Provincial Councils. All ordinances passed by a Provincial Council are subject to the veto of the Governor-General in Council. Members of the Provincial Council are elected on the same system as members of Parliament, but the restriction as to European descent does not apply. The number of members in each Provincial Council is as follows :—

Cape of Good Hope	61
Natal	25
Transvaal	57
Orange Free State	25

For members elected by the natives see the section on Native Affairs.

The first Provincial elections for the Cape of Good Hope and the Transvaal were held in September, 1910 ; those for Natal and the Orange Free State in October, 1910.

Since the passing of the Financial Relations Act No. 10 of 1913 all expenditure incurred by any Province in respect of matters entrusted to that Province has been defrayed from the Provincial Revenue Fund. The Act quoted provided for the payment to each Province by the Union Government of a subsidy based on the expenditure of the Province (approximately one-half) and for the transfer and assignment of certain Union revenues.

Act 46 of 1925 altered the basis of the subsidies which are now calculated on the number of pupils and students attending schools in each Province, and have no reference to expenditure.

The Provinces publish their own accounts and financial statements, and their revenue and expenditure are not included in the figures of revenue and expenditure published by the central government.

The executive power in the subjects on which the Provincial Council is empowered to make ordinances is vested in an Executive Committee consisting of an Administrator, appointed by the Governor-General in Council, and four members elected by the Provincial Council.

Areas and Population.

	Area, Square Miles.	Population, Census, May, 1921.	European Census, May, 1931.	Population, Census, May, 1936
Cape of Good Hope ...	277,169*	2,782,719	749,231	3,529,900
Natal ...	35,284	1,429,398	177,449	1,946,468
Transvaal ...	110,450	2,087,636	696,120	3,341,470
Orange Free State ...	49,647	628,827	205,375	772,060
Total ...	472,550†	6,928,580	1,828,175	9,589,898

Of the total 6,928,580 persons (1921), 3,536,992 were males and 3,391,588 females. Of the 1,828,175 Europeans (1931) 930,541 were males and 897,634 females. Of the total 9,589,898 persons in 1936, 4,837,107 were males and 4,752,791 females.

The increase for the Union (1921–36) was 38·41 per cent. For the Provinces it was as follows:—Cape, 26·85 per cent.; Natal, 36·17 per cent.; Transvaal, 60·06 per cent.; Orange Free State, 22·78 per cent.

The increase in the European population of the Union (1926-1931) was 9·0 per cent. For the Provinces it was as follows:—Cape, 5·7 per cent.; Natal, 11·7 per cent.; Transvaal, 14·4 per cent.; Orange Free State, 1·2 per cent.

The increase in the European population of the Union (1931–36) was 9·6 per cent. For the Provinces it was as follows:—Cape, 5·6 per cent.; Natal, 7·4 per cent.; Transvaal, 17·9 per cent.

There was a decrease in the Orange Free State of 2·1 per cent.

The population comprised (1921) 1,519,488 Europeans or whites (737,453 females); 5,409,092 non-Europeans (natives, Asiatics, and other coloured) (2,654,135 females). In 1936 the figures were:—Europeans, 2,003,857 (increase 1921–36 of 31·88 per cent.); non-Europeans (natives, Asiatics, and other coloured), 7,586,041 (increase 1921–36, 40·25 per cent.) The proportion of Europeans in the total population in 1904 was 21·58 per cent.; in 1911, 21·37 per cent.; in 1921, 21·93 per cent; and in 1936, 20·92 per cent.

The principal urban centres in the Union with over 10,000 European inhabitants in 1936, had a population as follows:—

Cities (including Suburbs.)	Census, 1936 European.	Census, 1931 European.	Census, 1926 European.	Census, 1921 European.
Johannesburg	257,671	203,298	171,626	152,656
Cape Town ...	173,412	150,914	133,453	117,058

Potchefstroom	10,774	9,909	9,336	8,189
Roodepoort...	10,693	8,139	7,217	7,140

* Includes Walvis Bay (430 square miles). This territory is part of the Cape Province, but for administrative purposes is controlled by South West Africa.

† This figure is subject to correction from time to time as re-surveys of the country are undertaken.

Climate.

Cape Province.

The climate of the Cape Province is very favourable to Europeans. The air is dry and bracing, the heat seldom oppressive, and the winter weather mild and delightful; snow or ice is practically unknown except in the more elevated localities, particularly of the north-east. The mean annual temperature at the Royal Observatory, near Cape Town, in 33° 56′ S. lat., and 18° 29′ E. long., is 62·5°, the mean maximum being 71·2°, and the mean minimum 53·8°; the average rainfall for the last 84·85 years is 25·28 inches. Cape Town itself has a mean annual temperature of 62·4° and the mean day temperature being 71·4° and the mean night temperature 53·4°. Aliwal North, 30° 41′ S. lat., and 26° 40′ E. long. (4,350 feet above sea level), shows a mean temperature of 59·4°, the mean maximum being 74·7°, and the mean minimum 44·0°; the rainfall average of 42-43 years being 20·60 inches. At the Royal Observatory the warmest days occur in February, when the average maximum is 80·5° F., and the coldest nights in July, with an average minimum of 47·2° F. compared with these data the average maximum temperature of the warmest month (February), in Cape Town, is 80·8°, and the average minimum of the coldest month (July), is 47·3°; at Aliwal North, January is the warmest month, the day temperature averaging 85·6°, whereas in July, when the coldest nights are experienced, the average minimum is only 28·7° F.

In the Eastern and Midland divisions the chief rainfall is during the summer months (November to April), in the Western districts during the winter months, while along the south coast the rainfall is fairly uniformly distributed throughout the twelve months.

The Cape offers many localities presenting the requisites of altitude and extreme dryness for the modern treatment of consumptive patients. Persons suffering from tuberculosis are however prohibited entry into the Union under the immigration laws.

Natal Province.

The climate of the Natal Province varies at different levels. On the coast-line it is sub-tropical, but is considerably modified inland owing to increased altitude. Thus Umzinto in the south near the coast, at an altitude of 275 feet, has a mean annual temperature of 68·9°; Durban (50 feet), 69·7°; whilst Howick, at an elevation of 3,439 feet, has an average yearly temperature of 62·4°. In the winter the air is generally exceedingly dry, and several degrees of frost at night are not uncommonly experienced inland. Snowstorms occasionally occur in the mountainous regions. There is a large proportion of cloudless days in the summer and the sky is bright throughout the winter months. Hot winds occasionally occur towards the end of the year (September-November), when temperatures of 100° to 110° may be recorded. At Pietermaritzburg (2,240 feet) the annual temperature is 65·2°, with an average maximum of 76·2° and a minimum of 53·4°. The warmest days occur in January and February, when the mean maximum averages 81·0° and the coldest nights in July, when the mean minimum is 42·6°. Again, Weenen (2,770 feet), situated in a deep cup-shaped valley, has a mean annual temperature of 66·2°, the mean maximum being 83·3°, and the mean minimum 49·1°; the hottest month is January, when the mean maximum is 91·6°, and the coldest nights are experienced in July, when the mean minimum is only 31·6°.

The average rainfall over the Province is approximately 34 inches, being about 40 inches along the

Digitized by Google

coast belt (Durban 44·59 inches) and mostly about 30·00 inches inland, but decreasing to 26·45 inches at Weenen. Thunderstorms are frequent and destructive hailstorms are common during the summer months.

Malarial fever was epidemic in coast districts during 1905 and 1906, but, thanks to the energetic measures taken by the authorities, it has been stamped out, but sporadic outbreaks occur occasionally. Very few cases have occurred inland.

Transvaal Province.

Owing to the altitude (4,000 to 6,000 feet) of the plateau constituting the greater part of the Transvaal Province, the climate on the whole is healthy, cool, and bracing; over the Lowveld to the north and east, however, it is hot and fever-stricken, and not at all adapted for stock owing to various endemic diseases. During summer the days are hot, occasionally exceeding 100 deg., but tempered by frequent thunderstorms, while the nights are mild to warm. During the winter months (April to September) the days are usually bright, sunny and almost cloudless, being frequently almost as warm as in summer, while the nights are cold with frequent frost and haze or fog. The rainfall is greatest in the east, Woodbush in the north-east (Zoutpansberg District) having an average of 69·50 inches in 132 days; it decreases rapidly, however, westward from the escarpment, falling to about 18 inches in the extreme south-west of the Province. The mean annual temperature shows considerable variation according to position and altitude; thus, Volksrust in the south-east, near the Natal border, at an elevation of 5,300 feet, has an annual average temperature of 57·0 deg., whilst Komati Poort, bordering Portuguese East Africa, at a height of only 486 feet above sea level, has an average temperature of 73·3 deg. Pretoria, the administrative capital, has an annual average temperature of 64·1 deg., with a rainfall of 29·17 inches; the warmest days there occur in December, when the mean maximum is 83·6 deg., whereas the coldest nights are met with during July, when the mean minimum is 36·3 deg. The warmest month, however, is January, with a mean of 72·4 deg., and the coldest July, with 52·3 deg. The city of Johannesburg has a mean yearly temperature of 59·7 deg., with an average rainfall of 29·87 inches. The mean warmest month there is January (66·7 deg.), the warmest days also occur in January, when the mean maximum is 76·9 deg., and the coldest nights in July, when the mean minimum is 40·7 deg., and the monthly temperature 50·5 deg. Duststorms are frequent during the latter part of August and throughout September. Thunderstorms also are frequent during summer, more particularly from November to January, and destructive hailstorms are apt to occur at this season, destroying trees and crops. Strong, biting, cold, southerly winds blow from time to time during the winter, although the prevalent winds are mostly northerly.

Orange Free State Province.

The Orange Free State can be separated, roughly, into three divisions, viz., the Western, the Middle and the Eastern.

The Western division is the driest, but is the best for grazing of sheep. The soil is fertile. Rainfall averages 15 to 20 inches.

The Middle division, through which the main line railway runs, holds moisture longer than the Western division. There are large tracts of grass lands good for grazing stock. Rainfall averages 20 to 25 inches.

The Eastern division is the best watered of the three, the climate being moist. This division is the wheat-growing area, and large quantities of wheat and other cereals can be grown. It is fairly well adapted for stock, but the winter is somewhat severe. Rainfall averages 25 to 30 inches.

The heat, especially in the Middle and Western divisions, is great during the months of December, January and February, the temperature at Bloemfontein (altitude 4,580 feet above the sea) has risen on individual days to 102 deg. Fahr. at noon in the shade, the mean maximum being 75·6 deg. and the mean minimum 47·0 deg.

The Eastern division is cooler, and in winter it is no unusual sight to see snow on the mountains Harrismith is a great summer resort for the people of Durban and Maritzburg (Natal), the temperature there being cool and delightful in summer.

The following is the mean monthly and annual rainfall at Bloemfontein:—January, 3·61 inches; February, 3·20; March, 3·58; April, 1·76; May, 1·03; June, 0·40; July, 0·32; August, 0·47; September, 0·86; October, 1·54; November, 2·10; December, 2·25. Total 21·12 inches.

Vital Statistics.

As the registration of births and deaths amongst the non-European population is imperfect, the birth and death rates cannot be calculated accurately.

The following are the latest available figures (1936) and provisionally for 1937 for Europeans in the Union and the several Provinces:—

	1936.			*1937.		
	Birth Rate.	Death Rate.	Marriage Rate.	Birth Rate.	Death Rate.	Marriage Rate.
Cape	22·91	9·54	9·50	22·97	8·84	9·57
Natal	18·87	9·42	9·81	19·44	10·03	9·74
Transvaal	26·94	9·87	13·16	28·08	10·28	13·61
Orange Free State	23·23	8·63	10·17	24·35	9·30	10·08
Union	24·21	9·57	11·10	24·89	10·08	11·31

* Provisional figures only.

Railways.

Prior to May, 1910, the state railways of the several colonies now comprising the Union were operated by separate Administrations. When Union was consummated in May, 1910, the Government lines were merged into one centrally controlled state undertaking which also took over the administration of the principal harbours of the country. At 31st March, 1937, the open route mileage of state-owned lines in South Africa, including the mandated territory of South West Africa, was 13,213 miles (comprising Cape 5,231, Orange Free State 1,633, Transvaal 3,356, Natal 1,511 and South West Africa 1,482), of which 12,329 miles were 3ft. 6in. gauge and 884 miles 2ft. gauge.

Digitized by Google

The capital expenditure on Government railways (open lines) up to 31st March, 1938, amounted to 156,698,405*l.*

The gross earnings for 1937–38 were 33,388,773*l.* and the surplus, after payment of interest but excluding special appropriations such as contribution to renewals and betterment funds, was 5,582,106*l.*

Working expenditure (including depreciation), amounted to 23,218,919*l.* or 69·5 per cent. of the gross revenue, as compared with 20,593,860*l.* or 64·58 per cent. of the gross revenue in the preceding year.

Harbours.

During the year ended 31st March, 1938, altogether 12,255 vessels of an aggregate gross register tonnage of 43,194,489 called at the harbours of the Union and South-West Africa. The principal harbours are at Capetown, Port Elizabeth, East London and Durban.

Capetown Harbour.

Accommodation. — Shipping accommodation consists of the Victoria Basin (67 acres), the Alfred Basin (8½ acres) and the New Basin (196 acres), giving a total area of 271½ acres. Altogether there are approximately three miles of berthage with a depth, at the deeper berths, ranging from 20 to 38 feet at lowest water. Roadstead anchorage under shelter of a breakwater is available for vessels of any draught. The depth of the harbour entrance at lowest water is 36 feet.

Facilities.—Electric cranes of a lifting capacity ranging from 3 to 15 tons are provided at the principal berths, while a floating crane is available for heavy lifts up to 60 tons. Modern precooling stores of a capacity of 6,000 shipping tons are available at berths in the New Basin, and precooled cargo may also be shipped at berths in Victoria Basin via a gallery. Facilities are provided at the principal berths for fueling oil-burning vessels, while a special berth is equipped for the offloading of bulk petrol and oils. The port is provided with a terminal grain elevator of 30,000 tons storage capacity.

Repairing Facilities.—There is a graving dock with a length of 500 feet on keel blocks and a depth at highest water of 26 feet on the sill. There is also a slip for vessels up to 750 tons, and a floating dock with a lifting capacity of 450 tons.

Developments.—A scheme of harbour development known as the Modified Southern Scheme was completed a short time ago. Briefly the project involved (*a*) the widening of the South Arm and the construction of deep-water berths on the south side thereof, (*b*) the provision of a return knuckle at the end of the South Arm, and of a random block mole approximately 5,300 feet long, thus forming a new basin, and (*c*) the lengthening of the breakwater. Authority was recently given for the construction of additional deep-water berths, "E," "F" and "G," at the southern or shore end of the new basin and this work is in progress.

The Government recently agreed to a comprehensive long-range scheme of harbour development at Capetown. Briefly the proposal involves the construction of a new arm approximately 7,000 feet in length from Woodstock beach in the direction of the South Arm Return Knuckle, and necessitates the demolition of the recently constructed random block mole. An area about 363 acres in extent, between the root of the South Arm and the Marine Drive near Woodstock, embracing the existing municipal pier at the foot of Adderley Street will be reclaimed. An enlarged basin, approximately 6,200 feet long by 2,200 feet wide, will thus be provided, enabling the construction of extensive deep-water berthage of which the new berths "E," "F" and "G" will form a part.

The extensive dredging and reclamation work involved has been let to an overseas engineering company and the contractors have already commenced operations.

Port Elizabeth Harbour.

A scheme for transforming Port Elizabeth from an open roadstead port, worked by the lighterage system, to a completely sheltered harbour has, except for the provision of certain shore facilities, recently been completed. Briefly the scheme provided for the construction of (*a*) a breakwater 4,850 feet in length extending from the end of the old Dom Pedro Jetty in an easterly and then a northerly direction, (*b*) an arm extending eastward of the North Jetty for a distance of 3,570 feet, to have a quay for the full distance on the south or enclosed side; this arm to form, with the breakwater, an enclosed sheltered area of 314 acres, (*c*) a new arm in the enclosed area, to have a quay 1,700 feet in length and to be equipped with modern pre-cooling facilities, and (*d*) the harbour entrance and the area served by the new quays to be dredged to a depth of 36 feet.

Approval was recently given to the provision of bulk-oil facilities at the port and work has already commenced on the reclamation for the storage sites and the provision of an oil berth.

Facilities.—Deep-water berthage provided under the new scheme totals 3,375 feet with 36 feet L.W.O.S.T. alongside. Electric cranes of a lifting capacity of from 4 to 15 tons are provided at the new quays, while a 20-ton electric crane is available at the old South Jetty. There is a modern precooling plant with a storage capacity of 4,500 shipping tons. The repair facilities consist of a slipway of a capacity of 400 tons dead-weight.

East London Harbour.

East London harbour is situated at the mouth of the Buffalo River, the entrance being protected by breakwaters. The approach channel is 430 feet wide and the working depth at the entrance is 35 feet. The water area of the harbour is approximately 100 acres in extent and there is a total of 4,742 feet of deep-water berthage with depths ranging from 27ft. 9in. to 35ft. at lowest water.

Facilities.—Electric cranes with a lifting capacity of from 3 to 20 tons are available at the various berths. There is a modern precooling store of a capacity of 1,500 shipping tons, and a special berth is equipped for the offloading of bulk petrol and oil. There is a patent slip with every facility for effecting repairs to vessels up to 1,000 tons dead weight.

Recent Developments.—A turning basin or swinging area 1,000 feet wide and capable of being made use of by the largest vessels at present visiting South African waters has recently been completed. In the eastern wing of the basin a concrete quay 1,000 feet in length with a depth alongside of 35 feet has been provided for the accommodation of mail boats. A recently authorised 600-foot extension to this quay is under construction. To facilitate the entry of the larger mail boats being constructed for the South African route the south breakwater is being extended by 1,000 feet.

Digitized by Google

Durban.

Accommodation.—The harbour works at Durban are situated within a land-locked bay with a high water area of approximately six square miles. The approach channel to the harbour has an average working depth of 37½ feet at lowest water with a minimum width of 450 feet and the entrance is protected by breakwaters. There are approximately 3½ miles of wharfs with depths alongside ranging from 23 to 38½ feet at lowest water.

Facilities.—Mobile cranes of a lifting capacity ranging from 3½ to 10 tons are provided along the Point quay wall, while a fixed crane of 80 tons lifting capacity is available for heavy lifts. The port is equipped with a terminal grain elevator of 42,000 tons storage capacity, and there is a precooling store with a capacity of 2,000 tons. Electrically-driven coaling appliances capable of loading at the rate of 1,000 tons per hour are installed at the Bluff. There is a special wharf equipped for the offloading of bulk petrol and oil.

Repairing Facilities.—The graving dock at Durban is the largest in the Southern Hemisphere. It is 1,150 feet in length on keel blocks and the width is 110 feet at the entrance and 138½ feet at the coping: depth on sill, H.W.O.S.T. 41 feet, L.W.O.S.T. 35 feet.

Developments.—Additional deep-water berthage is at present under construction at Durban Harbour, while approval was recently given to the provision of a jetty with deep-water berthage for six vessels, the total cost of these improvements amounting to 1,921,952*l.*

Means of Sea Communication.

The mail steamers of the Union-Castle Mail Steamship Company, under contract with the Union Government, leave England and the Union (Table Bay) weekly on Fridays, the passage being effected in 16 days 15 hours, and in 17 days 6 hours when the steamer is required to touch at St. Helena and Ascension. The calls at St. Helena and Ascension, however, are made by the intermediate steamers under agreement with the British Post Office. The distance by sea from England to the Union varies from 5,866 to 6,146 miles, according to the course followed. The mail steamers call at Madeira in both directions.

The mail steamers leave Table Bay weekly on Tuesdays for Durban, Natal, calling at Port Elizabeth and East London to land and embark passengers, while a frequent service to Mossel Bay, Port Elizabeth, East London and Durban, is also maintained by the intermediate steamers of the Union-Castle and by other companies. The passage from Table Bay to Port Elizabeth takes two days, to East London three, and to Natal four to five. From Natal the mail steamers leave weekly, calling at East London, Port Elizabeth (the call at Mossel Bay is fortnightly) and Table Bay.

An acceleration in the mail service from England to Cape Town and *vice versa*, has been brought into operation by the Union-Castle Mail Steamship Co. Ltd., and seven vessels of the Line now complete the passage in each direction in 13 days 12 hours instead of 16 days 15 hours under the old schedule.

The accelerated sailings provide for an arrival from England at Cape Town on Fridays, three days earlier than at present and four days earlier at Port Elizabeth, East London and Durban. The homeward voyages of these vessels are likewise expedited by three days, the arrival day at Southampton being Friday instead of Monday. It is expected that by the end of 1938 all vessels engaged in the weekly mail service between England and Cape Town, and *vice versa*, will maintain this schedule.

The Union-Castle Company also has a service *via* the Eastern route (through the Suez Canal), both outwards and homewards.

Joint service to Australia is maintained by the steamers of the Aberdeen—White Star—Blue Funnel Line and Wilhelmsen Norwegian Line.

There is a mail Service with Mauritius and East Coast Ports (Inhambane, Chiloane, Beira, Mozambique, Ibo, etc.), once or twice a month and at intervals of ten or twelve days with India. There are also two direct lines of steamers between London and Durban, the average passage of which is 26 days.

Regular services of steam and motor ships are maintained from and to Glasgow and Liverpool, also from and to the principal Continental ports, India, South America, Java, Canada, United States of America, Japan and other Eastern Countries.

Land.—Passenger train services afford communication between the principal towns of the Union on several days in each week. Dining-cars are provided on all main line trains and meals of a high standard are obtainable at moderate charges. Between Capetown and Johannesburg, *via* Kimberley, there are passenger trains on five days of the week in the inland direction and on six days in the coastwards direction; on this route there is an express train de luxe in each direction on one day in each week connecting at Capetown with the incoming and outgoing Union-Castle mail boats. On six days in each week there are passenger trains between Capetown and Johannesburg *via* the Orange Free State and on the same number of days in each direction between Capetown and Port Elizabeth, and between Capetown and East London. From Capetown mail trains depart for Durban on six days and in the reverse direction on four days in each week; a weekly express train de luxe runs between Kimberley and Durban connecting with the express trains between Capetown and Johannesburg. Between Port Elizabeth and Johannesburg, and between East London and Johannesburg, there are passenger trains in each direction on six days in each week, while between Johannesburg and Durban there are three trains in each direction daily. There is a tri-weekly passenger train service between Capetown and Bulawayo, Rhodesia, one train in each direction weekly being an express train.

The Railway Administration has a large number of road motor services in operation, total route mileage at the 25th September, 1938, being 14,199. The services are operated by high-powered, pneumatically tyred vehicles, and deal with the conveyance of all classes of traffic, including passengers. Practically all outlying towns and agricultural districts off the railway line are now served by road motor transport, which has been extremely valuable in encouraging the development of areas previously handicapped by being situated long distances from the railway.

Air.—In 1931 powers were granted to the South African Railways and Harbours Administration, to operate its own aircraft, and in pursuance thereof the Administration in 1934 assumed control of the air services operated by a private company between Capetown, Durban and Johannesburg, and in 1935 of the private service operated between the Union and South-West Africa, while in 1936 the Administration took over the service between Capetown and Johannesburg previously operated by Imperial Airways. Under State control considerable development of airways has taken place, and speedy air services now connect all the principal centres in the Union and South-West Africa, while in collaboration with other airways companies services are maintained between the Union and various states in Central and East Africa.

The following services are now operated by South African Airways :—

	In each Direction.
Rand–Durban	Daily
Durban–Capetown	Five trips per week
Rand–Capetown	Four „ „ „
Rand–Port Elizabeth	One „ „ „
Rand–Windhoek	Two „ „ „
Rand–Kisumu (Kenya)	One „ „ „

Posts and Telegraphs.

At the end of March, 1938, there were in the Union 3,317 post offices, and 3,273 telegraph offices. Air mail services operate between Cape Town, Port Elizabeth, East London, Durban; Durban and Johannesburg; Kimberley and Windhoek; Cape Town and Johannesburg; Johannesburg and Port Elizabeth; Durban and London *via* the Sudan; Johannesburg and Lourenco Marques.

When the triennial statistics were last taken, for the year 1936, 429,518,000 articles of mail matter addressed to places within and without the Union were handled. 4,690,000 of the articles were registered. The number of money orders issued was 752,946 of a total value of 3,584,849*l.*, while the number paid was 691,467 of a total value of 3,154,478*l.*

POSTAL ORDERS ISSUED.

Union.		
	No.	5,347,744
	Value	£2,522,376
British.		
	No.	545,286
	Value	£307,375

POSTAL ORDERS PAID.

Union.		
	No.	5,106,941
	Value	£2,385,638
British.		
	No.	204,828
	Value	£109,490

The revenue in respect of the postal service during 1937-38 amounted to 2,406,781*l.*, the telegraph revenue was 626,350*l.*, and telephone revenue 2,507,123*l.* The combined cash expenditure for the Department was 3,955,889*l.*

There were 175,711 telephone instruments, 124,145 subscribers, and approximately 261 million calls were handled.

The number of depositors in the Government Savings bank at 31st March, 1938, was 858,141, and the total amount standing to their credit 19,980,695*l.*

7,065,044 inland telegrams (including press messages) were received and despatched during the year.

The Union is in telegraphic communication with the rest of the world by means of cables and a Beam Wireless service Cape Town—London, and in telephonic communication with certain parts *via* the Beam Wireless.

Wireless installations for ship—shore working are established at Algoa Bay, Jacobs (Natal), Slangkop, and Walvis Bay, in addition to which a low power station exists at East London. With the exception of East London these stations have an effective range of approximately 2,000 miles, and even more when short wave apparatus is in use. During the year 39,815 messages were received from or transmitted to ships and 13,226*l.* accrued therefrom to Post Office revenue.

The rates of postage are :—

Country.	Letters.	Postcards.	Newspapers.	Printed Papers.	Commercial Papers.	Sample Packets.

* By air as normal means of transmission whenever expedition is afforded.

Air Mail.

A twice weekly air-mail service undertaken by Imperial Airways, Ltd., operates between England and South Africa. A connecting air service is operated between Kimberley and Windhoek twice a week, completing the journey in one day *via* Upington, Keetmanshoop and Mariental.

Customs and Excise.

The four self-governing colonies prior to the operation of the Act of Union gave notice to the Administrations of Southern and Northern Rhodesia of their intention to retire from the South African Customs Union Convention in terms of Article xxiii. of that Convention, with effect from the 30th June, 1910; and subsequently on the consummation of the Union of South Africa, an agreement was concluded with these Administrations to continue all the essential features of the previous Customs Convention, which Agreement has been subsequently amended to permit of freedom of charges for excise.

A further Agreement entered into as from the 1st January, 1925, was superseded by separate Agreements entered into in 1930 between the Union and Southern and Northern Rhodesia respectively. In the case of Northern Rhodesia, the Agreement, which was slightly emended by Act No. 29 of 1936, is still in operation, but in respect of Southern Rhodesia the Agreement has been superseded by a new Agreement which came into operation as from the 1st April, 1935. The more important provisions of the two Agreements are :—

Northern Rhodesia :

(*a*) The free interchange of the produce and manufactures of the Union and of the territory of Northern Rhodesia, except that in the event of one party to the agreement levying an excise duty on any article produced or manufactured in its territory, it shall be entitled to levy a corresponding customs duty on importation into its territory of a like article produced or manufactured in the territory of the other contracting party.

(*b*) The following goods, when produced or manufactured in the territory of one party to the Agreement, shall upon importation into the territory of the other party be subject to the lowest rates of customs duty leviable on similar goods imported from British Dominions or Possessions, rebated to the extent shown against the respective items, as follows :—

Ale, beer, stout, cider and perry, exceeding 3 per cent. of proof spirit	50%
Wines	50%
Cigarettes and tobacco manufactures	75%

Spirits distilled in the Union on importation into Northern Rhodesia shall be subject to the customs duty leviable on spirits imported into Northern Rhodesia from Great Britain, rebated to the extent of 25 per cent., and shall not be imported into Northern Rhodesia except through free-warehousing stations.

Spirits distilled in Northern Rhodesia shall on importation into the Union be subject to customs duties in accordance with the customs tariff in force in the Union, and shall not be imported into the Union except through free-warehousing stations.

In the case of matches, sugar and playing cards, manufactured in the Union or manufactured in Northern Rhodesia and removed from one territory to the other, the amount of excise duty leviable in the territory whence the goods are removed (not exceeding that leviable in the territory to which the goods are removed) shall be paid by the Government of the removing territory to the Government of the receiving territory.

In the case of cigarettes manufactured in the Union and removed to Northern Rhodesia the amount of excise stamp duty leviable in the Union (not exceeding that leviable in Northern Rhodesia), shall be paid by the Government of the Union to the Government of Northern Rhodesia, and similarly credit shall be passed by the Government of Northern Rhodesia to the Government of the Union to the extent of excise stamp duties in force in the Union (not exceeding those leviable in Northern Rhodesia), on removals from Northern Rhodesia to the Union.

In the event of goods subject to excise duties in the Union being duty-paid on importation into Northern Rhodesia and being subsequently returned to the Union, credit shall be passed by the Government of Northern Rhodesia, to the Government of the Union to the extent of the excise duties payable in the Union; and *vice versa* credit shall be passed by the Government of the Union on similar exciseable goods returned to Northern Rhodesia.

(*c*) The importation free of duty into the Union of leaf tobacco grown in Northern Rhodesia shall, during each period of twelve months ending the 30th June, be limited to 400,000 lbs. in all.

The importation free of duty into Northern Rhodesia of leaf tobacco grown in the Union shall during each period of twelve months ending the 30th June, be limited to 50,000 lbs. Each party to the Agreement may prohibit the importation into its own territory, and may prohibit the exportation into the territory of the other contracting party, of scrap tobacco, dust tobacco and tobacco stems, and tobacco in any form manufactured therefrom.

(*d*) Any party to the Agreement may prohibit the importation for consumption within its territory of beef, or cattle the weight of which, as ascertained on arrival within the said territory, is in the case of an ox less than 1,000 lbs. and in the case of a cow less than 750 lbs., or alternatively when the weight at the point of despatch in the territory whence imported is in the case of an ox less than 1,050 lbs. and in the case of a cow less than 790 lbs.

(*e*) In respect of goods manufactured in the Union or Northern Rhodesia and removed from one territory to the other there shall be paid by the Government of the exporting territory to the Government of the importing territory fifteen per centum of the export value of such of those goods as appear in Class I of the twenty-third Annual Statement of Trade and Shipping of the Union for the year 1928, together with the non-alcoholic beverages in Class II, and ten per centum of the export value of such of those goods as appear in Classes IV to XIII of the said Trade Statement with the exception of electrolytic copper and zinc and publicity literature (*i.e.*, advertising matter relating to fairs, exhibitions and travel).

The same bases of payment shall apply to the corresponding classes of goods manufactured in Northern Rhodesia and removed to the Union from Southern Rhodesia, and also to the corresponding classes of goods manufactured in the Union and removed to Northern Rhodesia from Southern Rhodesia.

Digitized by Google

In respect of goods imported into the Union from any country not a party to the Agreement and subsequently removed to Northern Rhodesia, otherwise than in bond, there shall be paid by the Government of the Union to the Government of Northern Rhodesia, the customs duties collected on importation into the Union, subject to a deduction of five per centum of such duties, to cover the cost of collection thereof.

The Government of the Union shall also be responsible for collecting and shall pay over to the Government of Northern Rhodesia, subject to a deduction of five per centum, the difference between the duties leviable in Northern Rhodesia, and those levied in the Union on the goods specified in the Annexure to this Agreement, imported into the Union from any country not a party to this Agreement and subsequently removed to Northern Rhodesia otherwise than in bond, when the rates of duty in Northern Rhodesia are higher than those in the Union. The list of goods so specified may be added to by mutual agreement, when rendered necessary by alterations in tariffs or trade conditions.

The arrangement set forth in the preceding paragraph shall not apply to goods despatched by parcels' or letter post, the extra duties in such cases being collected by the Government of Northern Rhodesia.

(*f*) Potable spirits not distilled in the Union shall not be removed from the Union to Northern Rhodesia except in bond.

(*g*) When bioscope films for exhibition purposes on which duty has not previously been paid in the Union, are removed from Northern Rhodesia to the Union, the Government of Northern Rhodesia shall collect the difference in duties leviable in Northern Rhodesia and the Union. Notwithstanding anything to the contrary contained in Articles X and XI upon removal from one territory to the other of bioscope films for exhibition purposes, the share of duty due to each territory shall be based on the showing value of such films in that territory, and the duties collected shall be apportioned and paid accordingly.

(*h*) In respect of goods imported into Northern Rhodesia from any country not a party to the Agreement and subsequently removed to the Union otherwise than in bond, there shall be paid to the Government of the Union by the Government of Northern Rhodesia customs duties at the rates leviable in the Union, subject to a deduction of five per centum of such duties, to cover the cost of collection thereof.

In the case of goods liable to *ad valorem* duties the values shall be those entered for customs purposes on importation into Northern Rhodesia.

Annexure (as amended by Government Notice, No. 1445, of 17th September, 1937).

Tea :—
In packets or tins not exceeding 10 lbs. each in weight.
In larger containers.
Cigars and cigarillos.
Knitted clothing.
Knitted underwear.
Underclothing, n.e.e.
Shirts, other.
Hosiery.
Millinery, drapery, haberdashery, textile articles of furnishing and napery, n.e.e.
Ties.
Piece goods not being canvas, blanketing or kaffir sheeting :—
Cotton (woven or knitted) :
Containing 50% or more by weight of cotton, but no rayon, the free on board price of which does not exceed 1*s.* 3*d.* per yard.
Of cotton and rayon, with or without other materials, containing 50% or more by weight of cotton, the free on board price of which does not exceed 1*s.* 3*d.* per yard.
Containing 50% or more by weight of cotton, the free on board price of which exceeds 1*s.* 3*d.* per yard.

Union Tariff Item Particulars.

Woollen (woven or knitted), containing more than 50% by weight of wool or hair, or wool and hair mixed.
Other woven fabrics in the piece, n.e.e. :
Containing 50% or more by weight of rayon.
Containing more than 50% by weight of silk.
Other.
Other knitted fabrics in the piece, n.e.e. :
Containing 50% or more by weight of rayon.
Other.
Threads, yarns, cottons, silks, and twists, sewing, knitting and crochet; and carpet and rug yarns for making carpets and floor rugs.
Bicycles and tricycles, pedal, including spare parts and accessories, but not electric lamp bulbs, tyres and tubes, when imported separately.
Motor cycles and side-cars, including spare parts and accessories, but not electric lamp bulbs, piston-rings, sparking plugs, tyres and tubes when imported separately.
Cutlery, not gold or silver, nor gold or silver-plated.
Dairy utensils and machinery :
Other.
Fencing material; droppers, gates, hurdles, posts, standards, strainers, staples, stiles, winders, and other materials or fastenings of metal ordinarily used for agricultural and railway fencing, but not including wire and wire netting.
Machinery, apparatus, appliances and implements (not specially provided for and not including material, domestic machines or vehicles) :
Agricultural purposes.
Fixed plant and machinery for factory installation, but not including structural steelwork for staging or platforms.
Machinery, apparatus, appliances, implements and electrical material used in connection therewith for the generation, storage, transmission, distribution of, and lighting by gas or electric power.
Plain copper wire, electric.
Motor Cars :—
Of a free-on-board value, not exceeding 400*l.*
Of a free-on-board value exceeding 400*l.* but not exceeding 600*l.*
(i) Second-hand or used, the personal property of an individual, brought into the Union by him for his own use, not for sale.
Spare parts and accessories, but not including electric lamp bulbs, piston-rings, sparking plugs, batteries, tyres and tubes and radio apparatus.
Motor omnibuses with all-metal bodies.

Digitized by Google

Motor char-a-bancs; and omnibuses other than those with all-metal bodies.

Spare parts and accessories or motor char-a-bancs and omnibuses, motor trucks and motor vans, but not including electric lamp bulbs, piston-rings, sparking plugs, batteries, tyres and tubes.

Pumps, wine; and windmills.

Refrigerating machinery and mechanically cooled refrigerators.

Sewing and knitting machines, not being industrial machinery, and needles therefor.

Tools, mechanics'.

Traction engines; stone crushers (not being mining machinery); and mechanical stone driers; steam and motor road rollers; road scarifiers; and mechanical road construction or maintenance graders; street sweeping and street spraying machines; asphalt melting and mixing plant; tar and pitch boilers.

Glassware, chinaware and porcelainware :—

For laboratory use.

(i) Glassware, n.e.e.

(ii) Chinaware and porcelainware, n.e.e., including household crockery of earthenware.

Boots and shoes :—

Cotton mesh and canvas shoes (sizes 4 and under) of the plimsoll tennis or gymnasium type, the soles of which are wholly of rubber; and rubber boots and rubber bathing shoes.

Wood, unmanufactured.

Ceiling and flooring boards, planed, tongued and grooved.

Paper :—

Newsprint, in reels, or in the flat.

Plain or composite, n.e.e. :

(i) in the original mill wrappers, flat or folded, not less than 16 inches by 15 inches.

(ii) in reels, including paper in reels used for the Monotype typesetting machine.

N.B.—The provisions of the Agreement shall not apply to that part of Northern Rhodesia falling within the Congo Basin, as defined in Article I of the General Act of Berlin of the 26th February, 1885, as revised by the Convention of St. Germain-en-Laye of September, 1919, or as may subsequently be revised.

The Agreement shall remain in force until the 30th June, 1932, and thereafter for periods of twelve months: provided that any party thereto may give notice before the 31st December of the year 1931 or of any subsequent year of its intention to retire therefrom as from the 30th June following such notice, and provided further that should one of the contracting parties at any time take any steps in conflict with the spirit and intent of the Agreement, the other party shall be at liberty to retire therefrom forthwith.

The following are the provisions of the Agreement concluded between the Union and Southern Rhodesia which came into operation on the 1st April, 1935 (Union Act No. 14 of 1935, as amended by Act No. 29 of 1936).

Southern Rhodesia :

Animals and the goods specified in the Schedule hereto when grown, produced or manufactured in the territory of one of the parties to the Agreement, shall, subject to any restrictions therein provided for, be admitted free of customs duty on their importation into the territory of the other party.

Animals and goods, grown, produced or manufactured in Southern Rhodesia shall, subject to any modifications provided for in the Agreement be admitted on importation into the Union at the rate of customs duty leviable on similar animals and goods grown, produced or manufactured in the United Kingdom, subject to a preferential rebate from such rate of 20 per cent.: Provided that in respect of the undermentioned goods the preferential rebate shall be as follows:

Cigarettes and tobacco manufactures	50%
Clothing: tailor-made, bespoke, ready-made, underclothing, shirts and pullovers	50%
Sleepers, wooden	The whole duty.

The importation into the Union of cattle for slaughter from Southern Rhodesia shall not exceed 5,200 head per annum.

The weights of such animals shall, on arrival within the Union, be in the case of an ox not less than 1,000 lbs., and in the case of a cow, not less than 750 lbs., or alternatively, when the weights are taken at the point of despatch, 1,050 lbs. and 790 lbs. respectively.

No fresh, chilled or frozen beef shall be imported into the Union from Southern Rhodesia; provided that the Livestock and Meat Industries Control Board of the Union may permit the importation into the Union from Southern Rhodesia of chilled quarters of beef, weighing each not less than 150 lbs., from oxen or cows which, when alive weighed not less than 1,050 lbs. each or 790 lbs. each respectively; and provided further that four such quarters shall be deemed to be a head of cattle.

The Livestock and Meat Industries Control Board of the Union may, subject to the provisions of the preceding paragraphs, regulate the supply and control the distribution of the cattle and beef imported to areas in the Union with regard whereto the said Board has the power to determine the number of cattle and quantity of beef which may be brought into any such area.

The quantity of Virginia type leaf tobacco which may be imported into the Union free of duty during every period of twelve months commencing on the first day of July, shall be determined by the Tobacco Control Board of the Union. For the purpose of making such determination the Board shall estimate :—

(*a*) the quantity of Virginia flue-cured leaf tobacco required in the Union during any such period,

(*b*) the quantity of such tobacco produced in the Union during the preceding period of twelve months,

(*c*) the unsold stocks of such tobacco in the Union at the commencement of such period,

(*d*) the quantity of such tobacco to be imported from Northern Rhodesia during such period.

The amount by which the quantity estimated under (*a*) exceeds the total quantity estimated under (*b*), (*c*) and (*d*) shall then be the quantity of such tobacco which may be imported into the Union from Southern Rhodesia free of duty during such period. The minimum price wet weight paid at auction, Salisbury, for the lowest grade of leaf that may be so imported shall be determined by the above Board.

The quantity determined for the year ended 30th June, 1939, is 2,000,000 lbs.

The quantity of leaf tobacco grown in the Union which may be imported into Southern Rhodesia free of duty during any period of twelve months, may by agreement between the contracting parties be changed to conform with any variation of the quantity determined as above.

In terms of paragraph (6) of article V of the Union and Southern Rhodesia Trade Agreement, 1935, the Tobacco Industry Control Board has determined that there shall be no duty free importations of Turkish leaf tobacco from Southern Rhodesia into the Union of South Africa during the period 1st July, 1938, to 30th June, 1939.

Animals and goods, grown, produced or manufactured in the Union shall, subject to any modifications provided for in the Agreement, be admitted on

Digitized by Google

importation into Southern Rhodesia at the rate of customs duty leviable on similar animals and goods grown, produced or manufactured in the United Kingdom, subject to a preferential rebate from such rate of 20 per cent. : provided that in respect of the undermentioned goods the preferential rebate shall be as follows:—

Fruits: bottled, tinned or otherwise preserved except crystallised fruits; but including pulp and candied peel	50%
Fruits, dried, of all kinds	50%
Jams, jellies and honey	50%
Ale, beer, stout, cider and perry, all kinds, of strength exceeding 3 per cent. of proof spirit	33⅓%
Spirits, potable, exceeding 3 per cent. of proof spirit	10%
Wines	33⅓%
Cigarettes and tobacco manufactures	50%
Clothing: tailor-made, bespoke, ready-made, underclothing, shirts and pullovers ..	33⅓%

(NOTE.—Shirts manufactured in the Union from piece goods not the manufacture of the United Kingdom or any part of the King's dominions, shall be liable to a minimum duty of 6d. each.)

Boots and shoes	33⅓%
Leather in the piece	33⅓%
Blasting compounds	50%
Detonators	50%
Matches	25%

Motor vehicles manufactured in the Union shall, on importation into Southern Rhodesia be admitted at the lowest rates of customs duty applicable to similar vehicles manufactured in other British Dominions, rebated to the extent of 10 per cent., and for the purpose of assessing duty the value shall be the usual wholesale selling price to any purchaser in the Union for home consumption at the date of exportation, less the customs duties leviable in the Union on entry for home consumption.

Rubber tyres and tubes manufactured in the Union shall, on importation into Southern Rhodesia be admitted at the rates leviable on similar goods manufactured in the United Kingdom.

Each contracting party agrees to prohibit the importation from the territory of the other party of the goods enumerated hereunder:

Wheat,
Wheaten flour, meal and bran,
Potatoes,
Maize,
Maize products,
Groundnuts,
Vegetable oils,
Eggs,
Butter,
Cheese;

Provided that:

Any such goods may be imported into any such territory under a permit issued by or under the authority of the Government of such territory, and that any such permit relating to butter or cheese may restrict the permit to any defined grade, class or type of butter or cheese;

Any such goods imported under permit shall be free of customs duty except wheaten flour or meal produced in the territory of the other party, the customs duty on which shall be at the rate of customs duty leviable on wheaten flour or meal produced in the United Kingdom, subject to a preferential rebate of 1/- per 100 lbs.

In respect of goods imported into the territory of either party to the Agreement from a country not a party thereto and subsequently exported to the territory of the other party, other than goods in transit, the value for purposes of assessing customs duty shall be as defined by the law of the latter territory, but excluding customs duty paid on importation into the former territory, and subject to a further deduction of 25 per cent., except in the case of goods falling within Class IV of the customs tariffs, when the deduction shall be 15 per cent. in respect of articles falling under tariff item 65, and 20 per cent. in respect of all other goods in that class.

When bioscope films intended for exhibition, on which duty has not previously been paid in the Union, are removed from Southern Rhodesia to the Union, the Government of Southern Rhodesia shall collect the difference between the duty levied on these films on their importation into Southern Rhodesia and the duty which would have been payable thereon if they had been imported into the Union direct.

Notwithstanding anything to the contrary contained in Article X of the Agreement, upon removal from one territory to the other of bioscope films for exhibition purposes, the share of duty due to each territory shall be based on the showing value of such films in that territory and the duties collected shall be apportioned and paid accordingly.

If cigarettes manufactured in the territory of one of the parties to the Agreement are imported into the territory of the other party, the Government of the firstmentioned territory shall pay to the Government of the lastmentioned territory a sum equal to the excise stamp duty which was levied on those cigarettes but not exceeding the sum which the latter Government would have levied thereon if they had been manufactured in its territory.

An article shall not be deemed to have been manufactured in the territory of either of the parties to the Agreement unless it was wholly manufactured in such territory, or if partially manufactured therein, unless at least fifty per cent. of the factory cost of such article in its finished condition was represented by the products and labour of such territory, or of any part of the King's dominions; provided that in respect of any motor vehicles manufactured in the Union such percentage shall be twenty-five; and provided further that in respect of any other class of article the parties may agree to reduce such percentage to not less than twenty-five.

The Government of the Union undertakes to charge for the conveyance, over any part of its railway system, of any livestock or goods grown, produced or manufactured in Southern Rhodesia, whether intended for consumption in the Union or for export, the same railway rates which would be payable if the livestock or goods had been grown, produced or manufactured in the Union.

On the basis of the railway rate that was in force on February 1st, 1935, the Government of the Union of South Africa undertakes, in respect of Southern Rhodesia chilled beef for export overseas, to rebate the rate to the extent of 50 per cent.

The Government of Southern Rhodesia undertakes to use its influence to ensure that goods not grown, produced or manufactured in the Union but exported from the Union, whether for consumption in Southern Rhodesia or in transit through Southern Rhodesia to other territories, shall be conveyed at the lowest railway rates granted or that would be granted under similar conditions on goods imported into Southern Rhodesia from any other territory or country, and in respect of livestock or goods grown, produced or manufactured in the Union, at the same railway rates which would be payable if the livestock or goods had been grown, produced or manufactured in Southern Rhodesia.

The mandated territory of South West Africa, shall, for purposes of the Agreement, be regarded as part of the Union.

Digitized by Google

Subject to the provisions of paragraph (2) of Article VI, the Agreement shall take effect from the 1st April, 1935, but shall be subject to ratification and confirmation by the Parliaments of the Union and Southern Rhodesia.

Upon such ratification and confirmation, the Agreement shall continue in force until the 31st March, 1937, and thereafter for periods of twelve months: Provided that either party to the Agreement may give notice before the 1st January of the year 1937 or of any subsequent year of its intention to terminate it on the 31st March following such notice, and provided further that in the event of circumstances arising which, in the judgment of the Government of either party, necessitate a variation of any provision of the Agreement, the proposal to vary that provision shall form the subject of consultation between the two Governments.

Schedule.

Animals, living:—
- (*a*) Cattle for slaughter.
- (*b*) Sheep for slaughter.
- (*c*) Bacon pigs.
- (*d*) Other, excluding pigs for slaughter, not being bacon pigs.

Bones, feathers, ivory, hoofs, horns, shells, skins, teeth, wool and other parts of animals, fishes or reptiles, not being manufactured, polished or further prepared than dried or cleaned, but in their raw or unmanufactured state.

Hog casings (sausage skins).

Bonemeal for use as a cattle food, in bulk.

Fish: fresh, dried, cured or salted.

Fodder, chaff, hay, lucerne, oat-hay, oil-cake and other fodder, n.e.e.

Fruits, fresh and green.

Hair: Horsehair or other animal hair not being further prepared than dyed, dried or cleaned.

Lard and edible meat fats.

Bacon and ham.

Meat meal.

Meats, preserved, in tins.

Onions and garlic, not preserved.

Precious metal concentrates.

Publicity literature (*i.e.*, advertising matter relating to fairs, exhibitions and travel).

Seeds, bulbs, plants, trees and tubers: for planting and sowing only, not including those ordinarily used for food or fodder.

Vegetables: Fresh or green, but not including potatoes.

A Customs Agreement has likewise been entered into between the Government of the Union and His Majesty's High Commissioner on behalf of the Territories of the Bechuanaland Protectorate, Basutoland, and Swaziland. The agreement is somewhat similar to that of Northern Rhodesia, but the basis laid down in Section No. 12 of the South Africa Act, 1909, for the adjustment of duties between the parties to the Agreement is followed, viz:—The Treasury of the Union will pay out quarterly a sum in respect of such duties which shall bear to the total Customs revenue of the Union in each year the same proportion as the average amount of the Customs revenue of such Territories for the three completed financial years last preceding the taking effect of the South Africa Act 1909. The percentage so arrived at is applicable to both Customs and excise duties, other than the excise duties on spirits and beer, which are collected by the Territories themselves.

The mandated Territory of South West Africa is, for the purpose of the collection of customs and excise duties, regarded as a part of the Union, with which there is free interchange of trade. The Customs and excise duties collected on goods consumed in South West Africa are paid over by the Union Government towards the cost of the Administration of the territory.

A uniform rate of excise duty now applies throughout the Union on spirits distilled, or beer brewed, within the Union, except in the case of spirits distilled from the products of the sugar-cane, on which, when consumed in Natal, is rebated to the extent of 5*s.* per proof gallon.

A rebate of the whole excise duty is granted on methylated spirits, on spirits used in the fortification of pure wine, or in the manufacture of motor-fuel, and on spirits exported, and a rebate of part duty on plain spirits used in the manufacture of medicinal preparations, flavouring essences, and perfumed spirits and a rebate of the whole duty when rendered non-potable and used for industrial purposes.

Spirits are also free when used by scientific or teaching institutions for burning, preserving or experimental purposes, when used in and essential for the working of X-ray and similar apparatus and in Government or Public Hospitals. A rebate of part of the duty is also granted on brandy after maturation for three years under conditions laid down by the Commissioner of Excise.

A rebate of the whole excise duty is allowed on sugar used in the manufacture of jams, bottled, tinned and other preserved fruits and vegetables, biscuits, sweets, jelly and pudding powders, condensed milk, non-alcoholic beverages, pickles, sauces and chutneys, preserved ginger, coffee essence and washing blue, and such other commodities as the Minister of Finance may approve.

An excise duty is also levied throughout the Union on acetic and pyroligneous acids, extracts and essences of vinegar, matches, playing cards and sugar.

Excise is levied by means of stamps on cigarettes manufactured in the Union, and also by means of stamps or direct duty on cigarette tobacco manufactured in the Union, or in the Bechuanaland Protectorate, Basutoland, and Swaziland, when entered for consumption in the Union, or in these Territories, and an equivalent surtax is levied on imported cigarette tobacco and cigarettes, whether from oversea or from Southern or Northern Rhodesia.

The principle of granting a rebate of Customs duties on all goods the growth, produce, or manufacture of the United Kingdom was abandoned in the Customs Tariff Act of 1925, and under the Ottawa Agreement Act (No. 8 of 1933) specific preferences were granted to the United Kingdom, the Irish Free State, Canada, New Zealand, the non-self-governing Colonies and Protectorates, and the Mandated Territories of Tanganyika, the Cameroons under British Mandate and Togoland under British Mandate. Still more recent legislation (Act No. 44 of 1935) provides for a three-line tariff with minimum, intermediate, and maximum rates of duty; the rates applicable being determined by the nature of Agreements entered into with certain countries from time to time.

Rebates of duty are granted on numerous articles which are essential to certain specified industries.

Duties are also rebated under prescribed conditions on Union manufactures returned to the Union subsequent to export thereof.

All duties are rebated on goods in transit through any part of the Union to places outside the Union.

The duty paid on *bonâ fide* samples of commercial travellers is refunded if the samples are

Digitized by Google

exported within twelve months from the date of importation.

A refund of the duty originally paid will be made on all articles not intended for consumption in the Union imported by *bonâ fide* tourists for their use while in the Union provided such articles are exported within twelve months from the date of importation. As regards tourists' motorcars the triptyque system is in vogue.

A rebate of Customs duty will be allowed on *used* household effects the *bonâ fide* property of settlers, the value of which does not exceed one hundred pounds for each adult and fifty pounds for each child and not exceeding four hundred in all for each family.

A refund of import duties is granted on goods subsequently exported to St. Helena, Mauritius, Kenya, Uganda, Tanganyika, Nyasaland, Belgian Congo, Portuguese East Africa, and Southern Rhodesia.

Commerce.

The total value of the imports and exports of the Union, exclusive of silver and copper specie, but including gold specie, has been as follows:—

Banking Statistics.

The South African Reserve Bank was established in 1921 under Act No. 31 of 1920. The Bank has the sole right in the Union for a period of 25 years to issue bank notes which are secured to an amount of not less than 30 per cent. in gold. In addition, the Bank must hold in gold or specie a reserve of at least 30 per cent. of its deposits and bills payable. There are eight commercial banks transacting business in the Union and these are required to hold reserve balances in the Reserve Bank equal to at least 10 per cent. of their demand and 3 per cent. of their time liabilities to the public in the Union. The following are the chief statistics for the last five years :—

BANKING STATISTICS.

As at 31st Dec.	S.A. Reserve Bank.		Commercial Banks—Business in the Union.		
	Notes Issued.	Gold Coin and Bullion.	Deposits.	Cash Reserves.*	Advances and Discounts.
	£	£	£	£	£
1933	11,935,434	17,143,951	81,250,515	29,379,284	37,918,069
1934	13,460,895	22,287,432	85,216,987	25,150,138	47,048,094
1935	14,718,061	25,723,091	88,404,204	31,398,056	48,271,699
1936	16,416,043	24,634,513	94,548,829	25,796,504	52,870,142
1937	18,093,293	22,937,260	93,497,689	20,520,665	58,792,617

* Includes deposits with S.A. Reserve Bank.

Money, Weights and Measures.

Coinage.—A Coinage Act passed in 1922 provided for the minting of Union coins with the same denominations and relative values as those of Great Britain.

Weights and Measures.—The Weights and Measures Act, 1922, which came into effect on the 1st April, 1923, makes provision for both the Union and Metric systems, and prescribes the denominations, and multiples thereof, of weight and measure which may be used in trade in the Union of South Africa. The original Act of 1922 was amended by Act No. 13 of 1933. The authorised denominations given in the Second Schedule to the Act were amended by Proclamation No. 252 of 1933, dated 6th November, 1933.

Regulations issued under the Act prescribe the manner and frequency of assizing of trade weighing and measuring instruments, as well as controlling the sale of goods and fixing standard quantities for commodities in general use.

The Union system of measures is equivalent to the Imperial. The Union denominations of avoirdupois weights, however, differ from the Imperial in so far that a ton equals 2,000 lb. instead of 2,240 lb. and a cental of 100 lb. replaces the Imperial hundredweight of 112 lb.

Land Administration.
Union of South Africa.

The Land Settlement Act (No. 12 of 1912), as amended by Acts No. 23 of 1917, 28 of 1920, 21 of 1922, 38 of 1924, 26 of 1925, 6 of 1928, 1 of 1931, 25 of 1931, 57 of 1934, 47 of 1935 and 45 of 1937, provides *inter alia*, for the purchase by government—subject to the limit of funds specially appropriated by Parliament—of privately owned farms for persons able to contribute not less than one-tenth of the purchase price of such farms in cash and possessing all the qualifications prescribed in the Act. All such applications are dealt with by the Central Land Board, to whom under the law they must be referred for consideration. The remainder of the purchase price including transfer costs and other expenditure in connection with the purchase, transfer, and allotment, and an amount representing 3½ per cent.

Digitized by Google

interest for the first and second years, must be paid not later than 65 years reckoned from the date of the transfer of the farm to the Government. The balance of the purchase price remaining unpaid, together with interest at 3½ per cent. per annum, is payable yearly in advance in sixty three equal instalments, the first of which instalments is payable at the expiration of two years from the date of transfer. Ordinary Crown Land or lands acquired under the Act for general settlement purposes may be allotted on lease for five years, with the option of purchase. Applications for any land becoming so available are invited in the Gazette and it rests with the Central Land Board to recommend to the Minister the applicant to whom the land should be allotted. One important condition of all allotments is that of personal occupation of the land by the lessees. Advances may be made to lessees for the purchase of stock, implements, seeds and other things necessary for the development and working of the holding, but no advance is made which would bring the total amount owing by the lessee in respect of such advances to an amount exceeding 50 per cent. of the value of his own improvements on the land and 75 per cent. of the value of his own stock on the holding, and at no time shall the amount owing in respect of such advances exceed 500*l*. On the recommendation of the Central Land Board the Minister of Lands may cause boring operations to be effected or improvements of a substantial and permanent nature to be constructed and add the cost thereof to the valuation of the holding.

The Act lays down the qualifications of intending lessees, and prescribes that they must possess capital sufficient for beneficially developing and working the holdings applied for.

Not less than ten years after the date of commencement of a lease, a lessee is entitled to a Crown grant of his own holding, provided the purchase price has been paid and the provisions of the Act have been complied with.

In special cases the 10 year period may be waived and the 1922 Act provides that if after 5 years the value of the farm, including permanent improvements effected therein, offers sufficient security for the settler's total indebtedness a Crown grant may be issued and a mortgage bond passed for the residue of the purchase price and any sums owing for advances.

Geological Survey.

The geological survey of the Transvaal, together with what was formerly controlled by the Cape Geological Commission, has been incorporated together as the geological survey of the Union of South Africa.

The publications consist of memoirs, maps, and palaeontological papers.

Forestry.

The total area reserved for forestry purposes in the Union of South Africa at March, 1938, was approximately 3,323,100 acres. The timbered area of the reserves is about 942,000 acres, of which some 339,000 acres consist of plantations.

The Union is divided into six conservancies, each controlled by a conservator of Forests. The conservators are stationed at Cape Town, Knysna, Kingwilliamstown, Umtata, Pretoria and Pietermaritzburg respectively. The Conservancies comprise 27 Forest Districts, each in charge of a District Forest Officer. District Forest Officers are stationed at Cape Town, Elgin, Kluitjeskraal, Bredasdorp, Jonkershoek, Knysna, Concordia, George, Saasveld, Storms River, Kingwilliamstown, Stutterheim, Port Elizabeth, Keiskamahoek, Umtata, Butterworth, Kokstad, Pretoria, Tzaneen, Louis Trichardt, Sabie, Barberton, Graskop, Nelspruit, Bloemfontein, Pietermaritzburg and Eshowe, respectively.

The District Forest Officers are responsible to the Conservators, who, in turn, are responsible to the Director of Forestry acting under the Secretary for Agriculture and Forestry for the Union at Pretoria. The policy of the Division of Forestry is to conserve and utilise to the best advantage the indigenous forests, and to add to the forest resources of the country by afforesting from 15,000 to 20,000 acres per annum.

Expenditure on forestry operations, including Railway Plantations, and gratis issues during the financial year 1937–38 was 812,000*l*. and the total revenue including Railway Plantations and gratis issues was 186,000*l*.

Timber production on the Forest Estate during 1937–38 aggregated 9,447,000 cubic feet; made up as follows: saw timber, 3,489,000 cubic feet; poles, droppers, etc., 2,291,000 cubic feet; firewood, 3,666,000 cubic feet.

Education.

In the South Africa Act (1909), Section 85 (3), it is provided that "Education, other than higher education, for a period of five years and thereafter until Parliament otherwise provides, shall be and remain under the jurisdiction of the respective Provincial Councils."

Under Act No. 5 of 1922, a definition is given of the term "higher education."

Section 11 of that Act, as amended by Section 14 of Act No. 46 of 1925, reads as follows:—

The expression "higher education" as used in Section 85 of the South Africa Act, 1909, shall include *inter alia*—

(*a*) education provided by Universities and University Colleges incorporated by law;
(*b*) education provided by the South African native College;
(*c*) education provided by such technical institutions (including schools of art, music, commerce, technology, agriculture, mining and domestic science), as the Minister of Education may declare to be places of higher education;
(*d*) such part of the education provided by other technical institutions as the Minister of Education may, after consultation with the provincial administration concerned, declare to be higher education:
(*e*) any other education which, with the consent of the provincial administration concerned, the Minister of Education may declare to be higher education.

In terms of clauses, (*c*), (*d*) and (*e*) above, the Provinces have been relieved of all vocational education (technical, industrial, and agricultural*) and the Department of Education under the Minister is therefore now concerned with—

I. Universities and university colleges comprising the following:—

1. *University of South Africa* with the following constituent colleges—Potchefstroom University College, Potchefstroom; University College of the Orange Free State, Bloemfontein; Rhodes University College, Grahamstown; Huguenot University College, Wellington, C.P.; Natal University College, Pietermaritzburg.
2. *University of Capetown.*
3. *University of Stellenbosch.*
4. *University of the Witwatersrand.*
5. *University of Pretoria.*

* By Act No. 30 of 1937 agricultural schools are being transferred to the Provincial Administrations.

Digitized by Google

II. Technical colleges which have been established under Act No. 30 of 1923 at the following centres—Capetown, Durban, Johannesburg, Port Elizabeth, East London, Pretoria, Pietermaritzburg and Bloemfontein.

III. Industrial, trade, housecraft, and agricultural* training schools (State and State-aided), at various centres throughout the Union.

IV. Juvenile and juvenile adult reformatories (five) which were transferred to the control of the Union Education Department under the provisions of the Reformatories Amendment Act, 1934, No. 27 of 1934, with effect from 1st July, 1934. On 1st April, 1935, the probation services were transferred from the Department of Prisons to the Union Education Department, but on the 1st October, 1937, these services were transferred to the Department of Social Welfare.

The average number of students at Universities and University Colleges for the calendar year 1937 was 8,707. The State expenditure on higher education as above defined was 1,195,189*l.* during the financial year, 1937-38.

Provision is made on the vote of the department for a grant-in-aid to the South African Native College at Alice, Cape Province, an institution for the higher education of natives, which was formally opened in 1916, and for the calendar year 1937 had an average enrolment of 130 students.

Native Affairs.

The native population of the Union at the census of 1936 was as follows:—Cape of Good Hope, 2,045,570; Natal, 1,553,629; Transvaal, 2,444,380; Orange Free State, 553,110, making a total of 6,596,689, or 68·79 per cent. of the whole population. In the Cape Province the native population is centred in the native territories and a number of eastern districts, with King William's Town as the area with the densest native population. In Natal, about one-quarter of the native population is to be found in Zululand, while in the rest of the province the natives are distributed evenly throughout the various districts. In Zululand they are, however, less densely settled than in the remainder of Natal. In the Transvaal the bulk of the native population is contained in the Witwatersrand area, which is largely urban and has a high density, and in the northern portion of the province forming the greater part of the Bushveld. In the Orange Free State the natives are principally located in the central and eastern districts, adjoining the Basutoland border.

The position of the natives in relation to the parliamentary franchise is now governed by the *Representation of Natives Act*, No. 12 of 1936. This measure is designed to achieve a dual purpose, viz.:—

A. To provide a solution of the difficulty presented by the Cape Native franchise; and

B. To accord a special form of representation, quite apart and distinct from ordinary franchise rights, to the Native population of the Union as a whole.

A. Cape Native Franchise.

In the Cape Colony prior to Union, Natives enjoyed franchise rights on the same basis as Europeans. A uniform standard of qualification was prescribed applying equally to white and black. Natives participated in the same elections as Europeans, had the same right to nominate candidates, etc., and, in short, enjoyed the same rights and privileges as European voters, no distinction being drawn.

The Cape Native franchise rights were specially protected by section *thirty-five* of the Act of Union.

In the Transvaal and the Orange Free State, on the other hand, the Natives have up to the present had no franchise rights whatever and no representation of any kind in Parliament.

In Natal prior to Union, Natives could in theory qualify for the franchise, but the acquisition by them of such rights was so circumscribed by restrictions that the number of Natives registered as voters in Natal can be counted on the fingers of one hand. Natal possessed no special form of representation for Natives and was thus very much in the same position as the northern provinces.

The *Representation of Natives Act* takes away from the Natives of the Cape Province their right to be enrolled on the same voters' lists as Europeans and to participate in the ordinary elections in that Province for members of the House of Assembly and of the Provincial Council.

As a *quid pro quo* for those rights the Act lays down that the Natives registered as voters in the Cape Province shall be entitled to elect three members of the House of Assembly and two members of the Cape Provincial Council.

To this end—

(*a*) a register known as the Cape Native Voters' Roll has been compiled, to which have been transferred the names of all Natives in the existing voters' lists for the various electoral divisions of the Cape, and in which are to be included the names of all Natives in the Cape Province who become registered as voters for the future.

No Native may in future be registered in the ordinary voters' lists for electoral divisions under the *Electoral Act*.

(*b*) The Cape Province is divided into—

(i) three constituencies, to be known as electoral circles, each containing approximately the same number of Natives registered in the Cape Native Voters' Roll, and each of which will be entitled to return one member to the House of Assembly;

(ii) two constituencies, to be known as electoral divisions, each containing approximately the same number of Natives registered in the Cape Native Voters' Roll and each of which will be entitled to return one member to the Cape Provincial Council.

The members of the House of Assembly and of the Cape Provincial Council elected by the Natives registered in the Cape Native Voters' Roll will hold their seats for a period of five years notwithstanding any dissolution of the legislative body to which they belong; they must have the same qualifications *as ordinary members of the House of Assembly*, and they will enjoy the rights, powers, privileges and immunities and be subject to the duties and obligations of ordinary members of the House of Assembly or of the Provincial Council, as the case may be, save that they will not have the right to vote at any election of senators under the South Africa Act.

B. Special Representation for the Native Population of the Union as a Whole.

The special representation provided by the Act for the Native population as a whole is two-fold, consisting as it does of—

(*a*) representation in the Senate; and

(*b*) a special Natives Representative Council.

(*a*) *Representation in the Senate.*

The Act divides the Union into four electoral areas, constitutes an electoral college for each electoral area and lays down that each electoral college shall be entitled to elect one senator.

* By Act No. 30 of 1937 agricultural schools were transferred to the Provincial Administrations.

Digitized by Google

The electoral areas are—

(i) the Province of Natal;
(ii) the Provinces of the Transvaal and Orange Free State;
(iii) the Transkeian Territories; and
(iv) the Cape Province excluding the Transkeian Territories.

The electoral college for the Transkeian Territories consists of the Native members of the United Transkeian Territories General Council.

The electoral colleges for the other three electoral areas consist of the voting units in those areas. These voting units are the local councils, Native reserve boards of management, chiefs, headmen, Native advisory boards under the *Natives (Urban Areas) Act*, 1923, and, in respect of farm Natives who do not fall under any of the above specified units, electoral committees for the establishment of which special provision is made in section *five* of the Act.

These voting units will act not as individuals but in a representative capacity for and on behalf of the Native taxpayers domiciled within their respective areas of jurisdiction. There will thus be no individual voting in the ordinary sense of the term but each voting unit will exercise a number of votes determined according to the number of its taxpayers.

The election of senators will thus be by representative or group voting.

The senators elected under the Act are additional to the senators for the nomination and election of whom provision is made in the South Africa Act. They will hold their seats for five years notwithstanding any dissolution of the Senate; they must have the qualifications prescribed for elected senators under the South Africa Act, and they will enjoy all the rights, powers, privileges and immunities and be subject to all the duties and obligations of ordinary senators.

Provision is contained in section *two* of the Act, whereby the Governor-General, at any time after the expiration of seven years from the commencement of the Act, if he is satisfied that civilisation and local government amongst Natives have progressed to such a stage as to justify an increase in the representation of Natives in the Senate, may, by proclamation in the Gazette, increase the number of electoral areas to five or six, each of which will have the right to elect one senator.

(*b*) *Natives Representative Council.*

Section *twenty* of the Act provides for the establishment of the Natives Representative Council. The Council consists of twenty-two members, viz.: six official members, four nominated members and twelve elected members.

The official members are the Secretary for Native Affairs and the five Chief Native Commissioners.

The four nominated members must be Natives appointed by the Governor-General, one being appointed for each electoral area.

The twelve elected members are elected as follows:

(i) three members by the electoral college for the Transkeian Territories, i.e., the members of the United Transkeian Territories General Council other than magistrates;
(ii) two members by the electoral college for every other electoral area, but in so far as the election of these two members is concerned the Native advisory boards are not regarded as voting units of the electoral colleges;
(iii) one member is to be elected for every electoral area other than the Transkeian Territories by the Native advisory boards therein.

If at any time the number of electoral areas is increased by the Governor-General, under the powers vested in him by section *two* of the Act, to five or six, the number of members of the Council is likewise to be increased by one official member, one nominated member and three elected members for each additional electoral area.

The nominated and elected members of the Council will hold their seats for five years and they will each receive an allowance of £120 per year.

The Council meets at times and places fixed by the Minister, its proceedings ordinarily take place in public and its meetings are presided over by the Secretary for Native Affairs. The Secretary for Native Affairs has a casting vote only and the other official members have no vote.

The general functions of the Council are set forth in section *twenty-seven* which reads as follows:—

"27. (1) The Council shall consider and report upon—

(*a*) proposed legislation in so far as it may affect the Native population;
(*b*) any matter referred to it by the Ministers;
(*c*) any matter specially affecting the interests of Natives in general.

(2) The Council may recommend to Parliament or to any provincial council, as the case may be, legislation which it considers necessary in the interests of Natives.

(3) If the Minister has transmitted to the Speaker of the House of Assembly or the President of the Senate or the chairman of a provincial council a certificate stating that he is of opinion that any bill or draft ordinance, as the case may be, contains provisions specially affecting the interests of Natives, and that, in the case of a bill, he has consulted with the Native Affairs Commission or, in the case of a draft ordinance, with the administrator of the province concerned, then, unless that certificate has been withdrawn by the Minister by writing addressed to the Speaker or President or chairman, as the case may be, the bill or draft ordinance, as the case may be, shall not be introduced, or, if already introduced, shall not be proceeded with further than the stage which had been reached when the certificate was received by the Speaker or President or chairman, as the case may be, until it has been referred to the Council for consideration and report."

Section *twenty-eight* provides that the Minister shall, before the commencement of each ordinary session of Parliament, or as soon as possible thereafter, submit to the Council, for consideration and report by it, a statement showing—

(*a*) the provision which it is proposed to make on the estimates of expenditure for the ensuing financial year in respect of the moneys to be appropriated by Parliament to the South African Native Trust Fund for the purchase and development of land, and for Native education and for any other purpose in the special interests of Natives;
(*b*) estimates of the revenue to be derived from any other sources by the South African Native Trust Fund; and
(*c*) the Minister's proposals as to the method in which the moneys referred to under (*a*) and (*b*) are to be allocated.

Council reports are submitted to the Minister who must lay them upon the Tables of both Houses of Parliament.

Digitized by Google

Under section *one* of the Act the term "Native" is given a very wide meaning, including not only what for convenience of reference may be referred to as full-blooded Natives, but subject to certain qualifications, halfcastes and quadroons as well.

The first elections under the Act were held in June, 1937.

The Native Affairs Act of 1920 established the Native Affairs Commission, which is an advisory body consisting of not less than three or more than five members, appointed by the Governor-General and presided over by the Minister of Native Affairs. The Act also revived for the Union the obsolescent provision of the Transvaal Law for the summoning of conferences of native persons and bodies representative of native opinion, with the object of enabling the Government to gauge more accurately the state of native thought and feeling and of affording to those not otherwise represented, the opportunity of expressing their views.

The control and administration of native affairs throughout the Union are vested in the Governor-General-in-Council, who is authorized to exercise all special powers in regard to native administration vested at the time in the Governors of the Colonies entering the Union, or exercised by other authorities as superior chiefs. The executive authority rests with a Minister of Native Affairs, who is in control of a department of state under a permanent Secretary for Native Affairs with an under-secretary and staff. In all four provinces of the Union there are native chiefs and headmen, many of whom are subsidized by the Government. Their powers, duties and jurisdiction vary in different parts of the country. All serve under district officials and are in charge of tribes and locations, as the case may be.

Local government of natives is established under various bodies. A system providing for Local Government was first included in the Glen Grey Act, No. 25 of 1894 (Cape), whereby such local affairs were dealt with by a District Council. Subsequently the same system was extended to the Transkeian Territories in an amended form providing for a general council amalgamating the resources of the district councils in one general body which operates in a centralised capacity. This system has been singularly successful and has resulted in a further enactment (Act No. 23 of 1920) which provides for the formation of local (previously called district) councils and the amalgamation of these in a general council where circumstances permit. Apart from this provision local affairs are also administered in the Orange Free State under an Ordinance of 1907 and in the Cape Province under the Mission Stations and Communal Reserves Act of 1909. Apart from such native areas, the local government and control of natives rests with the various municipal and other local government bodies.

The passing of the *Natives Land Act*, 1913, was the initial step in the direction of the practical application in the Union of the principle of territorial segregation or separation of land rights between the European and Native races in South Africa, which had been advocated by the South African Native Affairs Commission, 1903–1905.

That Act was designed as an interim measure and it was intended to check the indiscriminate occupation of land by Europeans and Natives with its attendant evils, and, by temporarily restricting the further acquisition of land by Natives, so far as that could be done without undue hardship, to maintain the *status quo* as regards the ownership and occupation of land pending the passing of a comprehensive measure based upon the report of the Commission for the appointment of which provision was made in section *two* of the Act.

In furtherance of these objects, the 1913 Act provided that, except with the approval of the Governor-General, a Native might not acquire from a person other than a Native, nor a person other than a Native from a Native, any land or interest in land in any area outside the Native areas described in the schedule to the Act (which are known as scheduled Native areas), and that, without such approval, no person other than a Native might acquire any land or interest in land in a scheduled Native area. These scheduled Native areas, it may be mentioned, comprised the then existing Native reserves and locations throughout the Union and, in addition, much land privately owned by Natives.

The Commission appointed under the 1913 Act, commonly known as the Beaumont Commission, submitted its report in March, 1916, and the following year a Bill was introduced to give effect to its recommendations as regards additional Native areas. This Bill was, however, received with such hostility by Europeans and Natives alike that the Government decided to appoint local committees in the various provinces to revise the recommendations of the Beaumont Commission. The reports of the various local committees were furnished in 1918, but the Government for manifold reasons found it impracticable then to proceed with the further legislation foreshadowed under the 1913 Act and decided to leave it in abeyance.

In 1927, the Honourable the Prime Minister introduced into Parliament the series of four Bills, generally known as "the Native Bills," included among which was the *Native Land (Amendment) Bill*. That Bill engaged the attention of Parliament in one form or another practically every year from the time when it was first introduced until it was finally passed during 1936 and emerged as the *Native Trust and Land Act*, No. 18 of 1936. It was brought into operation on the 31st August, 1936. The cardinal features of the Act are—

A. The constitution of a corporate body, known as the South African Native Trust, with the Governor-General as Trustee, in which the existing Native trusts and special funds, *e.g.*, the Natal Native Trust, the Zululand Native Trust and the Native Development Account, are merged and in which is vested existing Native locations and reserves, and, with certain exceptions, Crown land in the scheduled and released areas.

The establishment of the South African Native Trust represents the extension to the whole Union of the policy of entrenching Native interests by the formal establishment of a fiduciary body, the main function of which is to protect, safeguard and promote the material, moral and social welfare of the Native population—a policy which was adopted in Natal prior to Union and has operated satisfactorily there.

An essential corollary to the establishment of the Trust is the inauguration of a fund, known as the South African Native Trust Fund, which will be utilised for the acquisition and development of land for occupation by Natives, for the advancement of their agricultural and pastoral interests and generally to promote the objects and purposes of the Trust.

The Fund will derive revenue from a variety of sources, such as rentals paid by Natives in respect of the occupation of land, trading rentals, prospecting and licence fees, certain fines, etc. The main source of its revenue, however, must necessarily be grants by Parliament.

Digitized by Google

B. General Land Provisions.

(1) The prescription under section *two* of the Act certain areas, termed released areas, defined in First Schedule to the Act, within which the chasing power of the Trust and of the Natives themselves is to be focussed and which are thus ined ultimately to become Native areas.

(2) Section *ten* of the Act empowers the Trust from to time to acquire land for Native settlement the land so acquired, together with the Crown in released areas which vests in the Trust, unts to seven and one quarter million morgen, portioned as follows between the various provinces :

(a) Transvaal Province	.. 5,028,000 morgen
(b) Natal Province ..	.. 526,000 morgen
(c) Orange Free State ..	.. 80,000 morgen
(d) Cape Province ..	.. 1,616,000 morgen

Here it may be mentioned that the approximate extent of the released areas as scheduled under the Act is 6,730,000 morgen, that is to say, approximately half a million morgen short of the seven and a quarter million morgen specified in section *ten*. The Trust, however, in its acquisition of land will not be restricted to the released areas but may purchase—

(a) land which adjoins land in a scheduled Native area or in a released area actually owned by the Trust or by Natives; and

(b) land which adjoins land which has been acquired by the Trust under (*a*) above.

Up to the end of September, 1938, the following extents of land had been purchased by the South African Native Trust :—

In the Transvaal ..	710,627 morgen
In the Cape	94,831 morgen
Natal	784 morgen
Orange Free State ..	33,519 morgen

(3) In so far as concerns purchase by the Natives themselves, the Act frees the released areas from the restrictions imposed by paragraph (*a*) of sub-section (1) of section *one* of the 1913 Act, so that Natives are now able to acquire land in those areas without special approval. At the same time it is important to note that even in the released areas Natives will not be able to acquire isolated patches of land, *i.e.*, land surrounded by land owned by non-Natives, except with the approval of the Governor-General and subject to such conditions as he may impose. For the purpose of computing the extent of land acquired by the Trust from time to time, that is for the purpose of the seven and a quarter million morgen which are to be acquired, land purchased by Natives is deemed to have been purchased by the Trust.

(4) In so far as the Cape Province is concerned, the position is that the restrictions imposed by section *one* of the 1913 Act, as modified by the new Act, now apply to the Cape.

(5) The position throughout the Union is that *except with the approval of the Governor-General*—

(a) no Native may acquire from a non-Native land outside a scheduled Native area or a released area or land in a released area which is wholly surrounded by land held by non-Natives;

(b) no non-Native may acquire *from any person* land in a scheduled Native area or from a *Native* land outside such an area.

Sub-section (2) of Section *two* empowers the Governor-General from time to time, whenever he considers it in the public interest so to do, by proclamation in the Gazette, to excise any land from a released area, provided that, by the same proclamation, other land of at least an equivalent pastoral or agricultural value must be included in a released area in substitution for that excised. No person's land may be included in a released area under this special provision without his consent.

(7) Provision exists in section *thirteen* of the Act whereby the Trustee can expropriate any land in a released area or which adjoins land owned by the Trust or by a Native in a scheduled or released area. This power of expropriation will not, however, be exercised to the prejudice of European owners of land as a generous basis of compensation in the case of expropriation is laid down.

The section provides that in the absence of agreement as to the compensation to be paid for expropriated land, the amount shall be determined by the Water Court exercising jurisdiction over the area within which the land is situate and shall not exceed—

(*a*) the fair market value of the land without improvements; plus

(*b*) the fair value of any necessary or useful improvements; plus

(*c*) the fair value of any luxurious improvements but not exceeding the actual cost thereof; plus

(*d*) a sum to make good any inconvenience or loss that will actually be caused by the expropriation.

Moreover, the Court may, if it is proved that the land was not acquired for speculative purposes at any time after a date five years before the commencement of the Act, add to the values referred to in paragraphs (*a*) and (*b*) above an amount not exceeding twenty per cent. of those values if it considers that the circumstances of the case justify such a course.

It should be added that in the case of any farm or other piece of land of which one person is the registered owner, the Trustee may not, except with the consent of that person, expropriate a part only of that farm or piece of land.

(8) Sub-section (2) of section *thirteen* provides that the Governor-General, whenever he considers that for reasons of public health or for any other reason it would promote the public welfare or the public interest so to do may expropriate any land outside a scheduled Native area and a released area of which a Native is the registered owner.

In the case of the expropriation of Native-owned ground the basis of compensation will be the same as in that of European-owned land.

(9) Section *fourteen* is important in that it entitles any person other than a Native who is the registered owner of land in a scheduled Native area or in a released area to require the Trust to purchase that land if it is proved to the satisfaction of the Minister that it cannot be sold at a reasonable price in consequence of its having become bounded along more than one-half of its perimeter by land owned or occupied by Natives *as the result of the operation of the Act*.

(10) The question of prospecting or mining on land held by the South African Native Trust or by Natives is governed by the provisions of section *twenty-three* of the Act.

In terms thereof no person may prospect for minerals on such land without the written permission of the Minister of Native Affairs. This provision does not apply, however, in respect of land situate in the Transvaal Province which at the commencement of the Act was a proclaimed public digging for precious and base metals or was land declared open to public prospecting for precious and base metals for so long as it remains so proclaimed or open.

If such land is proclaimed as a public digging or as a mine, or if any right to mine on such land is granted, the Trustee may impose such conditions as may be deemed necessary or desirable for preserving

Digitized by Google

the continued or future use by Natives of the surface of such land.

So much of the moneys received by the State in respect of licences to prospect or mine on any land in a scheduled Native area or in a released area or on any land wherever situate of which the South African Native Trust or a Native is the registered owner as would be retained by the State if the Act had not been passed must be paid by the State to the South African Native Trust Fund.

Save as is otherwise provided in the Act the South African Native Trust is, in respect of mineral rights, held by it, in the same position as any private holder of mineral rights.

C. The provisions of the Act as regards the occupation by Natives of land belonging to non-Natives, i.e., its squatting provisions contained in Chapter IV.

(1) Each of the pre-Union legislatures found it necessary to enact legislation to regulate the residence of Natives on privately-owned land in rural areas so as to guard against the manifold evils of "kaffir-farming."

This legislation, while passed with the same main objects in view, took different shapes in the different territories and Chapter IV of the Act is an attempt to co-ordinate the law in this connection for the different Provinces.

(2) It is important to note that under section *twenty-five* the greatest elasticity has been provided as regards the application of the provisions of Chapter IV, as it is realised that this is a matter which must necessarily largely depend upon local conditions. Thus the Chapter will not apply to any area until such area is proclaimed under the section. Further, while it is contemplated that ordinarily the Chapter will not be applied to land in released areas, it can be so applied except as regards land belonging to the Trust or to a Native. Moreover, provision is made whereby the operation of the Chapter or any provision thereof may be suspended in any area for such period and on such conditions as the Governor-General may determine.

(3) For the purposes of their occupation of land owned by non-Natives, Chapter IV classifies Natives as follows:

(*a*) *servants*—*i.e.*, Natives who are *bona fide* and continuously employed by the owner of land, under contract;

(*b*) *labour tenants*—*i.e.*, Natives, other than servants, the services of whom or of whose families are actually and *bona fide* required by the land-owner for domestic services or in or about farming operations carried on by him on any land held by him or in any other industry, trade, business or handicraft carried on by him on the land where such labour tenant resides, and who is obliged to serve the owner under contract;

(*c*) *squatters*—*i.e.*, Natives resident on land who are neither owners, nor servants nor labour tenants, e.g., rent-payers or Natives who occupy on the share system.

No restriction is imposed by the Act as regards the occupation of land by class (*a*) above, that is to say, by full-time servants.

As regards class (*b*), *labour tenants*, the Act makes provision for the compulsory registration of all such in a register to be kept by the Native Commissioner of the district in which the labour tenant resides. Registration is effected by the Native Commissioner upon the application of the owner against payment of a registration fee of sixpence for each labour tenant.

In order to prevent abuse and the registration by land-owners of excessive numbers of labour tenants, provision is made for the appointment from time to time in any district outside the Cape Province of a labour tenants control board to consist of the Secretary for Native Affairs (or his nominee) and two land-owners actually resident and carrying on farming operations in such district. In the Cape Province the functions of these labour tenants control boards are to be performed by the divisional councils which already function under the *Cape Private Locations Act*, No. 32 of 1909.

Where any doubt exists as to whether any particular land-owner *bona fide* requires as many labour tenants as he has had registered, such land-owner may be brought before the board to show cause why the number of his labour tenants should not be reduced. The board in such case enquires into the matter and determines the number of labour tenants *bona fide* required by such owner, working, *unless and until the contrary is proved*, on the presumption that ordinarily five labour tenants are required by a land-owner in respect of each farm owned by him and on the further presumption that every labour tenant is under contract to render service to the land-owner for at least six months in every calendar year.

After the Board has determined the number of labour tenants required by any particular owner, such owner is obliged, if the number of his labour tenants exceed the number so determined, to reduce them accordingly and to effect the removal of the excess number within a period not exceeding twelve months to be specified by the Board. Failure to do this constitutes a criminal offence.

Each labour tenant kept by a land-owner in excess of five must be licensed by the Native Commissioner on payment of an annual licence fee of 6d., provided that to any owner in respect of whose land more than ten labour tenants are licensed during any year every licence in excess of ten shall be issued free of charge.

The provisions of the Masters and Servants Laws are to apply to owners and labour tenants as if the owner were the master and the labour tenant the servant.

As regards class (*c*), *squatters*, the Act provides that within three months of the application of the provisions of this Chapter to any land on which any Native is lawfully residing as a squatter, the owner of such land shall apply to the Native Commissioner of the district concerned to have that Native registered as such.

Thereafter the owner must pay to the Native Commissioner in respect of each such squatter an annual licence fee assessed at a progressively increasing rate per annum.

Licences once issued may be renewed from year to year against payment of the appropriate licence fees, provided that no licence shall be renewed after the expiration of thirty years. Further, if there is doubt as to whether any Native who is licensed as a squatter in respect of any land was actually residing thereon upon the date of the application of the provisions of the Chapter to that land, the Native Commissioner may after enquiry cancel such registration and licence. The Act accordingly contemplates that the fullest freedom should be allowed as regards the employment of servants, that labour tenants should be permitted, subject to regulation and control for the prevention of abuse, and that squatting should be permitted as a necessary evil for a limited period but should be eliminated within a period of thirty years.

(5) Section *thirty-four* makes special provision for the exemption from the restrictions imposed by Chapter IV of certain classes of Natives, such as chiefs, ministers, teachers, evangelists, etc., and section *thirty-seven* provides an inexpensive summary

Digitized by Google

procedure for the ejectment of Natives from land of which they are unlawfully in occupation.

(6) Section *thirty-eight* is important in the provision which it makes for the accommodation of ejected Natives. It places a definite obligation upon the Government in its Department of Native Affairs to make such provision as may be necessary and adequate in the opinion of the Minister for accommodating in a scheduled Native area or in a released area Natives who have been displaced by reason of the operation of Chapter IV of the Act or of the Natives (Urban Areas) Act, 1923, or any amendment thereof.

Certain areas in the district of Lydenburg, Transvaal, have been proclaimed under Chapter IV of the Act—*vide* Proclamation No. 264 of 1937, as amended by Proclamation No. 43 of 1938.

D. Definition of Native.

The definition of "Native" in the Native Trust and Land Act has been brought into line with that in the Representation of Natives Act, 1936. It accordingly includes not only what may conveniently be referred to as full-blooded Natives, but, subject to certain modifications, half-castes, quadroons and, in special cases, persons with an even smaller proportion of Native blood.

All state and state-aided native education in the Union, with the exception of that represented by the South African Native College, is controlled by the provincial administrations in terms of the South Africa Act. Native education, other than state and state-aided education, is under the control of missionary societies.

There are numerous educational institutions in the Union which endeavour to provide for the needs of the native peoples in regard to higher education, *i.e.*, education beyond Standard IV, including industrial, agricultural, and commercial education, preparation for religious ministry, and the teaching profession. By far the most important of these is the South African Native College, which was established in 1914, and has rendered inestimable service in the cause of native education. In 1923, it was declared to be "a place of higher education" under Act No. 30 of 1923. As a result of this development, the college became eligible for the receipt of grants in aid of higher education under the Act.

Agriculture.—In 1929 a Director of Native Agriculture was appointed to reorganise and extend the agricultural work which was being carried out in the native areas—exclusive of the Transkeian Territories. In those Territories agricultural instruction and practical demonstration had been provided for some years under the control and at the expense of Native Councils which are now responsible for three agricultural schools where natives are trained in the theory and practice of agriculture.

Outside the Territories and situate in the Cape Province the Government has established the Fort Cox Agricultural School where natives holding the VIth standard of Education are given a practical and scientific training in the many branches of agriculture suitable to South African conditions. A few demonstration and experimental farms have been established in Natal.

The staff of the Director of Native Agriculture numbers 87 Europeans and 168 Natives. The technical officers are employed in practical demonstrations amongst the Natives in their reserves and locations. All agricultural officers are closely connected with the extensive anti-soil erosion works and the veld reclamation services which are being undertaken in native areas.

Fifty bull camps have been erected and 220 bulls purchased in connection with the livestock improvement policy.

Cane production is progressing satisfactorily and the natives now have some 7,000 acres of cane under cultivation along the coast of Natal and Zululand. The average size of holding is approximately 7 acres.

The sale of cattle by public auction is progressing. The cattle are sold at auction centres situated in the native reserves and the first sale centre established is now the second largest rural cattle sale in the Union including all those in European areas.

The Engineering Section has a staff of nine engineers as well as draughtsmen and field assistants. The engineering staff is largely employed on works for the provision of water supplies—for the people, for stock and for irrigation. It is also responsible for construction work in connection with the provision of dipping tanks, the making of roads, the building of bridges, and anti-soil erosion measures.

A large amount of development work has been carried out in the native reserves during the past year. Extensive domestic water supplies have been furnished for both people and their livestock mainly in the shape of boreholes, totalling in all some 200 with the necessary pumping plants. Seven irrigation works have been completed and the people satisfactorily settled on the land.

There is a very large number of native separatist churches, and these are increasing rapidly. The Select Committee of the House of Assembly on Native Affairs in 1925 recommended that, with regard to applications by churches or religious bodies for sites or other privileges depending upon Government recognition, as a general rule permission should only be granted to churches long established and enjoying universal public recognition, and, in all other cases before any application is considered by the Native Affairs Department a report should be submitted by the Native Affairs Commission in regard to the applicant body as to the demand for its existence, its stability, its capacity both financially and educationally, and the general fitness for religious work amongst natives. The recommendation was adopted and now forms the basis for administration in connection with the separate churches.

The control and administration of matters affecting natives in urban areas are governed by the Natives (Urban areas) Act, No. 21 of 1923. It is a comprehensive measure framed with the intention of securing a much needed improvement in urban conditions, not only from the point of view of the native population, but also in the interests of European residents. Generally, it defines and describes the powers and duties of urban local authorities in respect of the native population within their areas. These bodies may be required to set aside locations for the accommodation of natives and are given powers of expropriating land and borrowing money for this and other purposes. Means are provided for enforcing the residence of natives, with certain exceptions, in locations, native villages or hostels, and for the exercise of certain powers of control with the intention of limiting the native population to the number legitimately required for the needs of the community. The Act prohibits the introduction of intoxicating liquor into locations, but allows, subject to various circumstances, the private brewing of Kaffir beer or its manufacture and sale by the local authority. Idle, dissolute, and disorderly natives can be removed from urban areas either to the place to which they belong or to a farm or work colony, and wide powers of regulation are provided to give effect to the objects and policy of the Act. This Act has been amended

Digitized by Google

and re-inforced in several respects by Acts. No. 25 of 1930 and No. 46 of 1937. The latter Act, in pursuance of the Union's policy of segregation in land ownerships, makes certain restrictions in regard to acquisition of land in urban areas by Natives. It also gives greater facilities to Natives in urban locations for procuring Kaffir beer and includes a provision whereby individual Natives may be licensed to brew and sell Kaffir beer. The Act furthermore gives powers in the last resort to remove from towns Natives who are surplus to the town's labour requirements, provided suitable arrangements for their accommodation are made by the State.

The principal Act has undoubtedly resulted in an improvement in the general conditions of Native residence in urban areas. A system of Pass Laws is in force throughout the Union, with the exception of the Cape Province. Provisions for granting letters of exemption from these and certain other laws affecting natives is included in the Native Administration Act, No. 38, of 1927. Provisions of far-reaching effect are contained in this Act, the main purpose of which is to consolidate the systems of native administration throughout the Union and generally to facilitate this administration. With this end in view the Governor-General is now, except in the Cape Province, Supreme Chief of all natives, thereby centralizing in him the powers assumed to have been possessed by hereditary chiefs. Provision is made for tribal organization and control, with definite powers to remove individuals and even tribes in the public interest from place to place within the Union.

One of the most revolutionary changes is that contained in the recognition of native law and custom in special courts. Native Commissioners, Additional Native Commissioners, and Assistant Native Commissioners have been appointed for these Courts as from the 1st January, 1929, with almost unlimited jurisdiction to hear civil cases and matters between native and native. Notwithstanding the provisions of any other law, it is in the discretion of these Courts, in all suits or proceedings between natives involving the question of customs followed by natives, to decide such questions according to the native law applying to such customs, except in so far as it shall have been repealed or modified, provided that such native law shall not be opposed to the principles of public policy or natural justice, and it is specially enacted that it shall not be lawful for any court to declare that the custom of *lobolo* or *bogadi* or other similar custom is repugnant to such principles. Certain native chiefs may be authorized to hear and determine civil claims subject to appeal to the Native Commissioner. Chiefs in British Bechuanaland have been allowed to maintain their criminal jurisdiction, and this may also be granted to other chiefs in other areas in respect of offences punishable under native law and custom.

As from the date of the establishment of the Native Appeal Courts, the Native Territories Appeal Court was abolished, and the Natal Native High Court ceased to exercise jurisdiction in any civil matter. Criminal jurisdiction conferred upon Magistrates by the Magistrates' Court Act, 1917, and the Criminal Procedure and Evidence Act, 1917, has, in terms of the Act under review, been conferred on Native Commissioners.

An amendment of the Act makes provision for the establishment of Native Divorce Courts under the presidency of the Presidents of the Native Appeal Courts.

A further chapter deals with marriages and succession. In this provision is made for the regulation of marriages by Christian rites between parties, who had previously been living in a customary union, and also for the exclusion of the ordinary consequence of marriage in community of property according to Common Law, except under certain circumstances, and succession under certain rules is also provided for.

Another outstanding feature of the Act is the provision for government by proclamation. The Governor-General is empowered to alter any existing law or make new laws for areas included in the Schedule to the Natives Land Act, 1913, or such areas as may be designated by both Houses of Parliament as native areas for this purpose. All the provisions contained in the laws in force in the Provinces dealing with the issue of Letters of Exemption have been repealed, and the Governor-General has been empowered not only to grant these privileges but to cancel them, whether they may have been granted under the provisions of the existing legislation or under the powers of prior Acts. Letters issued under the latter are regarded as having been issued under the provisions of Act No. 38 of 1927. Finally, apart from the preceding provisions, the Governor-General may make regulations for the prevention of misconduct and disorders, for the regulation of native living, and the control of certain villages and townships.

Section 37 of the Act provides for the date of coming into operation, either in whole or in part, being fixed by proclamation of the Governor-General. By Government Notice No. 201, *Government Gazette* dated the 5th August, 1927, the Act, with the exception of Chapter V having reference to Marriage and Succession, became law as from the 1st September following. Chapter V was eventually brought into force as from the 1st January, 1929, under the provisions of Proclamation No. 296, *Government Gazette Extraordinary* dated the 21st December, 1928.

Special Native Courts.

1. *Native Tribunals.*—Generally speaking, natives in both civil and criminal matters are subject to the ordinary laws and the ordinary courts of the land. Certain special tribunals have, however, been established for the hearing of purely native cases, with a view to affording the natives a simpler and less expensive method of procedure, also to ensure that cases arising out of native law and customs are heard by officials experienced and well versed in such laws and customs and, in so far as native chiefs' courts are concerned, to accord a measure of recognition to purely native institutions.

2. *Civil Matters.*—In so far as civil matters are concerned the following special native courts have been established:—

(i) *Native Chiefs' and Headmen's Courts.*—A native chief or headman appointed as such under the Native Administration Act, No. 38 of 1927, as amended by Act No. 9 of 1929, may be authorized by the Governor-General to hear and determine civil suits arising out of native law and custom between natives resident within his area of jurisdiction. An appeal from the decision of any such court lies to the court of the native commissioner.

(ii) *Native Commissioners' Courts.*—Under section 10 of the Native Administration Act, No. 38 of 1927, the Governor-General may establish Native Commissioners' Courts for the hearing of all civil causes and matters between native and native only, provided that no such court shall have jurisdiction in any matter in which:—

(*a*) the status of a person in respect of mental capacity is sought to be affected;

(*b*) a decree of perpetual silence is sought;

(*c*) namptissement is sought;

Digitized by Google

(*d*) the validity or interpretation of a will or other testamentary document is in question; or

(*e*) a decree of nullity, divorce, or separation in respect of a marriage (contracted according to christian or civil rights) is sought.

Under this provision Native Commissioners' Courts have been established in all districts in which there is a large native population resident under tribal conditions.

These courts are authorized to decide cases involving questions of customs followed by natives, according to the native law applying to such customs, except in so far as this law shall have been repealed or modified, and provided that such native law is not opposed to the principles of public policy or natural justice. The custom of *lobolo* or *bogadi* or similar custom is specially declared not to be repugnant to such principles.

(iii) *Native Appeal Courts.*—There are two Native Appeal Courts in existence—one for the Cape and Orange Free State Provinces and one for the Transvaal and Natal. These courts are constituted under Section 13 of the Native Administration Act, No. 38 of 1927, for the hearing of appeals from Native Commissioners' courts. Each Native Appeal Court consists of a president and two members. The president is a full-time officer appointed by the Governor-General, while the members are appointed by the Minister from time to time as required, and are selected from magistrates, native commissioners, and other qualified persons. The decision of a Native Appeal Court is final, except:—

(*a*) where conflicting decisions have been given by a Native Appeal Court within its area of jurisdiction, in which case the Minister may cause a special case to be argued before the Appellate Division of the Supreme Court;

(*b*) where the Native Appeal Court consents to an application for leave to appeal, upon any point stated by the court, to the Appellate Division.

(iv) *Native Divorce Courts.*—Section 10 of the Native Administration Act 1927, Amendment Act No. 9 of 1929, made provision for the establishment of native divorce courts with jurisdiction to hear and determine suits of nullity, divorce, and separation arising out of native marriages contracted according to christian or civil rites. Each such court must consist of the president of a Native Appeal Court, and its area of jurisdiction must coincide with that of a Native Appeal Court. Two Native Divorce Courts have accordingly been established with areas of jurisdiction coinciding with those of the two Native Appeal Courts.

The jurisdiction of the Supreme Court as a forum of the first instance for native divorce cases is not ousted by the Native Divorce Courts, and, moreover, an appeal from the judgment of a Native Divorce Court lies to the Provincial or Local Division of the Supreme Court having jurisdiction.

3. *Criminal Matters.*—The special courts established for the exercise of criminal jurisdiction in respect of natives are as follows:—

(i) *Native Chiefs' and Headmen's Criminal Courts.*—Such courts are established under Section 20 of the Native Administration Act, No. 38 of 1927, as amended by Section 6 of Act No. 9 of 1929, which empowers the Governor-General to grant to any native chief or headman jurisdiction over members of his own tribe resident or being upon tribal land, or in a tribal location within his area, in respect of offences punishable under native law and custom. His jurisdiction is limited to a maximum penalty of two head of cattle or £5.

An appeal from the decision of any such court in a criminal matter lies to the magistrate of the district concerned.

(ii) *Native Commissioners.*—Section 9 of the Native Administration Act, No. 38 of 1927, authorizes the Governor-General to confer criminal jurisdiction upon native commissioners in respect of offences, subject to the jurisdiction of a magistrate's court, committed by natives. Appeals from the decisions of native commissioners exercising criminal jurisdiction so conferred lie to the Supreme Court.

(iii) *Natal Native High Court.*—The Native High Court of Natal, as at present constituted, exercises criminal jurisdiction only. The court consists of a judge-president and three other judges and tries criminal cases, when the accused are natives, but without prejudice to the jurisdiction of magistrates' courts. It exercises jurisdiction in respect of all crimes (including capital offences) committed by natives, save certain particular classes of crimes specified in Section 6 of Natal Act No. 49 of 1898 as amended by Natal Act No. 30 of 1910. The jurisdiction of the Supreme Court as a court of first instance is expressly excluded in respect of such crimes committed by natives as are cognisable by the Natal High Court.

The principal sources of native revenue in the various provinces have been as follows:—Cape Province, hut tax, quitrent, and private location fees; Natal, hut tax and rent levied in respect of native huts on crown lands as distinct from locations; Transvaal, poll tax and rent from natives squatting on crown lands as distinct from locations; Orange Free State, poll tax. These different systems of taxation were abrogated by the Native Taxation and Development Act, 1925, which substituted a uniform system throughout the Union. Under that Act, as amended by Acts Nos. 28 of 1926, 37 of 1931 and 49 of 1935, every adult male native under the age of 65 years is liable annually for a general tax of 1*l.* and in addition every native occupier of a hut or dwelling in a native location, unless he be the holder of a quitrent allotment, is liable for a local tax of 10*s.* per annum. Three-fifths of the general tax and the whole of the local tax are to be used for the direct benefit, educationally or otherwise, of the natives. The former charges in respect of the occupation of land, i.e., rents, etc., remain. No direct taxation can be imposed on natives by any body other than the Union Government.

The regulation of native labour employed by large industrial undertakings—a matter of fundamental economic importance to South Africa—is governed by an Act of 1911, which consolidated the laws in force in the various provinces with regard to the recruiting and employment of native labour. The law provides for the appointment of a director of native labour, the issue of licences to employers and agents to recruit natives, and to compound managers, and the assessment of compensation for injuries contracted during service.

Owing to special measures adopted and improved conditions of work, the death rate among native labourers on the mines is remarkably low for this class of employment and the standard of health is generally satisfactory.

The supply of Native labour from Portuguese East Africa to the Witwatersrand Gold Mines is regulated by the terms of a Convention entered into between the Portuguese and Union Governments in September, 1928 and revised in 1934.

Defence.

The South Africa Defence Act, 1912, as amended by the South Africa Defence Act Amendment Act, of 1922, provides for the establishment of Defence Forces, comprising:—

Digitized by Google

1. *The South African Permanent Force*, which consists of :—

(i) The South African Staff Corps.
(ii) The South African Artillery.
(iii) The South African Air Force.
(iv) The South African Naval Service.
(v) The South African Instructional Corps.
(vi) Special Service Battalion.
(vii) The Pioneer Battalion.
(viii) The South African Ordnance Corps.
(ix) The South African Service Corps.
(x) The South African Medical Corps.
(xi) The South African Veterinary Corps.
(xii) The South African Administrative, Pay and Clerical Corps.

2. *The Coast Garrison Force.*
3. *The Citizen Force.*
4. *The Royal Naval Volunteer Reserve.*
5. *Special Reserves.*

Every citizen between the ages of 17 and 60 is liable to render personal service in time of war, and those between 17 and 25 are liable to undergo a prescribed peace training with the Active Citizen Force spread over a period of four consecutive years. The Act states, however, that only 50 per cent. of the total number liable to peace training shall actually undergo that training unless Parliament makes financial provision for the training of a greater number.

The establishment of Rifle Associations is a marked feature of the Act; citizens between the ages of 21 and 25 who are not entered for peace training with the Active Citizen Force are to be required to undergo training during these four years in a Rifle Association, thus ensuring that, in course of time, all citizens will at least know how to handle and use a rifle. As an alternative, citizens may enter for service in the South African Division of the Royal Naval Volunteer Reserve.

Provision is also made in the Act for the cadet training of boys between 13 and 17 in urban and other populous areas where facilities can conveniently be arranged.

The Union is divided into 7 commands. To each command has been allotted various units of different arms, to which the citizens entered for peace training are posted.

On 1st April, 1937, a scheme was inaugurated with a view to obtaining a reserve of 1,000 trained pilots. Selected citizens are enrolled for training as pupil pilots at Government expense at various centres throughout the Union, at the beginning of each quarter. The number is limited to 50 for the whole Union on each occasion, *i.e.*, 200 per annum. The pupil pilots perform non-continuous training with Civil Flying Schools which are under contract with the Government. This training is arranged at times which will not interfere unduly with the civil employment of the pupil pilots. In addition, continuous training takes place at the S.A. Air Force Air Training Schools at Roberts Heights, Capetown, Durban or Bloemfontein in two periods annually of 30 and 15 days each. The normal period required before a pupil pilot is sufficiently trained to qualify for the S.A. Air Force Flying Badge ("Wings") is roughly two years, after which he has to serve in the Reserve of Pilots for at least ten years and perform three weeks flying training annually.

Finance.

	1936–37 (Final Figures). £1,000.	1937–38 (Unaudited Figures). £1,000
Revenue	43,087	43,611

Assistant Commissioner, R. W. Wamsley, 1,200*l.*
Chief Revenue Officer, A. D. Wiggett, 1,020*l.*
1st Grade Chief Clerk (Income Tax), S. M. Hill, 850*l.*
Chief Surveyor, A. M. Slade, 825*l.*
First Grade Chief Clerk (Legal), F. Harvey, 825*l.*
Second Grade Chief Clerks, F. W. E. Watts, 725*l.*; L. G. Richmond, 725*l.*
Accountant, R. J. Yell, 725*l.*
Surveyors, J. M. Lawrence, 675*l.*; F. S. Brown, 675*l.*; A. Hewitt-Fox, 625*l.*; D. Brown, 625*l.*; R. R. Cumming, 625*l.*; G. E. Henderson, 600*l.*
Principal Clerks, G. Lindenberg, 675*l.*; E. W. H. Goeze, 625*l.*; C. V. Alport, 600*l.*; C. D. Lloyd, 600*l.*
Appeal Court, Registrar, J. A. Lambert, 625*l.*

District Offices.

Cape Town—Receiver of Revenue, R. Gray, 1,040*l.*
Assistant Rec. of Rev., A. Whiting, 850*l.*
Second Grade Chief Clerk, A. J. Flyn, 700*l.*
Principal Clerks, I. Kleinschmidt, 600*l.*; L. C. N. Philip, 600*l.*; W. A. C. Anderson, 600*l.*
Johannesburg—Receiver of Revenue, C. W. Marshall, 1,110*l.*
Asst. Rec. of Rev., R. Lefebvre, 825*l.*
2nd Grade Chief Clerk, C. H. Kaufman, 725*l.*
Principal Clerks, N. D. Davis, 675*l.*; H. W. Hill, 625*l.*
Benoni—Receiver of Revenue, A. M. Mathieson, 700*l.*
Bloemfontein—Receiver of Revenue, G. J. D. Liebenberg, 800*l.*
Principal Clerk, P. D. Cronje, 600*l.*
Boksburg—Receiver of Revenue, F. Davies, 550*l.*
Brakpan—Receiver of Revenue, V. S. Horrocks, 525*l.*
Durban—Receiver of Revenue, F. W. Medway, 900*l.*
2nd Grade Chief Clerk, T. V. Davies, 700*l.*
Principal Clerk, M. W. Hill, 600*l.*
East London—Receiver of Revenue, F. J. Wilter, 800*l.*
Principal Clerk, R. S. C. Hope, 675*l.*
Germiston—Receiver of Revenue, F. Baker, 700*l.*
Kimberley—Receiver of Revenue, C. R. G. Acton, 725*l.*
Krugersdorp—Receiver of Revenue, G. D. During, 700*l.*
Pietermaritzburg—Receiver of Revenue, A. Spencer, 800*l.*
Principal Clerk, J. E. Knaggs, 625*l.*
Port Elizabeth—Receiver of Revenue, D. McAuliffe, 900*l.*
Principal Clerk, E. Glaholm, 600*l.*
Pretoria—Receiver of Revenue, A. E. Hoffe, 850*l.*
Principal Clerk, H. V. Adams, 700*l.*
Springs—Receiver of Revenue, H. G. Granger, 625*l.*

DEPARTMENT OF LANDS.

Minister of Lands, General Hon. J. C. G. Kemp, 2,500*l.*
Secretary for Lands, V. H. T. H. Rudd, 1,800*l.*
Under-Secretary, F. Neser, 1,250*l.*
Chairman, Central Land Board, T. Edwards, 1,300.

Surveyors-General.

Chairman, Survey Board, and Surveyor-General, Transvaal, N. Snyman, 1,250*l.*
Assistant Surveyor-General, E. P. Eitzen, 860*l.*
Surveyor-General, Cape, M. L. van der Spuy, 1,250*l.*
Assistant Surveyor-General, L. M. Walton, 890*l.*
Director of Trigonometrical Survey, Union of South Africa, W. Whittingdale, 1,250*l.*
Surveyor-General, Natal, C. S. Douglas, 1,050*l.*
Surveyor-General, Orange Free State, T. de Smidt, 950*l.*

Registrars of Deeds.

Chief Registrar of Deeds for the Union, and Registrar of Deeds, Transvaal, M. A. Cross, 1,450*l.*
Registrar of Deeds, Cape, E. Banwell, 1,250*l.*
Registrar of Deeds, Natal, P. S. Lambrechts, 1,050*l.*
Registrar of Deeds, Orange Free State, F. P. van Coppenhagen, 950*l.*

IRRIGATION DEPARTMENT.

Director of Irrigation, A. D. Lewis, M.I.M.E., M.I.C.E., 1,800*l.*
Assistant Director, K. R. Shand, S.A.S.C.E., A.M.I.C.E., 1,200*l.*
Superintending Engineer, T. Hopwood, A.M.I.C.E., 1,080*l.*
Construction Engineer, L. A. MacKenzie, B.Sc., A.M.I.C.E., 1,050*l.*
Chief Meteorologist, Dr. T. E. W. Schuman, D.Ph., M.Sc., B.A., 930*l.*
Hydrographic Surveyor, L. Levinkind, B.Sc., 830*l.*
Boring Engineer, L. D. O'Grady, 990*l.*

DEPARTMENT OF CUSTOMS AND EXCISE.

Commissioner of Customs and Excise, J. D. Heddon, 1,800*l.*
Deputy Commissioner of Customs and Excise, G. E. Saunders, 1,200*l.*
Assistant Deputy Commissioner of Customs and Excise, H. R. Kirby, 950*l.*

Digitized by Google

Chief Inspector of Customs and Excise, A. W. McNair, 850*l*.
Chief Clerk, C. M. Oettle, 800*l*.
Chief Clerk of Excise, W. Broadhurst, 900*l*.
Accountant (Vacant).
Collector of Customs and Excise, Johannesburg, R. A. Hendrikz, 875*l*.
Collector of Customs and Excise and Registrar of Shipping, Cape Town, W. A. Kitchener, 980*l*.
Collector of Customs and Excise and Registrar of Shipping, Port Elizabeth, J. W. Mullen, 850*l*.
Collector of Customs and Excise and Registrar of Shipping, East London, J. Loxton, 800*l*.
Collector of Customs and Excise, Mossel Bay, V. A. Geering, 600*l*.
Collector of Customs and Excise and Registrar of Shipping, Durban, L. Parker, 1,100*l*.
Collector of Customs for Union of South Africa (Lourenco Marques), H. M. Rhodes, 800*l*.
Collector of Customs and Excise, Pretoria, W. H. A. J. Rein, 600*l*.

Department of the Controller and Auditor-General.

Controller and Auditor-General, H. P. Smit, 2,000*l*.
Assistant Controller and Auditor-General and Accounting Officer, W. M. S. Hope, 1,350*l*.
Chief Inspector of Expenditure Audit, H.E. Rudd, 1,080*l*.
Chief Inspector of Railways and Harbours Audit, T. H. Rowell, 1,110*l*.
Chief Inspector of Revenue Audit, A. E. Hayward, 960*l*.
Senior Inspectors, E. N. Simpson, 825*l*.; J. C. Duncan, 825*l*.; C. J. K. Loveday, 725*l*.; J. C. Ballard, 725*l*.; R. S. Stokes, 700*l*.; W. J. C. R. Miller, 700*l*.; C. B. Louw, 700*l*.; J. H. Duigan, 700*l*.; F. C. Maytham, 700*l*.
Chief Clerk, T. Lark, 825*l*.
Principal Clerks, C. L. E. Dilley, 675*l*.; G. W. Hart, 625*l*.; L. B. Ravenscroft, 625*l*.; A. O. P. Johnson, 625*l*.; D. H. Steele, 625*l*.; H. C. H. Newton, 625*l*.; G. A. Salomon, 600*l*.; A. K. A. Murray, 600*l*.; P. J. Le Roux, 600*l*.; A. J. C. Louw, 600*l*.; H. G. Anderson, 600*l*.; G. A. Siegruhn, 600*l*.; P. J. Foot, 600*l*.; A. P. Crofton, 600*l*.

Native Affairs Department.

Minister, The Hon. H. A. Fagan, K.C.
Secretary for Native Affairs, D. L. Smit.
Under-Secretary for Native Affairs, J. S. Allison.
Controller of Native Settlements, H. Rogers.
Chief Clerks, W. E. Clark and F. Rodseth.
Chief Native Commissioner and Chief Magistrate, Transkeian Territories, R. Fyfe King.
Chief Native Commissioner, Natal, H. C. Lugg.
Chief Native Commissioner, Cape, King William's Town, A. L. Barrett.
Chief Native Commissioner, Witwatersrand, and Director of Native Labour, Johannesburg, B. W. Martin.
Chief Native Commissioner, Northern Areas, Pretoria, E. W. Lowe.
Director of Native Agriculture, T. G. W. Reinecke, B.A., M.Sc.
Deputy Director of Native Agriculture, H. H. Curson, Dr. Med. Vet., F.R.C.V.S.
Accountant, N. C. Leith.
President, Native Appeal Court, Transvaal and Natal, A. G. McLoughlin.
President, Native Appeal Court, Cape and Orange Free State, H. G. Scott.

Public Works Department.

Minister of Public Works, Senator the Hon. C. F. Clarkson, O.B.E.
Secretary for Public Works, J. S. Cleland, M.B.E., F.R.I.B.A., M.I.A.
Under-Secretary for Public Works, C. A. Cilliers.
Chief Clerk, R. W. Porter.
Accountant, H. Worthington.
Chief Architect, W. Mollison, A.R.I.B.A., M.I.A.
Chief Quantity Surveyor, R. J. C. Prentice, F.S.I., M.R.San.I., M.C.Q.S.
Structural Engineer, E. W. Dobse, B.Sc. (Eng.), A.M.I.C.E., A.M.I.Struct.E.
Drainage Engineer, E. E. Morgan, M.I.C.E.
Electrical Engineer, W. H. Bottomley, M.I.E.E., M.I.Mech.E.
District Representatives (Transvaal), J. G. H. Holdgate, F.R.I.B.A., M.I.A., A. D. Mackay, B.Sc., A.M.I.C.E.
District Representatives (Cape Province), N. Harvey, L.R.I.B.A., M.I.Struct.E., M.I.A., V. R. Hicks.
District Representative (Natal), V. Calder.
District Representative (Orange Free State), F. W. Ronde, M.I.A.
Asst. Dist. Representative (Transvaal), E. B. Gascoine, A.M.I.C.E.
Asst. Dist. Representative (Cape Province), G. Roxburgh, M.C.Q.S., G. S. H. Bradford, A.R.I.B.A.
Asst. Dist. Representative (Natal), G. A. Mabin, M.I.A.
Asst. Dist. Representative (Orange Free State), G. H. Eddy.
Senior Inspectors of Works (Transvaal), F. O. Mabin, E. J. Rowse, A.M.I.E.E., J. K. Sedgwick, J. Jones.
Senior Inspectors of Works (Cape Province), J. Roche, J. H. K. Roux.
Senior Inspector of Works (Natal), G. Anthony.
Controller of Transport, E. J. A. Rink.

Department of Posts and Telegraphs.

Minister of Posts and Telegraphs, Senator the Hon. C. F. Clarkson, O.B.E.
Postmaster-General and Secretary for Posts and Telegraphs H. J. Lenton, 1,800*l*.
Under-Secretary, Posts, J. N. Redelinghuys, 1,300*l*.
Under-Secretary (Staff and General), L. C. Burke, 1,200*l*.
Under-Secretary, Telegraphs, F. Collins, O.B.E., 1,300*l*.
Principal Accountant, E. W. Dodds, 1,070*l*.
Chief Engineer, C. Griffith, A.M.(S.A.)I.E.E., 1,300*l*.
Inspecting Engineer, J. A. F. Mitchell, M.(S.A.)I.E.E. 950*l*.
Controller of Post Office Propaganda, J. Perkins, 700*l*.
Controller of Stores, A. E. Riley, 860*l*.

Union Representatives Abroad.

High Commissioner in London, C. T. te Water.
Envoy Extraordinary and Minister Plenipotentiary at The Hague and Brussels, Dr. H. D. van Broekhuizen.
Envoy Extraordinary and Minister Plenipotentiary at Berlin and Stockholm, Dr. S. F. N. Gie.
Envoy Extraordinary and Minister Plenipotentiary at Paris and Lisbon, S. F. Waterson.
Envoy Extraordinary and Minister Plenipotentiary at Rome, Dr. G. M. A. Heymans.
Envoy Extraordinary and Minister Plenipotentiary at Washington, R. W. Close.
Accredited Representative to the League of Nations, Geneva, H. T. Andrews.

Accredited Representative in Canada, D. de Waal Meyer.
Consul-General at Lourenco Marques, Lt.-Col. F. F. Pienaar, D.T.D., O.B.E.
Consul-General at Hamburg, Capt. F. Brehmer.
Consul-General at Buenos Aires, A. Zoutendyk.
Consul at New York, E. F. Horn.
Hon. Consul at Gothenburg, G. Carlsson.
Commissioner at Nairobi, Col. R. B. Turner.
Trade Commissioner at Batavia, Mr. Grant Smith (acting).
Trade Commissioner at Tangier, A. H. Handford.
Hon. Commissioner at Jerusalem, M. Haskel.
Hon. Trade Commissioner at Genoa, M. C. Viezzoli.
Hon Trade Commissioner at Rotterdam, J. Schilthuis.
Hon. Trade Commissioner at Oslo, O. Thorstad.
Hon. Trade Commissioner at San Francisco, V. H. Pinckney.
Hon. Trade Commissioner at Vancouver, Col. R. D. Williams.
Hon. Trade Commissioner at Shanghai, P. D. G. Gain.

DIPLOMATIC REPRESENTATIVES OF OTHER COUNTRIES IN THE UNION.

France, Monsieur E. M. de Simonin, *Envoy Extraordinary and Minister Plenipotentiary.*
United States of America, Mr. Leo J. Keena, *Envoy Extraordinary and Minister Plenipotentiary.*
Germany, Herr Rudolf Leitner, *Envoy Extraordinary and Minister Plenipotentiary.*
The Netherlands, Jonkheer W. F. van Lennep, *Envoy Extraordinary and Minister Plenipotentiary.*
Japan, Mr. Kanekazu Okada, *Envoy Extraordinary and Minister Plenipotentiary.*
Belgium, A. Moulaert, *Envoy Extraordinary and Minister Plenipotentiary.*
Portugal, Dr. João de Barros Ferreira da Fonseca, *Chargé d'Affaires.*
Italy, Comm. Paolo Cortese, *Chargé d'Affaires.*

United Kingdom, High Commissioner, Sir William Clark, G.C.M.G., K.C.S.I.
Political Secretary, M. E. Antrobus, O.B.E.
Assistant Political Secretary, D. L. Busk.
Private Secretary, H. Ashton.
Registrar, D. Bootle.

CAPE OF GOOD HOPE PROVINCE.

Extent and Boundaries.

The Cape of Good Hope, strictly speaking, is a small promontory near the south-west extremity of the continent of Africa. But the extensive Province of the name is bounded by the Atlantic and the Southern or Indian Oceans on the west and south; it is bounded on the north to the west of longitude 22° by the Orange River, and on the north-east by the Orange Free State and Natal Provinces. The Cape Province, with the Transkei, contains an area of 276,966 square miles, being over five times that of England. It extends from 26 to 35 deg. S. lat., and from 17 to 30 deg. E. long.

In 1844 Letters Patent were issued annexing Natal to the Cape, but in 1856 it was constituted a separate Colony.

Twelve islands off Angra Pequena, on the coast of Damaraland (Plum-pudding, Roast-beef, Hollam's Bird, Mercury, Ichaboe, Seal, Penguin, Halifax, Long, Possession, Albatross, and Mona), with the adjacent rocks, were annexed in 1867, and added to the Cape Colony in 1874.

In 1876, three large tracts of Kaffraria—namely, Fingoland, Idutywa Reserve, and Noman's Land, were brought under the more direct control of Government, and on the 12th of June, 1876, Letters Patent were issued authorising the Governor to annex these territories to the Cape of Good Hope, on condition of the Cape Parliament passing an Act to provide for their government. Such an Act was passed as No. 38 of 1877, but the territories were not actually incorporated until the 1st of October, 1879.

On the 12th March, 1878, the Port of Walfish Bay, situated a few miles north of the tropic of Capricorn, was proclaimed British territory. It was annexed to the Colony by proclamation dated 7th August, 1884.

On the 15th October, 1880, the Province of Griqualand West was incorporated with the Cape Colony.

Under Proclamation No. 13 of the 26th January, 1882, were issued certain laws and regulations for the government of the territories known respectively as Tembuland, Emigrant Tambookieland, Bomvanaland, and Gcalekaland, of which, by Royal Warrant dated the 14th November, 1881, the officer administering the government of the Cape of Good Hope was appointed Governor. By proclamation No. 140 of 26th August, 1885, issued under Act 3 of 1885, these territories were annexed to the Cape Colony. A similar Warrant was passed on the 27th July, 1881, in respect to the St. John's River Territory, which was annexed to the Colony by Proclamation No. 215 of the 15th September, 1884.

The Xesibe country ("Mount Ayliff") was annexed to the Colony by Letters Patent of the 23rd August and Proclamation of 25th October, 1886, and the Rode Valley, Pondoland, by Letters Patent of 29th July, 1887, and Proclamation of October, 1887 (Act No. 45 of 1887). Under Act No. 5 of 1894 the whole of Pondoland was annexed. Basutoland, now an independent Colony, formed part of the Cape from 1871 to 1884.

On the 16th of November, 1895, British Bechuanaland was incorporated with the Cape under Law No. 41 of 1895.

History.

On 14th September, 1486, Bartholomew de Dias, a Portuguese commander, landed in Algoa Bay; Vasco de Gama doubled the Cape 11 years later, from which time it appears to have been resorted to by European navigators of all nations, but chiefly by Portuguese, Dutch, and English. British ships visited the Cape in 1591, and about 1602 the Dutch made it a place of call. In 1620 two English East India commanders, by a proclamation dated from Saldanha Bay, took possession of the Cape in the

Digitized by Google

name of Great Britain; but no settlement was formed. In 1648 a Dutch East Indiaman, the *Haarlem*, was wrecked in Table Bay, the crew remaining there some time. In 1652 J. A. Van Riebeck, duly commissioned by the "Chamber of Seventeen" at Amsterdam, landed at Table Bay accompanied by 100 persons, and took possession of what is now the site of Cape Town on behalf of the Dutch East India Company. In 1671 the first formal purchase of land was made from the Hottentots, and another purchase took place the following year. At the time of the revocation of the Edict of Nantes, the European population received a slight addition of French Protestants, but their descendants have not maintained any distinctive position in the country. The rule of the Dutch East India Company proved very distasteful to the burghers, who were continually prompted to move further and further from the seaboard and original seat of colonisation. Following these migratory colonists, a magistracy was established at Swellendam in 1745, and another at Graaff Reinet in 1786, and in 1788 the Great Fish River was proclaimed the boundary of the Colony. In 1795, Holland having yielded to the French Revolutionary Government, an English force proceeded to the Cape of Good Hope to secure it against the French for the Prince of Orange, but the Governor refused to obey the mandate of the Prince, and the British force thereupon proceeded to take possession, upon which a capitulation was arranged, and the administration of the Government was assumed by General Craig. An Act of Parliament (37 Geo. III., c. II.) was passed to regulate the trade with the new possession. By the Peace of Amiens the Cape of Good Hope was restored to the Batavian Republic, and evacuated in 1803, but it was again captured by a British Force in 1806, and at the general Peace of 1814 it was ceded in perpetuity to the British Crown. During the interval between the Peace of Amiens and the recapture by the British in 1806, the Colony had made rapid progress, owing to the abolition of the rule of the Dutch East India Company, and the wise regulations of government which had been substituted. An important event in the history of the Cape was the expulsion in 1809 of the Kaffirs from the Zuurveldt, a district west of the Great Fish River. In 1817 that district was visited by the then Governor, who saw the importance of its colonisation as a barrier against the Kaffir power, and in 1820 Parliament voted a sum of 50,000*l.* to promote emigration to the Cape, and 4,000 British immigrants were brought to the Colony and settled in the eastern districts. In December, 1834, began the first of what are called the Kaffir wars, when the Gaika tribe, 20,000 strong, overran the whole south-eastern portion of the Colony, but were defeated, and their lands up to the Kei River proclaimed British territory, but Lord Glenelg, then Secretary of State, refused to ratify the annexation. In 1846 the second Kaffir war broke out, but was speedily suppressed, and the colonial border was extended to the Kei River, as proposed by Sir Benjamin D'Urban. On Christmas Day, 1850, began the third Kaffir war, which lasted nearly three years, and in its earlier stages was aggravated by a simultaneous rebellion of the Kat River Hottentots.

In 1836 began what is called the trekking of a part of the Dutch or Boer population. This remarkable movement, which resulted in the colonisation of Natal, the Free State, and the Transvaal, may be ascribed to several causes, of which the chief were: (1.) General dislike of the policy of Great Britain in relation to slavery and the Native question. (2.) Particular resentment against the policy of Lord Glenelg in reversing the policy of Sir Benjamin D'Urban in relation to the first Kaffir war. (3.) Resentment against the mode in which compensation had been made to them for the loss of their slaves under the Imperial Act abolishing slavery, namely, by orders for payment payable in London, which they could only dispose of on the spot at an enormous discount.

The years 1849 and 1850 were years of continued excitement, owing to the proposals of the Government at home to send convicts to the Cape. In view of the agitation, carried almost to the point of active resistance, the project was abandoned. In 1856 the German Legion, which had been formed during the Crimean war, was brought to the Cape, and the men, numbering 2,300, disposed in selected spots on the frontier for defensive purposes. The same year (1856) was remarkable for the prevalence in Native Kaffraria of a cattle-killing delusion, preached by a young prophetess, which resulted in wide-spread starvation.

Population.

The European population of the Province according to the European Census of 1936 was 791,574.

The total population of the Province in 1936 was 3,529,900, of whom 2,738,326 were non-European (1,268,033 males, 1,470,293 females).

Of the non-European population in 1936, 10,508 were Asiatics, 2,045,570 were Bantus, and 682,248 were of mixed and other races; total, 2,738,326.

Chief towns with European population:—

	1936
Cape Town (incl. Suburbs)	173,412
Port Elizabeth	53,461
East London	31,311
Kimberley	15,741
Uitenhage	9,437
Grahamstown	8,198
Paarl	8,823
King William's Town	5,840
Queenstown	6,723
Oudtshoorn	6,512

Of the European population in 1921, 79,333 were engaged in fishing and agriculture, 2,352 mining, 38,370 industrial, 14,366 transport and communication, 45,142 commercial, 11,674 administrative government, 14,816 other professions, 11,308 personal service, 7,991 independent, 412,141 dependent, and 13,116 other and unspecified. Of the non-European population the great majority are engaged in agricultural or domestic employments.

A. The Province proper is divided into 104 Magisterial districts and the Transkeian Territories into 26 Magisterial districts. B. A Magistrate is stationed in each district, and in the Province proper there is a Divisional Council in each district except (*a*) Wellington, which for Divisional Council purposes forms portion of the Paarl Division; (*b*) Simonstown, Bollville and

Digitized by Google

Wynberg, which for Divisional Council purposes form portion of the Cape Division; (c) Adelaide, which for Divisional Council purposes forms portion of the Bedford and Fort Beaufort Division; (d) Hopefield which for Divisional Council purposes forms portion of the Malmesbury Division; (e) Keiskama Hoek and Middel Drift which for Divisional Council purposes form portion of the Kingwilliamstown Division; (f) Somerset West which for Divisional Council purposes forms portion of the Stellenbosch Division; (g) Taungs which for Divisional Council purposes forms portion of the Vryburg Division; and (h) Glen Grey and Herschel which, being native areas, are separately administered. Divisional Councils have also been constituted in two Transkeian districts, viz., Matatiele and Mount Currie. Each Divisional Council consists of at least six members elected quinquennially by the owners or occupiers of immovable property. These Councils are charged with the duty of constructing and maintaining roads and bridges, controlling public outspans, trek-paths and public servitudes, and perform other local duties.

There are 133 Municipalities, each governed by a Mayor, or Chairman and Councillors, a certain number of whom are elected annually by the registered voters. There are also 94 Village Management Boards, 32 Local Areas, established under the Divisional Councils and Road Ordinance, No. 13 of 1917, and 23 Local Boards, established under Ordinance No. 11 of 1921.

In 1921 there were 1,684,906 Christians—546,065 Dutch Churches, 358,827 Anglican Churches, 105,696 Presbyterians, 115,941 Congregationalists, 394,085 Methodists, 76,421 Lutherans, 47,293 Roman Catholics, 16,102 Baptists, and 24,476 other Christians. Mohammedans, 24,513, Hebrews, 21,244, heathen, 1,002,450.

Constitution and Government.

The Colony of the Cape of Good Hope was originally founded by the Dutch in the year 1652. Great Britain took possession of it in 1795, but evacuated it in 1803. A British force again took possession in 1806, and the Colony has remained a British Possession since that date. It was formally ceded to Great Britain by the Convention of London, 1814. The original Colony has been extended from time to time. East and West Pondoland were annexed in 1894 and Bechuanaland in 1895. For many years the form of government in the Colony depended on the terms of the Royal Letters Patent and Instructions to Governors. Letters Patent issued in 1850 to Governor Sir Henry Smith declared that in the Colony there should be a Parliament which should consist of the Governor, a Legislative Council, and a House of Assembly.

A Constitution Ordinance was enacted by Order in Council of March 11th, 1853, and took effect on May 1st ensuing. This Order in Council provided that nothing it contained should prevent the Parliament of the Colony from making Acts (subject to the power of Her Majesty in Council either to disallow or assent to such Acts) in amendment of the said Ordinance. This power of amending the Constitution was exercised from time to time as the bounds of the Colony were extended. In 1872 an Act was passed at the Cape and assented to by Order of the Council providing for the system of Executive Administration known as Responsible Government. The Constitution formed under these various Acts vested the Executive in the Governor and an Executive Council, composed of certain office holders appointed by the Crown. On the 31st May, 1910, the Colony was merged in the Union of South Africa, thereafter forming an original Province of the Union. Cape Town is the seat of the Provincial Administration.

The educational system (for other than higher education) is maintained by the Provincial Administration under the general control of the Administrator of the Province. It is administered by the Department of Public Education under the direction of the Superintendent-General of Education, financial matters being regulated by the Provincial Secretary in his capacity of Controller of Educational Finance. Practically the whole cost of the maintenance of the schools under the Department's control is borne by the Administration.

The local administration of undenominational public schools is conducted by school boards and school committees, the unit of administration being the school district. There are 111 such districts. Every public school under a board is ordinarily managed by a committee elected by the parents, or, in default, nominated by the board. Members of School Boards are partly elected and partly nominated by the Administration and by Municipal and Divisional councils. School boards have the power, subject to departmental approval, to establish and maintain schools; further, subject to departmental approval, they have the general financial management of schools under their jurisdiction. They also have the power to enforce school attendance.

Denominational Schools are mainly mission schools for coloured or native children and are under the local management of representatives of the various religious denominations at whose instance they were established.

Education is free for all children, whether European, coloured or native, in all primary standards and also in secondary standards up to the age of 15 years, except in a limited number of European schools known as *fee-paying schools*. For secondary education (available from Standard VII to Standard X in high schools and from Standard VII to Standard VIII in secondary schools) fees are payable according to approved scales for children over the age of fifteen. All fees received are paid into the Provincial revenue. The Superintendent-General of Education, however, may grant bursaries for the purpose of assisting any European or coloured pupil who has passed Standard VI or a higher standard to take advantage, by means of either conveyance or boarding, of the facilities offered for secondary education at a secondary or high school under the Department. Further school boards, with departmental consent, may to a limited extent grant remission of *school fees* in whole or in part in suitable cases. The secondary school curriculum is divided into two stages, each covering a period of two years. An examination is held at the conclusion of each two-year course of study, Standard VIII pupils taking the Secondary School Junior Certificate Examination, and Standard X pupils the Secondary School Senior Certificate Examination. A pass in the latter examination, provided a certain selection of subjects is taken, constitutes a qualification for admission to any South African University.

School attendance is compulsory throughout the Province for children of European parentage or extraction who have completed their seventh but not their sixteenth year, unless the child has passed the sixth standard and is engaged in a regular occupation or has been otherwise exempted under certain statutory conditions.

Total	2,145	878	1,822	4,845	157,134	108,647	193,929	459,710

* 830 pupils in Secondary Departments attached to Coloured Training Schools and 358 pupils in Secondary Schools.

Provincial expenditure on Education (excluding Higher Education, which is under the control of the Central Government): 1936–37, 4,091,724*l.*; 1937–38, 4,095,875*l.*

In the state-aided hospitals in the Province 369,705 out-patients, and 68,805 in-patients, were treated during the year 1937.

Fisheries.

This subject has been engaging the attention o the Cape Provincial Government since the inception of Union.

Under the Fisheries Ordinance which was passed in 1920, regulations were promulgated providing for the better protection of both sea and fresh-water fish. Fishing boats employed for purposes of profit are licensed and registered, and a licence is also necessary before trout or other non-indigenous fish can be caught in any of the public waters of the Cape Province.

The licence fee to catch trout or other non-indigenous fish is 10*s.* per month or 1*l.* per fishing season for male adults and 5*s.* per fishing season for women and juveniles under the age of 16 years. The licence fee to catch black bass and perch only is 2*s.* 6*d.* per fishing season. Holders of either of the first three licences do not require the fourth.

The close seasons, in each year throughout the Cape Province and the Transkeian Territories, are from the 16th May to the 31st August for trout, and from the 1st September to the 31st December for largemouth black bass and European perch.

The Cape Provincial Government maintains a trout hatchery and pondfish station at Jonkershoek, Stellenbosch, and also makes an annual grant towards the upkeep of the trout hatchery of the Frontier Acclimatization Society at Pirie, near Kingwilliamstown. The Inland Fisheries Advisory Officer of the Provincial Administration is stationed at Capetown.

Scientific investigations into the habits and spawning seasons of various kinds of marine fish are also carried on at the Aquarium at St. James under Dr. C. von Bonde, the Director of Fisheries of the Union.

Provincial Administration.

Administrator, Hon. J. H. Conradie, 2,500*l.*
Provincial Secretary, Chief Local Government Inspector, Accounting Officer and Controller of Educational Finance, F. C. M. Voigt, 1,600*l.*
Assistant Provincial Secretary, J. D. de Villiers, 1,080*l.*
Provincial Roads Engineer, W. P. F. McLaren, 1,080*l.*

Cape Western . . .	J. G. F. Moult.

PROVINCE OF NATAL.

Area and Population.

Natal* derives its name from its discovery by Vasco da Gama, the celebrated Portuguese navigator, on Christmas Day, 1497. It lies on the south-east coast of Africa, about 800 miles from Cape Town, and between the 26th and 32nd parallels of S. lat. It is bounded on the north by the Portuguese possessions and the Transvaal, on the west by the Orange Free State and Basutoland, and on the south by the Province of the Cape of Good Hope and Umtamvuna River. It is a well-watered country, no less than 35 distinct rivers running into the Indian Ocean in the 376 miles of coast. Unfortunately none of them are navigable. Pietermaritzburg is the seat of the Provincial Government, and has a population of 49,539 (1936 census). According to the figures of the 1936 census, the European population was: males 10,534, females 11,912, total 22,446. The largest town and only port is Durban, the European population of which according to the same census was stated to be: males 46,496, females 48,537, total, 95,033.

The Province (including Zululand, 10,472 square miles) has an area of 35,284 square miles, with a seaboard of about 360 miles. The climate is sub-tropical on the coast and somewhat colder inland. It is well suited to Europeans. The Province is divided into 44 Magisterial Districts.

The returns of the total population in 1921 and 1936 were:—

	1921	1936
Europeans	136,838	190,549
Indians and Asiatics ..	141,649	183,661
Natives	1,150,911†	1,572,258‡
Total	1,429,398	1,946,468

† Including 11,107 mixed and other coloured.
‡ Including 18,629 mixed and other coloured.

The figures of the European population of Natal in 1936 show: males 95,157, females 95,392, total 190,549.

According to the census of 1936 the population of Durban including suburbs, was 259,606 (Europeans, 95,033; others, 164,573), and of Pietermaritzburg including suburbs, 49,551 (Europeans, 22,446; others, 27,093).

History.

From the discovery of Natal by Vasco da Gama, in 1497, little is to be found respecting it until 1686, when a Dutch vessel was wrecked in the Bay of Natal. The Dutch formed a settlement in 1721, but soon abandoned it.

In 1824 Lieutenant Farewell, of the Royal Navy, having in the previous year visited Natal on an exploring voyage, endeavoured to colonise it. Tshaka, a chief of the greatest talent, who had fused into a nation under his own despotic sway the various tribes inhabiting a vast tract of country, sanctioned the formation of a settlement by this small band of white men, which, however, was broken up about four years later.

Towards the close of 1837 a large body of Boers from the Cape Colony, taking offence at what they regarded as the weak and vacillating frontier policy of the British Government which gave them no adequate protection against native marauders, migrated to Natal. Many of them were treacherously murdered by Dingaan, then Zulu chief, the murderer of, and successor to, his brother Tshaka. For two years the Zulus and the Boers waged war with varied success; but in 1839 the Boers obtained a decisive victory, and placed Mpande, an ally of theirs, and brother of Dingaan, on the Zulu throne.

Owing chiefly to these disturbances, the Governor of the Cape decided to take military possession of the district, and sent there a force under Captain Smith (1842). These troops came into collision with the Boers, were defeated by them, forced to entrench themselves, and completely blockaded until the arrival of considerable reinforcements under Colonel Cloete. The Boers submitted, on the 5th July, to Colonel Cloete at Pietermaritzburg.

In consequence of the outbreak of war between the South African Republic (as the Transvaal was at that time called) and Orange Free State on one side and Her Majesty's Government on the other, Natal was invaded by the Boer forces in Oct., 1899. The first important engagement took place at Dundee, the Boers being repulsed by an advanced British force under Sir W. Penn Symons, who was mortally wounded. The British troops, under General Yule, then fell back upon Ladysmith, and rejoined the main army of defence under Sir G. White, who in the meantime had gained a decided

* There was formerly another British settlement named Natal, a factory of the East India Company on the west coast of Sumatra, founded 1751, and not finally abandoned until the cession of Sumatra to the Dutch in 1824.

victory over a Boer commando at Elandslaagte. Ladysmith was invested by a largely superior Boer army on the 28th October. Ladysmith was relieved by the British forces under Sir R. Buller at the end of February, 1900, and the Boers were cleared out of Natal in the course of the following few months, the British advancing into the Transvaal, where Lord Roberts was already operating with an invading army. It was not, however, until the signature of the terms of surrender by the Boer leaders on the 31st May, 1902, that peace was generally restored throughout South Africa, and that Natal was relieved from all further danger from the Boer forces remaining in the field up to that date.

An Act was passed in 1902, providing for the annexation to Natal of certain territories hitherto forming part of the Transvaal, and a Commission appointed to report as to the new boundaries. The new territory was annexed to Natal in January, 1903, and is divided into the five Magisterial divisions of Vryheid, Utrecht, Paulpietersburg, Ngotshe, and Babanango. The population at the census of April 17th, 1904, was 5,754 Europeans (mostly Dutch), 45 mixed and others, 5 Indians and Asiatics, 4,104 Natives in service, and 86,911 Natives in native areas: total 96,819. This territory represents an area of 6,970 square miles.

Zululand and Tongaland.

The Zulus are a warlike tribe who, in the beginning of the century, under Tshaka, pressed southwards and became consolidated into a powerful and well-organised kingdom. Tshaka was murdered and was succeeded by Dingaan in 1828, who came into conflict with the emigrant Dutch, by whom he was deposed in 1839, in favour of his brother Mpande. In the latter years of Mpande Zululand was distracted by the rival ambitions of his sons, and the Natal Government in 1861 sent Mr. (the late Sir) Theophilus Shepstone, Secretary for Native Affairs, on a mission to Zululand, to induce the Zulus to recognise some one of Mpande's sons as heir to his throne, and thus restore tranquillity to the country. The son chosen, with the consent of the nation, the king, and the Natal Government, was Cetshwayo, who from that time acted to a great extent as regent for his father until the latter died in 1873. Cetshwayo, at the instance of Mr. Shepstone, proclaimed certain new laws, which in effect came to this, that he was not to kill his subjects without adequate cause and without trial. The relations between Cetshwayo and Natal during the first years of his reign were not unfriendly, though they became occasionally strained through disregard by him of his coronation law. But after the annexation by England of the Transvaal, a material change in the relations of the two Powers took place. Cetshwayo had long hated the Boers, with whom he had a boundary dispute, dating from 1861, and after the annexation his enmity appeared to be transferred to the new Government. The Zulu war party wanted at once to occupy the whole territory in dispute, and a collision between the Zulus and the British Government of the Transvaal appeared imminent, but was averted by the suggestion of Sir Henry Bulwer, Lieutenant-Governor of Natal, to refer the dispute to the arbitration of three Commissioners to be selected by himself. This was accepted, both by Sir T. Shepstone, as Governor of the Transvaal, and by Cetshwayo, and approved by Her Majesty's Government; the final award being, however, by them reserved to Sir B. Frere as Her Majesty's High Commissioner in South Africa. The Natal Commission reported, in June, 1878, in favour of the claims of the Zulu king, and in September Sir B. Frere arrived in Natal and took up the consideration of the boundary dispute, and also of our general relations with the Zulus, which were becoming more and more strained. On the 11th of December his award in the arbitration was delivered to the representatives of the Zulu nation at the Lower Tugela Drift. At the same time Cetshwayo was required to introduce some modification of his administration, especially as regards military service, and to surrender certain refugees from Natal, and pay a fine for harbouring them, and for border outrages by his subjects.

The king not having complied, the further enforcement of the demands was confided to Lieut.-General Lord Chelmsford, whose forces advanced into Zululand in three columns between the 11th and 14th of January, 1879. On the 22nd of January two engagements were fought; one at Isandhlwana, the other at Inyezane; the former with disastrous, the latter with doubtful, results to the British. On the same night part of the Zulu impi crossed the Buffalo and attacked the commissariat and hospital post of Rorke's Drift, held by one company of the 24th Regiment. The post was without defences; but the officer in command, Lieut. Chard, V.C., R.E., with great rapidity and skill converted the stores themselves into a defence, and throughout the whole night the little garrison, behind a flimsy rampart of rice bags and biscuit boxes, successfully maintained an heroic defence.

In the meantime, the northern column, under Colonel (the late Sir Evelyn) Wood, continued to engage and harass the enemy. Even in this part, British arms were not free from disaster at the Intombi River, and in a reconnaissance at the Hlobane Mountain; but immediately after the whole Zulu army, numbering 24,000 men, having attacked Wood's camp at Kambula Kop, suffered a severe defeat.

At the beginning of April, reinforcements having begun to arrive from England and the neighbouring colonies, Lord Chelmsford advanced across the Lower Tugela to the relief of Colonel Pearson, who was shut up in Eshowe; defeated the enemy at Ginginhlovu on the 2nd of April, and relieved the garrison.

The military power of the Zulu kingdom was finally broken to pieces at the battle of Ulundi on the 4th of July, and Cetshwayo fled to the bush with a few followers. Chief after chief submitted, and Cetshwayo himself was captured. The dynasty of Tshaka was deposed, and the country was divided into thirteen districts, each under an independent chief, holding office by the gift of the Queen of England, subject to certain conditions accepted by him; a British resident was appointed to reside in Zululand, and be the adviser of the chiefs and channel of communication between them and the British Government.

Difficulties were soon experienced in working this arrangement. Some of the chiefs quarrelled and fought with one another and with their subjects, many of whom refused to recognise their authority; while a large and influential party were anxious for the restoration of Cetshwayo. Sir H. Bulwer, who had assumed the government of Natal in the early part of 1882, was specially

Digitized by Google

commissioned to inquire into the whole question of the Zulu settlement. After fully considering his report, Her Majesty's Government decided to replace the ex-king over the whole country north of the Umhlatuze River, with the exception of a small territory in the north-east, which Usibepu, one of the thirteen chiefs appointed by Sir Garnet Wolseley, was allowed to retain. The territory between the Umhlatuze and the Natal frontier was constituted a native reserve, under the supervision of a British commissioner, and it was arranged that locations should be provided in this reserve for any of the Zulus who might be unwilling to again submit to the restored king. Cetshwayo, who had at his own request been allowed to visit England, where the decision of the Government was communicated to him, and by him formally accepted, was reinstalled by Sir Theophilus Shepstone on the 29th January, 1883, in the presence of 5,000 Zulus.

His enemies, headed by Usibepu, proved more formidable than he or others had anticipated, and after a struggle of some months he was overthrown and his kraal destroyed. He took refuge in the Reserve, where he lived practically under the care of the Resident, until the 8th of February, 1884, when he died. Soon after his death his followers, the Usutus (the name by which the personal adherents of Cetshwayo—as distinct from the Zulus in general—were known), finding themselves no match for Usibepu, called in some Boer adventurers, with whose assistance they inflicted a crushing defeat on Usibepu, who took refuge in the Reserve. And as a reward for this service the Boers received a grant of land, in which they established the "New Republic."

Finding that the Zulu people were unable to form any orderly administration of the remaining territory, Her Majesty's Government decided, with the general assent of the Zulus, to declare their country to be British territory, which was done in May, 1887. Some disturbances occurred soon after in connection with an attempt to set up Dinuzulu, a son of Cetshwayo, as King; but it was soon checked, with the assistance of the Imperial troops, and Dinuzulu with his uncles Ndabuko and Tshingana were arrested, tried and convicted of high treason, and removed to St. Helena, while other offenders were tried on other charges, and imprisoned or fined. Dinuzulu and his two uncles were permitted to return from exile at the beginning of 1898.

In 1890 Tongaland and the districts of Fokoti, Umjindi, and Manaba, were proclaimed part of Zululand.

In 1895 the territories of the Chiefs Mbikiza and Sambana, in extent 668 square miles, lying between Zululand and Swaziland, the Portuguese territories, and Tongaland, were annexed to Zululand.

By Government Notice, dated 11th June, 1895, a British Protectorate was declared over the territory of Tongaland, also called Maputaland, which is about 1,200 square miles in area, and is bounded on the north by Portuguese possessions, on the west and south by Zululand, and on the east by the Indian Ocean. Under the Anglo-Portuguese Convention, signed at Lisbon on 11th June, 1891, the spheres of influence of Great Britain and Portugal over the country occupied by the Tongas was defined by a line following the parallel of the confluence of the River Pongolo with the River Maputa to the sea coast. The boundary then agreed upon was surveyed in 1896, and laid off by a joint commission appointed by the British and Portuguese Governments.

In November, 1897, a Bill was introduced into the Natal Parliament to provide for the annexation of Zululand to Natal, and became law. A Proclamation was issued by the Governor on the 30th December, giving effect to the annexation from that date. The British Tongaland Protectorate had been previously annexed to the Queen's dominions, and were incorporated with Zululand on the 27th December, 1897.

In 1906 a serious native rebellion broke out in the colony and spread to Zululand. It was suppressed by the Colonial forces, with assistance from detachments of volunteers from the Transvaal and the Cape Colony. A Commission was appointed to enquire into the native question generally, and the Commission's Report has since been published.

In 1907 there was a further recrudescence of unrest amongst the natives in Zululand, which was, however, easily suppressed without actual bloodshed. Dinuzulu, son of Cetshwayo, together with other chiefs and ringleaders, was arrested, and tried on charges of high treason, rebellion, sedition, murder, etc., and found guilty, though complicity in the murders of several noted loyalist Chiefs was not proved as against Dinuzulu. Dinuzulu was sentenced to four years' imprisonment, whilst other Chiefs were sentenced for longer periods and transported to St. Helena.

Constitution.

Natal, which had been annexed to Cape Colony in 1844, was placed under separate government in 1845, and under charter of July 15, 1856, was erected into a separate Colony. By this charter partially representative institutions were established, and, under a Natal Act of 1893, assented to by Order in Council June 26, 1893, the Colony obtained responsible government. The province of Zululand was annexed to Natal on December 30th, 1897. The districts of Vryheid, Utrecht and part of Wakkerstroom, formerly belonging to the Transvaal, were in January, 1903, annexed to the colony. On May 31, 1910, the Colony was merged in the Union of South Africa, becoming an original province of the Union.

Instruction.

With the exception of higher and vocational education, which has been placed under the control of the Union Government, education comes under the Provincial Administration.

There are in the Province, 1 Training College for Teachers, 1 Farm Training School, 24 secondary and intermediate schools, 2 preparatory schools and 133 primary schools for Europeans; 99 schools for Natives; 17 for Indians, and 14 for Coloured children, all under direct Government administration, and the following numbers of schools which receive Government aid and inspection: 27 for Europeans (of which 9 are secondary schools), 350 farmhouse schools; 651 for Natives, 85 for Indians, and 23 for Coloured children; and about 47 purely private schools for Europeans, which number includes about 9 large and successful secondary schools.

The average number of Europeans enrolled in Government and Government-aided schools in 1937 was 29,414 (the average daily attendance being 93 per cent. of that figure), including 943 in farmhouse schools. With the large number attending private schools, it is estimated that there are few European children who are receiving no education.

Primary education is free in Government European and Coloured schools, and is compulsory for Europeans between the ages of 7 and 15 (or Standard VI if below 15), who live within three miles of a school. For indigents who live beyond that radius boarding or transport assistance is available.

The average enrolment in non-European schools for 1937 was: Native 73,640, Indian 22,669. Coloured 3,332.

The Government expenditure on education for 1937 was 970,065*l.*

Fishing.

All coastal fishing in Natal is administered under the Natal Fisheries Ordinance No. 11, 1916, and regulations framed thereunder. A Principal Fisheries Officer is in charge of the Department.

The Natal Fisheries Advisory Board, consisting of seven members, meets once a month.

The principal classes of edible sea fish are red and silver breams, bass, rockcod, barracoudas, seventy-fours, and steenbras.

Whaling operations on the Natal coast generally commence in May and end in October of each year. The species of cetacea captured are sperm, humpback, finner, blue, sei, and occasionally Right whale. Porpoise and dolphin abound all the year round on the coast. A whaling licence, subject to the approval of the Administrator, costs 50*l.* per annum, which fee includes a free Factory Licence. In addition a licence fee of 25*l.* 10*s.* is charged for each vessel and 2*l.* 10*s.* for each harpoon gun. Shellfish—mussels and oysters—are marketed under licence during the season, which extends from March to October in each year. The local fisheries also provide a limited supply of crustaceans—crabs, crayfish, prawns and shrimps.

Rod and line salt-water angling on the Natal coast is extremely popular and well organised. Several Angling Clubs are in existence and are controlled by the Natal Coast Anglers' Union.

Fishing in inland waters is governed by the provisions of Ordinance No. 11, 1935, under which a Board of nine members is appointed from time to time to advise the Provincial Administration.

The cost of a Government Trout Fishing Licence is 1*l.* Licences are issued by the Provincial Accountant, Pietermaritzburg, Principal Fisheries Officer, Durban, and the Revenue Officer of the division within which the licence is sought.

Active measures are taken to foster and extend the scope of trout fishing, both brown and rainbow, and at the present time there are over thirty rivers with numerous tributaries well stocked and furnishing excellent results. The trout fishing season embraces the period 16th August to 31st May of the following year.

Large Mouth Black Bass have been introduced to the inland waters. Several of the larger dams now afford excellent fishing. The open season extends from 1st January to 30th June. Free permits to capture bass may be obtained from the Provincial Secretary.

Provincial Administration.

Administrator, The Hon. H. Gordon Watson, I.S.O., 2,000*l.*
Provincial Secretary, T. A. F. Rhodes, 1,450*l.*
Assistant Provincial Secretary, E. D. Davies, 990*l.*
Provincial Accountant, H. C. Lake, 910*l.*
Provincial Roads Engineer, W. J. Cairns, 1,050*l.*
Principal Fisheries Officer, B. M. Impey, 320*l.*
Provincial Auditor, J. F. Williams, 930*l.*

Education Department.

Superintendent, F. D. Hugo, B.A., 1,450*l.* (fixed).
Chief Inspector of Schools, J. H. Lawlor, 850*l.*-30*l.*-1,000*l.*
Secretary, Education Department, J. D. Robertson, 700*l.*-25*l.*-800*l.*

Hospitals.

Medical Superintendent, Addington Hospital, Durban, Dr. A. G. Stewart, 1,450*l.*
Medical Superintendent, King Edward VIII Hospital, Durban, Dr. R. E. Stevenson, 1,140*l.*

S. J. Smith	Durban (Congella).
A. F. W. Springorum	Zululand.
C. H. Stott	Durban (Toll Gate).
P. H. Taylor	P. M. Burg. (South).
G. I. Van Rooyen	Umvoti.
G. D. H. Wallace, Dr.	Victoria County.
A. T. Wanless	Durban (Greyville).
L. Whiteley	Durban (Umlazi).

Members of the Executive Committee, Lt.-Col. T. H. Blew, D.S.O.; F. C. Hollander, J.P.; J. Macaulay; and W. M. Power.

The fifth member and Chairman of the Executive Committee is the Administrator, the Honourable H. Gordon Watson.

PROVINCE OF THE ORANGE FREE STATE.

Situation, Area, and Population.

The Province of the Orange Free State lies to the north of the Orange River and the Province of the Cape of Good Hope, and to the south of the Vaal River. On the east it is bounded by Basutoland and the Province of Natal. The country, which lies at an altitude of 4,000 to 5,000 feet above the sea, consists chiefly of grassy plains; but to the east, on the Basutoland border, it is hilly. The rainfall is moderate, and the country is mainly devoted to stock-farming, though grain is raised in parts.

Digitized by Google

The area of the province is 49,647 square miles; it is divided into 33 districts. The population at the complete censuses of 1921 and 1936 was as follows —

Year.	European.			Non-European.			Total.		
	Males.	Females.	Total.	Males.	Females.	Total.	Males.	Females.	In all.
1936	101,872	99,106	200,978	280,031	291,051	571,082	381,903	390,157	772,060

The capital, Bloemfontein, had in 1921, 17,711 European inhabitants (9,041 males and 8,670 females), and 18,780 Non-European (9,729 males and 9,051 females); total 36,491.

According to the figures of the census of 1936, the population of Bloemfontein was: European—males 14,931, females 15,360, total 30,291; non-European—males 15,880, females 18,062, total 33,942; total all races 64,233.

Religion.—The principal body, according to the census of 1921, is the Dutch Reformed Church with 207,536 adherents; of Methodists there were 137,778; Anglican Communion 50,807; Presbyterians 13,562; Congregationalists 8,638; Lutherans 7,931; Roman Catholics 9,879; Jews 4,761; Heathen, 174,697.

According to the Census of 1926 the religions of the European popluation are: Dutch Churches, 163,504; Anglican, 13,235; Presbyterian, 3,945; Methodist, 7,478; Roman Catholic, 2,516; Other Christian, 5,795; Hebrew, 5,753; Other, 759.

History.

The Orange River was first crossed by a European in 1760, but no attempt was made to settle the country for many years after. Emigrants from the great trek established themselves at Winburg and elsewhere, but the Colonial Government for some time made no attempt to establish any administration. In 1848, however, owing to the disputes between the settlers and the natives, Sir Harry Smith issued a Proclamation declaring the whole territory between the Orange River and Vaal River to be under the sovereignty of the Queen, and a British Resident was appointed at Bloemfontein, with Assistant-Commissioners at Winburg and the Caledon River. The discontented farmers under Pretorius took up arms, but were defeated by Sir Harry Smith at Boomplaats. The British Government, however, before long determined to abandon the territory because of the increasing difficulties with the Basutos; and in 1854 Sir George Clerk, the Special Commissioner for "the settling and adjustment of the affairs of the Orange River Sovereignty," signed the Convention of Bloemfontein, by which, much against the will of many of the inhabitants, British sovereignty was withdrawn, and the independence of the country was recognised.

The history of the Orange Free State was in the main peaceable, but a good deal of fighting followed with the Basutos, and in 1866 Moshesh was compelled to cede much of his best cornland. The Basutos appealed to the High Commissioner and were taken under British protection, but by the Treaty of Aliwal North in 1869 the incorporation of the conquered territory into the Orange Free State was recognised.

About the same time the discovery of diamonds at Kimberley and the inrush of diggers led to a dispute between Her Majesty's Government and that of the Orange Free State as to the boundary, which was ultimately settled in 1876 by a Convention signed in London by President Brand providing for a payment by Great Britain of a sum of 90,000*l.* in consideration of the abandonment of the Free State claim.

The Government of the Orange Free State consisted of a President, elected every five years, assisted by an Executive Council and a Volksraad, containing 60 members, half of whom retired every two years. The Orange Free State had since 1889 been a member of the Customs Union, to which the Cape and latterly Natal also belonged. In the same year the railway to the Vaal was completed by the Cape Government, which continued to work the line until after the Jameson raid, when the Free State took it over.

In 1889, not long after the death of President Brand, whose wisdom and moderation had won general recognition, the Orange Free State entered into an alliance with the South African Republic. This alliance was renewed in 1897, and was appealed to as binding the Free State to assist the South African Republic in her quarrel with Great Britain in 1899. This course was determined on by a resolution of the Volksraad taken on the 27th of September, 1899, and resulted in the annexation of the country to the British dominions by a Proclamation of Lord Roberts issued on the 28th of May, 1900, the new Colony being called the Orange River Colony, and Lord Roberts being appointed Administrator. Sir Alfred Milner succeeded to the Administration on the departure of Lord Roberts from South Africa at the end of the year 1900, and was afterwards selected for appointment as Governor both of the Transvaal and of the Orange River Colony. Major (afterwards Sir) H. J. Goold-Adams was selected for the post of Lieut.-Governor. Early in 1905 Lord Milner resigned, and in May of that year his successor, Lord Selborne, arrived in South Africa. On the establishment of responsible government, July, 1907, Sir Hamilton Goold-Adams became Governor of the Colony.

On the restoration of peace in 1902 Crown Colony government was established, and continued till 30th June, 1907, when responsible government was granted. The election of the first Legislative Assembly took place in November, 1907.

The Legislature consisted of two Chambers—a Legislative Council and a Legislative Assembly, consisting of 11 and 39 members respectively.

On the 31st May, 1910, the Orange River Colony became, under the name of the Orange Free State, a Province of the Union of South Africa, and is now governed in terms of the South Africa Act which constituted the Union of South Africa. Apart from the general control of

Digitized by Google

the Union Parliament the Act provided that the control of certain specified matters should be vested in an Administrator and Provincial Council.

Education.

Higher and technical education are under the control of the Minister of Education for the Union, while primary (including elementary) and secondary education are controlled by the Administrator of the Province. Under the Educational Ordinance No. 15, of 1930, the Province is divided into 25 School Districts. Each Government School is under the supervision of a School Committee elected by the parents. For each District there is also a School Board, elected by the School Committees which exercises general supervision over all schools within its district. The School Committees have the right of nominating teachers, subject to the approval of the Department. Grants are given conditionally to private schools. At present there are 673 Government and Government-aided European schools in the Province with a total enrolment of 43,606 in 1937. Education is free in primary and secondary schools. Three schools in Bloemfontein are allowed to charge fees. Except where the parent objects, both official languages are taught to all children. In Practice all pupils take both official languages. Up to and including Standard VI the medium of instruction is the home language of the child. On the medium basis, schools fall into the following classes: (i) Afrikaans—medium Schools; (ii) English —medium Schools; (iii) Schools with parallel classes; (iv) Schools with dual medium classes.

Bloemfontein is the chief educational centre, and contains the following institutions:—

(*a*) High Schools

(i) Fee-paying:—Grey College School, boys', parallel classes; Eunice High School, Girls', English medium; Oranje Meisies School, girls', Afrikaans medium.

(ii) Non-Feepaying:—Brebner High School, mixed, English medium; Central High School, mixed, Afrikaans medium.

(*b*) Primary Schools: Model School, President Brand School, Dr. Viljoen School, Bloemfontein North School, Robert Bowie School—these are all non-feepaying mixed schools with parallel classes.

These are Government schools, Grey College School, the Eunice High School, the Oranje School and the Central High School having large boarding departments. St. Michael's Home and St. Andrew's Schools are Government-aided schools, whilst the Convent School is purely private. All these have large boarding establishments.

(*c*) Training of Teachers: The Normal School, established soon after the Anglo-Boer War, has been replaced by the Normal College, where about 80 students annually complete the Training Course prescribed by the Education Ordinance of 1930. Two teachers' certificates are issued—the Lower and the Higher. For the lower certificate a two years' post-matriculation professional course is required, while for the higher certificate a two years' professional course following on a year's course at the Glen Agricultural College or at a recognised University is necessary.

Secondary schools have been established in all the leading towns of the Province with more advanced departments, preparing pupils up to University Matriculation Standard.

The gross expenditure on education of white and coloured scholars for the year 1936-37 was 926,022*l.*, with an additional 64,305*l.* for Native education. This sum does not include the cost of construction of educational buildings.

TRANSVAAL PROVINCE.

Situation Area and Population.

The Transvaal lies to the north of the Orange Free State Province and to the south of Rhodesia, being bounded on the west by the Province of the Cape of Good Hope, and by the Bechuanaland Protectorate, and to the east chiefly by the Portuguese possessions, but touching Natal Province at the south-east corner. Its limits stretch from 28·40 to 22 S. degrees of latitude and between 24·40 and 32·10 E. in longitude. The greater part lies high, seldom less than 4,000 feet above the sea.

Digitized by Google

The area of the Province is 110,450 square miles, divided into 41 districts. In 1921 the population was as follows:—Europeans 543,485 (284,388 males, 259,097 females); non-European 1,544,151 (875,042 males, 669,109 females); total, 2,087,636 (1,159,430 males, 928,206 females).

According to the Census of 1936, the population of the Province was: European males, 424,470, females, 396,286, total, 820,756; non-European males, 1,422,106, females, 1,098,608, persons, 2,520,714; total all races, males, 1,846,576, females, 1,494,894, persons, 3,341,470.

The largest town is Johannesburg, the mining centre of Witwatersrand goldfields, with a population (1936) of 519,384.

The 1936 Census showed the European population of Pretoria and Johannesburg to be:—

	Males.	Females.	Total.
Pretoria ...	40,003	... 36,932	... 76,935
Johannesburg	129,891	... 127,780	... 257,671

Churches, &c.	European. 1926.	Non-European. 1921.

Jews	38,802	4
Other Non-Christians ...	1,500	450,798
Others	4,365	14,048

History.

The first European settlers in the Transvaal Territory were emigrant Cape farmers. The original destination of these emigrants was Natal, but upon the annexation of Natal to the English Crown most of them left the new district, and turning back over the Drakensberg went, some to the Orange River Territory, and others to the country beyond the Vaal. In 1848 British sovereignty was extended over the Orange River Territory, but no attempt was made by the British Government to exercise authority over its unwilling subjects beyond the Vaal, and in January, 1852, a treaty was made with them, containing a promise that they would not be interfered with in the management of their own affairs. This treaty is known as the Sand River Convention. The emigrants at the time formed three independent communities, which did not unite until 1858, when they adopted for themselves the name of the South African Republic. After fifteen years of somewhat chequered history, the people of the Transvaal elected as President the Rev. Thomas Burgers, a clergyman of the Dutch Reformed Church, from the Cape Colony, and high hopes were entertained by many for the future of the Republic under his guidance. These hopes were not fulfilled. Misfortunes followed one another in rapid succession, and only ended with the collapse of the Government, and the extinction of the Republic.

The President early conceived the project of a railway to be made from Delagoa Bay into the Republic, to carry its produce profitably to the sea; and to promote this project he visited Europe in 1875, concluded a treaty with Portugal, and essayed to launch a loan of 300,000*l.* in Amsterdam, of which, however, only about 74,000*l.* was subscribed. This money he spent in buying plant for the proposed railway. In the meantime the Provisional government of the Republic had drifted into a dispute with the Zulu King, Cetshwayo, touching the boundary of Utrecht Province; and on his return the President himself engaged, first in a dispute with, and then in actual military operations against, Sikukuni, a Bechuana chief, living on the north-east of the Republic, whose country was claimed under an ambiguous and not very intelligible treaty in the Dutch language, to which some Boers had obtained the assent of Sikukuni's father in the year 1857. The operations against Sikukuni, which were upon a large scale, looking to the resources of the Republic, and were directed in person by the President, ended in failure. The Republican field army melted away; a guerilla war, however, was continued by a small mercenary force, until a peace was concluded early in 1877. In the meantime the defeat of the Boers by an insignificant tribe of an unwarlike branch of the native race, and their inability to repair the disaster, were producing alarming excitement in the native mind, and the peace of South Africa being deemed to be in evident danger, Her Majesty's Government despatched Sir Theophilus Shepstone, who happened to be in London at the time, to South Africa, as a Special Commissioner from Her Majesty, to watch events, and take such action as might be necessary to secure the general peace. When Sir Theophilus Shepstone arrived in the Transvaal, he considered on a review of all the circumstances that no other course was open to him than to proclaim the Queen's sovereignty. This he did on the 12th of April by a proclamation which was approved by Her Majesty's Government.

The annexation of the Transvaal was effected without the aid of physical force. Sir T. Shepstone at the time had with him but a few mounted policemen; and Her Majesty's troops did not arrive in the province for some time after the English Government had been set up, with the apparent acquiescence of its people. But subsequently hostile feelings towards the annexation were widely manifested, and two deputations were sent to England after annexation, to represent those who were opposed to that measure and desired a withdrawal of the British Government. In each case the answer of Her late Majesty's Government was a decided refusal.

In December, 1880, a majority of the Boers took up arms against the Government, and hoisted the flag of the South African Republic at Heidelberg. The towns held by Imperial troops were immediately invested, and a detachment of the 94th Regiment, which was being withdrawn from Lydenburg to Pretoria, to strengthen the force at headquarters, was surprised, and after suffering very heavy loss, compelled to surrender.

The towns, however, held out, and Sir G. Pomeroy Colley, without waiting for reinforcements, collected the small force at his disposal and advanced from Pietermaritzburg in Natal to relieve them. A large force of Boers successfully opposed his entry into the Transvaal at Laing's Nek, the path across the Drakensberg mountains and they followed up this advantage by cutting off Sir G. Colley's communications with Newcastle, with a view to preventing the arrival of reinforcements. To re-open his communications he crossed the Ingogo River on the morning of the 8th of February, and was immediately attacked by the Boers. The action continued all day; at nightfall the Boers drew off, and the English forces returned to their camp.

Digitized by Google

In the meantime strenuous efforts were being made by President Brand, of the Orange Free State, to bring about an understanding, and in reply to the appeal which he made to Her Majesty's Government, they declared that if the Boers would desist from armed opposition to the English troops, a scheme would be framed for the permanent friendly settlement of all difficulties. This message was forwarded to the Boers on the 21st of February in a letter addressed to Mr. Paul Kruger, one of their leaders, by General Colley, and an answer was required within forty-eight hours. Mr. Kruger was away at Rustenburg, and the letter was sent unopened to the headquarters of the Boers at Heidelberg. Dr. Bok, who was acting as State Secretary, sent it on to Mr. Kruger, and replied to General Colley that no definite answer could be given to the message from Her Majesty's Government until Mr. Kruger's views were known. Dr. Bok's message did not reach the camp at Laing's Nek till the 1st of March. On the night of the 26th of February, General Colley, having received no reply to his message, moved out with three hundred and fifty men, and took possession of the summit of the Majuba Mountain, a spur of the Drakensberg, commanding the Boer camp at Laing's Nek. The Boers attacked the mountain next day, and carried it by storm, with little loss, while only about one-fifth of the defenders escaped, the rest being killed, wounded, or taken prisoners. Sir G. Pomeroy Colley himself was killed.

The command now devolved on Sir E. Wood, who was at Pietermaritzburg organising the advance of the reinforcements, and, at the instance of President Brand, an interview took place on the 6th of March between him and General Joubert, who was in command of the Boers at Laing's Nek, which resulted in the conclusion of an armistice, and on the 21st of March a preliminary agreement for peace was signed. The terms of the agreement were that Her Majesty's Government should allow the Transvaal self-government as regards its own interior affairs; that the control and management of the foreign relations of the State should be reserved to Her Majesty as suzerain; and that the Government of the Transvaal should recognise a British Resident. The functions of this officer, and the provisions for the protection of the interests of the native population, were to be determined by Her Majesty's Government on the recommendation of a Royal Commission.

As a result of the Commission's recommendations a Convention was framed embodying the terms of the peace agreement, assigning the boundaries of the State, defining the functions of the Resident as analogous to those of a consul-general and chargé d'affaires, and conferring upon him extensive powers for the protection of the interests of the natives in the Transvaal. He also formed the medium of communication between the Government of the Transvaal and the native States on its borders. Stipulations were made for the repayment of the sums advanced by Her Majesty's Government in aid of the revenue of the Transvaal during the occupation; and a sub-commission, composed of the two judges of the High Court and Mr. Hudson, the British Resident, was appointed to consider claims for compensation for losses sustained during the hostilities.

The Convention was signed on the 3rd of August, and on the 8th of that month the Government was handed over to the representatives of the Boers. The Convention was finally ratified by a duly-elected Volksraad on the 25th of October.

By a further Convention of 1884, signed at London, fresh articles were substituted for the articles of the Pretoria Convention, a point which, as the reservation of suzerainty and grant of self-government to the Transvaal State both occur in the "preamble," or introduction of the Pretoria Convention, became of importance in the subsequent controversy regarding the status of the South African Republic, as the Transvaal State was now called.

The new Convention provided for the extension of the boundary of the Republic on the south-west, and abolished the British Resident and all direct control over native affairs, the Republic being bound, however, by Articles VIII. and XIX., to abstain from slavery and fulfil certain pledges made to the natives in 1881.

The concession of a larger degree of independence did not, however, prevent further trouble in Bechuanaland, while in Zululand adventurers from the Transvaal succeeded, by interfering in native disputes, in acquiring a large part of the country, where they formed a new State called the New Republic, the incorporation of which in the South African Republic was ultimately allowed by Her Majesty's Government in 1888. A trek to the north into Rhodesia in 1890 was only prevented with difficulty; while the efforts of the Government of the Republic to extend its influence in Swaziland resulted in 1894 in the recognition by Her Majesty's Government of its protectorate over that country.

The Transvaal, which had been bankrupt in 1877, when it was annexed, remained for some years after the retrocession in great financial difficulties. From these, however, it was not only saved, but raised to an unprecedented height of prosperity by the development by immigrants, chiefly British subjects, of the gold industry on the Witwatersrand, which began to grow soon after the signature of the London Convention. The progress achieved is clearly reflected in the fact that the revenue of the Republic, which, in 1885, amounted to 177,877*l.*, had risen in 1890 to 1,229,061*l.*, reaching 3,329,958*l.* in 1898. The Republic, fearing that the newly-acquired independence would be jeopardised by the influx of the newcomers, adopted a repressive policy towards them. From 1890 to 1894 legislation was passed restricting the grant of the franchise, which at the time of the Pretoria Convention had been open to all settlers after a year's residence, and since 1882, after five years' residence, until it became practically unattainable to the ordinary immigrants. At the same time the abuses of the Administration, among which the Uitlander population especially reckoned the grant of concessions and monopolies, and against one of which, the dynamite monopoly, Her Majesty's Government entered in 1899 a special protest, created much discontent among the new population.

In 1894 the discontent assumed a threatening aspect, owing to the commandeering of British subjects to fight in a native war, but this question was arranged by the High Commissioner, Lord Loch, who visited Pretoria at that time; other questions, however, remained unsettled. In 1895 the action of the Government of the South African Republic in closing the drifts by which trade entered the Transvaal from the Cape, brought the Republic to the verge of war with Great Britain. Towards the end of 1895, a revolutionary movement was set on foot in Johannesburg. On the 29th of December, however, Dr. Jameson crossed the border of the Transvaal

Digitized by Google

on his disastrous raid, and was defeated, and surrendered at Krugersdorp on the 2nd January, 1896. The High Commissioner, Sir Hercules Robinson, hurried to Pretoria, and by his intermediation Johannesburg laid down its arms.

President Kruger, at the time of the raid, had issued Proclamations promising to consider the redress of grievances, and laying down the principle, "Forget and Forgive." Little result, however, beyond the erection of an unsatisfactory municipality, followed his promises of reform; while the action of the Government of the Republic in disregarding the London Convention gave rise to questions with Her Majesty's Government. In addition to infringing Art. IV., the Republic passed in 1896 an Aliens' Immigration Restriction Law, which Her Majesty's Government contended was in violation of Art. XIV., and the law was repealed next year.

In 1897 the Government, in consequence of the complaints of the mining industry, appointed a commission of inquiry, whose report showed clearly the existence of very serious maladministration. Little or no reform, however, resulted.

The dissatisfaction which the Uitlanders manifested with the treatment which they received was brought to a high pitch by the shooting of an Englishman by a policeman at Johannesburg on the 18th of December, 1898, and the action of the authorities in the matter, followed by the acquittal of the accused, aroused great excitement on the Rand—and, indeed, throughout the English-speaking part of South Africa. A petition, signed by 21,000 British subjects, calling attention to the grievances of the Uitlanders, and asking for the protection of Her Majesty's Government, was addressed to the Queen in March, 1899. The Government of the South African Republic at this time appeared to recognise the need for reform by proposing some slight alterations in the franchise law, but their negotiations, conducted with some of the leaders of the mining industry, broke down because the latter insisted that the Uitlander population generally must be consulted, and the Government repudiated responsibility for their negotiators. Her Majesty's Government, in a despatch dated 10th May, represented the grievances of the Uitlanders to the Government of the South African Republic, and urged that they should be redressed, proposing a conference between the High Commissioner and the President. Before, however, the despatch was presented, Sir A. Milner, on the invitation of the President of the Orange Free State, met President Kruger at Bloemfontein on the 31st of May, and proposed the grant of the franchise to the Uitlanders to relieve the situation. The proposals of the President were quite inadequate for the purpose of giving any substantial and immediate representation, and the Conference broke up.

After successive proposals, and after Her Majesty's Government had asked that, if these proposals were to form any element in the settlement of differences between the two Governments, full particulars might be furnished, a franchise law, giving a seven years' retrospective franchise, was passed by the Volksraad without reference to Her Majesty's Government, and came into operation on 26th July. This law was an improvement on any previous proposal, but there was good ground for doubting whether it did not contain many provisions which would render it illusory in actual practice, and Her Majesty's Government, therefore, proposed a joint inquiry as to whether it would give "immediate and substantial representation." However, the Government of the Republic were extremely unwilling to accept the joint inquiry, and an alternative proposal for a five years' franchise was made by the State Attorney, Mr. Smuts, to Her Majesty's Agent, on three assumptions. These assumptions were (1) that Her Majesty's Government would not in future interfere in the internal affairs of the Republic; (2) that Her Majesty's Government would not insist further upon the assertion of suzerainty, the controversy being allowed tacitly to drop (this point had acquired special importance since the South African Republic, on the 9th May, had claimed the status of a sovereign international state); (3) that arbitration without a foreign element should be conceded.

The proposal was put forward in writing by the Republic and the three "assumptions" were put forward as express conditions. To these notes Her Majesty's Government replied, that they could not bind themselves never to intervene again, but they expressed the hope that further intervention would be unnecessary if the franchise was granted. As to suzerainty they referred to their despatch in which they had intimated their refusal to continue the discussion; and as to arbitration, they agreed to discuss the form of a tribunal. The South African Republic thereupon withdrew their five years' offer, and officially declared their objections to the joint inquiry, which they represented was an interference with the independence of the country. Her Majesty's Government then (8th September) being convinced by accumulating evidence of the unworkable character of the law which had been passed, while maintaining their position as regards interference and suzerainty, declared that they would be satisfied with a franchise on the five years basis if shown by an inquiry, either unilateral or joint, not to be encumbered with impossible conditions. If this was accepted they were ready to have a conference about arbitration, etc., but, failing acceptance, they would have to formulate their own proposals for a final settlement. To this the Government of the Republic replied by maintaining their withdrawal of the five years' franchise unless accepted with the conditions above stated, and called on Her Majesty's Government to revert to the proposal for a Joint Commission on the seven years' franchise. On the 22nd of September Her Majesty's Government repeated their views, and stated that their own proposals for a settlement would be formulated later.

After some correspondence between the President of the Orange Free State and the High Commissioner, in which the High Commissioner, as late as the 5th of October, said that any definite proposal would still be considered, the South African Republic, without waiting for Her Majesty's Government to formulate their proposals, handed to the British Agent an ultimatum, dated 9th October, requiring the instant withdrawal of British troops on the borders of the Republic, and the removal of all reinforcements which had arrived in South Africa since the 1st of June, and demanding an answer by five o'clock on the 11th of October. It was deemed impossible by Her Majesty's Government to discuss such a demand, and war broke out accordingly. The Orange Free State, in pursuance of a resolution passed on the 27th of September, threw in its lot with the Transvaal.

On the outbreak of war, the Boers immediately invaded British territory to the south-east and west of the Republics. The operations on the

Digitized by Google

western side were chiefly concerned with the investment of Mafeking and Kimberley. Meantime the main body of the Boers invaded Natal under General Joubert. The first considerable engagement of the war occurred at Dundee on the 20th of October, where General Symons attacked and repulsed a Boer commando. On the 21st of October the British army at Ladysmith attacked a Boer commando at Elandslaagte, and inflicted a severe defeat. On the 30th Sir G. White made a reconnaissance from Ladysmith, and during the engagement which then took place two battalions and a mountain battery were cut off and captured by the Boers. Ladysmith was then surrounded by the Boers and communication cut. On the 3rd of November Colenso was evacuated, and the garrison there fell back on Estcourt.

Meanwhile troops were on the way from England. The Governments of Canada and of all the Australian Colonies offered the services of contingents, and the offer was gratefully accepted; the despatch of troops from the different colonies was rapidly organised, and they left amidst enthusiastic demonstrations of loyalty. Offers of troops were also made by several of the Crown Colonies, and by the Federated Malay States, and contingents of mounted Volunteers were accepted from India and Ceylon.

As the troops from England arrived, a move forward was made in two directions. A Natal relief column prepared for an advance to the relief of Ladysmith. Sir Redvers Buller, who was in chief command of the British forces, left Capetown for Natal to direct the general plan of advance, and by the end of November the British forces had arrived near Colenso. On December 15th, Sir R. Buller made an attack on the enemy and attempted to cross the Tugela at Colenso, but he had to retire to his camp at Chieveley after suffering severely in casualties and abandoning a large number of guns. On the western side a force under Lord Methuen pushed up along the railway to the relief of Kimberley. On the 23rd of November he attacked the Boers at Belmont and dispersed them. Two days later he pushed aside a further force at Enslin, and on the 28th November he forced a large body of the enemy to evacuate a strong position at the Modder River. On December 11th he attacked the enemy at Magersfontein, but was unsuccessful in carrying the position, and fell back on the Modder River.

The northern borders of Cape Colony, where there were a few British garrisons, were invaded by parties of Orange Free State Boers, with the apparent object of gaining recruits from the Dutch residents in the Colony, in which they were partially successful. General Gatacre, on his arrival, took command of the British troops in these districts. His first important action took place on the 10th of December, when he was unsuccessful in a night attack on Stormberg.

On the receipt of news of the capture of the battalions at Ladysmith orders were at once given for the despatch of further reinforcements from England. The repulses experienced early in December made it necessary to take further measures. On the 7th of the month it was announced that Field-Marshal Lord Roberts would go out to take supreme command at the Cape, leaving Sir R. Buller to confine his attention to the operations in Natal; Lord Kitchener was appointed Chief of the Staff to Lord Roberts. Large reinforcements were ordered out from England, and further help offered by Australia and Canada was gladly accepted.

Lord Roberts reached Modder River on 9th February, 1900, and General French relieved Kimberley on the 16th. General Cronjé was caught up and surrendered with all his force on the 27th. Ladysmith, after two unsuccessful attempts, was relieved by General Buller on the 28th of the same month. Lord Roberts reached Bloemfontein on the 13th of March, and Pretoria on the 5th of June.

The Transvaal was annexed to Her Majesty's dominions Lord Roberts becoming Administrator, in which office he was succeeded on his departure from South Africa at the end of the year by Sir Alfred Milner. Sir A. Milner (afterwards Lord Milner) was selected for the post of Governor of the Transvaal and of the Orange River Colony, an office which he combined with that of High Commissioner for South Africa.

The Transvaal Colony remained the scene of military operations till May, 1902, when on the last day of that month Articles of Peace were signed at Pretoria.

Prior to this, the Civil Administration was partly organised on a provisional basis, resident magistrates and district Commissioners having been appointed in many districts. Numerous proclamations were issued to provide for administrative requirements, and amongst those issued in 1902 may be mentioned those making provision for the acquisition of lands for public purposes (Proclamation 7), placing subsidised schools under the control of the Director of Education (9), amending the law relating to the registration of deeds (10), levying a tax of 10 per cent. on the annual net produce of gold-bearing produce (34), regulating the registration of mining rights (35, amended by Ordinance 6 of 1902), and several relating to the administration of justice. On the 21st of June, 1902, Letters Patent were published constituting the Government of the Transvaal, and providing for an Executive and a Legislative Council, the members of which are to be appointed by the Crown; the subsequent legislation being accordingly by Ordinance.

On the 31st March, 1905, Letters Patent were passed providing for the constitution of a Legislative Assembly to consist of the Lieut.-Governor and not less than six or more than nine official members, and (provisionally) not less than thirty or more than thirty-five elected members. But in December, 1906, this Constitution was revoked and a new one substituted.

On 6th December, 1906, Letters Patent were issued conferring full responsible government upon the Transvaal. The legislature consisted of two chambers, the Legislative Council and the Legislative Assembly, the former containing fifteen members and the latter sixty-nine.

The Transvaal was included as an original Province of the Union of South Africa in terms of the South Africa Act, 1909, which came into operation on the 31st May, 1910, and is now governed under that Act. Apart from the general control of the Parliament of the Union, the control of certain matters specified in the South Africa Act is vested in an Administrator and Provincial Council.

Municipal Government.

Municipal Government was established in the principal towns of the Province by Ordinances enacted in 1903. These Ordinances were subsequently extended and amended, and were during the 1926, 1927, 1928, 1930, 1931, 1932, 1933, 1934, 1935, 1936 and 1937 sessions of the Provincial Council consolidated and further amended so as to give local authorities more extensive powers,

Digitized by Google

principally in regard to matters affecting the public health, although other important amendments, e.g., the basis of the municipal franchise, and the principle of councillors contracting with Councils, were incorporated in the consolidating and amending Ordinances. Three Ordinances were enacted dealing with:

(a) the constitution of Local Authorities, i.e., Town and Village Councils and Health Committees, and the powers and duties of such bodies (Ordinance No. 11 of 1926);

(b) the election of councillors (Ordinance No. 4 of 1927), and

(c) the levying of assessment rates (Ordinance No. 20 of 1933).

During 1928 the Johannesburg Town Council was made a City Council (Ordinance No. 15 of 1928) and during 1931 the Pretoria Town Council was made a City Council (Ordinance No. 5 of 1931).

Under these Ordinances, as under previous legislation, the Provincial Administration retains some measures of control over the government of Municipalities, limited, however, to powers of audit and surcharge, the approval of loan proposals, local improvement schemes, the approval of by-laws and the alienation of Municipal property. There are now 62 Municipalities (2 City Councils, 30 Town Councils and 30 Village Councils) in the Province and considerable progress in the improvement of the towns has been made since the inauguration of local self-government.

In areas under the jurisdiction of City and Town Councils the Municipal franchise under the Ordinance is extended to all white persons, males or females of the age of 21 years and upwards being British subjects who have resided within the Municipality for a period of six months immediately preceding the compilation of the voters' roll, or who are the owners of rateable property in the municipality.

Any person, male or female, qualified to be registered as a voter is eligible to be elected a Councillor.

In areas under the jurisdiction of village Councils the qualification of voters and Councillors is the same as that for City and Town Councils.

In all municipal areas elections are by ballot, a more simple form of procedure being followed in the case of Village Councils than with City and Town Councils.

Provision is made in the Local Government Ordinance of 1926 for the constitution of Health Committees, of which there are 39 in the province. These are minor local authorities constituted for townships or areas where the density of population makes it necessary for sanitary measures to be enforced. They have rating powers under Ordinance No. 20 of 1933 and regulations conferring other powers are made by the Administrator.

Education (June, 1937).

	Schools.	Final Enrolment.	Average Enrolment.	Average Attendance.
1. High Schools ...	40	14,468	14,562	13,689
2. Primary Schools (incl. Secondary Depts. at Primary Schools):

(2) Aided Schools for Coloured and Asiatic Children	3	270	273	250
Total ...	1,145	162,044	162,661	151,089

In June, 1937, the 4 Normal Colleges had 894 students. There were 815 state-aided native schools, with 106,035 scholars and one Government Native School with 1,243 scholars.

Education in Government Schools, both primary and secondary, is free.

SOUTH WEST AFRICA AND WALVIS BAY.

Area and Boundaries.

The Territory of South West Africa embraces an area of 822,909 sq. kilometres (317,725 sq. miles) and the Territory of Walvis Bay, 969 sq. kilometres (374 sq. miles). Walvis Bay has been transferred for administrative purposes to the Administration of South West Africa.

The boundaries are as follows:—

South West Africa.

North. Angola and Northern Rhodesia.
East. Bechuanaland and Union of South Africa.
South. Union of South Africa.
West. Altantic Ocean and Walvis Bay.

Walvis Bay.

North, East, South } South West Africa.
West. Atlantic Ocean.

Formation.

South West Africa forms a portion of the main South African Plateau with its great interior basin the Kalahari. The Territory has a mean average height of approximately 3,600 feet above sea level, sloping gradually, especially on the eastern portion, from 2,500 feet in the south to 4,800 feet in the north interspersed with small mountain ranges, of which the Moltkeblick rises as high as 8,146 feet above sea level. The Brandberg, which is near the coast, and is the highest of these, has an elevation of 8,550 feet. The plateau, or interior upland is separated from the sea by a practically rainless desert, commonly called the Namib, which rises rapidly, but evenly, from the sea to the plateau, the average width being 100 kilometres (62 miles), attaining its greatest width towards the south, and its narrowest towards the north, the annual rainfall there being less than one inch. A good deal of the plateau in the south may be classed as semi-desert as the average annual rainfall is less than 10 inches, but in the north there is a marked improvement, the average rainfall in parts being over 20 inches. The edge of the South African Plateau is well defined in the north and south of South West Africa by broken ranges of mountains like the Kaokofeld, and Aus-Kubub Mountains (Huib Hochebene), but in the centre there is no defined escarpment. The plateau attains its greatest average elevation around Windhoek, which lies between the Khomas Hochland and the Auas Mountains. From there isolated eminences and ranges super-imposed on the main plateau extend in a northerly direction to the Kaokofeld Mountains. To the south the Highlands are succeeded at some little distance by the plateau and the tabletopped mountains of Great Namaqualand, eastward and north-east of these elevated tracts the upland assumes a very level character composed mostly of sand dune formation merging eventually into the sand-veld of the Kalahari.

Mountains.

The most mountainous section is the Windhoek district in which are the Khomas Hochland, a very rugged lofty tableland with a mean altitude of 6,000 feet rising in places to 6,700 feet above sea level; rugged ranges north-east of Windhoek of which the principal are the Onjati Mountains (6,457 feet); and to the south and south-east the Auas Mountains having a mean average elevation of approximately 6,700 feet, attaining their greatest altitude in the Moltkeblick peak (8,146 feet). In this section, which may be termed the watershed of South West Africa, the Kuiseb, the Fish, the Elephant, the Nosob, the Swakop, and the Auob rivers have their source.

With the exception of the Kaokofeld mountains, which form the edge of the plateau, the rest of the mountains are broken ranges and isolated eminences rising out of the Great Plateau. Among these are the Omatako (7,510 feet), Brandberg (8,550 feet), Erongo (7,277 feet), Chuos (4,446 feet), Naukluft (6,477 feet), Weissrand (3,800 feet), Tzaris (5,922 feet), Schwarzrand (5,889 feet), Tiras (6,126 feet), Huib Hochebene (5,490 feet), (Auas Kubub), Klein Karas (4,885 feet), Gross Karas (5,907 feet).

Rivers.

With the exception of the boundary rivers, the Kunene, Okavango Zambezi and Orange Rivers and the Kwando (or Mashi) in the Caprivi Zipfel, there are no perennial streams. There are, however, dry, sandy river beds, which flow after heavy rains, but except in very wet seasons few of these flow for any considerable distance. The Swakop, the Kuiseb and the Omaruru reach the sea perhaps once in five years or at even longer intervals. These river beds have the appearance of having been blocked up by loose sand under which the water percolates and eventually reaches the sea. By sinking shallow wells in them plentiful supplies of fresh water are obtained, a good illustration of this is at Rooibank near the mouth of the Kuiseb and at Goanikontes near the mouth of the Swakop. The principal of these intermittent rivers are:—The White Nosob, the Black Nosob, the Vereinigte Nosob, the Auob, the Elephant, flowing east and south-east, the Fish, flowing south, and the Kuiseb, the Swakop, the Omaruru, the Ugab, flowing west.

Ocean Currents.

The coast is swept by the cold Benguella current, which originates in the Antarctic Ocean and flows along the western coast of South Africa as far as the mouth of the Congo. There can be no doubt that the arid character of the Namib is due primarily to the influence of this current.

Digitized by Google

Pans.

Very characteristic of the northern and eastern section of the Territory are the peculiar shallow depressions without any outlet, commonly known as pans, which range in diameter up to a couple of miles. They can, according to the water contained in them, be classified as fresh pans, brack pans and salt pans. The surface of the salt pans, such as the salt pans at Aminuis, and west of the Etosha pan, during the dry season become covered with a dazzling white crust composed chiefly of common salt. The Etosha pan can hardly be classified amongst these pans as it covers an area of approximately 3,636 sq. kilometres (1,404 sq. miles). In the winter it is dry, but during the summer months it is covered by a shallow sheet of water, which varies according to the rainfall and the amount of water flowing into it.

Vegetation.

Namib. Along the sea coast there is no vegetation whatsoever; from about 25 miles inland the landscape is characterized by such plants as the milk bush (Euphorbia) and Cacti; towards the east, in years of abundant rainfall, it is fairly well grassed. In the river beds trees and rich verdure are found, such as various acacias, etc., the principal of which are the Kameeldoorn (Acacia Giraffae) and the Ana (Acacia Albida).

South. In the extreme south for a considerable distance semi-desert conditions prevail, consisting of an arid stony plateau and plains supporting edible shrubs and a sparse growth of grass. In heavy rainy seasons, however, nutritious grasses and flowers spring up everywhere. The river courses as in the Namib are clothed with trees. The most widely distributed plants are the milk bush, the Ganna bush (Salsola Aphylla), the three thorn bush (Rhigozum Trichotumum) and the Noonie bush (Boscia Foetida). The principal trees are the Camel-thorn (Acacia Giraffae) and the Koker-boom (Aloe Dichotoma).

Centre. From the southern portion northwards, the veld assumes the characteristics of the Karroo until Rehoboth is reached, when it changes into a park-like grass country studded with large thorn trees, and is especially well timbered along the water courses. From the mountainous portion of the Windhoek district northwards towards Omaruru, the country is covered with level bush with an undergrowth of very nutritious grass, the valleys and water courses being well timbered with mostly acacia trees especially the Kameeldoorn (Acacia Giraffae).

North. Towards the north the bush becomes denser. It is traversed in its most northern section by belts of open Mopane forests and towards the Okavango it is covered by fertile tropical vegetation.

East. In the southern portion of the eastern section the vegetation is karroo bush, intermixed with grass, the valleys being covered with thorn bush. Towards the centre trees become more numerous and the dunes themselves are covered with thorn bush, large acacia trees, and good grass. From Rehoboth northwards the whole is well timbered and merges into thick tropical vegetation.

Government and Administration.

Early in the late war the country was invaded by the Military Forces of the Union, and on the 9th July, 1915, was surrendered to them at Khorab. It is now administered by the Union under a Mandate from the League of Nations dated 17th December, 1920.

In terms of the Mandate, military training of the natives, except for police or defence purposes, is forbidden, and no naval or military fortifications may be established.

The supply of intoxicating liquor (except, in certain circumstances, kaffir beer) to the natives is prohibited, as also is any system of forced labour.

The administration of the country is conducted from central offices situated at Windhoek, and the country is divided into 17 districts, controlled by magistrates. This excludes Ovamboland in the extreme north which contains the bulk of the native population and is administered by Native Affairs officials.

There is also a Native Affairs official stationed at Runtu who controls the native tribes on the Okavango River. A police officer is stationed in the Eastern Caprivi Zipfel.

Windhoek, the Capital, is pleasantly situated at an altitude of 5,600 ft., in the centre of the Territory. The town has a population of 4,812 Europeans and 5,839 non-Europeans, and, with its surrounding district, contains a population of 6,042 Europeans and 14,377 non-Europeans.

Previous to 1920 German Imperial and Local Laws were in force. On the 1st January, 1920, however, the Roman Dutch Law became the Common Law of the country.

By Act No. 42 of 1925, the Union Parliament made provision for the grant of representative institutions to the European inhabitants of the Mandated Territory. Under this Act, an Executive Committee, Advisory Council, and Legislative Assembly are constituted: the Assembly to consist of 18 members, of whom 6 are to be appointed by the Administrator and the remainder to be directly elected. Every male European is qualified to be registered as a voter provided that he is not less than 21 years of age, is a British subject, and has been resident in the Territory for 12 months. In terms of Act No. 38 of 1931, which amends Act No. 42 of 1925 in certain respects, general elections are to be held at intervals not longer than every five years. The Advisory Council is to consist of 8 members, viz.: the Administrator as Chairman, the other members of the Executive Committee, and 3 members nominated by the Administrator, one of whom shall be selected mainly on the ground of his knowledge of the wishes of the non-European races in the Territory. The Executive Committee is to consist of the Administrator and four persons chosen by the Assembly from among its own members or otherwise.

The Assembly is vested with the power to make Ordinances for the Territory except on certain subjects which are reserved: the latter include native affairs, immigration, customs tariffs, currency and banking, and other subjects, though they may by resolution recommend that legislation be enacted on any of such matters. The function of the Advisory Council includes advising the Administrator in regard to the reserved subjects, and in regard to assenting to the Ordinances which the Assembly has passed.

The present Administrator is Dr. D. G. Conradie, who was a Member of the Union House of Assembly from 1929 to 1933, and succeeded Mr. A. J. Werth, as Administrator in April, 1933.

The chief executive officer for the country is the Secretary for South West Africa, Mr. F. P. Courtney Clarke. The official languages of the Territory are English and Afrikaans. For the convenience of the older section of the population the

Digitized by Google

German language is recognized for purposes of official correspondence.

Population.

The European population, according to the figures of the 1921 census, was 19,432, and the native population about 218,000. As large areas of the country, particularly along the coast and in the North, are uncivilised, it has been impossible to procure precise figures. In particular it has been difficult to estimate the numbers of the Bushmen, who still exist in considerable tribes in the North-Eastern portion of the country.

It is estimated that of the 19,432 European inhabitants in 1921 some 7,850 were Germans. The remainder were almost all South Africans, and farmers by occupation.

According to the census, the population of the Territory in 1936 was: European males, 16,564; females, 14,113; persons, 30,677; non-European males, 160,899; females, 166,211; persons, 327,110. Total all races, 357,787.

The principal native races of South West Africa are the Ovambos, Hereros, Bergdamaras or Klipkaffirs, Hottentots, and Bushmen.

The Ovambos are a Bantu race, and follow agriculture as a pursuit. They still possess to its full extent tribal organisation, but have given practically no trouble since the Union occupation of the country. The Germans in pre-war times exercised no authority whatever over them, and never entered their territory.

The Hereros are a pastoral people who formerly owned enormous herds of cattle. The Germans in dealing with these people pursued a policy of oppression, with the result that in 1904 they rebelled, and 75 per cent. of them were destroyed. Their tribal organisation has completely disappeared, and they are now scattered throughout the country on farms and in the different towns, where they form the ordinary source of labour.

Owing to the fact that formerly tribal organisation was based on the ownership of cattle, and that they have consequently for generations been familiar with cattle and their ways, the Herero makes an excellent herd. It is not an unusual thing for a member of this race to have charge of, say, 3,000 head, and to know each one individually.

Since the Union occupation of the country reserves have been set aside for the Hereros, who have increased considerably in numbers and in animal wealth.

The Bergdamaras are, it is believed, also of Bantu origin, though some authorities hold that they belong rather to the Hottentot race, whose language they now speak. They are an inferior tribe, and were alternatively the slaves of the Hereros and the Hottentots in pre-European days, as the former or the latter prevailed in the constant struggles that were going on between them.

The Hottentots, so called, consist of two distinct sections, one of which, whose remnants are found in the central portions of the country, is of pure native extraction, the source of which is but little understood, while the other is composed of tribes which have resulted from an admixture of European blood in the Cape with the Hottentot races residing there a couple of centuries ago, and which after conflict with their European neighbours sought refuge across the Orange river in this country.

The Bushmen are the oldest inhabitants of South West Africa, and are to be found in considerable numbers in its eastern portion from Lat. 26° right away to the Northern boundary. There are also remnants of a bushmen tribe in the desert wastes just north of the Orange River and in the Kaokofeld, in the North North-Western portion of the country. These may be of the "Strandlooper" type.

Situated in the centre of the country just South of the Windhoek District is the Bastard Gebiet, occupied by a semi-independent race known as the Bastards, whose origin is much the same as the second class of Hottentots mentioned above, with the difference that the admixture of European blood is much greater, and that their ordinary language is Cape Dutch. The estimated number of Bastards in the Gebiet is 7,538. These people used to control their own affairs to a very large extent, and were governed by a Raad (Council) which is partly hereditary and partly elected. The Administration is represented by a magistrate, who assists them with advice, and takes cognisance of serious crimes. But in 1924 owing to political dissension a deadlock was reached. The Administration, therefore, by Proclamation declared that the Raad ceased to function and vested all its powers and duties in the Magistrate.

Education.

(European.) There were in 1937 60 schools under the Administration with an enrolment of 5,162 pupils. In addition there were 26 registered private schools with an enrolment of 790 pupils. Hostels are conducted by the Administration in conjunction with 38 of the government schools. In view of the scattered nature of the population it is difficult and expensive to bring a sufficient number of children together to establish a Government school. The Administration therefore pays capitation grants for pupils attending approved private schools in localities where no provision for education exists.

(Coloured.) The Coloured people (people of mixed European and native parentage) are provided for in 12 schools with an enrolment of 821 scholars. One Government Native School has been established.

(Native.) The education of the natives is mainly under the direct supervision of the various Missions. In Ovamboland it is mainly in the hands of the Finnish Mission, whilst the Rhenish and Catholic Missions operate in Namaland and Damaraland. The Wesleyan and the Anglican Churches are also taking an active interest in this work. There are 71 government-aided mission schools with an enrolment of 4,036 pupils. In addition there are mission schools in different parts of the country that have not yet qualified for government aid. There are two training schools for native teachers. Both are subsidized by the Administration. The one at Okahandja is under the ægis of the Rhenish Mission and the one at Döbra under the Catholic Mission.

Religious Organizations.

Mission and other religious activities are being carried on within the Territory by various organizations, such as the Dutch Reformed Church, Church of England, Wesleyan Methodist Church, Finnish Mission, Roman Catholic Church, German Lutheran Church, Rhenish Mission, etc.

Finance.

For the financial year 1937–38 the revenue amounted to 1,013,412*l.* and the expenditure to 754,604*l.*, of which 56,958*l.* is loan expenditure. The estimates for the year 1938–39 were Revenue 704,000*l.* and Expenditure 794,223*l.*

Customs.

For the purposes of customs and excise revenue this territory is included in the customs union.

Digitized by Google

All customs and excise collections are paid over to the Union consolidated revenue fund and a lump sum based on the customs and excise duties on goods consumed in this territory after deducting a sum equivalent to the said duties in goods removed from this territory for consumption in the Union, is paid over to this Administration. The total annual revenue is approximately 200,000*l.*

Trade (South West Africa).

The figures of Imports and Exports (including ships stores and specie) for the five years ending 1937, are as follows :—

Year.	Imports.	Exports.
	£	£
1933*	1,049,628	1,474,186
1934*	1,261,865	1,154,400
1935*	1,498,741	2,535,936
1936*	1,959,864	3,125,344
1937*	2,420,766	3,706,206

* Includes premium on gold specie.

Mineral Production.

The development of the mineral industry has come about largely within the past 25 years, and the territory may be said to be well mineralised, but chiefly owing to natural drawbacks, such as scarcity of water and fuel, distance from rail, etc., sufficient useful exploratory work has not been done in many parts to permit of any definite assessment of future production. During the calendar year 1935, minerals constituted 33·8% of the total value of exports from the Territory.

Diamonds, which constitute the principal mineral product, are recovered from alluvial sources on a 300 mile stretch along the coast line from the Orange River northward. The industry has been placed on a sound footing and large sums have been invested in up-to-date plant, etc. Production and export must, to some extent, of necessity, vary with the requirements of the market.

Export of diamonds in 1937 :—184,863.50 carats, valued at 1,100,492*l.*

Next in importance are Copper-lead ore, Vanadium and Tin. Output and export have in like manner varied with market conditions.

Value of export of Copper, Vanadium, and Tin in 1937 :—Copper-lead ore, 213,619*l.* Vanadium (as concentrates), 199,017*l.*; Tin (as concentrates), 36,482*l.*

Stock and Agriculture.

Rainfall varies from 25 inches in the north to three inches in the south, and it is, therefore, only in the former area that agriculture is practised to any extent. Here crops are grown, the chief of which is maize.

As regards stock farming, speaking generally the southern portion of the Territory is suitable for small stock farming, the middle and southern north for large and small stock, and the north for large stock and dairying.

As regards large stock, the "semi-ranching" or as it is also known "dairy ranching" system would appear to be the most suitable outside of the northern area. The principle of this system is the taking of a limited quantity of milk from the cow with the idea of getting a certain amount of revenue for current expenses, but leaving at the same time a supply sufficient to ensure the development of the calf into a good slaughter animal.

As regards small stock, sheep are bred for the production of mutton (Blackhead Persian and Afrikander), wool (Merinos), and pelts (Karakuls). All these breeds do well in this Territory, whilst as regards the Karakul a pelt is produced which gives a high-class "astrakan."

The 1937 census return shews the following numbers of live stock :—

Karakul Sheep (Purebred)	25,074
Karakul Sheep (Grade)	1,880,932
Woolled Sheep	111,824
Blackhead Persian	82,771
Crossbred and others	797,190
Angora Goats	17,216
Other Goats	1,212,788
Cattle	706,667
Horses	25,447
Donkeys	88,051
Mules	1,050
Pigs	11,541

Owing to the financial depression it became necessary to suspend active land settlement operations in the territory over a period of years. Land settlement has now been resumed and some 200 farms have been advertised for allotment. Each lease issued to a settler runs for a period of five years and carries with it an option to purchase the holding at any time during that period, provided certain conditions have been complied with. On the option having been exercised the purchase price of the farm becomes payable over a period of 30 years in sixty half-yearly instalments. On the payment of the full purchase price of the farm, a Crown Grant or free title is issued, provided all the conditions under the lease have been complied with. When funds are available financial assistance for the purchase of stock and permanent improvements on settlers' holdings may be rendered.

Harbours.

Walvis Bay.—Prior to the 1914–18 war Swakopmund and Luderitz were used as ports of entry to the territory (now South West Africa Mandated Territory). After the military occupation, however, Swakopmund was abandoned in favour of Walvis Bay, which is a sheltered port, affording safe anchorage, and is connected by rail *via* Swakopmund with South West Africa and Union Stations. A new wharf and basin, together with a channel leading thereto, were completed in 1927. The wharf is 1,500 feet long with a depth alongside of 31 feet L.W.O.S.T., which depth extends for 100 feet into the basin. Electric cranes are installed on the wharf, also an adequate fresh water service. The basin is 2,150 feet long by 700 feet wide, with a depth of 30 feet L.W.O.S.T. A depth of 29 feet is maintained throughout the channel, which is 3,000 feet wide at the entrance, narrowing to 440 feet, and again widening as it approaches the basin to 1,200 feet. The South West Imperial Cold Storage Company, Ltd., has erected cold storage works and abattoirs alongside the new wharf.

Luderitz.—At Luderitz there are two jetties, one of reinforced concrete, 492 feet long, and the other of wood, 564 feet long. Two 7-ton steam and two 4-ton electric cranes are erected on the former. Conveyance of cargo to and from the shore is effected by lighters, of which there are seven of an aggregate capacity of 940 tons.

Railways.

The Mandated Territory is served by a main line connecting with the Union system at De Aar.

Digitized by Google

Branch lines extend from the main route, viz., Windhoek to Gobabis, Seeheim to Luderitz, and a narrow gauge system from Usakos to Tsumeb, Grootfontein and Outjo, the total mileage within South West Africa being 1,486 (1,133 standard gauge and 353 narrow gauge).

A comfortable mail train service, with sleeping accommodation and dining-car service, is run twice a week between the Union and South West Africa with connection to Luderitz, Gobabis, Tsumeb and Grootfontein, the duration of the journey between Windhoek and Cape Town and between Windhoek and Johannesburg being approximately 63 hours.

Cattle Industry.—The territory is essentially a stock-raising country, and to assist farmers livestock trains are run through from Windhoek to Upington (624 miles) and De Aar (882 miles) where the stock is detrained, fed, watered, and rested, and thereafter trucked to destination which is generally to Maitland for Cape Town or Newtown for Johannesburg.

Posts, Telegraphs and Telephones.—Excellent postal, telegraph and telephone services exist. Telegraphic communication beyond the borders of South West Africa is maintained via the Union of South Africa. The wireless telegraph station at Walvis Bay is equipped with the latest short and long wave transmission and receiving gear, capable of maintaining two-way communication between South African and European ports and ship stations en route.

The number of Post Offices is 101 and of Telegraph Offices 80. The number and value of money orders and postal orders issued and paid during 1936-37 was respectively :—

Money Orders	issued	43,793	value	193,686*l.*
„	„ paid	23,750	„	146,752*l.*
Postal	„ issued	114,088	„	50,898*l.*
„	„ paid	56,578	„	25,497*l.*

Savings Bank Accounts open at 31/3/38. numbered 11,410 and the balance due to depositors was 358,585*l.**

The postal, telegraph and telephone revenue amounted to 89,297*l.* and expenditure to 59,084*l.*

The names of the elected members of the Legislative Assembly (1938), together with the names of the electoral divisions which they represent, are given hereunder :—

Electoral Division.	*Name of Member.*
Gibeon	Cdt. J. C. Jooste.
Gobabis	L. C. F. Taljaard.
Grootfontein . . .	W. B. Volkmann.
Keetmanshoop . .	M. E. Oliff.
Luderitz	Dr. H. B. K. Hirsekorn.
Okahandja . . .	L. J. B. van Aardt.
Otjiwarongo . . .	Cdt. L. J. F. von Maltitz, M.C.
Stampriet. . . .	H. P. van der Westhuizen.
Swakopmund . .	J. D. Lardner Burke.
Warmbad. . . .	C. H. B. Oberholzer.
Windhoek Central .	N. C. Fraser.
Windhoek District .	Lt.-Col. J. L. Hamman, D.S.O.

The following persons have been appointed to be the nominated members of the Legislative Assembly :—

C. P. Bond, D. W. F. E. Ballot, Cdt. J. C. Balt, H. Hörlein, J. C. T. Meinert, T. F. L. Woker.

Clerk of the Assembly, K. W. Schreve.

* Savings Bank Certificates of a value of £50 are also issued. The balance due to holders as at 31/3/1938 amounted to 98,700*l.* with an accrued interest of 1,510*l.* at 31/3/1938.

Government Staff.

The following is a list of the principal Officers of the Administration :—

Administrator, Dr. The Hon. D. G. Conradie.
Secretary for South West Africa and Chief Native Commissioner, F. P. Courtney Clarke.
Asst. Secretary for South West Africa, J. Neser.
System Manager, South African Railways and Harbours, G. H. Dawson.
Medical Officer to the Administration, B. Viviers, M.B., Ch.B., B.A.O., D.P.H.
Surveyor-General, A. C. Parry.
Director of Posts and Telegraphs, W. W. Williams.
Director of Works, D. Holtzhausen.
Director of Education, W. Orban, M.A.
Registrar of Deeds, H. W. S. Birch.
Senior Veterinary Surgeon, J. G. Williams, M.R.C.V.S.
Manager of the Land and Agricultural Bank of South West Africa, J. G. von Backstrom.

Judicial and Police Officers.

Judge of the High Court of South West Africa, O. H. Hoexter.
Registrar of the High Court, Taxing Officer, Sheriff, and Master of the High Court, J. M. M. Commaille.
Attorney General, R. E. G. Rosenow.
Commissioner South West Africa Police, Lieut.-Col. C. A. B. van Coller, M.B.E.

BASUTOLAND, BECHUANALAND PROTECTORATE, AND SWAZILAND.

THE OFFICE OF HIGH COMMISSIONER.

The office of High Commissioner originated in the Commission of 1846 which appointed the Governor of Cape Colony "High Commissioner for the settling and adjustment of the affairs of the territories in Southern Africa adjacent or contiguous to the eastern and north-eastern frontier of the said Colony." The title of the post, after some modification, subsequently became "High Commissioner for South Africa." The High Commissioner was until 1899 charged with the conduct of British relations with the South African Republic (Transvaal) and the Orange Free State, as well as with native States and tribes outside the Colonies of the Cape and Natal, and also with Swaziland, which was administered by the Government of the South African Republic, under the Convention of 1894. He is to-day Governor of Basutoland, and administers the Bechuanaland Protectorate and Swaziland.

Prior to the 1st October, 1923, Southern Rhodesia was administered by the British South Africa Company, and the High Commissioner exercised certain powers of control under the Southern Rhodesia Order in Council, 1898. Upon the establishment of responsible Government the Order in Council of 1898 lapsed, but under the Southern Rhodesia Constitution Letters Patent certain of the High Commissioner's previous powers and functions in regard to native administration were reserved to him. In 1937 the High Commissioner's powers in regard to Southern Rhodesia were terminated by the Southern Rhodesia Constitution (Amendment) Letters Patent.

The office of High Commissioner, which was formerly held by the Governor of Cape Colony, was, by a Commission dated the 6th Oct., 1900, vested in Lord Milner, and by a similar Commission, dated the 15th March, 1905, in Lord Selborne.

Digitized by Google

From 1910 to 1930 the office was vested, by separate Commission, in the successive Governors-General of the Union of South Africa; in 1930 H.M.G. in the U.K. decided to establish the post of High Commissioner for the U.K. in the Union of South Africa and to combine this post with that of High Commissioner for South Africa. The title of "High Commissioner for South Africa" was changed upon the appointment of Sir W. H. Clark, K.C.S.I., K.C.M.G. (now G.C.M.G., K.C.S.I.), to be His Majesty's High Commissioner for Basutoland, the Bechuanaland Protectorate, and Swaziland.

Sir W. Clark also holds the post of High Commissioner for the United Kingdom.

High Commissioner and Staff.

High Commissioner, Sir William Henry Clark, G.C.M.G., K.C.S.I., 2,500*l.* plus 2,500*l.* representation allowance, plus 1,000*l.* allowance as High Commissioner of the High Commission Territories (*see* also under "Union").
Private Secretary, E. H. Ashton.
Administrative Secretary, H. E. Priestman, C.M.G., 1,200*l.* by 50*l.* to 1,500*l.*
Asst. Administrative Secretary, H. L. Smith, O.B.E.
Asst. Secretary, R. B. M. Sullivan.
Clerical Staff, H. E. Houghton, M.B.E., Miss J. MacKintosh, Miss P. N. T. McNeight, Miss J. Keller, Miss M. Anderson, Miss M. Walsh, Miss E. J. Masterman.

Legal Adviser, Sir Walter Huggard, K.C.
Asst. Adviser, Major E. R. Roper, D.S.O., K.C.
Auditor, R. E. Goodman, C.B.E.
Clerk to Auditor, Miss T. O'Dowd.

BASUTOLAND.

Situation and Description.

Basutoland forms an irregular oval bounded by the Union of South Africa; the main axis, about 150 miles in length, lying in a north-easterly direction. The Orange Free State Province, Natal and the Cape Province form its boundaries. Its area is 11,716 square miles, or nearly as large as Belgium.

It lies between 29 and 30 degrees south latitude and between 27 and 28 degrees east longitude.

A portion of the great Drakensberg range of mountains lies within the eastern boundary. Peaks in this range rise to heights of eleven and twelve thousand feet. Westward are the Malutis, mountains inferior in height to the Drakensberg. They form a broken mass so closely packed that the valleys are of the narrowest, and there is little ground which can be cultivated. It is only along the Western border that mountains give place to hills and the cultivation of larger portions of land becomes possible.

The climate is dry and bracing with extremes of heat and cold both seasonal and diurnal. High altitude, electric tension and long periods of strong sunshine without clouds or rain necessitate for European residents periodic changes to the more humid atmosphere at coast level.

Population and Industry.

In 1875, when Basutoland formed part of the Cape Colony, at the general census of the Colony taken in that year, the European population of Basutoland was 499, and the native 127,707.

A census was taken on the 5th May, 1936, and the following are the figures:—

Natives	559,273
Europeans	1,434
Asiatics	341
Coloured	1,263
Total	562,311

There were 101,273 Basuto, male and female, absent from the Territory in temporary employment in gold mines, on farms and in other occupations in the Union of South Africa at the time of the census.

The country is a native territory and the European residents consist of Government officials, traders, missionaries and a few artisans.

Maseru, the capital and largest town, has a population of 3,000 Natives and 331 Europeans.

The economic life of the Basuto depends chiefly on agriculture and animal husbandry; land is entirely in the hands of the Natives and is held under communal tenure.

The chief crops are maize, sorghum and wheat, of which it is estimated that 1,135,983, 297,117 and 383,645 bags respectively were produced in 1937; barley, oats, beans, peas and other vegetables are also grown. It is calculated that 10 per cent. of the country is under the plough.

Natural advantages permit of the production of wool of the finest class, and it is the aim of the Government to improve the breed of sheep and the quality of wool produced. In 1937 5,445,000 lbs. of wool was exported to the Union valued at about 200,000*l.* In 1937 there were 1,695,325 sheep and goats, 418,921 head of cattle and 108,851 equines in the country, which is no longer overstocked owing to the toll taken of livestock by the drought in 1933.

Soil erosion, which is a serious problem in this territory as well as in other parts of South Africa, has been vigorously tackled during the last two years with great success. In 1936 the Colonial Development Fund granted Basutoland 160,233*l.* for this purpose. Up to the end of 1937, 8,316 acres had been reclaimed, 858,831 yards of contour banks constructed, and 29 dams built. The improvement in the pasturage over these areas is remarkable. Experimental work has been in progress since 1934.

No minerals are known to exist in Basutoland excepting small outcrops of coal, and as yet there has been no mineralogical survey. No mining is carried on nor is there any industrial activity.

History.

The Basutos appear to have been composed of the remnants of several tribes which were broken up in the wars waged by Moselikatze, the king of the Matabele, in the early years of the last century. These remnants were united in about 1818 under Moshesh, a chief of great ability, who ruled for many years.

In 1852 war broke out between Moshesh and the British Government; a few years later, in 1856, disputes arose between Moshesh and the Orange Free State respecting boundary questions, and hostilities resulted which lasted from 1856 to 1858, with indecisive results, and were concluded by the Treaty of Aliwal, 1858, but collisions frequently recurred.

In 1865 the war broke out afresh, and Moshesh again claimed the protection of the Governor, Sir Philip Wodehouse. He declined to interpose actively, but despatched a British Commissioner to Thaba Bosiu, the capital of Basutoland, to settle the difficulties. This measure met with

Digitized by Google

little success, and in the end the Boers were successful, and Moshesh sued for peace. At the treaty of Thaba Bosiu, April, 1866, he recognised the permanent cession of a portion of his district and acknowledged himself a subject of the Orange Free State.

The peace was of short duration, the war was renewed, and the Basuto, pressed by the Boers, were on the brink of destruction, when they again appealed to be taken under the authority of the Queen, and in 1868, Sir Philip Wodehouse received authority to recognise Moshesh and his tribe as British subjects, and for the incorporation of their territory. This was carried into effect by a proclamation dated March 12th, 1868.

The country remained in a very unsettled condition, until it was annexed to the Cape, by an Act of the Cape Legislature, No. 12 of 1871. The Act expressly declared that Basutoland was not to be subject to the general law of the Colony, and gave the Governor power to legislate for it by proclamation, and to extend to it by proclamation any Cape Act not otherwise in force therein.

The subsequent history of Basutoland was one of much trouble and disturbance.

In March, 1879, Moirosi, the chief of the Quthing district, in the south-east of Basutoland, rescued from justice his son Doda, who had been arrested for horse-stealing; and, on the Colonial authorities demanding his surrender, broke out into open defiance of its authority. Owing to the great natural strength of his country and stronghold, considerable difficulty was experienced in subduing him; but in December of that year his stronghold was carried by storm, and he himself fell in the assault. The proposals of the Colonial Government to divide the territory occupied by the adherents of this chief into lots for occupation by European settlers gave rise to great discontent among the Basuto who had remained loyal. This discontent was further increased by the extension of the Cape Peace Preservation Act of 1878, providing for a general disarmament, to Basutoland by proclamation in April, 1880, and culminated in the revolt of almost the whole tribe when an attempt was made to put the Act in force. The rebellion spread to the native territories east and south of Basutoland, East Griqualand, Tambookieland, and the Pondomisi, where the rising was signalised by the treacherous murder of Mr. Hope, the magistrate, and other Europeans.

Strenuous efforts were made by the Colony to reduce the Basuto to submission by force of arms, but without decisive success, though the loss of their cattle, and the interruption of cultivation, caused great distress amongst them. Early in 1881 overtures for an arrangement were made by the leading chiefs, and, at the instance of Her Majesty's Government, the High Commissioner acted as arbiter between the Colonial Government and the Basuto.

The terms of his award were, the registration of arms, the payment of compensation to those natives who had remained loyal by the tribe, and also the payment of a fine of 5,000 head of cattle. The award was accepted by the Basuto and the fine paid, but little was done towards fulfilling the other conditions. The Colonial Ministry, with a view to facilitate a settlement, cancelled the award and induced the Cape Parliament to assume the burden of compensating the loyal natives. The Disarmament Proclamation was also repealed, and at a Pitso held on the 24th of April, 1883, a very liberal constitution was offered to the Basuto. Masupha, however, the chief of the Berea district, with several other chiefs of influence, held aloof, and practically declared their intention to have no further connection with the Colonial Government, and the tribe generally were understood to wish to be under the direct authority of the Imperial Government. In the meantime a strong feeling in favour of the entire abandonment of Basutoland had grown up in the Colony, and on the request of the Colonial Ministry the Imperial Government decided to undertake for a time the administration of the country on condition that satisfactory evidence was given by the Basuto of their desire to remain under the British Crown, that the Orange Free State should undertake to cause the frontier to be respected by its subjects, and that the Colony should pay over towards the cost of administration the Customs duties received on goods imported into Basutoland. This offer was accepted by the Colony, and provision was made in the Basutoland Disannexation Act of 1883 for the payment of 20,000*l.* a year, and the Free State also intimated its willingness to comply with the conditions so far as it was concerned.

A great national Pitso of the Basuto was held on the 29th of November, 1883, attended by the representatives of more than two-thirds of the whole tribe, who unanimously expressed their willingness to comply with the conditions on which the Imperial Government was prepared to assume the responsibility of the administration of the country. Several important chiefs who were not at the Pitso subsequently expressed their concurrence in this resolution, Masupha alone refusing to accept the offers of the Government, and desiring to remain independent. Her Majesty's Government upon this decided that their conditions were sufficiently complied with, advised the Queen to sanction the Disannexation Act, and immediately took steps for carrying on the government under the immediate authority of the Crown, from the 13th March, 1884. Masupha tendered his submission in 1886, and asked for a magistrate to be resident in his district.

Constitution.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for Basutoland, Bechuanaland Protectorate, and Swaziland, the latter possessing legislative authority, which is exercised by proclamation.

The chiefs adjudicate on cases between natives, with a right of appeal to the Courts of District Commissioners where all cases between natives and Europeans are brought. There is a Court of the Resident Commissioner, presided over by the Resident Commissioner in person or by a Judicial Commissioner appointed by the High Commissioner by notice in the *Gazette*, which has jurisdiction in all cases, civil and criminal, subject to a right of appeal in certain civil cases to the Privy Council.

For administrative purposes the country is divided into 7 districts namely, Maseru, Leribe, Mohale's Hoek, Berea, Mafeteng, Quthing, and Qacha's Nek. The districts of Leribe and Qacha's Nek include the sub-districts of Butha Buthe and Mokhotlong separately.

The main sources of revenue are: native tax, customs, income tax, poll tax, licences and wool export duty.

Education.

Education is mainly in the hands of missionaries, who co-operate with the Administration in the control of those mission schools which receive Government

Digitized by Google

grants. Inspection and the higher examinations are conducted by the Education Department.

There are four Government Schools; the Lerotholi Technical School, providing industrial and agricultural training for 70 apprentices, and three day schools at important centres providing primary intermediate education. Expenditure from public funds on education including grants to Missions amounted to 62,054*l.* in 1937–38.

The following figures give the number of native schools and the average attendance during 1937:—

Government* ..	4 average attendance	451
Government-aided 576	do.	64,595
Unaided 260	do.	12,472

About 70 per cent. of Basuto children of school-going age are actually attending school.

There are six small primary day schools in the territory for the education of European children, numbering about 80.

Means of Communication.

Roads and Pack Trails. The interior of Basutoland is exceptionally mountainous and can only be reached by horseback and transport of goods is by pack animal along bridle paths. On the western side of Basutoland where there is a strip of comparatively low-lying agricultural country, which is thickly populated, a fairly good road system has been developed. The main trunk road runs from Butha Buthe in the north through Leribe, Teyateyaneng, Maseru, Mafeteng, Mohale's Hoek, to Quthing in the south, a distance of 185 miles, fairly close to the western border and there are other main roads, connecting this road with the South African Railways. Similarly there are feeder roads, providing communication with trading stations and missions from the main western road up to the first range of mountains. On the mountainous eastern side a small road system connects Qacha's Nek with Matatiele in East Griqualand. Short feeder roads serve the trading stations near Qacha's Nek on the southern side. The whole system comprises 360 miles of main roads, and 132 miles of feeder roads maintained at Government expense and 290 miles of road leading to trading stations maintained by Traders with Government assistance. The only Government Station not served by a motor road is Mokhotlong, a sub-station of the Qacha's Nek district, which is connected by pack trails with Qacha's Nek and Himeville in Natal.

The South African Railways and Harbours run regular motor-bus services between Zastron and Mohale's Hoek, Zastron and Quthing, Fouriesburg and Butha Buthe, in each case connecting with railheads in the Orange Free State.

Railways. There are no railways through the country, but in December, 1905, the Central South African Railways opened a branch line from Marseilles station on the Bloemfontein–Ladysmith main line to Maseru.

The line of postal communication is through the Orange Free State, Cape Province and Natal. Letters to and from Europe take about 20 days by rail and steamer and 9 days by air-mail. Postal rates are similar to those obtaining in the Union of South Africa. Savings Bank facilities and a money order system have been extended to Basutoland. There are telegraph stations at Butha Buthe, Leribe, Teyateyaneng, Maseru, Morija, Mafeteng, Mohale's Hoek, Quthing and Qacha's Nek; a telephone line runs along the eastern border connecting Maseru with all Government Stations from Butha Buthe in the north to Quthing in the south. The telephone system is connected up with the Union lines at various points. Qacha's Nek on the western side is connected by telephone and telegraph with Matatiele.

* Does not include 1 vocational school with 67 pupils.

Trade.

The following are the total values of Imports and Exports by Traders during recent years:—

	1933	1934	1935	1936	1937
	£	£	£	£	£
Imports ..	611,110	566,767	588,331	712,125	760,736
Exports ..	330,157	284,522	331,145	302,193	368,629

The principal imports are blankets, ploughs, clothing, tin ware and other native requirements, and the principal exports in 1936 were wool (5,986,871 lbs., value 154,329*l.*), mohair (817,849 lbs., value 42,124*l.*), wheat (96,250 bags of 200 lbs., value 65,796*l.*), and cattle, 6,613 units, value 34,365*l.*

Currency and Banking.

The Standard Bank has a branch at Maseru, and there are Post Office Savings Banks at most of the Government Stations. British (other than silver), Union of South Africa coins and South Africa Reserve Bank notes are legal tender in Basutoland.

Finance.

The revenue is derived mainly from native tax and customs. Other sources of revenue are income tax, poll tax, licences and wool export duty.

An income tax has been levied on the lines of that existing in the Union of South Africa.

Basutoland is a member of the South African Customs Union and is dealt with for customs purposes as a part of the Union, receiving a fixed percentage (0·88575%) of the total customs collected on imports into the Union, which in the year 1936–37 amounted to 121,604*l.*

	1932-33	1933-34	1934-35	1935-36	1936-37
	£	£	£	£	£
Revenue ..	275,410	246,144	302,489	321,910	368,923

Agricultural and Livestock Officers, H. C. Mundell, 450*l.*; L. H. Collett, 410*l.*; C. L. F. Peachey, 420*l.*; A. E. Hensley, 420*l.* (met from Colonial Development Fund).

Engineer, E. R. Roberts, B.Sc., 525*l.* (met from Colonial Development Fund).

Surveyor, W. K. Hudson, 450*l.* (met from Colonial Development Fund).

Agricultural and Livestock Officers, F. O. A. Wande, B.Sc., 375*l.*; R. K. Tennant, 375*l.*; C. H. Aitchison, B.Sc., 375*l.*; B. P. Harding, 360*l.* (met from Colonial Development Fund).

Accounting Clerk, E. D. G. P. Heering, 600*l.*

(II) *Veterinary* :

Principal Veterinary Officer, G. T. Henderson, M.R.C.V.S., 775*l.*

Agricultural and Livestock Officer, S. J. Steenekamp, 500*l.*

Assistant Agricultural and Livestock Officer, N. O. Halse, 360*l.*; P. M. Wilhelm, 360*l.*; J. L. J. van Vuuren, 360*l.*; G. H Larkan, 360*l.*; G. R. Chalmers, 330*l.*; J. G. S. Bennie, 315*l.*

Clerk, R. F. S. Heering, 320*l.*

Posts and Telegraphs :—

Senior Postmaster, J. P. Jones, 500*l.*

Postmasters, B. H. van der Merwe, 450*l.*; B. L. Austin, 450*l.*; G. H. Leask, 450*l.*; C. R. R. Dawson, 380*l.*; P. S. G. Phillips, 300*l.*

Officers attached to High Commissioner's Office :—

Administrative Secretary to the High Commissioner, H. E. Priestman, C.M.G., 1,300*l.*

Clerk, Grade I, H. E. Houghton, M.B.E., 460*l.*

Clerk, Grade II, Miss J. Mackintosh, 300*l.*

Auditor, R. E. Goodman, C.B.E., 1,100*l.* (of which Basutoland pays 550*l.*).

BECHUANALAND PROTECTORATE.

Situation and Area.

The territory of the Bechuanaland Protectorate is bounded on the South and East by the Union of South Africa, on the North by Southern Rhodesia and the Zambesi and Chobe Rivers, and on the West by South-West Africa. Its area is estimated at about 275,000 square miles, and the population, according to the census taken in 1936 was 265,756, of whom 1,899 were Europeans.

History.

During the year 1885, Sir Charles Warren, who was in command of an expedition despatched from England to pacify Southern Bechuanaland, where for some time previously hostilities had been proceeding between the Bechuanas and Boers from the South African Republic, visited the principal chiefs in Northern Bechuanaland (known as the Bechuanaland Protectorate), Khama, Gaseitsiwe, and Sebele, and as a result a British Protectorate was proclaimed over their territories. No further steps were taken until the year 1891, when,

Digitized by Google

by an Order in Council dated 9th May, the limits of the Bechuanaland Protectorate were more clearly defined, and the High Commissioner was authorised to appoint such officers as might appear to him to be necessary to provide for the administration of justice, the raising of revenue, and generally for the peace, order, and good government of all persons within the limits of the Order. Sir Sidney Shippard, the Administrator of Bechuanaland, was appointed Resident Commissioner, and an Assistant Commissioner was appointed for the Northern Protectorate, and another for the Southern Protectorate.

For fiscal and several other purposes the Protectorate was treated as a portion of the Crown Colony of British Bechuanaland, until the latter was annexed to the Cape Colony on the 15th November, 1895. In the autumn of that year arrangements were made for the transfer of the administration of the Bechuanaland Protectorate, with the exception of certain reserves for native chiefs, to the British South Africa Company, but was never administered by that Company. Since the annexation of British Bechuanaland to the Cape the Protectorate has been governed as a separate territory under the name of the Bechuanaland Protectorate, and the form of government is very similar to that which obtains in Basutoland. There is a resident Commissioner, who is under the direction of the High Commissioner. There are District Commissioners at Gaberones, Maun, Ghanzi, Serowe, Kanye, Tsabon, Lobatsi, Mochudi, Molepolole, and Francistown. For the maintenance of law and order there is a force of police known as the Bechuanaland Protectorate Police, numbering 284. This force is under the direct control of the Resident Commissioner. There are 7 officers, 4 warrant officers, 22 European N.C.O.s, 19 European Troopers (mounted), 7 Native N.C.O.s, 115 Native Troopers (mounted), and 110 Police Messengers (dismounted). The police are stationed in small detachments at various places in the Protectorate. The headquarters of the Administration is at Mafeking, in the Cape Province.

Climate and Industries.

The climate is delightful during the winter and airly healthy during seven months of the year. During the summer months malarial fever is prevalent in some districts.

The Protectorate is essentially a pastoral country, and although mealies and Kaffir corn are reaped by the natives in large quantities when the season is favourable, the rainfall is insufficient, or perhaps too uneven and uncertain in its distribution, to render agriculture anything but a hazardous pursuit. The staple product consists of cattle, of which there are approximately 650,000. There are also 490,000 sheep and goats. In the North, in the Tati district, gold mining has been carried on, on a small scale, for years. During the year 1937, 17,570 ozs. gold and 1,503 ozs. silver, of a total value of 122,412*l.*, was produced.

Native Chiefs.

The principal chiefs are :—

Tshekedi, Chief of the Bamangwato, whose chief town is Serowe (acting during minority of Chief Seretse).

Kgari Sechele, Chief of the Bakwena, who lives at Molepolole.

Bathoen, Chief of the Bangwaketsi, who lives at Kanye.

Musi, acting chief of the Bakgatla, who lives at Mochudi.

Moremi, Chief of the Batawana, who lives at Maun.

Ketshwerebothata, acting Chief of the Bamalete, who lives at Ramoutsa (acting during the minority of Mokgosi Mokgosi).

Matlala, Chief of the Batlokwa, who lives at Gaberones.

Means of Communication.

The main trunk railway to the North, which connects Rhodesia with Cape Town runs through the Protectorate. The line north of Vryburg in the Cape Province is the property of the Rhodesia Railways, Limited, to whom, under an agreement made in 1894, the Protectorate Government was to pay a subsidy of 20,000*l.* a year for ten years, which has now lapsed.

A Commission was appointed in 1927 under Proclamation No. 8 of 1927, in conjunction with Statutory enactments in Southern and Northern Rhodesia, to fix railway charges in the three territories. The Commission consists of a chairman and three members, one in respect of each territory, viz.: R. Gibb (chairman), R. D. Gilchrist (Southern Rhodesia), F. H. Lowe, O.B.E. (Northern Rhodesia), and S. Eales, C.M.G., C.B.E. (Bechuanaland Protectorate).

Finances.

	REVENUE.	EXPENDITURE.
	£	£
1932-33	102,303	142,830
1933-34*	255,270	187,264
1934-35†	209,962	187,529
1935-36‡	191,820	223,395
1936-37	261,944	252,207

The revenue is derived principally from Customs Income Tax, and Native Tax, and the chief items of expenditure are Police and Medical. Except as stated below, no customs duty is collected in the Protectorate, but under an Agreement with the Government of the Union of South Africa, Customs revenue, calculated on the average receipts for three completed years prior to Union, is received from the Union Treasury. The Territory collects its own customs duties on spirits and beer manufactured in the Union of South Africa, or in any British Protectorate or possession in South Africa, the Government of which has entered into a customs agreement with the Union.

Establishment.

Resident Commissioner :—

Resident Commissioner, C. N. Arden Clarke, 1,350*l.*, and 450*l.*, travelling allowance.

Assistant Resident Commissioner and Government Secretary, A. D. Forsyth Thompson, 900*l.*, travelling allowance 150*l.*

First Assistant Secretary and Registrar, G. E. Nettelton, 860*l.*

Assistant Secretary, R. A. R. Bent, 340*l.*

Principal Clerk, Mrs. E. Harris, M.B.E., 550*l.*, house allowance 90*l.*

* Included £177,000 Grant from Imperial Funds.
† Included £98,000 Grant from Imperial Funds.
‡ Included £85,000 Grant from Imperial Funds.
§ Included £60,000 Grant from Imperial Funds and £59 000 C.D.F. Grants.

Clerk to Principal Medical Officer, J. O'N. Anderson, 330*l.*

Sanitary Inspector, G. T. Joyce, 400*l.*

Education :—

Director of Education, H. J. E. Dumbrell, O.B.E., B.A., 775*l.*, allowance 100*l.*, house allowance, 130*l.*

Veterinary :—

Chief Veterinary Officer, J. H. N. Hobday, B.Sc. (Lond.), M.R.C.V.S., 750*l.*, travelling allowance, 150*l.*

Veterinary Officers, W. Hay, M.R.C.V.S., 700*l.*, travelling allowance 100*l.*; E. C. S. Dawe, M.R.C.V.S., 600*l.* and 100*l.* travelling allowance; H. A. Crawshaw, M.R.C.V.S., 540*l.* and 100*l.* travelling allowance; J. W. Macaulay, M.R.C.V.S., 520*l.* and 100*l.* travelling allowance.

Animal Husbandry Officer, F. B. H. Watermeyer, 420*l.* and 100*l.* travelling allowance.

Stock Inspectors, K. A. Berrell, 360*l.* and travelling allowance 50*l.*; A. A. Pedlar, 360*l.* and travelling allowance 50*l.*; N. F. Wright, 360*l.*, and travelling allowance 50*l.*; P. A. Johnston, 330*l.*; R. Hoyle, 330*l.*; H. J. Rundle, 360*l.*, travelling allowance 100*l.*; J. R. Stewart, 330*l.* and 50*l.* travelling allowance; G. B. Watson, 330*l.*; G. P. Engelbrecht, 330*l.*; H. C. Allman, 330*l.* and travelling allowance 50*l.*; M. D. Maytham, 330*l.*; H. E. Hannam, 315*l.*; A. Crystal, 315*l.*; G. H. Pretorius, 315*l.*; F. Y. Fisher, 300*l.*

Hide and Skin Improvement Officer, W. A. H. Sagar, 480*l.*

Clerk to Chief Veterinary Officer, C. J. Nelson, 410*l.*

Agriculture :—

Chief Agricultural Officer, R. England, M.B.E., 700*l.* and 150*l.* travelling allowance.

Agricultural Officer, W. C. Grandi, 420*l.* and 100*l.* travelling allowance.

Dairy Officers, C. A. Challis, 450*l.* and 100*l.* travelling allowance; W. J. Chase, 360*l.* and 100*l.* travelling allowance.

Officers attached to the High Commissioner's Office :—

Assistant Secretary, R. B. M. Sullivan, 460*l.* and 50*l.* allowance.

Private Secretary to the High Commissioner, E. H. Ashton, 350*l.*, allowance 120*l.*

Auditor, R. E. Goodman, C.B.E., 1,000*l.* and allowance 100*l.* (of which Bechuanaland Protectorate pays 300*l.*).

SWAZILAND.

Situation and Area.

Swaziland is bounded on the North, West and South by the Transvaal, and on the East by Portuguese territory and Tongaland, now part of the Natal Province.

Its area is 6,704·6 square miles.

Description and Climate.

The territory is divided geographically into three longitudinal regions.

The mountainous region on the West approximates an altitude of over 4,000 feet.

What is known as the Middle Veld is some 2,000 feet lower, while the Low Veld, bounded on the East by the Ubombo Mountains, attains an average altitude of not more than 1,000 feet. The first two regions are remarkably well watered. Innumerable small streams unite with the large

Digitized by Google

rivers which traverse the country from West to East; except for these the Low Veld is not very well watered, though bore holes put down by private enterprise have revealed the existence of underground supplies of water at several places.

Swaziland is on the whole very healthy, but in common with other parts of similar country in South Africa, malaria is prevalent in the Low Veld during some of the summer months.

Mbabane, the headquarters of the Administration, is situated on the hills at an altitude of 4,000 feet, and Bremersdorp, the old capital, is on the Middle Veld. Other European centres are the Government Stations at Hlatikulu, Mankaiana, Stegi and Pigg's Peak.

Native History.

The Swazis are an allied race to the Zulus and speak the same language, with minor modifications. According to themselves the tribe lived originally in Southern Tongaland, from whence they migrated about 300 years ago to the Tshiselweni country, that is the country to the West of the Ubombo Range, between the Pongolo and the Great Usutu Rivers. Here they remained until 1815 when, being attacked by Zwide, Chief of the Ndwandwe, the major portion of the tribe under their chief Sobhuza, better known as Somhlolo, fled north and settled near the present site of Bremersdorp. The petty tribes or clans of Baroswi, Bavenda or Bapedi origin, then in occupation of Swaziland North of the Great Usutu, were conquered and absorbed. Under Sobhuza and his successor Mswazi, they occupied territory up to Barberton in the North and extending towards Carolina and Ermelo on the West, while the tribes occupying what is now the Lydenburg District also paid tribute to the Swazi King.

The Swazis are known to themselves and other native tribes as the Ama-Ngwane, that is, the people of Ngwane, one of their early Chiefs, and the country as Kwa-Ngwane, the land of Ngwane. After their flight to the North they were never seriously disturbed, though they were occasionally raided by Zulu tribes from the South, especially after the death of Dingana, who was killed by a Swazi Impi on the Southern border, after his defeat by the Boers and his brother Mpande. Subsequently through the good offices of Sir Theophilus Shepstone (Somtseu) amicable relations subsisted with Mpande, the Zulu King and his successor Cetywayo. In 1879 the Swazis lent assistance to the British in the war against Sikukuku (Sikukuni), but took no part in the Zulu War. Through the possession of secret medicines, used in the propitiation of the spirits of ancestral Chiefs, the Swazi Chiefs hold a pre-eminent position as rain makers. The native Government consisted of the King and his Council, made up of the *Malangeni*, the Chiefs of royal blood, and the Chief indunas of the tribe. The assistance of the witch doctors was called in whenever necessary to communicate with the spirits of departed Chiefs and to clean the country of sorcerers and other doers of evil. A military system of trained regiments on the lines formulated by Dingiswayo and Tshaka was adopted, mainly no doubt as a defence against the Zulus.

In the year 1846 Mswazi ceded whatever rights he had in the Lydenburg District to the Lydenburg Republic. Subsequently he, and later Mbandini, entered into agreements purporting to cede the whole of the territory to that Republic and to its successor the late South African Republic. These later cessions were in fact nullified by the Conventions of 1881 and 1884 entered into between Great Britain and the Republic though the boundaries of the Transvaal laid down in the 1881 Convention constituted a considerable encroachment on what was claimed to be Swazi Territory.

In 1921 the Chief Regent Labotsibeni handed over her duties to her grandson Sobhuza, who was duly installed as Paramount Chief. The Chief Regent had a long term of office after the death of her husband, Mbandeni, in 1889 and, later, of her son Bhunu. She was a wise chief and did valuable work for her people and country. Her relations with the Administration were always of a friendly nature; she died in 1925. The Paramount Chief is 39 years of age. He was educated at Zombode and Lovedale.

European Settlement.

During the eighties the King Mbandini in return for money and other payments granted concessions for various periods. Every conceivable right was granted away, not only for land, minerals, grazing, and timber, but also for all imaginable purposes, including exemption from taxes, for railways, telegraphs, mining patents, collection of the King's revenue, trading, etc., All unallotted land and minerals also formed the subject of concessions.

In 1888 a charter of self-government was granted to the whites in the country. Later, in 1890, under a Convention between the British Government and the South African Republic, a provisional Government was, with the consent of the Swazis, set up, consisting of a Government Committee composed of representatives of those two Powers, and a representative of the Swazis, a Government Secretary, Attorney General and other officials and of a Chief Court. This Court adjudicated on the initial validity of all concessions granted by the King, and, with a few exceptions, confirmed the grants in respect of such initial validity.

In accordance with pledges given to the Government of the South African Republic the provisional Administration came to an end three years later, when the British Government signed a fresh Convention, which permitted the South African Republic to acquire from the Regent and her Council an Organic Proclamation conferring on the South African Republic rights of jurisdiction, legislation and administration without incorporation in the South African Republic. The Swazis refused to sign the Organic Proclamation which had been drafted for them, and accordingly its provisions, with some of those in the 1893 Convention, were embodied in the final Convention of 1894, under which the South African Republic exercised powers of protection, legislation, jurisdiction and administration in Swaziland, subject to the limitations of the Convention.

On the conquest of the Transvaal, all the rights and powers of the late South African Republic passed to His Majesty, but since the other party to the Convention of 1894 had disappeared without the limitations therein, an Order in Council under the Foreign Jurisdiction Act was issued in June, 1903, providing that the Governor of the Transvaal should administer Swaziland, and conferring on him the right to legislate by Proclamation.

Digitized by Google

On the cessation of hostilities a British Special Commissioner, with a small force of South African Constabulary, was sent into the country, and a provisional Administration was established.

In accordance with the powers granted to him, the Governor issued a Proclamation in 1904 providing for administration and for dealing with the concessions question. The Laws of the Transvaal in force at the date of the Proclamation were applied to Swaziland, *mutatis mutandis*. Courts were established with the rights of appeal to the Supreme Court of the Transvaal, and an appeal was permitted from the decisions of the chiefs in civil matters to the Court of the Resident Magistrate. The chiefs were otherwise confirmed in their civil jurisdiction over natives, subject to the exclusion of usages incompatible with the due exercise of His Majesty's power and jurisdiction, or clearly injurious to the welfare of the natives.

The Commission constituted under the Proclamation of 1904 to deal with the concessions examined the concessions granting the exclusive rights, except exclusive rights to land and minerals, with a view to their expropriation at their value prior to the commencement of hostilities. The Commission reported in 1906, and the concessions, the subject of its report, were, with few exceptions, expropriated. The Commission subsequently dealt with the question of boundaries of land, mineral and grazing concessions. The general survey of these concessions, necessary to determine the conflicting rights, was also completed. Under the Concessions Partition Proclamation issued in 1907 land and grazing concessions were subjected to a deduction of one-third of their area for the sole and exclusive use and occupation of the natives of Swaziland and the remaining two-thirds were freed from such occupation subject to the provision that for five years from July 1st, 1909, no natives actually resident on such land could be compelled to move therefrom but after that period they could only continue to occupy such land on terms to be agreed upon between themselves and the concessionaires. These Agreements are subject to confirmation by the Resident Commissioner. Proclamation No. 24 of 1913 provided simple and effective machinery for the removal of natives from concessions after the period of five years had elapsed. This took place in 1914 and there was no large movement of natives from concessions. Those who desired to move did so voluntarily and the remainder made terms with the concessionaires and remained on the farms.

Of the total area of Swaziland, 4,290,661 acres, 1,638,093 acres have been set aside for the exclusive use of the Swazis and they have, in addition, acquired by purchase, 77,076 acres.

By an Order in Council, dated 1st December, 1906, the control of Swaziland was transferred from the Governor of the Transvaal to the High Commissioner for South Africa. Under the Order in Council the High Commissioner issued a Proclamation in March, 1907, providing for the appointment of a Resident Commissioner, a Government Secretary, Assistant Commissioners, and the establishment of a Police Force. The Laws of the Transvaal were re-enacted, *mutatis mutandis*, and, except where modified by Statute, the Roman-Dutch Common Law was put in force by the Proclamation. A special Court, having the full jurisdiction of a Superior Court, was established together with Courts of Assistant Commissioners with a limited jurisdiction.

The paramount chief and other chiefs were confirmed in their Civil Jurisdiction over natives subject to appeal to the Resident Commissioner. Provision was made for the Swaziland Deeds Office and Surveyor-General's Office to remain at Pretoria under control of the officers responsible prior to the date of the Proclamation.

An elected Advisory Council, representative of the Europeans, was established in 1921, to advise the Administration on purely European affairs.

Population.

The population of Swaziland, according to the census in May, 1936, was 2,740 whites, 153,270 natives (Bantu) and 705 coloured. Estimated total population, 1938, 157,770.

Religion and Education.

The Anglican Church, the Roman Catholic Church, The South Africa General Mission, the Scandinavian Alliance Mission, the African Methodist Episcopal Mission, the Wesleyan Methodist Mission, the Independent Methodist Mission, the Church of the Nazarene, the American Pilgrims' Holiness Union, the Berlin Lutheran Mission, the Full Gospel Mission of Norway, the African Congregational Church, the Lebombo Pentecostal Mission, the Norway Free Evangelical Mission to the Heathen, the Christian Apostolic Church of South Africa, the Apostolic Faith Church, and the Swedish Alliance Mission have representatives in the country.

The principal European School is St. Mark's, Mbabane, with a roll of 71, drawn from Swaziland, the Eastern Transvaal, and Portuguese East Africa. The Government also maintains 7 schools for European children at various centres, and makes annual grants to the various Native Missions which undertake Native Education. There are 2 Coloured Schools.

The Administration has established the Swazi National School at Matapa.

Industries, Agriculture, and Trade.

Mining in Swaziland is carried out under the authority of Concessions granted by the late King Mbandeni. Tin is found in payable quantities in the vicinity of Mbabane. Gold mining on a small scale is carried on at Pigg's Peak and Forbes Reef. The Crown owns a few mineral areas, and legal provision has been made for the exploitation of these by the public in the event of payable minerals being discovered.

Output of Tin.

1935	-	181	tons (long) valued at	£39,628
1936	-	182	,, ,, ,,	38,351
1937	-	154	,, ,, ,,	37,158

Output of Gold.

1935	-	314	oz. valued at	£2,130

1937	-	2,410	,, ,, ,,	16,873

There are approximately 403,900 head of horned stock, and 136,000 native sheep and goats in the territory. Cattle ranching has been in operation for some years.

A few farmers have herds of cattle ranging from 1,000 to 2,000 head. The young stock from

Digitized by Google

imported bulls show a very marked improvement on the local cattle.

The stock is fat all the year round and fat oxen can be put on the market in the winter and spring without any artificial feeding.

Dipping of all cattle is consistently carried out and diseases of stock are not more virulent here than elsewhere in South Africa.

Approximately 250,000 sheep (Merinos) are brought in from the Transvaal high veld for winter grazing, but this class of sheep has not so far been farmed in the Territory otherwise.

Maize is the staple product. The growing of cotton in suitable localities has proved successful. In 1937 the yield of seed cotton was small—103,550 lbs. valued at 640*l*. Tobacco is also a paying crop, about 200 789 lbs. valued at 6,191*l*., being grown in 1937, and many portions of the Territory have been favourably reported on for citrus and sub-tropical fruits. There are no railways. In 1928 the Railways and Harbours Administration of the Union of South Africa established Road Motor Services on the main routes in Swaziland. In 1930 the Portuguese East African Administration opened a daily motor service between Goba railhead and Stegi in Swaziland, the latter village being the eastern terminus of the South African Railways Motor Service. The Swazis grow the usual native crops but not quite in sufficient quantity to feed themselves. Efforts are, however, being made to improve their methods.

No statistics of the imports into Swaziland are kept. By an agreement with the Government of the Union of South Africa, Swaziland is dealt with, for Customs purposes, as a part of the Union. A payment is made to Swaziland of a percentage of the total customs revenue collected in the Union. The percentage is based upon the relation of the average Customs revenue of the territory to the average Customs revenue of the Colonies forming the Union and the High Commission Territories for the three years ended on the 31st March, 1910. The imports consist principally of maize, flour, groceries, wearing apparel, hardware, spirits, tobacco, and kaffir truck; while the principal exports are cassiterite tin, cotton, tobacco, hides, and slaughter oxen.

There are branches of Barclay's Bank (Dominion, Colonial and Overseas) at Mbabane, Hlatikulu, Bremersdorp and Stegi, and branches of the Standard Bank of South Africa, Ltd. at Bremersdorp and Stegi, and Post Office Savings Banks at Mbabane, Bremersdorp, Hlatikulu, Stegi and Pigg's Peak. The currency is South African.

Stores exist where necessary to serve the need of the population, but the volume of trade small.

Revenue and Expenditure.

The revenue and expenditure for the two years ended March 31st, 1938, were:—

1936-37	Revenue	£105,236
	Expenditure ...	£132,009
1937-38	Revenue	£119,288
	Expenditure ...	£151,320

The public debt on March 31st, 1937, was 35,000*l*. for the repayment of which provision has been made through the medium of a sinking fund.

Establishment.

Resident Commissioner, C. L. Bruton, O.B.E., 1,350*l*.; 100*l*. entertainment allowance.

Deputy Resident Commissioner and District Commissioner at Mbabane, H. B. A. McCarter, O.B.E., 1,000*l*. (850*l*. by 50*l*. to 1,000*l*.); 50*l*. subsistence allowance.

Government Secretary and Financial Secretary, J. R. Armstrong, O.B.E., 1,000*l*. (850*l*. by 50*l*. to 1,000*l*.); 50*l*. subsistence allowance.

Assistant Government Secretary, L. J. Puttick, 800*l*. (600*l*. by 25*l*. to 800*l*.).

Registrar and Master of the Special Court, Sheriff, Registrar of Births, Marriages and Deaths, W. W. Usher, 650*l*.

Accountant, E. P. Perkins, 490*l*. (450*l*. by 20*l*. to 600*l*.).

District Commissioner at Hlatikulu, S. B. Williams, 790*l*. (700*l*. by 25*l*. to 900*l*.); 50*l*. subsistence allowance.

District Commissioner at Bremersdorp, R. Armstrong, 730*l*. (700*l*. by 25*l*. to 900*l*.); 50*l*. subsistence allowance.

Assistant District Commissioners, (360*l*. by 20*l*. to 500*l*. by 25*l*. to 600*l*.), H. W. Boast, 600*l*.; C. G. Leary, 460*l*.; D. G. F. Silburn, 380*l*.; H. D. G. Fitzpatrick, 380*l*.; J. F. B. Purcell, 360*l*.; H. J. Steward, 360*l*.

Judicial.

Special Court of Swaziland—President, Sir Walter Huggard, K.C.; *Members*, The Resident Commissioner and District Commissioners.

Master, Registrar and Sheriff, W. W. Usher (see above).

Attorney-General, Major E. R. Roper, D.S.O., K.C.

Medical.

Principal Medical Officer, D. Drew, M.B., B.Ch., B.A.O., 800*l*. (800*l*. by 25*l*. to 900*l*.); 50*l*. subsistence allowance.

Medical Officer at Mbabane, P. Keen, M.R.C.S., L.R.C.P., M.D. (Laus.), M.M.S.A., 560*l*. (500*l*. by 20*l*. to 700*l*.); 50*l*. subsistence allowance.

Medical Officer at Hlatikulu, J. B. Tasker, M.B., B.Ch., 500*l*. (500*l*. by 20*l*. to 700*l*.); 50*l*. subsistence allowance.

Medical Officer at Hlatikulu, T. D. MacNab, M.B., B.Ch., B.Sc., 500*l*. (500*l*. by 20*l*. to 700*l*.); 50*l*. subsistence allowance.

Hospital Assistants and Dispensers (300*l*. by 15*l*. to 360*l*.); *Mbabane*, C. B. Hands, 345*l*.; *Hlatikulu*, J. L. van der Vyver, 300*l*.; *Mankaiana*, A. G. Lunnis, 360*l*.

Veterinary and Agriculture.

Principal Veterinary and Agricultural Officer, W. A. Elder, O.B.E., F.R.C.V.S., 900*l*. (700*l*. by 25*l*. to 900*l*.); 50*l*. subsistence allowance.

Assistant Veterinary Officer, C. T. Nilsen, 560*l*. (500*l*. by 20*l*. to 700*l*.); 50*l*. subsistence allowance.

Agricultural Officer, J. L. Moerdyk, 610*l*. (500*l*. by 20*l*. to 700*l*.); 50*l*. subsistence allowance.

Assistant Agricultural Officer, E. S. E. Thomas, 360*l*. (300*l*. by 15*l*. to 360*l*.); 50*l*. subsistence allowance.

Education.

Superintendent of Education, E. M. D. Glynn, M.A., 500*l*. (500*l*. by 20*l*. to 700*l*.); 50*l*. subsistence allowance.

Police.

Chief of Police, E. D. Fenn, Major, 600*l*. (600*l*. by 25*l*. to 700*l*.); 50*l*. subsistence allowance.

Public Works.

Government Engineer, J. H. Gardner, O.B.E., A.M.I.C.E., 775*l.* (600*l.* by 25*l.* to 800*l.*); 50*l.* subsistence allowance.

Assistant Government Engineer, (Vacant).

Inspector of Roads and Works, R. G. Leven, 360*l.*; 30*l.* subsistence allowance.

Officers Attached to High Commissioner's Office.

Assistant Administrative Secretary, H. L. Smith, O.B.E., 800*l.* (750*l.* by 25*l.* to 900*l.*).

Auditor, R. E. Goodman, 1,000*l.* and allowance 100*l.* (Swaziland pays 250*l.*).

SOUTHERN RHODESIA.

The limits of Southern Rhodesia, as defined by the Southern Rhodesia Order in Council, dated 20th October, 1898, are the parts of South Africa bounded by the Portuguese Possessions, by the Transvaal Colony to a point opposite the mouth of the River Shashi, by the River Shashi to its junction with the Tati and Ramaquaban rivers, thence by the Ramaquaban river to its source, thence by the watershed to the Rivers Shashi and Ramaquabane until such watershed strikes the Hunter's Road (called the Pandamatenka Road), thence by that road to the River Zambesi, and by that river to the Portuguese boundary. The said limits include an area of ten miles' radius round Fort Tuli, but exclude the area of the district known as the Tati district as defined by the Charter.

History.

On the 29th October, 1889, a Royal Charter was granted to the British South Africa Company, conferring upon it large powers of administration to carry out the objects for which it was formed, the principal being to extend northwards the railway and telegraph systems of the Cape Colony and Bechuanaland, to encourage emigration and colonisation, to promote trade and commerce, and to develop and work mineral and other concessions.

Early in 1890 a police force of Europeans was raised and equipped, and in June of that year, after obtaining permission from King Lobengula, a pioneer expedition on a large scale was organised to cut a road from a point on the Macloutsie River, a tributary of the Limpopo, through the south-eastern part of Matabeleland into Mashonaland, the objective point of the expedition being Mount Hampden, near which large belts of gold-bearing quartz were known to exist. This point was duly reached, and Fort Salisbury, 12 miles South-east of Mount Hampden, having been founded (12th September, 1890) the pioneers were disbanded, and, in accordance with the agreement made with them, were allowed to peg off auriferous claims and farms.

In July, 1893, the Matabele made a raid into Mashonaland, and killed a number of natives living under the Company's protection, near Victoria, when they were attacked and driven back by the Company's police. After an unsuccessful attempt to arrange matters, preparations were made for the invasion of Matabeleland, to anticipate an expected attack on the Bechuanaland Protectorate and Mashonaland. The Company's police and a small force of volunteers and native allies advanced on Bulawayo from the east, while the Bechuanaland Police, which had been largely reinforced, advanced with Khama and some 2,000 of his men by way of Tati from the south. Two successful engagements were fought by the Company's forces near Bulawayo, in which the Matabele suffered very severely. The Bechuanaland police were also attacked by a strong force of Matabele, which they repulsed with great loss. Lobengula fled, and Bulawayo was occupied, and a force sent in pursuit of the king.

This force was unfortunately divided by the sudden rising of the River Shangani, and Major Wilson and a small party of men were, after a heroic resistance, killed to a man. Arrangements for the future administration of the country were completed by the High Commissioner and Mr. Rhodes on behalf of the Company. Lobengula, who was said to be endeavouring to escape across the Zambesi, is reported to have died from small-pox or fever.

In 1896, owing to a variety of causes, the Matabele broke out in rebellion, and shortly after the Mashonas followed suit. After a prolonged struggle the rebellion was subdued in September, 1897.

From 1897 to 1899 the development of the country advanced rapidly, but the outbreak of the war with the Republics, in October, 1899, practically put a stop to progressive work of every kind and the investment of Mafeking and the occupation by the Boers of a section of the railway in Bechuanaland cut the Territory completely off from communication with the South. During the operations that followed, a conspicuous part was played by the British South African Police and by Volunteers from the civilian population of Rhodesia, many of whom continued, after the relief of Mafeking, to serve until peace was declared in other parts of South Africa. It was estimated that the number of men contributed by Rhodesia, was approximately 1,500, being at least 12½ per cent. of the European population. Their good work earned frequent mentions in despatches and secured the special approbation of the Commander-in-Chief.

The period between 1902 and the outbreak of the Great War of 1914-18 was one of, for the most part, uneventful but useful progress and consolidation. In October, 1902, the railway linking up Salisbury and Bulawayo was completed, while by 1904, the railway had been pushed on to the Victoria Falls, thus linking Northern Rhodesia to the Cape, and forming a further step towards the fulfilment of Rhodes' great dream of a railway from the Cape to Cairo.

During this period also there was considerable political activity, and the desire of the settlers for increased political representation was met by the Southern Rhodesia Order in Council, 1903, which increased the numbers of the Legislative Council to 14 (7 elected and 7 nominated members) exclusive of the Administrator and Resident Commissioner. In 1907 the number of nominated members was reduced to 5.

There was also considerable agitation concerning the ownership of unalienated land in the Colony which was finally settled by the decision of the Privy Council in 1918 that the land was the property of the Crown.

nd of the part played in the Great War by Southern and Northern Rhodesia, appears under the section Northern Rhodesia.

Towards the end of 1918, the British South Africa Company put forward their claim for the sum of £7,500,000 (later amended to £7,800,000) in respect of deficits in administrative expenditure paid by the Company. Early in 1919, the Legislative Council asked H.M. Government what proof of financial or other fitness was required from the people of Southern Rhodesia before Responsible Government would be granted. In July of that year, the Cave Commission was appointed to examine the Company's claim mentioned above. In January, 1920, the Commission awarded the Company some £4,400,000, subject to certain adjustments. The way was now clear for some change in the system of Government in the Colony and this is dealt with at some length under the section devoted to the "Constitution." Finally, Responsible Government was granted in September, 1923.

The first election under Responsible Government took place in April, 1924, and resulted in the return of the Responsible Government Party under the leadership of Sir Charles Coghlan, the first Premier of Southern Rhodesia, by a substantial majority. Sir Charles Coghlan died in 1927, and was succeeded as Premier by the Hon. H. U. Moffat, C.M.G.

The second general election which took place in 1928 resulted in the return of the Rhodesian Party for the second time, Mr. Moffat again accepting the Premiership. In 1933, the Ministerial Titles Act came into force and on the retirement from office of Mr. Moffat in June of the same year, the Hon. G. Mitchell became the first Prime Minister of the Colony. The Rhodesian party was defeated at the third general election held in Sept., 1933, and the Reform Party was returned, Mr. G. M. Huggins becoming Prime Minister. In September, 1934, a majority of the Reform Party and the Rhodesian Party agreed to form a United Party and at the fourth General Election held in November, 1934, the United Party was returned under the leadership of the Hon. G. M. Huggins.

Since the grant of Responsible Government, the Colony has made great progress. Considerable expansion has taken place in agricultural and mining production, a large volume of immigration has been absorbed, the railway system has been extended and road motor services inaugurated.

The principal Acts passed in the second Session of 1937 included Acts 28/37 and 30/37 controlling the pig and dairy industries; Act 37/37 establishing a Cold Storage Commission to acquire and operate cold storage works and abattoirs; Act 38/37 providing for the establishment of Native Councils; Act 36/37 providing for the regulation of native wages; and Act 39/37 providing for the registration of voters. The principal Acts passed in the early part of 1938 were the Electoral Act, the High Court Practice and Procedure Act, and the Printed Publications Act. In the latter half of 1938 Bills were introduced relating to the establishment of a separate coinage and currency, the reorganisation of the education system, the establishment of a Rhodesian Court of Appeal and the delimitation of electoral districts.

Constitution.

In 1888 that portion of Rhodesia now known as Southern Rhodesia was declared to be within the British sphere of influence, and on the 29th October, 1889, a Royal Charter was granted to the British South Africa Company, conferring upon it large powers of administration to carry out the objects for which it was formed.

At an Extraordinary General Meeting of the shareholders of the British South Africa Company, held on the 14th of December, 1899, a resolution was passed agreeing to accept the amendments proposed by Her Majesty's Government to be made in the original Charter of the Company by a Supplemental Charter, and a further resolution was passed approving certain alterations in the original Deed of Settlement of the Company.

The Constitution of Southern Rhodesia, originally laid down by the Charter, was subsequently amended by the Orders in Council of the 9th May, 1891; 30th July, 1891; and 18th July, 1894, the latter being known as the "Matabeleland Order in Council." This Order was revoked by the Southern Rhodesia Order in Council of 1898, which provides for the Administration of the Territory, Legislation, the Preservation of Peace and Order, the Constitution of Courts of Justice, and Native Administration. This Order was amended by several Orders in Council.

By a Proclamation, dated 10th June, 1891, the laws of the Cape Colony in force on that date were adopted for administration in Southern Rhodesia as far as the circumstances of the country would permit. The laws of the Cape Colony passed subsequent to the 10th June, 1891, do not apply to Rhodesia. On 12th November, 1937, an Act was promulgated to "declare which of the laws in force in the Cape Colony on 10th June, 1891, are inapplicable to this Colony, and to repeal specifically such laws of the Colony of the Cape of Good Hope and of this Colony as have already been repealed otherwise than specifically or have, by the lapse of time or otherwise, become unnecessary."

For the administration of justice there is a High Court with civil and criminal jurisdiction, the judges being appointed by the Governor. In the districts there are Magistrates' Courts. Appeals from the High Court lie to the Supreme Court of the Cape of Good Hope, and thence to the Privy Council.

Clause 33 of the Company's Charter reserved to the Crown the power at the end of twenty-five years from the date of the Charter, and at the end of every succeeding period of ten years, to add to or repeal any of the provisions of the Charter or to enact other provisions in substitution for or in addition to any of its existing provisions. It was further provided that this power should only be exercised in relation to so much of the Charter as related to administrative and public matters, and failing the exercise of this power the Charter was automatically extended for another ten years.

At the expiration of the first period of twenty-five years, viz., in October, 1914, His Majesty's Government, after ascertaining the views of the Company and of the Legislative Council of Southern Rhodesia, decided to advise the issue of a Supplemental Charter containing a proviso that if during the ensuing ten years the Legislative Council should, by an absolute majority, pass a resolution praying the Crown to establish a responsible government, and should support it by evidence showing that the condition of the Territory, financially and in other respects, was such as to justify this course, it should be lawful for the Crown to make such alterations in the Charter as might be necessary for the purpose.

Digitized by Google

A Supplemental Charter, giving effect to this arrangement, was issued on 13th March, 1915.

In May, 1920, the Legislative Council passed a resolution praying that responsible government should be established forthwith in Southern Rhodesia. In March, 1921, the Secretary of State for the Colonies appointed a committee, of which Earl Buxton was chairman, to consider certain questions relating to Southern and Northern Rhodesia. The first report of the committee, dealing with Southern Rhodesia, recommended that the question whether that territory was or was not prepared to adopt responsible government should be decided at the earliest possible moment, and that a scheme for responsible government should be drawn up in detail and placed before the electors for their acceptance or rejection, by referendum rather than a general election.

In accordance with the recommendations of the report, the Secretary of State invited a deputation of the elected members of the Legislative Council to discuss with him the drafting of a provisional scheme of responsible government for Southern Rhodesia. The deputation came to London, and after confidential discussions returned to Southern Rhodesia in December, taking with it draft Letters Patent providing for the constitution of responsible government in that territory. These were shortly afterwards made public by the Secretary of State, who at the same time stipulated that the Government of the Union of South Africa should be approached with the object of ascertaining the terms upon which Southern Rhodesia could be admitted to the Union, and that the alternative policies should in due course be submitted to the people of Southern Rhodesia in the form of a Referendum.

The delegation proceeded to Cape Town, and as a result of conferences held by them with General Smuts and his ministers an official memorandum was published on the 31st July, giving the terms which the Government of the Union was prepared to recommend to Parliament for the admission of Southern Rhodesia. The draft Letters Patent for responsible government and the terms of admission to the Union were placed before the electors at a Referendum on the 27th October, 1922, with the result that 8,774 voted for responsible government and 5,989 for joining the Union—a majority of 2,785 in favour of the former.

On the 12th September, 1923, the 23rd anniversary of the occupation of Mashonaland, the territory was formally annexed to the British Dominions with the title of "Colony of Southern Rhodesia," and on the 1st October following, the Colony was granted by Letters Patent responsible government under a constitution which provides for a legislature consisting of a Legislative Council and a Legislative Assembly of thirty members. The Legislative Council can be constituted by a law passed by the Legislative Assembly, but up to the present this power has not been exercised. Pending the election of the first Legislative Assembly, the constitution provided for the temporary continuance of the existing Legislative Council. Subject to reservations as to the alteration of the constitution, legislation in relation to native affairs and certain other matters, the Legislature may make all laws required for the peace, order and good government of the Colony. By amending Letters Patent of 1937 the High Commissioner in South Africa relinquished certain supervisory powers in connection with Native Affairs and the trusteeship of the Native Reserves which were vested in him. Of these powers the most important are now exercised by one of His Majesty's Principal Secretaries of State, while the trusteeship of the Reserves is vested in a Board of Trustees established for the purpose and consisting of a Chairman nominated by the Secretary of State, the Chief Justice for the time being, and the Chief Native Commissioner for the time being.

The Governor is empowered to assent to a law passed by the legislature, withhold his assent or reserve the law for signification of the King's pleasure.

Appointments to the office of Minister are made by the Governor. They shall not exceed six in number, one of whom shall be the head of the ministry and is styled the Prime Minister (previous to 1933 Premier).

The Governor and Commander-in-Chief of the Colony is assisted by an Executive Council. A session of the legislature is to be held once at least in every year. The duration of each house will be five years. Women are entitled to vote at elections and to sit in the Legislative Assembly (since 1933, Parliament).

Formerly the Colony was divided for electoral purposes into 15 two-member Constituencies, but under the Electoral Districts Delimitation and Voters' Lists Act of 1928 (as amended by Act No. 3 of 1933) the Colony is divided into four two-member Constituencies, and 22 single-member Constituencies.

Under the new Electoral Law promulgated on 19th November, 1937, the franchise is extended to all British subjects by birth or naturalisation, not under 21 years of age, who have resided in the Colony for at least six months, subject to certain other qualifications respecting the occupancy of houses and other buildings, ownership of a mining location, the receipt of income, wages, or salary at the rate of not less than 100*l.* p.a. Subject to the six months residential qualification, a married woman is deemed to possess the same qualification as her husband in cases where she does not possess the said qualifications in her own right. Natives can acquire the franchise on the same conditions as Europeans. Persons who, although not British subjects, had their names on the voters' list in force on 27th July, 1928, or if during a state of war they were at any time on active service, are also entitled to vote.

Sir Drummond Chaplin retired from the post of Administrator of Southern Rhodesia on the grant of responsible government. Lieut.-Col. Sir John Robert Chancellor, G.C.M.G., D.S.O., held office as Governor and Commander-in-Chief from October 1923 to September 1928. Sir Cecil Hunter Rodwell, G.C.M.G., held the office from October 1928 until the end of 1934; he is succeeded by Sir Herbert Stanley, G.C.M.G.

Local Government.

Salisbury and Bulawayo were constituted municipalities in 1897, Gwelo and Umtali in 1914, Gatooma in 1917, and Que Que in 1934. Salisbury was created a city in 1935. Town Management Boards have been appointed at Victoria, Umvuma, Enkeldoorn, Shabani, Bindura, and Selukwe. Village Management Boards are appointed for twelve other principal places. In certain districts, Road Councils have been established for the improvement of roads in their area.

Chief Towns.

The six chief towns of Southern Rhodesia are Salisbury (the seat of the Government), Gatooma,

Digitized by Google

and Umtali in Mashonaland; and Bulawayo, Gwelo, and Que Que in Matabeleland.

Railways.

The Bechuanaland Railways (now Rhodesia Railways, Limited) reached Bulawayo and was formally opened in 1897. An extension of the Beira Railway from Umtali to Salisbury was opened in 1899. In 1900, the widening of the gauge of the Beira Railway to 3 feet 6 inches, the standard gauge of South Africa, was completed. In 1902 the line was completed between Salisbury and Bulawayo, a distance of 299 miles, thus establishing through communication between Cape Town and Beira (2,033 miles). The line passes through the mining districts of Hartley, Que Que, Gwelo, Bembesi, etc. The railway from Bulawayo to the Victoria Falls (280 miles) on the River Zambesi was completed in June, 1904, and the further extension northward into Northern Rhodesia, *via* Kalomo, to the Broken Hill Mine, 375 miles from the Falls, was opened for traffic in 1906. A further section of the line from Broken Hill to the Congo Border (132 miles) was completed in 1909, by the Rhodesia-Katanga Junction Railway and Mineral Company, Limited. There is, therefore, through communication between Cape Town and the northern border of Northern Rhodesia, a total distance of 2,165 miles and thence to Bukama in the Belgian Congo, a total of 2,610 miles. The distance from Cape Town to Beira is 2,033 miles. The Zambesi river is crossed by a bridge 650 feet long, 30 feet wide, and about 420 feet above the level of the water. The structure was formally opened by the late Sir G. H. Darwin, K.C.B., President of the British Association, in 1905.

During 1928, a new branch railway extending from Somabula to Shabani, a distance of 62 miles, was opened, tapping an important mineral area yielding asbestos, chrome, etc.

A branch line from N'dola to Roan Antelope (Northern Rhodesia), 23¾ miles in length was opened for traffic in 1929. Branch lines constructed since 1929 include (*a*) the N'kana Branch in Northern Rhodesia and (*b*) the Lomagundi Branch Extension and the Umvukwes Branch in Southern Rhodesia.

The total mileage of the Rhodesian Railway Systems (including the Beira Railways) on 30th September, 1937, was 2,709 miles, of which 1,356 miles were situated in the Colony.

The Trans-Zambesia Railway was officially opened in 1922. The railway is 157 miles in length from its junction at Dondo with the Beira and Mashonaland trunk line, and the total distance from Beira to the Zambesi is 175 miles. The gauge of the line is the same as that in Rhodesia and Nyasaland.

Settlements with British South Africa Company.

In 1923 a settlement of the various outstanding questions relating to the Company's position in Southern and Northern Rhodesia was arrived at with His Majesty's Government. The effect of the settlement, which was conditional upon its acceptance by the shareholders and the approval of Parliament, was that the Company surrendered its rights and claims under the judgment of the Judicial Committee of the Privy Council relating to Southern Rhodesia, and under the award of Lord Cave's Commission; that it surrendered its buildings and assets used for administrative purposes, and its land and monopoly rights other than mineral rights under its concessions in Northern Rhodesia; that on the other hand the Company would receive on 1st October a cash payment of 3,750,000*l.* from His Majesty's Government, and would retain a half interest for 40 years in the net proceeds of the disposal of land in North-Western Rhodesia, such disposal to be in the hands of the administration of the territory; that it would receive the Crown's recognition of its mineral rights throughout Rhodesia, Southern and Northern, and a considerable measure of protection for its railway interests; and that the Crown would waive its whole claim against the Company in respect of extraordinary military expenditure incurred in the course of the Great War. Subject to the foregoing, the Company would retain the whole of its commercial rights and assets; no further question would be raised as to any liability of the Company in respect of land appropriated for the purpose of its own commercial undertakings or granted to other parties; and the Company would be relieved of the duty of carrying on the administration of Northern as well as of Southern Rhodesia. Consequently no further litigation or proceedings before the Judicial Committee of the Privy Council would be required. At an Extraordinary General Meeting held on the 24th July, 1923, the shareholders unanimously approved the provisional arrangement made with His Majesty's Government, and on the 25th July it was approved by the House of Commons. On the 1st October the Company received a cash payment from His Majesty's Government of 3,750,000*l.* In 1933 the mineral rights in Southern Rhodesia still remaining in the possession of the Company were purchased by the Government of Southern Rhodesia for a sum of 2,000,000*l.*

Climate.

The Rhodesian plateau lies at an altitude of from 3,000 to 6,000 feet above sea level. Broadly speaking, the year has two divisions, the wet and the dry season. The early rains of the wet season (which is the summer) gradually appear towards the end of October, increase in frequency and force until January, and disappear about the end of April. From May to September there is practically no rain. Taking into consideration the vast extent of the territory the climate naturally varies. In the highlands it is very healthy and bracing. Formerly, in the low-lying districts, malarial fever was very prevalent, but with the opening up of the country, better housing and food, it is rapidly disappearing. The summer is not oppressively hot, nor is the winter very cold. The average temperature shown by the maximum and minimum thermometers in the shade at the principal towns, is as follows:—

Mean Temperatures °F.

	max.	min.	mean
Salisbury	77·4	53·6	65·5
Bulawayo	78·4	54·4	66·4
Gwelo ..	79·5	53·1	66·3
Umtali ..	77·1	57·1	67·1
Fort Victoria	78·2	53·4	65·8

The mean annual rainfall is 28·6 inches distributed as under:—

	Normal annual rainfall.
Western Matabeleland	25·2 ins.
South-Eastern Matabeleland ..	21·3 ,,
Western Mashonaland	31·1 ,,
North-Eastern Mashonaland ..	33·6 ,,
South-Eastern Mashonaland ..	32·2 ,,

Public Health Services.

GOVERNMENT MEDICAL OFFICERS, ETC.—The Establishment of Medical Officers in the Public Health Department consists of the following:—1 Medical Director, 2 School Doctors, 2 School Dental Surgeons, 2 Bacteriologists, 2 Medical Superintendents of the Leper Hospitals, 1 Alienist, 1 Government Analyst, 1 Radiologist, 1 Field Officer and 32 Government Medical Officers (25 permanent and 7 aided), who, with the exception of two (at Salisbury and Bulawayo), are allowed private practice. There is a considerable number of Private Practitioners in the Colony.

GOVERNMENT NURSING SERVICE.—The Government Nursing Service consists of 14 Matrons, 2 Dietitians, 2 Sisters Tutor, 27 Sisters, 2 District Nurses, 126 Qualified Nurses, 110 Student Nurses, 1 Masseuse. Though the Nursing Service was formerly entirely recruited from England, many nurses are now drawn from Southern Rhodesia and South Africa generally, and in 1932 an important advance was made in the holding of nursing examinations for the first time by the Southern Rhodesia Medical Council who now grant their own certificate of training. This certificate is reciprocally recognised by the Medical Council of the Union of South Africa and by the General Nursing Council of England and Wales and will enable its holders to practise in these countries.

HOSPITALS.—There are 12 General Hospitals in the Colony, situated at Salisbury, Bulawayo, Umtali, Gwelo, Fort Victoria, Enkeldoorn, Gwanda, Gatooma, Shamva, Sinoia, Bindura and Que Que, each supplied with a complete staff of Doctors and Nurses. The total number of in-patients admitted to hospitals in 1937 was 21,744, including 8,040 Europeans and 13,704 Asiatics, Coloured and Natives. Out-patients numbered 67,206 (Europeans 22,685, and Asiatics, Coloured and Native persons 44,521).

MENTAL HOSPITALS.—Reorganisation in the treatment of mentally disordered persons in the Colony has resulted in the appointment of a whole-time alienist of first-class English experience at the mental hospital at Ingutsheni, the introduction of up-to-date methods of treatment and provision for further accommodation for the more suitable segregation of the various types of patients. In addition, an out-patient clinic for psychiatric patients has been commenced at the General Hospital at Bulawayo. During 1937 the number of patients treated at the mental hospital was 638 (Europeans 159, non-Europeans and Natives 479).

MATERNITY HOMES.—There are 10 well-equipped and well-staffed maternity homes subsidised by the Government and controlled by local committees. At Salisbury the "Lady Chancellor Nursing Home" (opened in 1928), and at Bulawayo, the "Lady Rodwell Nursing Home" (opened in 1933), both large, well-equipped modern buildings, have replaced the old and inconvenient hostels which served the two towns previously.

MEDICAL COUNCIL.—The Council consists of 13 members, viz.:—5 Medical Practitioners, 2 Dentists, 3 Chemists and Druggists, 1 Legal Member and 2 Nurse Representatives.

MEDICAL, ETC., REGISTER.—The numbers of persons registered at 31st December, 1937, were:—Medical Practitioners, 157; Dentists, 46; Chemists and Druggists, 89; Trained Nurses, 280; Midwives, 70; Mental Nurses, 9; Masseuses, 4.

DEATHS FROM DISEASE (EUROPEAN).—The number of deaths and the corresponding death rates from the principal diseases during 1936 and 1937 are as follows:

Diseases.	Number of Deaths.		Death Rate per 100,000.	
	1937.	1936.	1937.	1936.
Diseases of the heart ..	77	81	134	146
Cancer	54	52	94	93
Pneumonia, all forms ..	44	51	77	92
Violent deaths ..	33	30	58	54
Diseases of early infancy	27	27	47	49
Malaria	26	50	46	90
Influenza	25	9	44	16
Blackwater Fever ..	11	16	19	29
Tuberculosis of the respiratory system ..	3	3	5	5
Bronchitis	2	7	4	12

GOVERNMENT QUININE.—In connection with the campaign against Malaria and Blackwater Fever, Quinine is bought wholesale by the Government and sold to the public through the medium of the Post Offices, etc., at (little more than) cost price. The number of bottles of quinine containing 100 tablets of 5 grains each issued for sale during 1937 was 15,691.

LEPROSY.—The Colony has now two large Government leprosy hospitals at which two whole-time Medical Superintendents have been appointed. One hospital is at Ngomahuru which is several years old and well equipped with efficient dispensaries, wards, etc. The other is at Mtoko and will shortly be fully equipped with facilities for the effective treatment of the disease. In addition to these two leprosy hospitals, small leper institutions are maintained by the Swedish Mission Hospital at Mnene in the Belingwe District, which is subsidised by the Government, and by the American Mission at Mt. Selinda in the Chipinga District. A total of 1,066 cases was under treatment during 1937 at all four hospitals, with 333 admissions.

Population.

The aggregate population of Southern Rhodesia according to the Census of May, 1936, was as follows:—

	No.
Europeans	55,408
Asiatic	2,180
Coloured	3,187
TOTAL	60,775

or

Estimated Population at 30th June, 1938:—

	No.
Europeans	58,870
Asiatic	2,360
Coloured	3,310
TOTAL	64,540

Estimated native population, 1,311,000 (provisional).

Natives (including non-indigenous natives) as at Census of May, 1936, were estimated at 1,243,000.

The European population of the principal towns (including adjacent suburbs) at the Census of May, 1936 was:—Salisbury (capital), 11,392; Bulawayo, 12,321; Umtali, 2,134; Gwelo, 1,487; Gatooma, 742; and Que Que (incl. the Globe and Phœnix Mine), 798.

MARRIAGES (EUROPEAN).—The number of marriages registered in 1937 was 686 compared with 675 in 1936. Marriage Rate (persons married per 1,000 of population):—24·0 per mille in 1937 and 24·3 per mille in 1936.

Native Administration.

The Letters Patent provide that there shall be a Native Department of Southern Rhodesia, the permanent head of which shall be appointed by the Governor-in-Council with the approval of the High Commissioner. The Department is administered by the Minister of Native Affairs. The duties of the Chief Native Commissioner are defined by High Commissioner's Proclamation No. 32 of 1913.

The Colony is divided into 31 native districts, each in charge of a Native Commissioner, who is appointed by the Governor, with the approval of the High Commissioner, as laid down in the Southern Rhodesia Order in Council, 1898, and whose duties are defined by the High Commissioner's Proclamation, No. 55 of 1910.

The estimated population of *indigenous* Natives was, at the end of 1937, 1,144,909, who are domiciled as under :—

In Native reserves	755,505
On Crown Land in European area	136,119
In Native Purchase Areas	59,190
On alienated land	184,999
On Native occupational areas on Crown Land	5,674
On mines and in towns	3,422
	1,144,909

In addition there were 149,040 *non-indigenous* Natives in employment in Southern Rhodesia at the end of 1937.

On the recommendations of the Native Reserves Commission appointed by the Imperial authorities, certain areas were set apart in 1920 as Native Reserves for the sole and exclusive use of the native inhabitants of Southern Rhodesia. The Reserves, 94 in number, have a total area of 21,132,000 acres. The natives occupy the Reserves in a quasi-communal form of tenure and no person can obtain an individual title to any part of the land.

Under the provisions of the Land Apportionment Act of 1930 and the Land Apportionment Act, 1937, 7,482,000 acres situated contiguously to the Native Reserves have been set apart for natives to acquire individual title to farms. Persons other than natives are prohibited from acquiring this land. Similarly natives cannot purchase land in the European area. A Land Board was inaugurated in 1931 to deal with acquisition of land by natives in the "Native Purchase Areas."

The only tax imposed upon the natives is an annual poll tax of 1*l.* on each adult male native, and should such native have more than one wife a further tax of 10*s.* for each additional wife is payable.

The wages paid to native labourers vary from 12*s.* 6*d.* to 3*l.* per month, with board and lodging.

There is also an increasing number of skilled native artisans, who command a much higher rate of pay.

At the end of the year 1937 it was estimated that the Natives owned 1,582,062 head of cattle, 243,816 sheep, 757,703 goats, 93,054 pigs and 77,737 horses, mules and donkeys. Efforts to persuade the Natives to breed a better class of cattle are meeting with success.

In the same year 85,135 ploughs were in use by Natives. The estimated total acreage under cultivation by Natives was 1,554,305 acres, while the yield of grain therefrom was estimated at 3,270,222 bags (of 203 lbs.).

The native agriculturist too is entering into competition with the European. The quantity of maize bartered or sold by natives during 1937 was estimated at 382,071 bags (of 203 lbs.) and of other cereals at 143,978 bags.

It is estimated that natives sold or traded 105,357 head of cattle in 1937.

Digitized by Google

During 1927 a whole time European Agriculturist was appointed for the instruction of natives in agriculture. By 1937 the European staff had been increased by an Assistant Agriculturist, 2 Soil Survey Officers and a Soil Conservation Officer.

Considerable progress has been made in the agricultural demonstration work on Native Reserves and during 1937 there were 4 trained Native Agricultural Supervisors, 63 Agricultural, 12 Community Demonstrators, 1 Irrigation Supervisor, 5 Irrigation Demonstrators, and 4 Erosion Control Demonstrators serving in the various demonstration centres.

There is an increasing tendency among the natives to adopt co-operatively methods of European farming.

Education.

In December, 1937, the number of public and aided European schools, including 1 vocational school, a primary teachers' training centre, a reformatory and Correspondence classes conducting primary work, was 120 with 10,750 pupils. The public expenditure on education during the year 1937 was 335,404*l.*, and educational revenue amounted to 77,579*l.*

Owing to the munificent bequests of the late Cecil Rhodes and Alfred Beit and to the abolition of tuition fees in all schools early in 1935, largely increased educational facilities are now afforded. Scholarships and Bursaries are granted to pupils in the country itself, and to matriculated Rhodesian students who continue their education at the various institutions of university standing in South Africa. In addition, there are nine "Rhodes Scholarships" (three per annum), which enable Rhodesian boys to take a three years' course at the University of Oxford.

There were also open at the end of 1937, 10 public and aided schools for Coloured and Asiatic children. At the end of December these had a total enrolment of 1,242 pupils. The expenditure on these schools, also included in the total expenditure of the department, was 9,349*l.*

At the beginning of 1928 a Native Education Department, now known as the Native Development Department, was formed which is entirely separate from the European Education Department. Facilities are now available for stricter supervision and correlation of curricula which are necessary if progress is to be made. All of the Native Schools are run by Missionary Societies with the exception of two Government Schools. All schools receive Government grants on a capitation basis. The number of grant-earning Native Schools at the beginning of 1937 was 1,291, and the number of pupils was 104,483. The total expenditure of the Government on Native Development amounted to 128,032 in 1937-38, including Grants-in-aid estimated at 60,724*l.*

Minerals.

GOLD.—That gold was obtained from Rhodesia in very early times is evidenced from the innumerable "ancient workings," the ruins of temples and forts supposed to date from the time of the Himyarites and Phœnicians, and the discovery of gold beads, gold plates, fine chains, wire, nails, etc. From the occupation of the country in 1890 by the British South Africa Company when the European population amounted to about 500 persons, consisting of the pioneers and a few officials, up to September, 1898, the gold produced only amounted to 6,470 ounces. Since that date the mining industry has been greatly developed, numerous mines are producing gold, and in 1937 the output was valued at 5,656,693*l.* Large beds of coal of excellent quality are worked at Wankie, about 212 miles from Bulawayo, and 70 miles from the Victoria Falls on the River Zambesi, and the production of chrome iron ore and asbestos is of importance in the markets of the world. The following shows the mineral output from Southern Rhodesia during 1937 :—

Mineral.	Quantity.	Value.
		£
Gold, ounces	804,219	5,656,693
Asbestos, tons	57,014	840,026
Coal, tons	1,134,656*	497,724†
Chrome ore, tons	303,817	367,386
Tungsten concentrates, tons	275	48,613
Tin concentrates, tons ..	223	31,846
Other Minerals	—	40,575
Total	—	£7,482,863

In addition to the above, iron pyrites, silver, tin concentrates, mica, ochre, lead, antimony, diamonds, nickel ore, corundum and tantalum were produced in small quantities in 1937.

The total value of the mineral production from the commencement to 31st December, 1937, amounted to 139,429,673*l.*, of which gold accounted for 106,235,854*l.*

Mortality and Labour on Mines (Native Labourers).

The daily average numbers of Natives employed and the mortality rates from Disease, Accident and All Causes in 1937 are shown below :—

Number and Causes of Death.	1937.
	No.
Average number employed	90,600
Deaths :—	
Disease	839
Accident	168
All causes	1,007
Death Rate per annum—	Per 1000.
Disease	9·26
Accident	1·85
All causes	11·11

Agriculture and Lands.

Livestock.—Southern Rhodesia as a whole is a well watered country, suitable in most parts for mixed farming. In the southern section, where the rainfall is lower, the conditions are favourable for ranching. European breeds of cattle do well under most conditions, but it is generally considered desirable to maintain a proportion of the indigenous blood in the female breeding stock in areas where supplementary feed in the dry season is difficult to produce in sufficient quantities.

There is a good local market for beef cattle and a regular export trade in chilled and frozen beef and beef products has been in progress since 1931. This export trade has established a definite outlet capable of great expansion for Rhodesian products in the United Kingdom.

The Dairy Industry has shown much progress in recent years and the better dairy herds in the Colony have now reached a high standard. Pigs do exceptionally well and an export trade in frozen pigs, porkers and baconers to the United Kingdom has been started which appears to hold out much promise. With proper care sheep do well in most parts of the

* Quantity raised.

† Value of amount sold and estimated value of coal used for coke.

Digitized by Google

Colony. Woolled sheep have so far done best on the Eastern Border, but small flocks of Blackhead Persian and Native sheep are common throughout the Colony. There is room for considerable expansion in this industry. The poultry industry is making progress and has not yet been exploited to the limits of its possibilities.

Chilled and Frozen Meat.—Under agreement with the Government, Liebigs (Rhodesia) Limited have opened Meat Extract works at West Nicholson, capable of handling 25,000 to 45,000 head of cattle annually, and the Cold Storage Commission of Southern Rhodesia, financed by the Government of this Colony, has now taken over the export works for chilled and frozen meat in Bulawayo. This plant has a capacity at present of 1,200–1,500 tons of chilled and frozen meat monthly besides the usual by-products.

Cereals, etc.—Maize is the staple grain crop, and the Colony has specialised in the production of the flat whites used overseas chiefly for manufacturing purposes. The quality of Rhodesian maize is second to none, and in the season 1936–37 some 2,039,341 bags (203 lbs. weig .t) of this grain were grown by the European farmers.

The climate of the greater part of the Colony is sub-tropical, and while maize remains the principal grain crop, European cereals are also grown together with potatoes, beans, buckwheat, linseed, and oil yielding crops such as ground nuts and sunflower, the two latter being sold to the local mills for oil extraction and the manufacture of oil seed cake, any surplus being exported.

Tobacco.—The set-back experienced by the tobacco industry during the seasons 1927–28 and 1928–29 caused a serious reduction in the area planted to tobacco, but a period of recovery has now definitely set in and the production of tobacco, largely under the influence of the preference on the British Market is again increasing, and for 1936–37 the farm crop totalled 22,048,804 lbs.

Southern Rhodesia is eminently capable of producing a high-grade type of leaf, the lighter soils producing a particularly bright Virginian variety, usually flue-cured.

Attention is now being directed to the establishing of oversea markets on which the future development of this crop depends and two tobacco auction floors have been established in Salisbury.

Cotton.—There are indications that parts of Southern Rhodesia will eventually become cotton producing areas. The country is equipped with first-class facilities for ginning the cotton crop, and turning out high-density bales suitable for export to Liverpool and the Continent. The question of the most suitable variety of cotton has been receiving the attention of the Government, who have established a cotton breeding and Experiment Station at Gatooma. The Empire Cotton Growing Corporation are collaborating with the Government of Southern Rhodesia in their endeavour to establish the industry on a sound basis, and an Act was passed during the 1936 Session of Parliament providing for the establishment of a Board to supervise research work on cotton and to assist the development of the cotton industry.

The cotton crop for 1936–37 totalled 672,239 lbs. of seed cotton.

Fruit.—The major fruit crop of the Colony is the Citrus; 162,352 boxes of fruit were exported in 1937. Part of the crop is converted into fruit juices and essential oils which find a ready sale in overseas markets.

The principal particulars relating to the agricultural, livestock and allied industries are as follows :—

	1935–36.	1936–37.
A.—*Area under principal European crops* :—	Acres.	Acres.
Maize (grain)	266,513	277,612

Land Settlement.—Southern Rhodesia offers many advantages to those seeking an opportunity for the investment of capital, to those looking for a country in which to settle and make homes and also to the tourist and big game hunter. Full information for prospective settlers can be obtained from the Department of Lands, Salisbury. On the arrival of settlers in the country, this Department will also render assistance and advice towards their acquiring the necessary knowledge of local farming conditions, for obtaining training with well known and successful farmers and eventually, if desired, for the purchasing of land. No charge is made for these services, nor for similar assistance obtainable from the staff of the Department of Agriculture amongst whose members there are specialists dealing with each of the more important branches of the agricultural industry. Special efforts are made to safeguard the interests of new settlers in the matter of the purchase of land.

Digitized by Google

Crown Land in Southern Rhodesia may be acquired from the Department of Lands of the Government, subject to reasonable occupation and development conditions. Crown Land is alienated usually under Agreement of lease or Agreement of purchase terms. The rental under the former is based on 4% of the total purchase price. Under an agreement purchase, the purchase price of the land is repayable in 20 equal annual instalments, without interest except on overdue instalments, the first being payable as at date of Grant, and, if the land is unimproved, and the Grantee holds no other land, a free period of three years is granted, before the 2nd instalment becomes due, at the discretion of the Government. Should there be improvements on the land, 1·20th is payable as at date of grant, and the balance, bearing interest at 4%, is repayable together with the instalments on the land. Should an agreement of purchase be issued on expiration of a lease, the rental paid on the land is credited to the purchase price. Should land be sold for cash, occupation and development for a period of five years are usually insisted upon. On completion of an agreement of purchase, Title is issued subject to payment of Land Grant Stamp and Title Registration fee. A Title Deed gives the holder the freehold of the land.

During 1938, with the object of encouraging immigration of British subjects from the United Kingdom into Southern Rhodesia, a scheme financed by the two Governments, was introduced, whereby grants towards the cost of steamship and rail fares up to a maximum of 35*l.* are made to immigrants selected by the Selection Committee of the 1820 Settlers' Association in London in co-operation with the Southern Rhodesian Government Immigration Committee. The address of the latter organisation is :—The Secretary, Southern Rhodesia Government Immigration Committee, P.O. Box 1242, Salisbury, S. Rhodesia.

Government Representatives.

Full details as to the administration of Southern Rhodesia, land settlement, climate and products, with routes to and from Rhodesia, can be obtained at the office of the High Commissioner of Southern Rhodesia, Rhodesia House, 429 Strand, London, W.C.2.

High Commissioner, Hon. S. M. L. O'Keefe, C.M.G.
Official Secretary, B. F. Wright.
Government Agent at Cape Town, Rhodesia Chartered Agency, Ltd., P.O. Box 41, Cape Town.
Representatives in Johannesburg :—Southern Rhodesia Publicity Office, Maritime House, Loveday St., P.O. Box 4586, Johannesburg.

Customs and Excise.

Customs duties were first imposed in this Colony in 1899, and agreements were then entered into with the Cape Government and the Bechuanaland Protectorate Administration for a payment of the share of the duties collected upon goods removed from one territory to the other. These arrangements terminated in 1901, and until 1903 this Government collected the whole of its own duties.

Excise duties were imposed in 1901.

In 1903 this Colony joined the South African Customs Union, which terminated in 1910, owing to the Union of the Southern Colonies, and was replaced by Customs agreements between this Colony and the Union, Northern Rhodesia, and the Territories of the South Africa High Commission.

As the result of a conference held early in 1930, a new Customs Agreement was entered into with the Union of South Africa, and in the same year further agreements were concluded with Northern Rhodesia and Bechuanaland Protectorate.

The 1930 Agreement with the Union of South Africa was terminated with effect from the 31st March, 1935, and was replaced by a Trade Agreement which commenced to operate on the 1st April. The new agreement differed in many important respects from its predecessor, among the foremost of its provisions being those contained in Articles III and VI wherein the imposition of Customs duties on imports into one territory of the domestic produce of the other territory was substituted for the previous system of inter-governmental credits and debits. The rates of duty leviable on such imports were those applicable to similar goods imported from the United Kingdom rebated by a basic percentage of 20 per cent. and by varying percentages in the case of specified articles. Imported merchandise re-exported from one territory to the other also became liable to duty, the former arrangements regarding transference of the duty originally collected in the country of export being cancelled.

In place of the fixed amount of 2,000,000 lbs. Virginia and 400,000 lbs. Turkish leaf tobacco, which under the 1930 Agreement secured free admission into the Union from Southern Rhodesia, the new Agreement provided for the regulation, after 30th June, 1936, of imports of Southern Rhodesian leaf tobacco by the Union Tobacco Control Board. Further limitations were also imposed on the trade with the Union in slaughter cattle.

The rates of Customs duties levied in Southern Rhodesia on food, drink, and tobacco are mainly specific, whereas those levied on other classes of commodities are mainly *ad valorem*.

There is, however, a large range of commodities, e.g., railway and mining material and many others, which are free of duty when imported from British countries, and these countries supply the bulk of the imports in these lines.

In the case of a large number of dutiable goods imported from the United Kingdom or reciprocating British Dominions it was provided under the "Rhodes Clause" that the duties thereon should not exceed 9 per cent. *ad valorem*. The duty on most of these articles has now been raised to 10 per cent. *ad valorem*. The duties levied on the same classes of goods when imported from foreign countries mostly range from 15 per cent. to 25 per cent. *ad valorem*, with alternative specific rates in many cases which exceed the *ad valorem* rates mentioned.

For financial reasons all items previously tariffed at 3 per cent. *ad valorem* when imported from foreign countries have since March, 1931, paid a duty of 5 per cent. *ad valorem*. Such goods when imported from British countries are usually free of duty.

Customs Houses are established at the following ports of entry, viz. :—

Beira, Bulawayo, Gwelo, Plumtree, Salisbury, Umtali, and Beitbridge.

The net amount of Customs and Excise Revenue collected amounted to 782,768*l.* in 1934, 786,806*l.* in 1935, and 803,336*l.* in 1936.

British Preference.

The amount of preferential rebate granted to United Kingdom and British Empire goods reached the following amount in 1936, viz. :—

	Amount. £	Per cent.
Duty at full tariff rates ..	1,153,830	—
Duty at preferential rates ..	520,400	45·12
Preference granted	633,431	54·88

The foregoing calculation excludes imports from Northern Rhodesia and the Bechuanaland Protectorate which are governed by other conditions.

Digitized by Google

*Imports and Exports.**

The aggregate value of the trade of the Colony including Government Stores, Bullion and Coin during the last three years has been as follows :—

Year.	Total Imports.	Re-Exports.	Net Imports.
	£ 1,000	£ 1,000	£ 1,000
1935	6,556	971	5,585
1936	7,027	902	6,125
1937	8,569	1,274	7,295

Year.	Total Exports.	Re-Exports.	Domestic Exports.
	£ 1,000	£ 1,000	£ 1,000
1935	9,028	971	8,057
1936	10,153	902	9,251
1937	11,979	1,274	10,705

The values of the principal commodities imported (exclusive of Government Stores) into the Colony during 1937 were as follows. The corresponding figures for 1936 are in brackets :—Cotton piece goods 528,222*l.* (356,059*l.*); motor cars 360,474*l.* (349,065*l.*); mining machinery 286,705*l.* (221,719*l.*); apparel, outer garments 279,361*l.* (242,245*l.*); industrial machinery, not included elsewhere 270,914*l.* (256,680*l.*); electrical machinery 247,132*l.* (127,488*l.*); motor spirit 246,046*l.* (286,684*l.*); motor trucks 210,129*l.* (175,713*l.*); rails, heavy 161,672*l.* (173,241*l.*); other railway material 172,175*l.* (124,061*l.*); bicycles, tricycles and parts 139,136*l.* (81,589*l.*); blasting compounds 131,041*l.* (122,685*l.*); blankets and rugs, cotton 125,105*l.* (71,732*l.*); electric cable and wire 122,913*l.* (49,128*l.*); sodium cyanide 112,620*l.* (118,154*l.*); cotton underclothing 106,583*l.* (90,351*l.*); whisky 94,479*l.* (86,965*l.*); fertilisers 92,410*l.* (76,779*l.*); wooden furniture 88,890*l.* (66,955*l.*); motor car tyres 84,952*l.* (69,053*l.*); sugar 82,486*l.* (62,748*l.*); bags, jute for grain 78,399*l.* (70,218*l.*); gold bar 75,880*l.* (42,312*l.*); soft haberdashery 75,051*l.* (60,297*l.*); iron and steel pipes and pipings 72,850*l.* (47,591*l.*); motor trucks chassis 70,285*l.* (35,527*l.*); ploughs 66,698*l.* (44,279*l.*); iron and steel sheets, galvanised and corrugated 63,198*l.* (44,372*l.*); wheat in the grain 61,741*l.* (52,499*l.*); woollen and other underclothing 61,570*l.* (42,810*l.*).

The chief exports of domestic produce in 1937 were as follows, the corresponding figures for 1936 being shown in brackets :—Gold bar 5,614,091*l.* (5,623,203*l.*); raw asbestos 1,230,120*l.* (959,290*l.*); unmanufactured tobacco 934,204*l.* (652,154*l.*); chrome ore 673,258*l.* (465,030*l.*); maize 506,333*l.* (313,139*l.*); coal 247,910*l.* (185,646*l.*); meats, fresh, frozen or chilled 225,628*l.* (157,770*l.*); cattle hides, wet 129,043*l.* (86,820*l.*); wooden railway sleepers 89,590*l.* (89,567*l.*); cattle hides, dry 83,459*l.* (57,831*l.*); preserved meat 68,653*l.* (71,955*l.*); cement 68,502*l.* (45,598*l.*); cigarettes 60,995*l.* (49,978*l.*); ale, beer and stout 54,823*l.* (38,570*l.*); coke and patent fuel 49,510*l.* (18,690*l.*); flour and meal wheaten 49,049*l.* (26,285*l.*).

* During 1937 the value of gold bar was calculated at the price current on the day of export, and not, as hitherto, at the standard price of 4·24773*l.* per fine oz. Export figures for the years 1935 and 1936 have been amended to include the value of the gold premium.

Direction of Trade in 1937.

The principal sources of supply in respect of imports of private merchandise in 1937 are indicated below :—

(These figures are exclusive of Specie.)

Country of Origin.	Amount.	Proportion of Total.
	£1,000	Per cent.
United Kingdom	3,841	46·3
Union of South Africa ..	1,294	15·6
Rest of Empire	756	9·1
United States	816	9·8
Other Foreign Countries ..	1,592	19·2
TOTALS	8,299	100·0

All imports are valued for Statistical purposes at the free-on-board price (free-on-rail for imports overland) to the importer. The retail or consumption value will be in excess of the above figures.

The principal destinations of exports of private merchandise in 1937 were as follows :—

Country of Destination.	Amount.	Proportion of Total.
	£1,000	Per cent.
United Kingdom	7,490	62·8
Northern Rhodesia.. ..	1,517	12·7
Union of South Africa ..	600	5·0
Rest of Empire	465	4·0
United States	653	5·5
Belgium	210	1·8
Other Foreign Countries ..	985	8·2
TOTALS	11,920	100·0

Exports are valued at the selling price free-on-rail at the place of despatch, including the cost of packing and packages.

Trade with United Kingdom, 1933–37.

The value of goods Imported from and Exported to the United Kingdom for five years are given below :—

Year.	Imports of Private Merchandise.		Exports of Private Merchandise.	
	Amount.	Proportion of Total.	Amount.	Proportion of Total.
	£1,000	Per cent.	£1,000	Per cent.
1933	2,092	47·9	4,771	72·6
1934	2,400	46·2	5,991	71·9
1935	2,975	47·4	6,184	69·0
1936	3,107	46·0	7,019	69·3
1937	3,841	46·3	7,490	62·8

Posts and Telegraphs.

All First Class Mail to and from the United Kingdom and Southern Rhodesia is carried by the Empire Flying Boats of Imperial Airways between Southampton and Beira. From Beira the mail is conveyed to Northern and Southern Rhodesia by the Rhodesian and Nyasaland Airways. The time of the journey between England and Salisbury is five days and the postage rate 1½d. a half ounce.

Digitized by Google

Other mails to and from the United Kingdom and Southern Rhodesia are conveyed by the mail steamers of the Union Castle Company between Southampton and Cape Town, and conveyed thence by rail to Bulawayo and Salisbury.

The rate for iuland letters is 1*d.* per ounce. Letters to all countries in the British Empire are now carried by Air Mail, the rate being 1½*d.* per half ounce. Letters to foreign countries are normally carried by ordinary mail at 3*d.* for the first ounce and 2*d.* for each additional ounce; if transported by Air Mail the rate is considerably higher and varies for the countries concerned.

On the 31st of December, 1937, 247 post and telegraph offices were open in Southern Rhodesia, at 51 of which Savings Bank business was transacted. Telegraph Money Orders are also exchanged with Northern Rhodesia, Mocambique, the Union of South Africa, the United Kingdom, and Nyasaland.

The Southern Rhodesia Telegraph and Telephone system extends from Ramathlabama, on the northern border of the Cape Province, to Zinto in Portuguese East Africa. The magnitude of the combined Telegraph and Telephone systems at the end of 1937 was as follows:—

Telegraphs and Telephones.—Length of line 8,103 miles; length of wire, 39,925 miles.

At the 31st December, 1937, there were 5,676 subscribers to the various telephone exchanges.

The Post Office Savings Bank was established in 1905. Up to the 31st December, 1937, the total amount deposited since 1905, including accrued interest, was 4,589,066*l.*, and the amount withdrawn was 3,875,049*l.* 720,764*l.* was invested in Trustee Securities at 31st December, 1937.

Revenue and Expenditure.

Revenue.—The total revenue of the Colony in the financial year 1937–38 amounted to nearly 3½*l.* million of which approximately three-quarters were derived from taxation, both direct and indirect. The principal source of revenue from taxation is Customs and Excise duties; the tariff, on the whole, is moderate The exemption limit for Income Tax is high and the rate of tax is low.

The figures of Revenue during the last five years are given below:—

Year.	Tax Revenue.	Non-Tax Revenue.	Total Revenue.
	£1,000	£1,000	£1,000
1933–34..	1,721·3	744·1	2,465·4
1934–35..	1,993·9	728·1	2,722·0
1935–36..	2,046·8	773·7	2,820·5
1936–37..	2,217·5	842·3	3,059·8
1937–38*	2,491·3	943·1	3,434·4

The main sources of revenue in the year 1937–38* were as follows:—Customs and Excise, 997,630*l.*; Income Tax, 793,785*l.*; Native Tax, 397,500*l.*; Posts, Telegraphs and Telephones, 337,820*l.*; Mining Royalties, 205,905*l.*; Stamps and Licences, 169,320*l.*; Mining Fees, 73,455*l.*

Expenditure (including Expenditure out of Loan Funds):—

The expenditure of the Colony since the grant of Responsible Government in September, 1923, has been conducted on economical lines, without in any way hindering necessary development. Ordinary expenditure has been met out of Revenue, but deficiences in respect of Schools, Post Offices, Roads, Public Buildings, etc., which had accumulated during the few years prior to Responsible Government have had to be met out of Loans. The expenditure under these two heads for the past five years is as follows:—

Year ended 31st March	Expenditure from Revenue.	Expenditure from Loan Funds.	Total.
	£1,000	£1,000	£1,000
1934 ..	2,500·2	2,366·5	4,866·7
1935 ..	2,636·5	475·8	3,112·3
1936 ..	2,888·4	762·8	3,651·2
1937 ..	3,017·6	1,060·8	4,078·4
1938* ..	3,168·5	1,186·2	4,546·8†

The main avenues of expenditure (including loan expenditure) in 1937–38* were:—Service of Loans, 492,765*l.*; Agriculture and Lands, 367,264*l.*; Police and Defence, 340,157*l.*; Education, 337,068*l.*; Public Works, 301,335*l.*; Roads, 395,160*l.*; Posts, Telegraphs and Telephones, 285,102*l.*; Public Health and Hospitals, 257,894*l.*; Native Affairs, 173,897*l.*; Mines, 172,800*l.*; Pensions and Gratuities, 148,681*l.*; Native Development, 128,032*l.*

The accumulated Revenue surplus over Expenditure at 31st March, 1938, was 366,302*l.*

The Public Debt at 31st March, 1938, amounted to 12,367,224*l.*

The Budget for 1938–39.

For the financial year ended 31st March, 1939, the Finance Minister's estimate of ordinary Revenue was 3,320,000*l.* Tax Revenue was estimated to yield 2,384,750*l.* and non-Tax Revenue 935,250*l.*

Expenditure out of Revenue was put at 3,456,407*l.* and the estimated Expenditure to be defrayed from Loan Funds was put at 1,409,064*l.*

Courts.

There are High Courts at Salisbury and Bulawayo, while the High Court Judges hold Circuit Courts as required at Umtali, Gwelo, Umvuma and Fort Victoria. In addition there are 8 Magistrates' Courts and 38 Assistant Magistrates' and Native Commissioners' Courts.

Southern Rhodesia Government.

Governor, Sir Herbert Stanley, G.C.M.G., 4,000*l.*, 1,000*l.* personal allowance and 1,000*l.* entertainment allowance.

Superintendent, Capt. H. G. Seward.
Assistant Superintendents, Lieut. F. W. Harrison, Lieut. R. H. Borland.

NAURU.

Nauru (0° 26′ S., 166° 56′ E.), an uplifted atoll, about 12 miles in circumference, was discovered by Captain Fearn in 1798, and was annexed by Germany in 1888. It has an area of nearly 8½ square miles. There is a ring of fertile land between the sea and a plateau about 40 to 60 feet above sea level. The plateau contains extensive phosphate deposits.

Nauru was surrendered to H.M.A.S. "Melbourne" in November, 1914, and, at the request of the Commonwealth Government, was administered under the High Commissioner for the Western Pacific until June 10th, 1921. A mandate conferred by the Principal Allied and Associated Powers on the British Empire to administer Nauru was approved by the Council of the League of Nations in December, 1920.

By an agreement dated 2nd July, 1919, confirmed by the Nauru Island Agreement Act, 1920, and by the Parliaments of the Commonwealth of Australia and New Zealand, the British Government and the Governments of the Commonwealth and New Zealand agreed that the island should be governed by an Administrator, the first to be appointed for a term of 5 years by the Commonwealth Government, thereafter the Administrator to be appointed in such manner as the three Governments should decide. Four Administrators have been appointed by the Australian Government under this Agreement: Brigadier-General Griffiths, C.M.C., C.B.E., D.S.O., June, 1921, W. A. Newman, M.B.E., 1927, Commander R. C. Garsia, Royal Australian Navy (rtd.), 1933, Lt.-Col. F. R. Chalmers, C.M.G., D.S.O., 1938.

The Administrator has power to make Ordinances for the peace, order, and good government of the Island, to provide for the education of the children on the Island, to establish and maintain the necessary Police Force, and to establish and appoint Courts and Magistrates with civil and criminal jurisdiction.

Digitized by Google

The agreement dated 2nd July, 1919, also provided for the working of the phosphate deposits. The exclusive right to work these deposits was granted by the German Government to a German company which transferred it in 1905 to the Pacific Phosphate Company, a company registered in Great Britain, which commenced to work the deposits in 1906. In 1920 the interests of the Company in Nauru and in the phosphate deposits of Ocean Island were purchased by the British, Commonwealth, and New Zealand Governments. By the agreement between the three Governments, the deposits in Nauru were vested in, and the working and sale of the phosphate entrusted to, a Board of three Commissioners, one appointed by each Government. The functions of the British Phosphate Commissioners, so far as Nauru is concerned, are limited strictly to the business connected with the working of the phosphate deposits. The Administrator is responsible for all matters relating to the Government, the moral and social welfare, the labour conditions and health of all the people on the Island. The British Phosphate Commission is treated in the same manner as if it were a private company. Exports of phosphate during the last five years :—

1932	.. ..	418,180 tons
1933	.. ..	363,680 ,,
1934	.. ..	418,950 ,,
1935	.. ..	480,950 ,,
1936	.. ..	547,400 ,,
1937	.. ..	688,900 ,,

Of the 688,900 tons valued at 513,989*l.* exported in 1937, 463,925 tons went to Australia and 196,850 tons to New Zealand.

Nauru has an independent customs tariff which provides duties at specific rates on alcoholic liquors, narcotics, cigars, cigarettes, tobacco, and cylinder blocks for motor-cycle engines; all other goods are exempted from customs duty.

The population figures taken on the occasion of the annual census (1st April, 1938) are :—

Natives of Nauru	1,661
Natives of China	1,533
Europeans	179
Other Pacific Islanders	27
	3,400

There has been a steady increase in the native population since the introduction of the Mandatory Control as will be seen from the following table :—

1925 ..	1,220	1934 ..	1,567
1928 ..	1,297	1937 ..	1,638
1931 ..	1,426	1938 ..	1,661

Statistics.

Year.	Revenue.	Expenditure.	Imports.	Exports.
	£	£	£	£
1928	19,903	18,267	240,229	362,112
1929	19,936	17,859	101,691	346,052

PART II. — C. HISTORICAL AND STATISTICAL ACCOUNT, WITH PUBLIC ESTABLISHMENTS, OF THE COLONIES AND OTHER TERRITORIES WITH WHICH THE COLONIAL OFFICE IS CONCERNED.

ADEN.

The peninsula of Aden is situated in lat. 12° 47' N. and long. 45° 10' E., about 100 miles east of the Straits of Bab-el-Mandeb, on the Arabian coast. The colony of Aden (the total area of which, exclusive of Perim, is 75 square miles) consists of two old craters forming rocky peninsulas: — Aden proper (area 21 square miles: population 34,471), on the south, and Little Aden (area 15 square miles) on the west—and a flat strip of coast, about three miles broad (area 39 square miles; population, including Sheikh Othman, Imad, and Hiswa, 12,167). The peninsulas form the horns of a bay called Aden Back Bay, which is about eight miles broad from east to west and about four miles deep. Its entrance is about three miles across. The native town of Aden is situated on the east of the Aden peninsula, opposite a gap in the crater walls. On the west side of the peninsula, some five miles from the town, is Steamer Point, off which the large steamers lie. The highest point of the peninsula is 1,725 feet above sea level. The average annual rainfall is about 3 inches, and the maximum is about 8 inches. The climate is very hot and damp, especially during the summer months.

Aden, after being a trade centre under its native kings, became subject in succession to the Abyssinians, the Persians and the early Caliphs. In 1538 it was captured by the Turks, who lost it some years later, but captured it again in 1551 and held it until they evacuated the Yemen in 1630. The Aden peninsula was occupied by the British in 1839, and in 1868 Little Aden was obtained by purchase. The coastal strip between the two peninsulas was secured by purchases in 1882 and 1888.

Aden is an important oil fuel and bunkering station, and also an *entrepôt* for the trade with Arabia and other adjacent territories. The exports consist of coffee, gums, skins and hides, cotton goods, dyes, feathers, spices, etc.

Aden is a free port and there is no customs tariff. Excise duty is, however, levied on spirits, wines and beer, perfumed spirits, intoxicating and dangerous drugs on a specific duty basis.

Administration of the Colony.

Under the provision of the Government of India Act, 1935, the administrative control of the Aden Settlement was transferred from the Government of India to that of the Colonial Office with effect from 1st April, 1937, from which date Aden assumed the status of a Crown Colony.

The administration of the Colony is vested in the Governor and Commander-in-Chief, who is assisted by an Executive Council.

In spite of the transfer in control it is intended that there should be as great a degree of continuity as possible in the machinery and methods of Government. This will involve the retention of the spirit and in many cases of the letter of existing laws and regulations, the preservation in judicial cases of the right of appeal to the High Court of Bombay, the continued use of Indian currency and the maintenance of the port as a free port.

The management of the port is under the control of the Board of Trustees formed in 1888. Of recent years the harbour has been deepened so as to permit vessels of up to 33 feet draft to enter and leave at all states of the tide.

The police force consists of land, harbour, and armed police.

The Executive Committee of the Aden Settlement performs all municipal functions in Aden.

Perim, a bare rocky island, five square miles in area, with a population of 1,700, lies in the Straits of Beb-el-Mandeb, about 1½ miles from the south-west corner of Arabia. It possesses a good harbour on the south-west side, with an entrance 860 yards in breadth. It was occupied by the British in 1799, but subsequently abandoned, and was only re-occupied in 1857, when the overland route to India made the position important. The Island of Perim was administered by the Agent of the Perim Coal Company at Perim, who was styled Government Agent, Perim, up to 10th November, 1936, from which date the Perim Coal Company closed their business on the Island. The administration is now in charge of the Commissioner of Police, Aden, who visits the island once a month by air. The harbour has been closed for shipping. The Sub-Treasury and Post Office have also been closed.

The Island forms part of the Colony of Aden.

The Kuria Muria Islands, five in number, off the Dhufâr Coast of Oman, also form part of the Colony. They were ceded in 1854 by the Imam of Muscat. Only Hallaniya, the largest island, is inhabited. The people are Mahris.

Aden Protectorate.

Boundaries.

The Aden Protectorate, which has an area of approximately 112,000 square miles, is bounded on the East by Dhufâr, which is part of the dominions of the Sultan of Muscat and Oman, and on the North and West by the Great Desert and the Kingdom of Yemen, whose southern boundary was temporarily fixed by Article III of the Treaty of San'â (February, 1934) by which His Majesty's Government and the Yemen Government agreed to maintain the status quo frontier as it was on the date of the signature of the treaty. The coastline of the Aden Protectorate starts in the West from Husn Murad, opposite the Island of Perim, and it runs eastwards to Ras Dharbat 'Ali, where it meets the Sultanate of Muscat and Oman.

History.

Up to the 18th century, the Aden Protectorate used to be in the hands of the Imam of San'â (capital of the Yemen of to-day) and several of the rulers of the tribal districts such as the 'Abdali, Haushabi, Amiri, Yâfa'i and 'Aulaqi Sultans, were the Imam's "wakils" or Governors until his power declined and they declared their independence. This occurred in 1728 in the case of the 'Abdali and 1758 in the case of the Yâfa'i.

After the occupation of Aden by the British in 1839, most of the neighbouring Chiefs entered into

Digitized by Google

Treaty relations with His Majesty's Government. Others followed suit as time went on, the last to do so being the 'Audhali Sultan in 1914. The treaties are Treaties of Protection.

In 1904, an Anglo-Turkish Commission delineated the frontiers between the Protectorate and Turkish Yemen.

In July, 1915, during the Great War, the Turks occupied the 'Abdali, Haushabi and Amiri districts until the Armistice.

Division of Aden Protectorate.

The Aden Protectorate can be more conveniently described by dividing it into two areas, the Western and the Eastern. The former consists of the following Tribal districts, the Chiefs of which are all in protective treaty relations with His Majesty's Government.

'Abdali, His Highness Sultan Sir Abdul Karim Fadhl, K.C.M.G., K.C.I.E., Sultan of Lahej, who is the premier Chief of the Western area.

Amiri, Amir Nasr bin Shaif Seif, C.M.G., Capital Dhāla'.

Fadhli, Sultan Salih bin 'Abdullah, Capital Shuqra.

Lower Yāfa'i, Sultan 'Aidrus bin Muhsin, Capital Al Qāra'.

Haushabi, Sultan Sarur bin Muhammad, Capital Museimir.

Upper Yāfa'i Confederation, Sultan Muhammad bin Sālih, Capital Mahjaba. Sheikh Bubakr 'Ali 'Askar, Naqib of the Mausatta Tribe, Capital Al Qudma. Sheikh Sālim Sālih, of the Dhubi Tribe, Capital Dhi Sura. Sheikh Qāsim 'Abdurrahman, of the Mafiahi Tribe, Capital Al Jurba. Sheikh Muhammad Muhsin Ghālib, of the Hadhrami Tribe, Capital Ash Shibr.

Shaib, Sheikh Muhammad Muqbil As Saqladi, Capital Bakhāl.

Quteibi, Sheikh Hasan 'Ali, Capital Ath Thumeir.

'Alawi, Sheikh Muhsin 'Ali Nāshir, the Alawi Sheikh, Capital Al Qash'a.

'Aqrabi, Sheikh Muhammad Fadhl Ba 'Abdullah, Capital Bir Ahmed.

'Audhali, Sultan Salih bin Husein, Capital Lodar.

Upper 'Aulaqi, Sultan 'Awadh bin Salih bin Abdullah, Capital Nisab. Sheikh Muhsin bin Farid, Capital Yeshbum.

Lower 'Aulaqi, Sultan 'Aidrus bin Abdullah, Capital Ahwar.

Beihān, Sharif Sālih bin Husein, Capital An Nuqub.

Subeihi, Sheikh Muhammad bin 'Ali, the Barhimi Sheikh. Sheikhs Muhammad 'Ali Ba Salih and Hawwash bin Sa'id, the 'Ātifi Sheikhs.

The Eastern area comprises the Hadhramaut (consisting of the Qu'aiti State of Shihr and Mukalla and the Kathiri State of Seiyun), the Mahri Sultanate of Qishn and Socotra, the Wāhidi Sultanates of Bir 'Ali (Sultan Nasir bin Thalab) and Bālihāf (Sultan 'Ali bin Muhsin), and the Sheikdoms of Irqa and Haura, all of which have been for many years in protective treaty relations with His Majesty's Government. His Highness Sultan Sir Salih bin Ghalib al Qu'aiti, K.C.M.G., Sultan of Shihr and Mukalla, is the premier chief in the Eastern Aden Protectorate, and the Hadhramaut is the most important and best organised of these areas. It is bounded on the west by the Wāhidi Sultanates and on the east by the Mahri Sultanate.

The Mahri Sultanate of Qishn and Socotra is the most easterly area in the Aden Protectorate, being bounded on the east by the Sultanate of Muscat and Oman. The Sultan of Qishn and Socotra resides on the island of Socotra (area 1,400 square miles), which lies 150 miles from Cape Guardafui. The island was occupied by the East India Company in 1834, and it came under British protection, together with the neighbouring Abdal Kuri and Brothers Islands, in 1886, when the treaty with the Mahri Sultan was concluded. Socotra produces aloes, dragons' blood and ghee. The population is probably about 5,000; the island is rather less than 100 miles from east to west and about 30 miles broad. Its interior is mountainous and the Fidahan Hajr rises to nearly 5,000 feet. The capital is Hadibu, known on European maps as Tamrida.

Population.

The population of the whole Protectorate is roughly estimated to be about 600,000. The people are chiefly Muslims, nearly all being of the Shafa'i persuasion, but there are also a few Jews. The Western Aden Protectorate is divided into tribal confederations and Sultanates, and the inhabitants are, for the most part, settled or agricultural, though a few are nomadic. The indigenous type of Arab is chiefly confined to the littoral and to the maritime ranges. Further North and East in the Protectorate chiefly in Yafa'i and 'Aulaqi territory, there is a taller and more semitic type who came originally from the Yemen, especially from Jauf.

Physicel Character.

The Western Protectorate is divided into:—

1. The littoral belt, which varies between 4—40 miles in width.
2. The maritime ranges.
3. The intramontaine plains, about 3,000 ft. above sea level.
4. The highland plateau ranging from 5,000 to 8,000 ft. which falls away into the
5. Great Desert, with a mean altitude of 2,500 ft.

The country between the littoral and the plateau is a tangle of mountains and valleys. Some of the valleys are very fertile. The plateau itself is broken up by numerous hills and it is intersected with several deep valleys. The plateaux of the Upper Yāfa' and 'Audhali districts are particularly fertile.

Climate.

The climate is not unhealthy, and the nights are usually cool. The cultivated oases and river beds such as the Lahej delta, Abyan, and the Tiban and Bana valleys are malarious.

In the maritime hills and intramontaine plains the heat is fierce, but dry, by day. On the highland plateaux it never gets unbearably hot even in the day time and in the summer, whilst the nights are always cool. In the winter one often seeks the sun for choice, while, at night, the cold is severe, though frost is rare. The air in the highlands is invigorating and the climate delightful.

There is little rainfall in the littoral and maritime hills and intramontaine plains, and cultivation is chiefly dependent on irrigation from the water courses.

On the highland plateaux water is obtained near the surface and irrigation is chiefly from wells which are numerous. There is more rainfall, while, in the summer, thunderstorms are frequent towards the evening and hail occasionally falls. The region is also liable to dense white mists which provide considerable moisture and are beneficial to agriculture.

On the southern fringes of the Great Desert rainfall is scarce, and the heat very fierce, contrasting with cool, and in the winter cold, nights.

The prevailing diseases are malaria, internal disorders and rheumatism. Bilharzia is common in the Tiban and Hardaba valleys, and guinea-worm is also met with. Consumptive cases are above the normal. Ophthalmia and cataract are fairly common, and the diseases of the eye are particularly common in the northern and coastal 'Aulaqi districts, perhaps on account of the frequent sand storms blowing

Digitized by Google

there. Perhaps the most common complaint is the "Yemen" ulcer. This ulcer is not harmful if treated in its early stage, but, if neglected, as is often the case in the interior, where few opportunities for cure exist, it develops into a septic, spreading sore, often resulting in the loss of a leg. In some of the bigger towns where sanitation does not exist and flies abound, dysentery is common.

Communications.

There are no railways or metalled roads in the Western Aden Protectorate. There are several natural roads which have been improved to take motor traffic. The chief of these are:—

1. Sheikh Othman to Lahej.
2. Lahej to Museimir.
3. Lahej to the Yemen frontier towards Ta'iz.
4. Lahej to the Yemen frontier towards Mafalis.
5. Lahej to Dhala'.
6. Khor Maksar to Abyan and Shuqra.

A rough road is under construction for motor traffic between Shuqra and the foot of the 'Audhali plateau.

Recently, successful attempts have been made to take passengers by motor traffic to the 'Aulaqi district as far as the foot of the main 'Aulaqi range of mountains, the route being *via* Ahwar on the coast. Passengers have also been taken by taxi to the port of 'Irqa. In the absence of roads suitable for motor traffic, communication is chiefly by camel, though in the mountainous districts of Upper Yāfa' mules or donkeys are more suitable.

The Royal Air Force maintain a number of landing grounds in the Protectorate.

There is no civil aircraft service in the Western Aden Protectorate, but the firm of Messrs. A. Besse recently ran a service between Aden, Mukalla and the Hadhramaut which has been temporarily suspended.

Products, Industries and Trade.

Agriculture is the chief occupation of the majority of the inhabitants of the Western Aden Protectorate. Viewed from the barren surroundings of Aden, it is difficult to realise the surprising fertility of the mountain valleys and slopes, and of the highland plateaux in the Protectorate. Every possible use is made of irrigation, and water rights are a frequent cause of tribal feuds.

The stable crops are "Dhura" and "Dukhn," a millet, of which there are various varieties. Indian corn is also grown. Wheat and barley are found at the higher elevations especially in Yafa', the 'Audhali plateau and the Yeshbum valley. Other crops are jiljil (sesamum) and lucerne. Dates are grown in the Subeihi country. Coffee is grown in Yafa'.

Of fruits, grapes, peaches and pomegranates are found in the Dhāla' district and 'Audhali plateau. Bananas and papayas are grown in the Lahej oasis and in some other parts.

Cotton and indigo ("hawir") is grown in Beihān and 'Aulaqi districts.

Honey is largely exported from Yeshbum, and to a less extent from the 'Audhali, Yāf'a and Dhāla' districts.

Trade in the Western Aden Protectorate is chiefly transit trade from the Yemen, from which coffee, skins and "qāt" are exported, the latter being a plant cultivated in the Yemen, the leaves of which are chewed. Most of the coffee, however, is exported by sea. In return, kerosene oil, piece goods and food stuff are imported. All the main trade routes from the Yemen pass through Lahej, a town 15 miles north of Sheikh Othman, and the Sultan of Lahej's chief source of revenue is derived from transit dues, which make him the richest and most important chief in the Western Aden Protectorate.

The only industries are weaving, dyeing, and charcoal burning, though some silver work is made by the Jewish community. Potash is manufactured in the 'Abdali and Fadhli districts. Sheep and goats are imported from Somaliland, while oxen, fodder, vegetables and fuel come in by caravan from the neighbouring districts.

Government.

His Majesty's Government does not directly administer the Aden Protectorate. In the Eastern Aden Protectorate there is a Resident Adviser to the Qu'aiti and Kathiri Sultans with a small staff, while the interests of the Western Aden Protectorate are looked after by a small cadre of Political Officers. At headquarters in Aden is the Political Secretary for the Protectorate, who is responsible to the Governor for Protectorate affairs. The Political Secretary has an assistant to help in Secretariat work.

The tribes nominate their own Chiefs, who have subsequently to be recognised by the Aden Government. The majority of the Chiefs have only limited control over their subjects, an outstanding exception being the Sultan of Lahej (or 'Abdali Sultan), whose wealth and trained military forces assist him.

There are no Government regular troops in the Aden Protectorate. In the Western Aden Protectorate the only Chiefs with trained troops are the Sultan of Lahej and, in a minor degree, the Amir of Dhāla'. The Amir of Dhāla' has, in addition, a small force of tribal guards. Other Chiefs with tribal guards are the Fadhli and Haushabi Sultans, and the Sharif of Beihan.

Latterly the Aden Government has raised a small force named "Government Guards" for police duties in the Protectorate. These, with the "tribal guards," are jointly known as "Protectorate Guards." They were raised and trained by a Political Officer in whose charge they are, but whereas the Government Guards are paid and controlled entirely by His Majesty's Government, the Tribal Guards are under the direct control of the Tribal Chief concerned, who also contributes to their upkeep.

Towns, Ports and Water Courses.

The chief towns in the Western Aden Protectorate are Lahej, Dhāla', Shuqra, Lodar, Ahwar, Yeshbum, Nisāb and Beihan al Qasāb. Upper Yāf'a has several large settlements, the largest being Beni Bak.

The chief ports are Shuqra, Masāni' (Ahwar), 'Irqa and Haura. The chiefs of the two latter have Protective Treaties with His Majesty's Government.

THE HADHRAMAUT STATES.

The Qu'aiti Rulers of Shihr and Mukalla entered into a Treaty with His Majesty's Government in 1882 in which they bound themselves not to cede any parts of their territories to any person or power other than the British Government without the consent of the British Government. In addition the Qu'aitis bound themselves to abide by the advice and conform to the wishes of the British Government in all matters relating to their dealings with neighbouring chiefs and foreign powers.

Prior to this treaty the Qu'aiti Jemadar of Shihr and the Kasadi Nakib of Mukalla had entered into agreements for the abolition of the slave trade in 1873, and an even earlier agreement (1863) had been made with the latter on the same subject. The treaty of 1882 was strengthened in 1888 by the conclusion of a Protectorate in the common form of the treaties with the Protectorate chiefs, and in 1918 the Kathiri Sultans of the Hadhramaut made an agreement with the Qu'aiti Sultan whereby the former acknowledged that this treaty was binding on them. This agreement provided for the conduct of relations between the Qu'aiti and Kathiri Sultanates and

Digitized by Google

acknowledged that the Province of Hadhramaut should be one province, an appanage of the British Empire under the Sultan of Shihr and Mukalla.

Shihr and Mukalla.

Sultan, His Highness Sultan Sir Salih bin Ghalib al Qu'aiti, K.C.M.G.

Heir apparent, Sultan 'Awadh bin Salih al Qu'aiti.

The Qu'aiti State of Shihr and Mukalla on the Gulf of Aden is bounded on the West by the Wahidi and 'Aulaqi Sultanates and the Kingdom of Yemen, on the North by the Great Desert and on the East by the Mahri Sultanate. The Kathiri State forms an enclave on the North.

The country is large in extent but the greater part of its surface consists of barren mountains intersected by Wadis, some of which are fertile and cultivated. Of these the most important are the Wadis Meifa, Hajr, Du'an, Leisar, and part of the Wadi Hadhramaut. The principal crops are millet, sesame, beans and wheat. These are all consumed locally, but Hamumi tobacco is exported and so is Du'an honey. The other exports are principally fish products.

The Capital and the Residence of the Sultan is Mukalla (population about 16,000); Shihr is also an important port and both are visited by ocean-going ships. The country is divided into five provinces. There are several hundred miles of motorable tracks, including the Al Kaf Road, which is under separate administration and links Tarim with Shihr. Other tracks are under construction.

The population is estimated at about 200,000, and the revenue and expenditure are about 7 and 6 lakhs of rupees respectively.

The relations between the Qu'aiti State and His Majesty's Government are governed by the treaties referred to above and by a treaty of 1937 by which His Majesty's Government agreed to appoint a Resident Adviser.

Resident Adviser, W. H. Ingrams, C.M.G., O.B.E., 1,000*l*., 400*l*. personal, 200*l*. entertainment, and quarters.

Assistant, E. C. Figgis, 700*l*.–800*l*.

Secretary, E. S. Kennedy, 350*l*.–500*l*.

Seiyun.

The Kathiri State of Seiyun is bounded on the North by the Great Desert and on all other sides by the Qu'aiti State. The Kathiri country was formerly of great extent: it still includes the most fertile portion of the Wadi Hadhramaut and its tributary Wadis such as Wadis Adim and Bin 'Ali. Its crops are mainly grain and dates, which are all consumed locally, but cotton grows well and this may develop into an export. The Capital and Residence of the Sultan is Seiyun (population about 18,000), but Tarim is also a large and important city which is joined with the port of Shihr by the Al Kaf Road, constructed by the Al Kaf Seiyids, who spend large sums on the advancement of the country. Kathiri towns and villages are mostly accessible by motor. The population is estimated at about 58,000 and contains a large number of extremely well-to-do people, who live mostly on remittances from the East Indies.

The relations between the Kathiri State and His Majesty's Government are governed by the Qu'aiti Treaty of 1886 and the Kathiri agreement of 1918.

Resident Adviser, W. H. Ingrams, C.M.G., O.B.E.

TRADE AND FINANCE.

BAHAMAS.

Situation and Area.

The Bahamas, the most northerly of the British West Indian Colonies, are an archipelago of islands, cays and rocks lying between 20° 51′ and 27° 25′ north lat. and 72° 57′ and 80° 32′ west long. and extending from Inagua on the South to Matanilla Reef on the North; from Mayaguana and its adjacent rocks and cays on the East to, and including, the Cay Sal Bank on the West, and separated from Florida, to the West, by the Straits of Florida, and from Cuba, to the South, by the Old Bahama and Nicholas Channels. About 20 of the islands are inhabited. The principal islands are New Providence (containing the capital, Nassau), Abaco, Harbour Island, Eleuthera, Inagua, Cat Island, Ragged Island, Rum Cay, Exuma, Long Island, Long Cay, the Biminis, and Watling's Island (or San Salvador), all of which are ports of entry; and Great Bahama, Crooked Island, Acklin Island, Mayaguana, the Berry Islands, and Andros Island (containing the only river). The total area is 4,375½ square miles, or about half the size of Wales

History.

San Salvador, so called by Columbus, the native name being Guanahani, one of the islands composing this chain, and identical with Watling's Island, was the first land discovered by him on his voyage in 1492. A few years later all the Carib inhabitants were transported to work in the Cuba mines. It does not appear that the Spaniards had any settlements on any of the islands of this group at any time. Early in the 17th century the islands were well known to the settlers of Bermuda and the Carolinas. They were included in the Royal Grant of Sir Robert Heath, the Attorney-General of England, of the 30th of October, 1629. By 1640 the islands had become a well-known place of resort by the inhabitants of Bermuda, and on the 9th of July, 1647, The Company of Eleutherian Adventurers was formed in London for the purpose of making an organised attempt at a systematic colonization and development of the islands. William Sayle, a former Governor of Bermuda, was the moving spirit of this venture, and associated with him were a number of influential city merchants and Members of Parliament. On the 31st of August, 1649, Parliament, on the petition of Sayle and others, passed "An Act for the Adventurers for the Eleutherian Islands," which constituted Sayle and his associates the Proprietors of the Islands. Notwithstanding the Royal Grant to Heath in 1629 and the Cromwellian Act of 1649, Charles the Second, on the 1st of November, 1670, granted the Islands to Six of the Lords Proprietors of Carolina, namely, the Duke of Albermarle, the Earl of Craven, Lord Berkley, Lord Ashley, Sir George Carteret and Sir Peter Colleton. Before the Royal Grant of 1670 the inhabitants of the islands had organised the Settlement and instituted a form of Government which included an elective House of Assembly, and had selected Captain John Wentworth as their Governor. Wentworth applied to and received Commissions from the Governors of Jamaica. The Lords Proprietors appointed Hugh Wentworth as their first Governor on 24th April, 1671, but he did not take up the appointment. They then confirmed in office John Wentworth, the popularly elected Governor, on the 26th of December, 1671. A regular system of government was established including a Parliament, the Lower House of which was elective, and this was continued with several breaks until the Civil and Military Government of the Islands was resumed by the Crown on the surrender of their rights by the Lords Proprietors on the 28th October, 1717. Thirteen Proprietary Governors were appointed between 1671 and 1715. The Settlement on New Providence was sacked by the Spaniards on several occasions between 1680 and 1684. In 1684 nearly all the inhabitants were driven away, and it was not until 1688 that the Settlement was re-formed by their return, principally from Jamaica, under the leadership of Thomas Bridges. Bridges was recognised as Governor by the Lords Proprietors on the 12th July, 1688, and the Settlement had reached some importance when it was practically annihilated by the French and Spaniards in 1703. However, a year or so after this the dispersed inhabitants returned to New Providence and another Proprietary Governor was appointed in 1707. But the Islands became a regular rendezvous for pirates, and this finally determined the Crown to resume the Civil and Military Government of the place, and thus accede to the numerous petitions which the inhabitants had been making for several years and also carry out the express wishes of Parliament. Since 1717 there has been a continuous line of Royal Governors. The Islands were surrendered to a Fleet of the American rebels in 1776, and again to the Spaniards in 1781, but they had been re-taken by a British force under Colonel Deveaux before the conclusion of the war, which was brought to an end by the Peace of Versailles, 1783, when the British possession was confirmed. After the American Revolution a number of Loyalists settled throughout the Bahamas Group and received substantial assistance from England, and on the 19th of March, 1787, the Lords Proprietors surrendered all their proprietary rights to the King for the sum of 12,000*l.*, which was provided by Parliament.

The Turks and Caicos Islands, which geographically form part of the Bahamas chain, and which had often in their early history been claimed both by Bermuda and the Bahamas, were separated from the other Bahamas in 1848, and formed into a distinct Presidency, under the government-in-chief of the Governor of Jamaica.

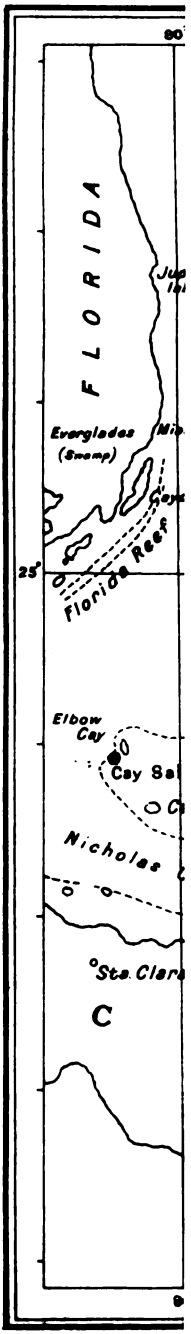
Climate and Inhabitants.

The climate is salubrious and very pleasant in the winter season, and the Colony has in recent years been much frequented by visitors from the United States and Canada, there being excellent hotels and other accommodation for tourists. The cost of living is very high; houses are difficult to obtain and rentals are high. The average annual rainfall is about 46 inches, the rainy season extending from June to October. From November to May the temperature averages 70° Fahrenheit, there is little rain, and cool breezes prevail. The lowest recorded temperature (in January, 1905) is 51.5°. In the summer months temperatures as high as 92° have been recorded. Three severe hurricanes passed over the Bahamas in 1926, on 26th July, 17th September and 20th October, causing loss of life and great destruction to property and shipping.

The Colony was visited by two hurricanes in 1928, one in August, which only affected the Southern part of Andros, and the other in September, which severely affected New Providence, Bimini, Cat Island, Eleuthera and Harbour Island.

In 1929 the Colony experienced a hurricane of exceptional severity which lasted from 25th to

Digitized by Google



Digitized by Google

Digitized by Google

27th September, causing great destruction to property and shipping in New Providence and Andros.

Another hurricane, one of the severest ever experienced in the Colony, swept the Island of Abaco in September 1932, practically wiping out some of the settlements with an attendant loss of 14 lives and 70 injured.

The majority of the inhabitants are of the negro race. About one-sixth are of European descent. English is universally spoken.

Trade and Industry.

The commercial relations of the Colony are mainly with the United States. Considerable quantities of pine-apples (canned), sponges, sisal and tomatoes are exported. In 1937 the principal exports were:—Sisal, 727 tons, valued at 8,477*l.* sponge, 9,589 cwts., valued at 95,350*l.*; lumber 3,313,000 feet, value 23,546*l.*; shell, value 3,224*l.*; tomatoes, 75,000 bushels, value 15,561*l.*; bark, value 1,092*l.*; salt, 138,000 bushels, value 1,584*l.*

The cultivation and preparation of the sisal fibre plant is an important industry. The estimated area planted at the end of 1929 was over 5,880 acres.

Fishing is extensively carried on for the Nassau market, about 82 native-built boats, with 460 men, being employed. Turtle-shell, shells and pearls are largely exported. Sponge-fishing employs a large fleet. The approximate number of vessels engaged in the industry is 476—aggregate tonnage 4,515—with 2,760 open boats, and a large number of long shore open boats; men and boys employed, 4,500.

Nassau is a port of registry, and had, on the 31st December, 1937, 192 vessels of 6,923 tons.

Principal imports during 1937; foodstuffs, value 332,250*l.*; malt, value 11,696*l.*; spirits and wines, value 45,778*l.*; tobaccos, cigars and cigarettes, value 16,631*l.*.

Lighthouses on several of the islands have been established, and are maintained by the Imperial Government. Several lights are also maintained by the local government.

Currency and Banking.

The legal tender currency is British sterling, although United States currency is also generally accepted in the Colony. Accounts are kept in sterling. There is a branch bank of the Royal Bank of Canada with deposits amounting to 1,886,659*l.* A Post Office Savings Bank was established in January, 1886, and had, on 30th June, 1937, 67,636*l.* deposited.

Means of Communication.

There is a telephone service in New Providence, Eleuthera, Long Island and Cat Island.

An automatic telephone system of the latest type, with three exchanges, City, Western and Eastern, is now being installed in New Providence, together with a comprehensive system of underground cables.

There are no railways in the Colony and but few good roads except in New Providence and Eleuthera.

A direct passenger service between Liverpool and Nassau is maintained monthly by the ships of the Pacific Steam Navigation Company (14 days). Nassau may also be reached by Elders and Fyffes line from Avonmouth to Kingston, Jamaica (14 days) and by steamers of the Canadian National Steamship to Nassau (3 days). The quickest route is via New York, the journey from New York to Nassau taking only three days by the steamers of the Munson Line, which leave New York fortnightly. During the winter there is usually a weekly service provided by the Cunard White Star Line between New York and Nassau.

Besides this service there are frequent sailings from New York to Nassau by various steamships during the winter.

The cargo steamers of the Royal Mail Steam Packet Company sail for the Bahamas from London every three weeks.

There is also a regular contract Mail, Passenger and Freight Service during the winter months, from January to April, between Nassau and Miami, Florida. These vessels make two voyages a week in January and April, and three voyages a week in February and March. A weekly summer service is usually maintained between Nassau and Miami by a vessel under contract with the Government.

Besides this Service there are motor boats plying almost daily between the ports of Miami and Nassau. During the past year an air mail and passenger service has been operated by The Pan American Airways Inc., on a daily schedule in the winter months and three times a week in the summer months between Nassau and Miami.

Till February, 1892, the nearest point in telegraphic communication with Europe was Key West, but in that month a cable from Nassau to Florida was completed. The cable is not however at present in working order and has been abandoned in favour of radio-telegraph communication, and twenty-four hour service with all parts of the world via Miami, Fla. Day service, 8 a.m. to 6 p.m. E.S.T., is also maintained with Kingston, Jamaica, in addition to twenty-four hours service to ships at sea. Wireless stations provide an Interinsular telegraph service between Nassau (New Providence), Harbour Island, Governor's Harbour (Eleuthera) and Hatchet Bay (Eleuthera), Grand Bahama, Cornwall (Abaco), Hope Town (Abaco), and Marsh Harbour (Abaco), Inagua, Bimini and Long Island, Green Turtle Cay (Abaco), San Salvador or Watlings, The Bight (Cat Island), and Mangrove Cay (Andros), George Town (Exuma), Ragged Island and Spanish Wells, Cat Cay, Whale Cay (Berry Is.), and Mayaguana. The Stations at Cat Cay and Whale Cay and Hatchet Bay are also fitted with radio-telephone apparatus, and a radio-telephone service is maintained from Nassau, N.P. to U.S.A., Europe, Bermuda, Hawaiian Islands, South America, Canada, Japan, Philippine Islands, Cuba, Mexico, and ships at sea (direct or via Ocean Gate Radio).

Postal rates are as follows:—

Jamaica (6d. per lb.) has been established, and money order agreements have been made with the United States, Canada and Jamaica.

Constitution.

The Executive Government is conducted, under Letters Patent, by the Governor, aided by an Executive Council not exceeding 9 members. The Legislative authority resides in the Governor, a Legislative Council, nominated by the Crown, and a Representative Assembly of 29 members, elected for 15 districts. An elector must be of full age, and either the owner for 12 months of land of the value of £5 or a house-holder of premises value 2*l.* 8*s.* in New Providence, or 1*l.* 4*s.* elsewhere, for six months. The qualification of Members is possession of an estate of real or personal property of the value of 200*l.* The Executive Council is composed partly of official and partly of unofficial Members who have a seat in one of the branches of the Legislature. In the absence of the Governor the Senior Member of the Executive Council administers the Government.

Education.

There is a Government system of elementary education, established in 1847, and modified by laws of 1864, 1875, 1885, and Consolidating Act of 1908. Attendance is compulsory from 6 to 14 years of age. The central control is in a Board of Education nominated by the Governor. Local Committees, partly elected, exercise local supervision only.

There are 55 unsectarian Government schools and 64 aided schools, with 12,490 scholars; 18 Church of England schools, with 607 scholars; 10 private schools, with 428 scholars; 20 Roman Catholic schools, with 1,686 scholars; 1 Seventh Day Adventist school, with 70 scholars; 1 Government Industrial school, with 61 scholars; 5 Secondary schools, with 403 scholars. The Government Elementary schools were made free in 1885. Higher education is provided at Queen's College, St. Francis Xavir's Academy, and the Government High School, all in Nassau.

Population.

53,735 (census 1901), 55,944 (census 1911), and 55,481 (census 1921), 1931—69,828. The island of New Providence contains 19,756 inhabitants according to census of 1931.

List of Governors since 1880.

Sir C. C. Lees, K.C.M.G.	1882
Sir H. A. Blake, C.M.G.	1884
Sir A. Shea, K.C.M.G.	1887
Sir W. F. Haynes Smith, K.C.M.G. ...	1895
Sir G. T. Carter, K.C.M.G.	1898
Sir W. Grey-Wilson, K.C.M.G. ...	1904
Sir G. B. Haddon-Smith, K.C.M.G. ...	1912
Sir W. L. Allardyce, K.C.M.G. ...	1914
Maj. Sir H. E. S. Cordeaux, K.C.M.G., C.B.	1920
Sir C. W. J. Orr, K.C.M.G.	1926
The Hon. Sir Bede E. H. Clifford, K.C.M.G., C.B., M.V.O.	1932
The Hon. Sir C. C. F. Dundas, K.C.M.G., O.B.E.	1936

Executive Council.

The Colonial Secretary. A. K. Solomon, K.C.
The Attorney-General. O. H. Curry.
The Receiver-General. R. G. Collins.
W. K. Moore, C.B.E. R. W. Sawyer.
Clerk, Sir Francis Peck.

Legislative Council.

President, Walter K. Moore, C.B.E.
P. W. D. Armbrister, O.B.E. Dr. J. B. Albury.
C. O. Anderson. R. W. Taylor, C.M.G., C.B.E.
A. K. Cole, O.B.E. A. F. Adderley.
J. H. Jarrett, K.C.
Clerk, D. S. D. Moseley, 120*l.*

House of Assembly (29 *Members*).
Elected May and June, 1935.
Speaker, W. C. B. Johnson, O.B.E., 200*l.*
Deputy Speaker, G. W. Higgs, 120*l.*

Abaco	B. R. Russell. J. W. Roberts. F. H. Christie.
Andros	R. H. Curry, J.P. B. H. McKinney.
Crooked Island	R. G. Collins.
Eleuthera	R. W. Sawyer. G. W. K. Roberts. O. H. Curry.
Exuma	E. V. Solomon.
Grand Bahama	G. Murphy.
Harbour Island	J. K. A. Kelly.
	W. C. B. Johnson, O.B.E. R. R. Farrington. H. N. Chipman.
Inagua	A. E. J. Dupuch.

Chief Clerk, J. Smith, 156*l.*
Second Clerk and Serjeant-at-Arms, G. E. Johnson, 100*l.*

Governor's Office.

Governor, 3,000*l.*, Hon. Sir C. C. F. Dundas, K.C.M.G., O.B.E.
Private Secretary and Aide-de-Camp, Sir Francis Peek.
Clerk Executive Council and Aide-de-Camp, Sir Francis Peek.
Clerk, Grade III, Mrs. L. Chipman.

Salaries.

The Clerical service is paid according to the following incremental scale:—

1st Grade	360*l.*-16*l.*-420*l.*	4th Grade	200*l.*-10*l.*-240*l.*
2nd ,,	300*l.*-14*l.*-360*l.*	5th ,,	170*l.*-8*l.*-200*l.**
3rd ,,	240*l.*-12*l.*-300*l.*	6th ,,	138*l.*-6*l.*-150*l.**

Secretariat.

Colonial Secretary, 1,000*l.*, J. H. Jarrett, K.C.
Assistant Colonial Secretary, C.P. Bethel, *I.S.O.*, 50*l.*; personal allowance, 50*l.*
Clerk, Grade II, Miss S. Burnside, M.B.E.
Clerk, Grade III, N. C. Roberts.

Judicial Department.

Chief Justice, 1,100*l.*, Sir Richard C. Tute.
Provost-Marshal, The Commissioner of Police.
Bailiff, Crier, Usher and Messenger, 170*l.*-8*l.*-200*l.*, J. F. Greenidge.
Marshal Admiralty Side, Supreme Court, G. C. Roberts.
Attorney-General, 800*l.* J. B. Griffin.
Stipendiary and Circuit Magistrate and Coroner, 700*l.*, O. L. Bancroft.
Clerk, Grade II., Magistrate's Court, J. F. Greenidge, Jr. (*a*).

Registrar General's Department.

Registrar General, 650*l.*, R. de Glanville.
Assistant Registrar General, 360*l.*, A. M. C. Johnson.
Clerk, Grade II., F. A. C. Duncombe.
Clerk, Grade III., Miss E. S. Clarke.

Receiver General and Treasurer's Department.

Receiver General and Treasurer, 650*l.*, R. W. Taylor, C.M.G., C.B.E.
Cashier, C. S. Thompson, 500*l.*
Clerk, Grade I, S. A. Eldon, M.B.E.
Clerk, Grade II, W. H. Sweeting.
Clerk, Grade III, E. S. Wells.
Clerks, Grade IV, Mrs. D. R. Lowe, R. B. Haxton.

Customs Department.

Comptroller of Customs, 600*l.*, A. K. Cole, O.B.E.
Assistant Comptroller and Examining Officer, 400*l.*, N. E. Lightbourn.
Clerks, Grade III, Miss M. Malcolm, Miss A. Smith.
Harbour Master and Port Officer, 360*l.*-16*l.*-420*l.*, G. C. Roberts.
Tidewaiters, 240*l.*-12*l.*-300*l.* each, H. R. Cooper, J. H. Wallace.
Tidewaiters, 200*l.*-10*l.*-240*l.* each, V. N. Pinder, T. McCartney, E. S. Mitchell.

Audit Department.

Auditor of Public Accounts, 500*l.*, E. A. Stoodley (700*l.* special salary).
Clerks, Grade I, J. L. Lightbourn, E. H. Stuart.
Clerk, Grade IV, G. D. Gamblin.

Medical Department.

Chief Medical Officer and Resident Surgeon, 800*l.* J. M. Cruikshank, O.B.E.
Medical Officer and Bacteriologist, 600*l.*, L. W. FitzMaurice.
Assistant Medical Officer, 500*l.*, H. P. Lyon.
District Medical Officers, 450*l.* each, W. A. Foulkes (*Andros*), D. A. A. Fields (*Eleuthera*), L. C. Huggins (*Inagua*); R. Cumberbatch (*not yet posted*).
Superintendent, Hospital, 360*l.*-16*l.*-420*l.*, H. L. Sumner.
Sanitary Inspector, 360*l.*, H. F. Knowles.
Deputy Sanitary Inspector, 200*l.*-10*l.*-240*l.*, E. Munroe.
Quarantine Officer, 85*l.*, C. B. Hall.
Matron, Hospital, 300*l.*-14*l.*-360*l.*, Miss A. Baines.
Sisters, three, 240*l.*-12*l.*300*l.*, J. A. M. Henderson, E. M. O'Keeffe, F. E. Copland.
Dispenser, 300*l.*-14*l.*-360*l.*, G. B. Strachan.
Relieving Officer, 240*l.*-12*l.*-300*l.*, S. A. Wallace.
Chaplain, 100*l.*, Rev. Andrew Douglas.
Supervisor, Market, 240*l.*-12*l.*-300*l.*, L. K. Rogers.
Clerk, Grade III., Miss K. Albury.

Post Office Department.

Postmaster, 650*l.*, J. Herbert Peet, O.B.E.
Assistant Postmaster, 400*l.*, A. E. Eldon.
Clerks, Grade III, C. A. Bowen, Miss M. I. Anderson.
Clerks, Grade IV, Miss V. T. Knowles, Miss M. V. Dupuch.

Police Department.

†*Commissioner*, 600*l.*, Major R. A. Erskine-Lindop.
Medical Officer, H. P. Lyon, B.Sc., M.D., C.M.
†*Deputy Commissioner*, 500*l.*, Capt. F. G. Lancaster, M.B.E., M.C.
†*Superintendents*, 400*l.*, H. Pemberton, L. H. V. Booth.
**Assistant Superintendents*, 300*l.*, G. F. Dugdale, A. M. Mackintosh.

Engineer-in-Charge, Ice Plant, H. V. Brown.

Out-Island Commissioners.

Senior Commissioner, 500*l.*, J. A. Hughes (*Travelling Commissioner*).
Commissioner, Grade I, 360*l.*-16*l.*-420*l.*, W. P. Roberts (*Harbour Island*).
Commissioners, Grade II, 300*l.*-14*l.*-360*l.*, each (*a*) M. Gerassimos (*Inagua*), J. V. Malone (*Seconded as Manager of Produce Exchange and Sisal Inspector*), H. R. Ryan (*Exuma*), K. M. Cross (*Bimini*).
Commissioners, Grade III, 240*l.*-12*l.*-300*l.* each (*a*), H. A. Bartlett (*Fresh Creek*), A. Smith (*Mangrove Cay*), H. Pyfrom (*Long Cay*), T. G. M. Wells (*Cat Island*), S. B. Archer (*Grand Bahama*), R. E. Malone (*Governor's Harbour, Eleuthera*).
Assistant Commissioners, 200*l.*-10*l.*-240*l.* each (*a*), J. Z. Bethell (*Watling Island*), R. W. Wood (*Long Island*), L. E. Pinder (*Rock Sound, Eleuthera*), D. H. Burrows (*Cat Island*), Claude Saunders (*Hope Town*), R. H. Culmer (*Ragged Island*).

Surveyor-General's Office.

Surveyor General, 600*l.* (vacant).
Deputy General, 500*l.*, William N. Aranha.
Assistant Surveyor, 500*l.*, 450*l.*, J. V. Cox.
Clerk, Grade IV, Geo. E. Johnson.
Clerk, Grade VI, Miss G. M. Cash.

Imperial Lighthouse Service.

Inspector of Lighthouses, Commander R. Langton-Jones, D.S.O., R.N. (from the General Lighthouse Fund).
Store Officer, M. J. L. Trenchard.
First Officer of Tender, W. J. C. Moxley.
Chief Engineer, Ditto, F. W. Poole (maintained out of General Lighthouse Fund).

Foreign Consuls.

United States of America, J. W. Dye, *Consul*; W. K. Ailshie, *Vice-Consul*.
France, H. N. Kelly, *Consular Agent*.
Norway, R. H. Curry.
Sweden, J. Burnside; A. R. Bethel, *Vice-Consul*.
Hayti, A. W. Erickson, Jr. (resident at Inagua).
Cuba, L. Fuentes, *Consular-Agent*.
Greece, Honorary Vice-Consul, T. J. Mangos.

(*a*) Quarters.

BARBADOS.*

Situation and Area.

Barbados is situated in latitude 13° 4′ North and longitude 59° 37′ West, and is the most easterly of the Caribbee Islands. It is nearly 21 miles long by 14 in breadth, and contains an area of 106,470 acres, or about 166 square miles, somewhat larger than the Isle of Wight.

History.

The exact date of the discovery of Barbados is not known. It is said to have been first visited by the Portuguese, who found it uninhabited and rude in appearance, and named the isle *Los Barbados*, from the number of bearded fig-trees. It was nominally taken possession of by the English ship *Olive Blossom* in 1605, when it was almost uninhabited. In 1626 Sir William Courteen, a London merchant, under the protection of the Earl of Marlborough, who held a grant of the island from James I., fitted out two large ships, only one of which arrived at Barbados, and the party, which consisted of some thirty persons, landed in February, 1627, on the leeward side of the island, formed a town called James' (or Hole) Town, and appointed Captain William Deane their Governor. In 1627 the Earl of Carlisle obtained a grant from Charles I. of all the Caribbee Islands. This grant was opposed by the former patentee, Lord Marlborough, but the matter was compromised on the Earl of Carlisle agreeing to settle on the Earl of Marlborough an annuity of 300*l.* Soon after this the Earl of Carlisle being employed on a diplomatic mission, the Earl of Pembroke, then Lord Chamberlain, obtained a revocation of the former nobleman's patent in his favour and supported Sir W. Courteen; but on the Earl of Carlisle's return from his embassy, he remonstrated with the king, who reinstated him in possession of the territory. Wolferstone, a native of Bermuda, was then commissioned by the Earl of Carlisle as Governor, and in 1628 sixty-four settlers arrived in Carlisle Bay, commenced the erection of wooden houses, threw a bridge across the river which intersected the ground, and laid the foundation of Bridgetown, the present capital. The Leeward and Windward men opposed each other, the latter ultimately triumphing. The civil war which raged in England contributed to people and enrich the island: and on the downfall of Charles, many families attached to the Royal cause found shelter in Barbados. The island was afterwards governed by Lord Willoughby, a Royalist, to whom it was conveyed by Lord Carlisle (son of the first patentee); but when the island was subdued by the Commonwealth he was banished. In 1662, after the Restoration, Lord Willoughby renewed his claim, and the kinsmen and heirs of the two earls brought forward demands on the settlers. To satisfy these claims, a duty of 4½ per cent. on all exports was imposed; and under certain conditions the proprietary government was dissolved and the sovereignty of Barbados annexed to the British Crown. The inhabitants long protested against the imposition of the 4½ per cent. duties, but without success; and it was not till 1838, four years after the abolition of slavery, that the tax was abolished by an Act of Parliament.

Barbados has not, like most of the neighbouring islands, changed owners; it has always remained in possession of Great Britain.

General Description.

Bridgetown, the chief town and port, is situated in the parish of St. Michael, in latitude 13° 6′ North, and longitude 59° 37′ West. This town contains, according to the census of 1921, 13,486 inhabitants. Speightstown, the only other town, has about 1,500 inhabitants.

Carlisle Bay, the harbour of Barbados, is an open roadstead, much exposed to the wind from the south and south-west. There is an inner harbour or careenage, protected by a structure called the Mole Head. It is a port of registry, and had registered, on 31st December, 1936, 57 vessels, of a total net tonnage of 6,891 tons.

The island is almost encircled by coral reefs, which in some parts, as off the parish of St. Phillip, extend nearly 3 miles to seaward, and prove very dangerous to navigation.

The area of the island called the Scotland district, which is the part enclosed by a semi-circular sweep of the ridge in the north-east, is composed of sandstones, clays, and infusorial earths.

Traces of oil were discovered in certain districts and experimental borings were carried out by the British Union Oil Company, Ltd., but the flow of oil was inadequate and operations on a large scale have ceased.

The Company has also established an oil depot and bunkering station for ships in Carlisle Bay.

A water supply is provided for all the parishes of the island by the Colonial Government, which bought up and extended the water works formerly operated by two companies, the Bridgetown Water Works Company and the Barbados Water Supply Company.

Owing to the steady Easterly Trade winds, which blow almost continuously from December to June, the climate is bracing and the heat is never oppressive. During the remainder of the year, the wet season of the Island, the heat is seldom excessive, although the absence of the Trade Winds renders the climate less invigorating. The average temperature is 79·8, and rainfall 61 inches.

The Island is largely visited as a Health resort by residents of neighbouring West Indian Colonies and British Guiana. It is, to a considerable extent, also utilised as a winter resort by visitors from temperate climates and a port of call for tourist steamers.

Industry, Trade and Customs.

The chief articles planted for exportation for some years after the settlement of the island were indigo, cotton-wool, ginger, and aloes, besides several kinds of woods; and the manufacture of sugar does not appear to have been practised with much success till about the middle of the 17th century, when the cultivation of the sugar-cane increased rapidly, and the plant became, in commercial importance, the island's most valuable production. At that period, too, the introduction of African labour was commenced. The produce exported during the last three years has been as follows :—

	Sugar. Tons.	Molasses. Gallons.
1935 ...	39,392	...10,785,568
1936 ...	97,811	...10,592,694
1937 ...	100,806	...10,077,390

The area under sugar cultivation in 1938 was 37,117 acres. In September, 1898, the island in common with St. Lucia and St. Vincent, suffered severely from the effects of a disastrous hurricane. In 1902-3 there was an epidemic of small-pox, which caused a prolonged quarantine and seriously affected trade. Cotton-growing was revived with help from the Colonial Treasury and the British Cotton Growing Association, but owing to market and other conditions almost entirely ceased. In 1937 the amount of cotton exported was 10,841 lbs., valued at 747*l*. Efforts to revive the industry have been partially successful.

The distribution of the Colony's import trade in 1937 was :—

	%	Value.
United Kingdom	41·2 ..	£913,471
Canada	14·5 ..	322,730
Other parts of the British Empire	17·4 ..	385,922
United States of America ..	11·3 ..	250,616
Other Foreign Countries ..	15·6 ..	346,496
The Imports are classified as follows :—		
Food, drink, etc.		£780,260
Raw materials		224,691
Manufactured articles		1,148,748
Animals not for Food		6,777
*Miscellaneous		60,174
		£2,220,650

The Customs Tariff of the Colony is the result of the Canada West Indies Reciprocal (Tariff) Agreement Act, 1926, which provides that the duties on all goods the produce or manufacture of Canada shall not be more than 50 per cent of the duties on similar goods imported from Foreign countries. Exceptions to this provision are Tobacco, Cigars and Cigarettes while specific preferences are provided for on a list of Articles named in Schedule B of the Act.

These preferences were by the Customs Tariff Act, 1921, extended to goods the produce or manufacture of all parts of the British Empire.

Twenty-five per cent., 50 per cent. and 75 per cent. of British factory cost of articles, partly of foreign origin, entitles these goods to be admitted under the British Preferential Tariff, except piece goods, containing 50 per cent. or more by weight of cotton or of artificial silk or of cotton and artificial silk combined imported from the United Kingdom, which may not be admitted under the British Preferential Tariff unless they have been spun, woven and finished in the British Empire. Under the Quotas Act, 1934, all importations of this class of piece goods from any foreign country are restricted.

As a result of the Conference held at Ottawa in 1932 further preferences were granted to Empire goods and given effect to by the Customs Tariff (Amendment) Act 1932 No. 2.

About two-thirds of the duties are on a specific and the remainder on an *ad valorem* basis.

Population.

The population of the island in 1851 amounted to 135,939. By the census of 1891 the population was returned at 182,306. By the census of April, 1921, the population was 156,312, the decrease, as compared with the figures for 1891, being attributed to the large numbers of the labouring classes which have from time to time emigrated to Panama in connection with the Canal Works, while many others have gone to Para, Brazil, Cuba, the United States of America and Canada in search of more remunerative employment than what can be obtained locally. The estimated population at the end of 1937 was 190,939. English is universally spoken. Labour is cheap, and the soil is well cultivated, the island having the appearance of a well-kept garden.

* Includes £1,415 Bullion and Coin.

Digitized by Google

Currency and Banking.

Government accounts are kept in sterling; commercial accounts in dollars. British coin is legal tender and the chief medium of circulation. There is no limit to the legal tender of British silver, and there is no gold in circulation. There are three banks doing business in Barbados, Barclays Bank (Dominion, Colonial and Overseas), capital paid up 4,975,500*l.* sterling, and the Royal Bank of Canada, with a paid up capital of 7,291,666*l.*, and the Canadian Bank of Commerce with a paid up capital of 6,250,000*l.* There is a Government savings bank, which had, on 31st December, 1937, 16,160 depositors. The total amount at credit of depositors on 31st December, 1937, was 843,169*l.*

Internal Communication.

An elaborate road system exists throughout the Island, 532¾ miles of road being suitable for use by motor vehicles.

The Barbados Telephone Co., Limited, a private company, at the 30th September, 1938. maintained a total of 2,038 Exchange lines and 2,585 Stations, with a wire mileage of approximately 7,100. The latest type of Strowger automatic equipment came into service in the two main exchanges during the autumn of 1937.

Steamer Communications, Postage, &c.

Steamers of the Harrison Line run a freight and passenger service from London monthly, a freight service from London and Glasgow monthly, and from Liverpool fortnightly. These vessels occasionally call at ports in the Leeward Islands en route. Length of passage between 13 and 17 days.

The Cie Generale Transatlantique (French) Line runs a regular monthly service touching at Southampton on the outward and Plymouth on the homeward journey. Length of passage 11 days.

This Company also operates an Intercolonial Service between Martinique and the Guianas, calling at Barbados and other islands in the Lesser Antilles en route.

The Royal Netherlands Steamship Company runs a regular fortnightly service, touching at Dover on the outward journey and at Plymouth on the return journey. Length of passage 11–13 days.

This Company will also operate a Service once fortnightly. Service beginning from November, 1938, as follows:—From Amsterdam to Dover, Barbados, Trinidad, Paramaribo, Demerara, back to Trinidad, thence to five Venezuelan Ports, Curacoa, Haiti and New York. Return from New York to Haiti, La Guaira, Curacoa, Porto Cabello, back to La Guaira, Porto Sucre, Pampaton, Campano, Trinidad, Demerara, Paramaribo, back to Trinidad, Barbados, Madeira, Plymouth, Havre and Amsterdam.

The Hamburg-American Line of steamers runs a regular monthly service, touching at Dover outwards and Plymouth homewards. Length of passage 10 days.

From Canada, the Canadian National Steamships run a fortnightly service from Halifax *via* Boston, Bermuda and the British West Indian Islands. This company also run another service from Montreal *via* Puerto Rico every three weeks during the summer months and every six weeks during the winter.

The Ocean Dominion Line of steamers also arrive fortnightly from Canada *via* West Indian Islands during the summer months, and from Vancouver ships of the Canadian Transport Company call monthly.

From the United States, the Bermuda West Indies Steamship Company (Furness Withy) run a service from New York every 24 days during the summer months, and approximately fortnightly during the winter months, and the American Caribbean Line run a weekly service.

The Aluminum Line of steamers arrive fortnightly from New Orleans and Gulf ports *via* West Indias Islands.

The McCormick Steamship Company run a monthly service from San Francisco.

Periodical calls are made by ships of the Booth Line from South American ports and by ships of the Nourse Line from the Far East.

Telegraphic communication is carried on by:—
(1) The West India and Panama Telegraph Company, an associated Company of Cable and Wireless Limited.

This Company has connections by cable to Georgetown, British Guiana, Trinidad, Granada, St. Vincent, St. Lucia, Dominica, St. Kitts, St. Croix, St. Thomas, Puerto Rico, Jamaica, Cuba and through Turks Island and Bermuda to Halifax, where it joins the North Atlantic system to Great Britain and beyond.

It also possesses Wireless Stations in Georgetown, British Guiana, Granada, Barbados, St. Lucia, Dominica, Antigua, Montserrat, St. Kitts, Jamaica and Bermuda.
(2) The Western Telegraph Company Limited, an associated Company of Cable and Wireless Limited, with direct cable communication with Brazil and South America in general.
(3) The Western Union Telegraph Company with direct cable communication through Miami, Florida to New York.

The principal tariffs per word are:—

	s.	d.
To the United Kingdom	1	10½
To Eastern Canada	1	0½
To Western Canada	1	3
Port-of-Spain Trinidad	0	6
Georgetown–British Guiana ..	0	10
Kingston–Jamaica	1	3
New York City	1	0½
Rio de Janeiro	2	0
Buenos Aires	2	5

CDE Telegrams at 60% of above rates, Deferred Telegrams in plain language at half the above rates, and Night-Letter Telegrams at one-third above rates (minimum 25 words) are accepted for places where such services are in force.

Rates of Postage.

Within the Island: Letters, 1*d.* per 1 oz.
Postcards, ½*d.* each.
Newspapers, ½*d.* per 6 oz.
Parcels, 4*d.* up to 1 lb. and 2d. per ½ lb. additional up to 5 lbs.
U.K., India, and British Colonies and dependencies: Letters per 1 oz. 1½*d.*, and for every additional oz. 1*d.*
United States of America and Porto Rico and The American Virgin Islands: Letters per 1 oz. 2½*d.*, and for every additional oz. 1½*d.*
Elsewhere: Letters per 1 oz. 2½*d.*, and for every additional oz. 1½*d.*
Postcards 1*d.* each.
Printed Papers and Books ½*d.* for 2 ozs. and for every additional 2 ozs. ½*d.*
Parcels to United Kingdom, 2*s.* per 3 lbs.; 3*s.* 3*d.* 7 lbs.; 4*s.* 3*d.* 11 lbs. not exceeding 22lb. 6*s.* 9*d.*

Education.

A Government system of elementary education was established by Act No. 41 of the 9th December, 1878, which authorised a total expenditure not exceeding 15,000*l.* annually on all grades of education. This section of the Act of 1878 was repealed, and Section 9 (d) of the Education (Amendment) Act, 1897, authorised an annual expenditure of a sum not exceeding 11,000*l.* on elementary education. This section has now been repealed by the Education (Amendment) Act, 1910, which authorised the amount to be spent on elementary education at 14,200*l.* In 1938 the sum of 50,852*l.* was voted by the Legislature for Elementary Education, and the total vote for all grades of education amounted to 66,328*l.*

The central administration is vested in a Board appointed by the Governor, and the local control of elementary schools is in the hands of the clergymen of the various districts assisted by committees of management. There are 125 elementary schools with 19,582 scholars (average attendance), and 26,397 on the rolls. At these elementary schools free education is now provided. Secondary schools are managed by Governing Bodies working under schemes formulated by the central Board of Education and approved by the Legislature. Government has recently undertaken to provide milk and biscuits to elementary school children.

Barbados possesses a college founded by General Sir Christopher Codrington, a native of the island, who died in 1710, and whose name it bears. It was affiliated to Durham University in 1875. It is under the administration of the S.P.G., who are the Trustees of General Codrington's will. There are several theological scholarships of the value of 30*l.* per annum from the College funds, and six Island Scholarships at 40*l.* per annum paid from the Colonial Treasury. The latter are competitive, and are confined to natives or sons of natives, or of persons domiciled in the island who have resided therein for at least ten years.

There is a good grammar school, called Harrison College, in Bridgetown, established on an old foundation, which has been liberally supported by the Legislature. It has a staff of twelve university men as Masters, two Preparatory Mistresses, three Lecturers in Natural and Agricultural Sciences and two additional masters in the Lower Forms. The number of pupils at the close of 1937 was 270. Another First Grade School, "The Lodge," situated in St. John's parish, to the N.E. of the island, was re-opened in 1882, after having been closed for several years. The number of pupils at the close of 1937 was 146. The Barbados English Scholarships, established by the Education Board, and endowed by the Colony, are tenable at any College in the British Empire approved by the Board, for a period of four years.

The number of years for which these scholarships are tenable may be varied to five or six, but the total value of each scholarship cannot be more than 1,050*l.*, with an additional 50*l.* to defray initial expenses.

A first-grade school for girls was opened in 1883, called the Queen's College. It has a staff of twelve teachers. The number of pupils at the close of 1937 was 172.

There are five second-grade schools for boys and three for girls. These first and second-grade schools cost the Government, including grants for scholarships, 11,350*l.* during 1937. They also receive annual grants for scholarships from the Vestries of the various parishes in which they are situated.

Police, &c.

A police force was established in Barbados in 1835 by an Act of the Legislature, and is stated to have been the first attempt in the British West India Colonies to establish a force of that description upon a similar footing. The Force consists of 4 officers and 466 non-commissioned officers and men. In 1882 the Harbour Police (established in 1867) were combined with the Land Police. A Juvenile Reformatory for boys was opened in April, 1883, and one for girls in April, 1911.

There is a lunatic asylum, a lazaretto and a general hospital in Bridgetown, to the latter of which the Colony contributed 22,875*l.* in 1936-37.

Constitution.

The Colony possesses representative institutions, but not responsible Government. The Crown has only a veto on legislation, but the Home Government retains the appointment and control of public officers, except the Treasurer, who is an officer of the House of Assembly. The Legislature consists of a Governor, a Legislative Council, consisting of nine members appointed by the King, and a House of Assembly, having twenty-four members elected for a period of two years on the basis of a moderate franchise. The qualifications of members and electors are regulated by a Franchise Act, which became law in April, 1884, and which repeals all previous legislation on the subject. By this Act an extension of the franchise was granted, and 2,004 electors were registered under its provisions, the number previous to its enactment being only 1,641. This and other Acts relating to the franchise was consolidated by the Representation of the People Act, 1901. The only change made was the extension of the franchise to persons enjoying a pension of 50*l.* a year or more. The number of registered electors for the year 1937 was 6,619. The executive part of the Government is vested in the Executive Council appointed by the Crown and consists of the Governor, the Colonial Secretary, the Attorney-General *ex officio*, Sir F. J. Clarke, K.C.M.G., V.D., and Sir J. R. Phillips, Kt., O.B.E., and such other persons as may be nominated by the King, and the Executive Committee consists of the members of the Executive Council *ex officio*, one member from the Legislative Council, and four members of the House of Assembly nominated annually by the Governor. This body introduces all money votes, prepares the estimates, and initiates all Government measures. The Governor of Barbados was for many years the Governor-in-Chief of the Windward Islands, consisting of Barbados, St. Lucia, St. Vincent, Grenada, and Tobago, but in 1885, by Royal Letters Patent, Barbados was separated from the other Windward Islands and made a distinct Government.

Local Government.

The island is divided into eleven parishes, each of which has its local affairs administered by a Vestry which is elected annually, the Rector of the Parish being the Chairman. The functions of the Vestry include sanitation and the care of the sick and poor. The upkeep of roads in eight of the eleven parishes is carried out by Highway Commissioners appointed by each Vestry, for the other three parishes the Government Central Road Board is responsible. The Vestries levy rates on lands and houses, and taxes on trade. The revenue for the upkeep of roads is provided principally by taxes on land, houses, trade, vehicles, draft animals, etc., under the provisions of the Highways Act, supplemented by grants from the Government.

The total revenue collected by the Vestries in 1937–38 amounted to 96,977*l.*, not including temporary loans, repaid during the year.

Poor Law Board.

President, Sir F. J. Clarke, K.C.M.G., V.D.
Members, Dr. J. Hutson, O.B.E., V.D., G. D. L. Pile, E. K. Walcott, K.C., C. L. Elder.

Department of Science and Agriculture.

Director of Agriculture, S. J. Saint, B.Sc. (Lond.), M.Sc. (Reading), Ph.D. (Lond.), F.I.C., 1,000*l.* and travelling allowance.
Assistant Director and Botanist, A. E. S. McIntosh, B.Sc., Ph.D. (Edin.), 500*l.* to 600*l.*, 100*l.* personal allowance and travelling allowance.
Entomologist, R. W. E. Tucker, M.A. (Cantab.), B.Ed. (Cape Town), 1,000*l.*, travelling allowance.
Chemist (vacant), 450*l.* to 550*l.*
Government Analyst, C. A. Coppin, B.A.Sc. (Toronto), A.I.C., 450*l.* to 550*l.*
Lecturer in Natural Sciences (vacant).
Lecturer in Natural and Agricultural Sciences, W. A. McD. Paterson, B.Sc., 500*l.* to 600*l.*
Lecturer in Botany, Chemistry and Physics, J. A. Allan, B.Sc. (Glasgow), 400*l.* to 500*l.*
Plant Diseases Inspector, D. R. D. Wiles, D.I.C.T.A., 250*l.* to 300*l.* and travelling allowance.
Senior Peasants' Agricultural Instructor, T. O. Phillips, 250*l.* to 300*l.*
Junior Peasants' Agricultural Instructor, G. B. Pilgrim, 200*l.* to 250*l.*
Chief Clerk and Clerk to Board of Agriculture, H. O. Ramsey, 300*l.* to 400*l.*
Second Clerk, G. D. Ramsey, 250*l.* to 300*l.*
Third Clerk, A. S. Inniss, 200*l.* to 250*l.*
First Agricultural Assistant, C. B. Foster, 300*l.* to 450*l.*, travelling allowance.
Second Agricultural Assistant, H. E. Ward, 250*l.* to 300*l.*, travelling allowance.
Third Agricultural Assistant, C. C. Corbin, 200*l.* to 250*l.*
Fourth Agricultural Assistant, F. E. Bynoe, 150*l.* to 200*l.*, travelling allowance.
Fifth Agricultural Assistant, L. H. Atkinson, 100*l.* to 150*l.*, travelling allowance.
Analytical Assistant, H. A. Jones, 200*l.* to 250*l.*
Analytical Assistant, L. A. Hall, 150*l.* to 200*l.*
Analytical Assistant, N. Carmichael, 100*l.* to 150*l.*
Sugar Analyst, C. St. A. Alleyne, 200*l.* to 250*l.*
Sugar Analyst, F. N. A. Fields, 150*l.* to 200*l.*
Sugar Analyst, R. E. Barrow, 100*l.* to 150*l.*

BRITISH WEST INDIES CENTRAL SUGAR CANE BREEDING STATION.

Advisory Committee.

Chairman, S. J. Saint, B.Sc. (Lond.), M.Sc. (Reading), Ph.D. (Lond.), F.I.C., Director of Agriculture, Barbados.

Lt.-Col. Commanding the Barbados Volunteers, Lt.-Col. W. Bowring, M.B.E.
Staff Officer (vacant).

BERMUDA.

Situation and Area.

The "Bermudas" or "Somers' Islands" form a group or cluster of about 300 small islands, situated in the Western Atlantic Ocean, in lat. 32° 15′ N., and long. 64° 51′ W., about 580 miles to the eastward of Cape Hatteras in North Carolina, the nearest point of the neighbouring American Continent. The distance from Liverpool is about 2,900 miles, from Halifax in Nova Scotia 730, from New York 677, and from the nearest of the West Indian Islands about 800 miles. The total area is estimated at 19 square miles (less than one-eighth of Rutland).

History.

These islands were discovered in the year 1515, by a Spanish mariner, Juan Bermudez, after whom they were called The Bermudas. The Spaniards, however, took no steps to form a settlement on the islands, and they were still entirely uninhabited when, in 1609, Admiral Sir George Somers' ship, *The Sea Venture*, while on a voyage with a fleet of eight other vessels, conveying a party of colonists to the new plantations then being formed in Virginia, was wrecked upon one of the numerous sunken reefs which surround the islands on every side. The reef is still called after the name of the Admiral's ship, The Sea Venture Flat.

Sir George Somers died in Bermuda the following year, and his companions, ignorant possibly of the prior claims of Juan Bermudez, called the group after him, "The Somers' Islands." The reports of the beauty and fertility of the land, taken home by Somers' nephew, Captain Mathew Somers, induced the Virginia Company to seek an extension of their Charter, so as to include the islands within their dominion, and this extension was readily granted by King James I., but shortly afterwards the Virginia Company sold the islands for the sum of 2,000*l*. to a new body of adventurers, called "The Governor and Company of the City of London for the Plantation of the Somers Islands," and thenceforward, for a considerable time, the islands bore the name of the Admiral who had led thither the first body of settlers.

General Description.

The Bermudas, of which a good account will be found in the narrative of the voyage of the *Challenger*, may be described as a singular agglomeration of small islands and submarine sand-hills and coral reefs, forming together an irregular oval ring, measuring about 22 miles in length from N.E. to S.W., and about 3 miles in width from N.W. to S.E. The external ring—whether composed of islands or of sunken banks or reefs—is seldom more than a mile in width, and generally considerably less.

At present the southern portion only of the encircling ring is formed of islands, the northern, eastern, and western sides being composed of almost continuous reefs of coral. The largest island, generally known as The Main Island, is about 14 miles in length, and about a mile in average width; it contains about 9,000 acres of land, the highest point being only 240 feet above the sea. All the other islands taken together measure about 3,000 acres. The city of Hamilton, now the seat of Government, is situated about the centre of the main island, where a deep inlet running up for two or three miles into the land from the sheltered waters, enclosed between the encircling reef, forms a safe and convenient harbour for the vessels which carry on the island trade.

Next in importance to the main island is the island of St. George, on which stands the town of St. George, so named after Admiral Sir George Somers, whose heart is buried there. This town was formerly the capital of the Colony, and though now shorn of much of its importance by the transfer of the seat of Government to Hamilton, is still a town of considerable trade, and its harbour is much frequented as a harbour of refuge.

The other principal islands of the group are—Ireland Island, entirely given up for the accommodation of His Majesty's Dockyard and a number of other naval establishments; Boaz and Watford Islands, intervening between Ireland Island and the rest of the group, and now exclusively occupied by military depots and garrisons; Somerset, Smith's, St. David's, Cooper's, Nonsuch, Darrell's, Ports, and Godets—all inhabited by a civil population. The islands form an almost continuous chain, and there is uninterrupted communication by roads and bridges and causeways from St. George over the main island and Somerset, and over Watford and Boaz to Ireland Island—a distance of about 22 miles.

About one-half of the inhabitants are of English descent, the remainder belonging for the most part to the negro race. English is universally spoken.

The Climate has been long celebrated for its mildness and salubrity The rainfall in 1937 was 56·74 inches, as against an average of 58·97 inches. In winter the thermometer never falls below 40° Fahr., and the summers are never very hot, the thermometer rarely rising above 86°. The summer heat, too, is generally tempered by a pleasant sea breeze. Mean relative humidity in 1937 was 77.

In 1914 the Legislature voted the sum of 51,750*l*., payable in fifteen yearly instalments, as a contribution to the Imperial Treasury in aid of the war fund.

The state of the Colony's finances did not admit of an immediate cash contribution and these annual payments represent a lump sum of the present value of 40,000*l*.

In 1927 the Legislature voted a contribution to His Majesty's Government of 2/6 per capita of the local population, payable after the 1st January, 1930, towards the cost of the military Garrison in the Colony, and a further contribution payable after the 1st January, 1928, of a sum computed in respect of all ranks of the Military Garrison serving in the Colony.

Industry, Trade and Customs.

In former days the inhabitants of Bermuda gave themselves up almost entirely to maritime pursuits. Numerous small vessels, of from 200 to 300 tons burthen, built by the islanders themselves, of their native cedar, traded between the West Indies and Demerara, and the United States, and the British colonies of North America. Later they extended their voyages, carrying the salt fish of Newfoundland to Italy and Portugal, and taking back the Port wine for which Newfoundland became celebrated, or running down to Madeira or Ascension to meet the homeward-bound Indian fleet, and taking back cargoes of tea or other Indian and Chinese products to be distributed along the American seaboard.

The repeal of the British navigation laws, the introduction of steam, and the very general substitution of iron for wooden ships, gradually destroyed the carrying trade which had been so profitable to Bermuda, and now the maritime fleet may be said to have ceased to exist, and the industry of the islanders is entirely confined to mercantile pursuits and to turning to account the small quantity of agricultural land which they possess.

The soil of Bermuda is naturally calcareous, free-draining, and poor in humus. A fair state of fertility is, however, readily maintained by the regular use of manures and fertilisers. Not more than one-fourth of the total area of the colony can be cultivated, but the climate, combined with the geographical position of these islands, compensates for the small extent of arable land. There is never any danger of frost, and seeds may be sown and plants put out at any time. The main crops, potatoes, onions and green vegetables, are planted from August to March, and are reaped and shipped from December to June when the Canadian markets are comparatively bare of early potatoes and fresh vegetables.

Practically the whole of the exports go to Canada. About two-fifths of the imports come from the United Kingdom, two-fifths from foreign countries and the remainder from the Dominions and Colonies

The Islands of Bermuda have become a favourite resort for Americans and Canadians. Large hotels have sprung up, and a considerable amount of money is expended by the visitors.

The total number of tourists to Bermuda during 1937 was 83,092, of whom 79,856 came from U.S.A., 942 from Canada, 1,174 from United Kingdom.

The quantity of shipping is remarkable for so small a place. During 1937, as will be seen from the tables, 6,227,383 tonnage entered and cleared, of which 5,124,080 was British.

About two-thirds of the Government revenue is obtained from Customs Duties on imports. The greater part of these receipts is from *ad valorem* duties at the rate of 10 per cent., with a surtax of 25 per cent. of the duty on all goods of non-British origin. Wines, spirits, and tobacco of British origin are subject to a 22½ per cent. surtax, and additional preferences have recently been granted as the result of the agreements concluded at Ottawa.

Currency and Banking.

The coins in circulation are British currency, which is legal tender. There is no limit to the legal tender of British silver. Bermuda Government £1, 10*s.* and 5*s.* Currency Notes to the value of 190,943*l.* 10*s.* were in circulation on 31st December, 1937. There are two incorporated banks, the Bank of Bermuda, Limited, and the Bank of N. T. Nutterfield & Son, Limited, and several of the leading merchants do a considerable amount of business as private bankers and agents. A Government savings bank was established in 1871, and there are branches at Hamilton, St. George's, and Sandy's Parish. The number of depositors at the end of 1937 was 5,281, the total amount of deposits 97,998*l.*

On the 1st of January, 1922, the Savings Bank was transferred from the Treasury to the Post Office Department.

Education.

In 1839 the Colonial Legislature first granted a sum of money to aid elementary schools.

The central control is vested in a Board of Education, consisting of ten members appointed by the Governor under the provisions of the Schools Act, 1922.

All the schools are private schools, charging fees. Attendance is compulsory, and there were, in 1937, 30 aided schools with 4,745 scholars.

There are, in addition, about 17 schools which receive no State aid.

In August, 1905, the Legislature established an annual scholarship of 150*l.*, tenable by youths, natives of Bermuda, for two years at some educational institution abroad to be approved by the Governor, with a view to assisting youths to prepare to compete for the Rhodes' Scholarship awarded to Bermuda. The amount was increased to 200*l.* p.a. in 1920, and the tenure of the scholarship to three years in 1927.

At the end of the year 1924, the Bermuda (Technical Education) Scholarship Act was passed establishing four new scholarships each of the value of 125*l.*, subsequently increased to 150*l.*, and tenable for four years at some educational institution out of the Colony.

Means of Communication.

Telegraphic communication with the United Kingdom is carried on by the cable between the Islands and Halifax, Nova Scotia.

Rates to Halifax, 1*s.* 4*d.* per word.
,, England, 2*s.* 6*d.* ,,

This cable has also been carried on to Turks Island and Jamaica, thus giving direct telegraphic communication with the West Indies.

A wireless telephone service between Bermuda and New York has been installed and gives communication with Great Britain, Ireland, Europe, U.S.A., Canada, Mexico, Cuba and the Hawaiian Islands.

Communication between Bermuda and England is maintained by steamers of Messrs. Elders and Fyffes, Ltd., and of the Pacific Steam Navigation Co., Ltd., which make regular calls at Bermuda every month outward and homeward, Bermuda being a port of call in both directions.

Permits to land in Bermuda are required by other than bona fide visitors with first class return tickets.

Communication between Bermuda and New York is maintained by steamers of the Furness-Bermuda Line, with bi-weekly sailings.

The Canadian National Steamships maintain a passenger and freight service between Montreal, Bermuda, Nassau, Kingston, Belize and British Honduras, sailing every two weeks from Montreal in summer and from Halifax in winter, and also a fortnightly passenger and freight service between Halifax, Boston, Bermuda, St. Kitts-Nevis, Antigua, Montserrat, Dominica, St. Lucia, Barbados, St. Vincent, Grenada, Trinidad and British Guiana.

Letters from England usually take from nine to twelve days. Postage rates are:—

	Letters.	Newspapers.
Within the Colony, per 1 oz.	1*d.*	½*d.* per 2 oz.
To U.K., India and British Colonies, per 1 oz.	1½*d.*	Books per 2 oz. Papers per 2 oz. ½*d.*
To all other countries ,,	2½*d.*	

Parcels to England, 1*s.* 6*d.* for 3 lbs.; 3*s.* for 7 lbs.; 4*s.* 3*d.* for 11 lbs; 6*s.* 9*d.* for 22 lbs.

Internal Communications.

A light railway is in operation between St. Georges and Somerset. There are approximately 105 miles of colonial and 15 miles of military roads. There is a private telephone company, which has 2,182 subscribers and about 11,600 miles of wire, a large portion of which is in underground cables.

Government and Constitution.

Representative government was introduced into the Colony in 1620, but the charter of the Bermuda Company of London was annulled in 1684, and since then the Governors have always been appointed by the Crown, and the laws of the Colony have been enacted by a local legislature consisting of the Governor, the Legislative Council, and the House of Assembly. The session lasts usually from November to June.

The Governor is assisted by an Executive Council, consisting of four official and three unofficial members. The Legislative Council consists of nine members, three of whom are official and six unofficial. The House of Assembly consists of thirty-six members, four of whom are elected by each of the nine parishes. There are 2,411, electors, the electoral qualifications being the possession of freehold property of not less than 60*l.* value. The qualification for a member of the House of Assembly is the possession of freehold property rated at 240*l.* The members of Executive Council and of the Legislature are paid 8*s.* a day for each day's attendance.

Local Government.

Hamilton and St. George have been incorporated since 1793 and 1797 respectively, and there are nine parish vestries, all the members of which, as well as of the two municipal corporations, are elected annually.

Salaries.

The Civil Service is paid according to the following incremental scales :—

Special, £600–£20–£700.
Grade IA, £550–£20–£650.
Grade I, £450–£20–£550.
Grade IIA, £350–£10–£440.
Grade IIB, £350–£10–£400.
Grade IIIA, £250–£10–£340.
Grade IIIB, £250–£10–£300.
Grade IVA, £150–£10–£240.
Grade IVB, £150–£10–£200.
Grade V, £100–£5–£150.

Colonial Secretary's Department.

Colonial Secretary, vacant, 1,000*l.*, and rent allowance 250*l.*
Assistant Colonial Secretary and Clerk to Executive Council, C. H. V. Talbot, Grade, Special.
Senior Clerk and Clerk to Legislative Council, A. R. Smith, Grade IIA.

Revenue Department.

Colonial Treasurer and Registrar of Shipping, J. T. Trimingham, C.B.E., 1,000*l.*
Asst. Treasurer, G. L. Young, Grade IA.
1st Revenue Officer, Hamilton, T. St. G. Gilbert, Grade IA
Collector of Customs, St. George's, H. J. Pearson, Grade IIA.

Post Office Department.

Colonial Postmaster, P. S. Ingham, 750*l.*
Assist. Colonial Postmaster, W. A. Manuel, Grade IA.

Public Works Department.

Director of Public Works, C. H. Smith, A.M.I.C.E., 800*l.*
1st Works Assistant, (vacant), Grade IA.
2nd ,, ,, J. B. Couper, Grade I.

Public Health Department.

Director of Medical and Health Department, H. C. Wilkinson, M.D., 1,000*l.*

Police and Gaols Department.

Chief of Police and Provost Marshal General, I. H. E. J. Stourton, Special.
Superintendent of Police, J. S. McBeath, Grade I.
Inspector of Police, M. B. Parker, Grade IIB.
Sub-Inspector of Police, A. H. Burrows, 300*l.*-10*l.*-350*l.*
Sub.-Inspector, C. W. Pantry, 300*l.*-10*l.*-350*l.*
Warden of Prisons, H. C. Morgan, Grade I.

Lunatic Asylum.

Medical Superintendent, O. A. Arton, M.D., C.M., 250*l.*

Quarantine.

Director of Medical and Health Department, H. C. Wilkinson, M.D.
District Medical Officer, Western District, P. J. Sweeney, M.D.
District Medical Officer, Eastern District, W. H. C. Masters, M.B., Ch.B.

Judicial Establishment.

Chief Justice, Sir Sidney O. Rowan-Hamilton, Kt., 1,150*l.* and rent allowance 250*l.*
Assistant Judge, R. C. H. Hallett, fees.
Attorney-General, J. T. Gilbert, O.B.E., 1,000*l.*
Registrar of Supreme Court and Registrar General, W. N. Parker, Grade I.
Police Magistrate, Eastern District, H. Martin Godet, 700*l.*
,, ,, *Western District*, C. T. Fowle, J.P., 400*l.*
Marshal, Admiralty Court, I. H. E. J. Stourton.

Department of Agriculture.

Director of Agriculture, T. A. Russell, special.
Plant Pathologist, J. M. Waterston, Grade I.
1st Agricultural Assistant, W. R. Evans, Grade IIA
Horticulturist, G. R. Groves, Grade IIA.
Inspector of Produce, T. A. Hollis, Jr., Grade IIB
Government Veterinary Officer, C. J. Cooper, D.V.S., Grade IIIA.

Board of Trade.

Inspector, Board of Trade, J. H. Parker, Grade IA.
Curator, Aquarium, L. L. Mowbray, 500*l.*
Assistant Curator, L. S. Mowbray, Grade IIIA.
Warden of Pilots, Comdr. Landman, Special.
Head Signalman, A. J. C. J. Moulder, Grade IIIB.
Meteorologist, Cmdr. H. B. F. Moorhead, Special.
Assistant Meteorologist, P. C. Bartrum, Grade IIA.

Trade Development Board.

Secretary, J. J. Outerbridge, special.
Assistant Secretary and Sports Promoter, T. H. Mowbray, Grade IIA.

Department of Education.

Director of Education, C. G. G. Gilbert, B.A., M.C., Special.
Attendance Officer, S. Davis, Grade IIIA.

Hospital, King Edward VII Memorial.

Secretary-Manager, P. Pattisson, Grade IA.

BRITISH GUIANA.

Situation, Area and Population.

British Guiana is the only British Colony on the Mainland of the South American Continent. It lies on the north-eastern coast of the continent between parallels 1° and 8° North and meridians 57° and 61° West. It has a coastline of about 270 miles extending almost from the eastern mouth of the river Orinoco to the river Courantyne, and is bounded on the north by the Atlantic Ocean, on the south and south-west by Brazil, on the east by Dutch Guiana, and on the north-west by Venezuela. It varies in depth from 540 miles on the western to 300 miles on the eastern side.

The area of the Colony is approximately 89,480 square miles, a little larger than the combined areas of England, Scotland and Wales.

The capital is Georgetown, situated in latitude 6° 49′ 30″ North and longitude 58° 11′ 30″ West. The population on 31st December, 1937, was 67,448. The next town of importance is New Amsterdam, about 60 miles east of the capital with a population of 9,650.

The estimated population of the Colony on the 31st December, 1937, was 337,039 made up as follows:—

Aboriginals	8,797
East Indians	142,978
Chinese	3,355
Europeans (Portuguese)	8,578
Europeans (other than Portuguese)	2,233
Blacks	130,693
Mixed, etc.	40,405

Of the estimated total there were 168,289 males and 168,750 females.

Physiography.

The Colony may be divided into three zones, the northern one is a low-lying flat swampy strip of marine alluvium known as the coastal region. This rises gradually from the seaboard and extends inland for a distance varying from 10 to 40 miles. It is succeeded by a broader and slightly elevated belt consisting of sands and clays which is mainly undulating and in places is covered by sand-dunes rising from 50 to 180 feet above sea level. The southern zone is more elevated. It rises gradually to the south-west between the river valleys, which are in many parts swampy, and contains three principal mountain ranges, several irregularly distributed smaller ranges, and in the southern and eastern parts many isolated hills and mountains. The eastern portion is almost entirely forest-clad, but on the south-western side there is an extensive area of flat grass-clad savannah elevated about 400 to 700 feet above sea level.

The country is traversed by many large rivers, which, with their numerous tributaries and branch streams, form a vast network of waterways. All the larger rivers of the Colony are impeded above the tide-way by numerous rapids, cataracts and falls, which render the navigation of the upper reaches difficult.

In its scenery British Guiana affords very great contrasts. The tourist who visits the colony and confines himself to the flat and settled coast-lands leaves with the impression that British Guiana is merely a mud-flat not entirely above sea-level; but the traveller who penetrates any considerable distance into the vast interior must be greatly impressed by the tropical vegetation of lofty trees, tangled lianas and graceful palms, the hilly nature of the country, the many great ranges and curiously-shaped mountains, the elevated undulating plateaus, the extensive savannahs, and the multitude of cataracts and waterfalls of surpassing beauty, which occur on the upper parts of the large rivers and their tributaries.

Situated on the Potaro River is *Kaieteur*—one of the recognised largest single-drop waterfalls of the world. It is nearly five times the height of Niagara, having a vertical drop of 741 feet, with a series of rapids and falls immediately below the pool, giving a further fall of 80 feet. Its width varies from 350 to 400 feet, and the depth of water passing over from a few feet to 20 feet according to the season of the year. These Falls, which are situated amidst grand and remarkable river and hill scenery, are a source of attraction to tourists. The journey from Georgetown to Kaieteur is now made *via* the Bartica-Potaro road. Tours are arranged by the Transport and Harbours Department.

Climate.

A.—*Coastal Belt.*—The climate compares favourably with that of other countries and islands similarly situated, and resembles rather that of a sub-tropical country. The mean temperature throughout the year is 80·4° F.

For most months of the year the maximum shade temperature is about 85° F., and even in the hottest months (August, September, and October) a temperature of 89° F. is rarely recorded.

At night the temperature falls about 12° to 14° F. The night temperature averages 73° or 74° F., and in the coolest months of the year (January, February and March) it may reach as low as 70° F.

The heat of the sun is tempered by fresh breezes from off the sea which blow steadily and without intermission during the daytime for the greater part of the year, and, during the months of January, February and March, continue both day and night.

The general direction of the wind is North-east to East, and it varies from gentle to fresh with occasional squalls; but hurricanes are unknown. The nights throughout the year are cool and conducive to sleep.

The seasons of the year for the coastal areas are as follows:—

The long wet season—Mid-April to Mid-August.
The long dry season—Mid-August to Mid-November.
The short wet season—Mid-November to end of January.
The short dry season—Beginning of February to Mid-April.

The average rainfall for Georgetown in the county of Demerara is about 88·64 inches annually, that for the County of Berbice being about eight inches lower, and that for the County of Essequibo fourteen inches higher. The most humid month of the year is May, and the atmosphere is driest during September and October. The mean average humidity for Georgetown for the past 83 years is 78 per cent.

B.—*Middle Interior and Upper River Areas.*—Generally speaking, the climate is hotter and more humid in the interior and river areas away from the coastal belt, the most noticeable change being the absence of the fresh sea breezes which make living so congenial on the seaboard. In forest areas and on rivers surrounded by forests the day temperature is distinctly hot and trying. On the other hand the nights are noticeably cooler than on the coastal belt. The rainfall is heavier.

C.—*Far Interior and Savannahs.*—Climate, temperature and humidity are modified by the varying physical conformations of the territory in the far south, and depend especially on the altitude and the presence or absence of forest belts. As the name implies, the savannahs, in the upper Berbice river

districts and in the south-west of the colony, are free from dense forest and are more in the nature of park country, and here the temperature is slightly higher than in forest regions, and the rainfall markedly less.

History and Constitution.

The coast line of the country between the Rivers Amazon and Orinoco was first traced by Spanish sailors in 1499 and 1500; and, during the 16th and early 17th centuries, the search for the fabulous city of Eldorado stimulated exploration of this region. The territory was first partially settled in 1616 by Dutch merchants, who erected a fort and depot at Fort Kykoveral in the present county of Essequibo. This colony subsequently came under the control of the Dutch West India Company, which was formed in 1621. In 1624 a settlement was founded on the Berbice by Van Peere, a Flushing merchant, and held by him under a licence from the Company. The first English attempt at settlement was made by Captain Charles Leigh on the O'apock river (now French Guiana) in 1604. The effort, though followed up by Robert Harcourt in 1613 and 1627, failed to establish a permanent settlement. Lord Willoughby, famous in the early history of Barbados, also turned his attention to Guiana, and founded a settlement in Surinam in 1650, which was captured by the Dutch in 1667, and ceded to them at the peace of Breda in exchange for New York. The Dutch retained their hold on the three colonies with more or less firmness, now yielding to England, now to France or Portugal, till 1796, when during the war of the French Revolution they were captured by a British Fleet from Barbados. The territory was restored to the Dutch in 1802, but in the following year retaken by Great Britain, and finally ceded to that Power in 1814.

In 1745 colonists from Essequibo settled on the Demerara River, and in 1773 Demerara was constituted a separate colony, but in 1784 it was reunited under one government with Essequibo, Berbice being under a separate government, an arrangement which continued in force under the British Administration down to the year 1831.

The constitution of the Colony of Berbice dates from the year 1732. Under it the Governor was nominated by the Directors of the Mercantile Body called the Berbice Association, and was assisted by a council of six. In 1826 an order of the King in Council was issued, dissolving the then Council of Government, appointing another, and thenceforward vesting the right of appointing to vacancies in the Governor as representing the Crown.

The Court of Policy for Essequibo appears to have been established very early in the history of the Colony. Until 1773, Demerara was represented on it. In 1773 a separate Court of Policy was set up for the latter, but provision was made for representatives of the two Courts of Policy to form a Combined Council, and the two bodies were merged in 1789, when the two Colonies of Essequibo and Demerara were united. Disputes having arisen between the Colonists the local Government and the West India Company as to the right of appointing the colonial members of the Court of Policy, in the year 1787, a provisional "Plan of Redress," as it was termed (being in fact the draft of a new constitution) was framed by a Committee of the States-General, to whom had been referred sundry petitions of the Colonists. This being approved of, a commission was despatched by the States-General to the Colony, who on their arrival in 1789 dissolved the then existing Government and established a new one for the conjoined Colonies upon the basis of the scheme in question, which continued in operation notwithstanding the captures of the Colony by the British in 1796 and 1803, the Articles of Capitulation having stipulated that the laws, usages, and institutions of the Colony should be maintained as before.

The Council or Court of Policy consisted of 1st, The Director-General; 2, The Commander of Essequibo; 3, The Fiscal of Essequibo; 4, The Fiscal of Demerara; 5 and 6, two Colonists from Essequibo; 7 and 8, two Colonists from Demerara.

In the first instance, the unofficial portion of the Council was to be chosen from a double nomination by the Colleges of Kiezers or Electors, of which there were two, one for each County,* each consisting of seven Members elected by a majority of the votes of the inhabitants possessing not fewer than twenty-five slaves, such votes to be in writing and signed by the voter. The tenure of the office of Kiezer, as subsequently defined by Proclamation of Sir Benjamin d'Urban in 1831, was to be for life, unless the party resigned or ceased to be an inhabitant.

In 1795 it was deemed necessary, during a period of some confusion, to introduce four members "commissioned" by the Colleges of Electors of both Colonies to have, jointly with the Court of Policy, the administration of the public funds. In the following year, however, Governor Beaujon annulled this arrangement, and to secure to the inhabitants more ample control of taxation enacted that in lieu of the four above mentioned, there should be six inhabitants adjoined to the Governor and Court of Policy, three from each Colony, to be elected by the inhabitants qualified as in the case of Kiezers, and to serve for two years, but with powers strictly limited to raising Colony taxes, and assisting in the audit of the public accounts.

Beaujon's proclamation was materially modified, though without affecting the definition of the duties of the financial representatives, by a proclamation of Acting Governor Carmichael in 1812, consolidating the two Colleges of Kiezers and Financial Representatives. This proclamation remained operative, though unconfirmed by the Crown, until, in 1831, when the three provinces were united, it was annulled by a Royal Instruction restoring the pre-existing arrangement, and extending the right of suffrage to the inhabitants of Berbice.

In the year 1855 under the administration of Sir Philip Wodehouse, an Ordinance was passed to alter and amend the Political Institutions of the Colony, but it was not approved by Her Majesty, and from that date till 1891 the only constitutional legislation was the passing of Ordinance No. 1 of 1864, a declaratory Act, defining the meaning of the term "Colonist," as employed in the "Plan of Redress" above noticed; and Ordinance No. 16 of 1864, to remove some difficulties in the exercise of the functions of the College of Electors.

The Constitution, as it existed up to 1891, may be summed up very briefly. It consisted of a Governor, Court of Policy, and a Combined Court. The unofficial members of the Combined Court and Court of Policy were chosen by a College of Electors. The functions of an Executive and Legislative Council and House of Assembly were performed by the Governor and Court of Policy, except as regards taxation and finance, which were dealt with by the Combined Court, composed of the Governor and Members of the Court of Policy, combined with the six Financial Representatives. The Court of Policy passed all laws and ordinances, except the Annual Tax Ordinance, which was passed by the Combined Court.

* Demerara and Essequibo only are here alluded to.

Digitized by Google

During 1891 an Act was passed, which came into force in 1892, effecting a considerable change in the constitution. By this Act the administrative functions of the Court of Policy were transferred to an executive council, and the duties of the former became purely legislative.

The College of Electors was abolished, and the unofficial members have since been elected by the direct vote of the whole body of electors.

The Combined Court had the power of (1) imposing the Colonial taxes and auditing the public accounts; and (2) discussing freely and without reserve the items on the annual estimates prepared by the Governor in Executive Council; it could reduce or reject, but not increase, any item. The first of these powers was bestowed in 1796, when Governor Beaujon called the financial representatives into being, "with a right of voting only for the raising of colonial taxes and not further"; while the second was conferred periodically by His Majesty's Order in Council after each renewal of the Civil List and was co-existent with the Civil List.

The Court of Policy consisted of the Governor, seven official members, and eight elected members. It could be prorogued or dissolved at any time by the Governor and in any case was dissolved at the end of five years, and a general election had to be held within two months of the date of dissolution. The number of financial representatives, who with the Court of Policy formed the Combined Court, was 6.

In 1926, at the request of the Secretary of State, a commission consisting of Sir Roy Wilson and Mr. H. Snell, M.P., was sent to British Guiana to report on the economic conditions. In its report (Cmd. 2841) the commission stated that one of the greatest impediments to development was the financial situation, and that it was essential that the Government should have power in the last resort to carry into effect measures which it considered essential, and that for this purpose an alteration in the constitution would be necessary. A local commission was appointed in 1927 to consider the steps to be taken to confer the necessary powers on the Governor and reported in favour of a change in the constitution.

In 1928, by an Act of Parliament, it was enacted that it should be lawful for His Majesty in Council to create and constitute, in substitution for the existing Legislature, a Legislature for the Colony of British Guiana in such form and with such powers as His Majesty in Council might determine, and from time to time to alter and amend the constitution of the Legislature and any powers thereof; and that any such Order in Council might provide that, notwithstanding the powers conferred on the Legislature thereby, there should be reserved to or conferred on His Majesty full power by Order in Council from time to time to make laws for the peace, order and good government of the Colony of British Guiana.

Pursuant to this Act, an Order of the King in Council providing for the Government of the Colony and for the constitution of a Legislative Council, was brought into operation on 18th July, 1928. The Court of Policy and Combined Court were thereby abolished and their powers were given to the new Legislative Council. The new Council consists of the Governor as President, of ten Official Members and of nineteen Unofficial Members. The Colonial Secretary and Attorney-General are ex-officio members, and of the nineteen unofficial members, fourteen are elected and the remainder nominated by the Governor. The persons who were elected members of the Combined Court became under the Order in Council the first Elected Members of the Legislative Council. It was also provided that any matter requiring a vote of enactment of the Council might be decided by the Governor in Executive Council notwithstanding that such decision might be contrary to the vote of a majority of the Legislative Council; but in such a case effect cannot be given to the decision until the facts have been reported to the Secretary of State and his approval obtained. The second General Election under the new Constitution was held in 1935.

An Amending Order of the King in Council was brought into force on 13th August, 1935. The Order amends the Principal Order with respect to the qualifications of voters and makes additional provision to counteract corrupt and illegal practices committed in reference to elections.

Law.

The Roman-Dutch law was in force in the Colony until 1st January, 1917, at which date the Civil Law of British Guiana Ordinance came into force. This enactment, along with two others, was the outcome of a Common Law Commission and Statute Law Committee. The Criminal Law is based upon that of Great Britain and is administered in the same manner. Indictments are preferred by the Attorney-General.

Local Government.

In 1837 the first municipal body was incorporated. The principle has now been materially extended in its application.

The existing municipal authorities are:—Mayor and town council, Georgetown; and mayor and town council, New Amsterdam. Their revenue in 1937 was respectively 148,652*l.* and 21,491*l.*, and their expenditure 143,502*l.* and 21,129*l.* There are also 25 village districts and 63 country districts whose revenue and expenditure in 1937 were respectively 32,480*l.* and 32,161*l.*

Communications—Internal and External.

The three rivers, Demerara, Essequibo, and Berbice, are navigable for 90, 35, and 150 miles respectively. Beyond these distances, owing to the nature of the country, they abound in cataracts and waterfalls. There is a good network of roads, and there are small canals in connection with the Demerara River. There is a railway from Georgetown to Rosignol on the Berbice River, 60½ miles in length, and one from Vreed-en-Hoop on the Demerara River to Parika on the Essequibo River, 18½ miles in length, both lines having been constructed by the Demerara Railway Company at a total cost of 694,621*l.* 8*s.* 1*d.* The Railways were acquired by the Colony from the Company in 1921 as from the 1st January, 1919, and are now operated by Government in conjunction with certain steamer services under the control of the Transport and Harbours Department. The steamers operate ferries across the Demerara, Berbice and Essequibo Rivers and services from Georgetown to Adventure on the Essequebo Coast to Bartica at the junction of the Mazaruni and Essequebo Rivers, to Morawhanna in the North-West District and to Pickeregill on the Pomeroon River and also from New Amsterdam to Paradise on the Berbice River. Launch services are also run by the Department on the Canje, and Pomeroon-Moruka Rivers.

Motor transport services are also operated from the steamer terminus at Bartica to Garraway Stream on the Potaro River, and to Issano on the Mazaruni River.

A steamer service is also operated from Georgetown to Wismar on the Demerara River by Messrs. Sprostons Limited.

Digitized by Google

A number of roadways and trails are maintained by Government in the interior to serve mining and other areas.

The roads suitable for motor traffic are :—

(*a*) From Bartica, the steamer terminus on the Essequibo River, to the Minnehaha River at 118 miles, crossing the Potaro river by a 360 feet span suspension bridge at 100½ miles.

(*b*) A Branch Road from the above (*a*) at 73½ miles to Issano Landing at Mazaruni River, a distance of 50¾ miles.

(*c*) A Branch Road from (*a*) at 89 miles to Tumatumari on the Essequibo River, a distance of 4 miles.

(*d*) A Branch Road from (*a*) at 102 miles to Kangaruma on the Potaro River, a distance of 4 miles.

The object of the above road and its branches is to render the districts concerned accessible by road transport from Bartica instead of by the slow and dangerous navigation of rivers impeded by falls and rapids.

The Bartica-Potaro Road (*a*) and its branch to Kangaruma are also part of the present day route to the Kaieteur Fall.

(*e*) The Camaria Portage, a roadway 3½ miles in length, side-tracking the series of falls and rapids on the Cuyuni river known as the Camaria Falls.

(*f*) The Morawhanna-Wanaina Road, a road 6½ miles in length from the left bank of the Barima river opposite Morawhanna *via* the Government Station at Mabaruma to the Government Experiment Station at Hosoro Hill, and with a branch road to the Aruka River at Kumaka Creek, ¾ mile in length.

The following trails are passable to pedestrians, horses and pack animals.

The Rupununi Cattle Trail, 299 miles in length, from Takama on the Berbice River *via* Kurupukari to Dadanawa on the Rupununi River.

The Barima-Barama Trail, 29 miles in length between Arakaka on the Barima River and Towakaima on the Barama River.

In addition to these trails there is a large mileage of forest trails suitable for foot traffic only serving sections of the mining areas and by-passing falls and rapids in the rivers. Examples of the latter are the portages at Amatuk Falls and Waratuk Falls, on the Potaro River, by which travel to the Kaieteur Fall is made possible.

The Georgetown wireless station, operated by Cable and Wireless Ltd., is in communication with ships at sea and stations outside the Colony, and a direction finding station is also maintained. The Colony is in telegraph communication with Barbados, and through Barbados with the United Kingdom, Canada, North America and other parts of the world over cables maintained by Cable and Wireless (West Indies) Ltd. Communication with the British West Indies generally is maintained by Cable and Wireless (West Indies) Ltd. cable to Barbados and thence by wireless.

The principal tariffs are :—

To the United Kingdom ..	1*s.* 3*d.*	per word.
To Eastern Canada ..	1*s.* 3*d.*	,, ,,
To Western Canada ..	1*s.* 3*d.*	,, ,,

There are also cheap rates at half and one-third of the ordinary tariff, the latter being subject to a minimum charge.

The Pan American Airways operates a radio station under Government licence in Georgetown for communication with aircraft and certain ground stations overseas.

There is an up-to-date Postal Telephone Service in the Colony with Exchanges in Georgetown, New Amsterdam and nine of the larger villages, including four semi-automatic exchanges.

Two separate police exchanges are maintained, one in Georgetown and one in New Amsterdam.

A full automatic exchange was opened at Georgetown on 29th June, 1928.

Length of telephone trunk lines 797 miles. Telephone lines in Exchange areas, 5,300 miles. Aerial cables 13 miles. Submarine cables 22 miles.

An efficient Postal Telegraph Service, connected by 317 miles of line and the above-mentioned submarine cables is maintained between 48 Post Offices on the coast lands from Skeldon on the Courantyne River to Charity on the Pomeroon River, and is extended to six district stations in the interior by radio through a central Post Office radio station in Georgetown.

A well-organised postal service extends throughout the colony, letters reaching Pomeroon in 10 hours from Georgetown, and the North-Western District in 24 hours. Georgetown and New Amsterdam are lighted by electricity.

The mail communication between the Colony and the United Kingdom is somewhat irregular, but nevertheless there are many opportunities.

The steamers of the Harrison Bookers and Dutch Surinam Lines are used, also via Trinidad :—

French—Plymouth and St. Nazaire Line.
Dutch—Colon Line.
German—Hamburg-American Horn Line.

Mails for North America are received and despatched fairly regularly by the following steamers :—Canadian National Steamships, Ocean Dominion, Furness Bermuda Line, American Caribbean, and *via* Trinidad by Prince Munson Lines, and by the aeroplanes of the Pan American Airways, Incorporated

There is also an Air Mail Service with the United Kingdom *via* Natal, Dakar and Paris. The approximate time of transmission from Georgetown to London by this route is 6 days.

Rates of Postage.

	Letters.	Newspapers.
To the British Empire	4 cents. per 1 oz. 3 cents. each addtl.	For every 2 oz. 1 cent.
To other postal union countries	for 1 oz. 6 cents. and 3 cents. for every succeeding 1 oz. or part of 1 oz.	For every 2 oz. 1 cent.
Within Colony	each letter not exceeding 1 oz. 2 cents; over 1 oz. not over 2 oz. 3 cents; over 2 oz. not over 4 oz. 4 cents; each additional 2 oz. 1 cent.	2 cents.

Industry and Trade.

The staple products of British Guiana are sugar, rum, molasses, molascuit, concentrated lime juice, rice, cocoanuts, coconut-oil, copra, coffee, balata and rubber. Sugar and rice are the chief industries of the Colony. Sugar and its by-products furnish 64 per cent. in value of the total exports. Timber —including the famous Demerara Greenheart, which is unrivalled for underwater structures, piling, etc., and Mora, which is becoming increasingly known and valued for railway sleepers—charcoal and hides are also exported.

Within recent years there has been a marked tendency towards the amalgamation of sugar estates and at present 24, run under separate management, are in active operation; the acreage under sugar is 70,233 English acres and the area reaped 64,890 English acres. The rice cultivation in the Colony was returned at 60,079 English acres, but including the second or Spring crop the actual area reaped was 70,787 acres. Other crops grown, such as ground provisions, coffee, rubber, cocoanuts, cacao, citrus and other fruit, and limes amounted to 40,231 acres.

The forests, with which the interior of the colony is covered, abound in woods of rare beauty and value. Some of the hard woods are, from their remarkable durability, peculiarly suitable for house and shipbuilding purposes, and for railway sleepers, while others are equally prized for the manufacture of household furniture.

During 1937, 186,875 tons of sugar, and 1,888,331 pf. gallons of rum, were produced. The bulk of the production is high-class vacuum pan sugar for refining purposes, while certain quantities of the far-famed "Demerara Crystals" are still exported.

Cocoanuts, coffee and cocoa are grown on the alluvial soils on the banks of the rivers. Rice is now grown to a considerable extent, chiefly by East Indians, on the low lands within the empoldered areas. Rice exported, 1937, 18,795 tons, valued at 163,237*l*.

Gold and diamond working is carried on by about 5,500 diggers. The diamonds exported during 1937 amounted to 34,556 carats, valued at 86,918*l*.

The values of the principal exports besides sugar (181,574 tons valued at 1,585,022*l*.) and rice are:—

Article.	Quantity.	Value.
Bauxite, tons	300,707	£358,290
Gold, ozs.	39,047	211,023
Rum, pf. gls.	1,235,366	108,451
Molasses, gls.	5,776,864	61,922
Timber, cub. ft.	439,621	48,949
Balata, lbs.	390,215	20,926
Charcoal, tons	3,588	10,250
Copra, tons	716	12,896
Lumber, ft.	539,231	8,475
Firewood, tons	11,203	5,660
Oils (Essential of Limes), gins.	700	5,431
Coconuts, No.	1,968,665	6,357

The chief imports are beef, pork, cheese, butter, cornmeal, flour, machinery, motor vehicles, dried fish, manure, tobacco, oils, earthenware, glass and hardware, cutlery, textiles, spirits, wines and malt liquors.

Fifty-three per cent. of the trade is with the United Kingdom, 14 per cent. with Canada, and 10 per cent. with the United States; other important customers being British India, British West Indies, Japan, Germany, Holland, Belgium, and Argentina.

Import duties are leviable both on an *ad valorem* and a specific basis, the total amount of revenue collected in 1937 from goods paying specific duties being 379,223*l*. as compared with 178,266*l*. from goods subject to *ad valorem* rates. The prevailing *ad valorem* duty rates (calculated on c.i.f. values) are 16⅔ per cent. (British Preferential tariff) and 33⅓ per cent. (General tariff). Jewellery, motor vehicles and parts, plate and plated ware pay 20 per cent. and 40 per cent. respectively, while agricultural and other industrial machinery is exempt from duty if of British Empire manufacture but is liable to a 7½ per cent. *ad valorem* duty if of foreign origin.

Most dutiable articles of British Empire manufacture or production receive a preference equivalent to one-half of the General tariff rates, but the preference on certain specified articles, *viz.*, apples, beef (pickled), boots and shoes (not being of rubber), butter, cement, cheese, cocoa, confectionery, cordage, fish (canned, dried or otherwise preserved), lard, milk, pork is a minimum of 66⅔ per cent. The preference on flour is 48 cents a bag of 196 lbs., on spirits 60 cents a gallon, and on wine, beer and ale 20 per cent. of the general rate. Boots and shoes of rubber receive a preference of over 100 per cent.

The following are the principal revenue-yielding articles of import on which duty is payable on a specified weight or other measure of quantity:—Tobacco, flour, spirits, kerosene oil, motor spirit, wines and malt liquors.

Medical Institutions.

There are six Government public (general) hospitals providing beds for approximately 958 patients. The accommodation varies from 8 beds in smaller out-stations to 622 beds in the Public Hospital, Georgetown (Demerara).

There is also a Mental Hospital in Berbice and a Leprosy Hospital at Mahaica (Demerara) providing accommodation for 758 and 520 patients respectively.

There are in addition to the dispensaries attached to the general hospitals 13 Government dispensaries in outlying parts of the Colony.

Twenty-three hospitals, with dispensaries, with 1,567 beds, are maintained by proprietors of sugar estates.

Attached to the Public Hospital, Georgetown, (Demerara) are X-Ray and Electrical-treatment, Ophthalmic, Dental and Bacteriological Departments, and Venereal Diseases and Tuberculosis sections. Infirmaries are attached to the Prisons (2), Alms House (1) and Industrial School.

The Public Health Department consists of 1 Medical Officer of Health and 3 Assistant Medical Officers of Health and 39 Sanitary Inspectors.

There are three institutions where nurses are trained by qualified medical and nursing staffs.

There is a Surgeon Specialist attached to the Public Hospital, Georgetown, and the European nursing staff consists of 1 Nurse Superintendent and 5 Divisional Sisters.

Education.

A State-aided system of elementary education was established by Law—The Education Ordinance, Cap. 196. Elementary education is compulsory and free.

The elementary schools are denominational. The central administration is vested in a Director and Education Committee, and the local control in managers, who are usually ministers of religion.

The number of schools receiving aid in 1937 was 240, with 52,276 scholars, and the aid granted amounted to 76,092*l*.

Provision is made for the higher education of boys by a Government college in Georgetown, in which the course of instruction is similar to that of a public school or first grade grammar school in England. Two secondary schools for girls, one for boys, and one for boys and girls, receive grants in-aid from the Government, and there is awarded annually one public scholarship of the value of 90*l*., open to boys

Digitized by Google

and girls and tenable at a University or College in the British Empire. Twelve Scholarships, entitling the holders to free education at the Government College or at other approved schools, are granted to scholars of the elementary schools. In 1924-25 the whole system of education in the Colony was investigated by a Commission. Important changes were recommended, and are being made as opportunity arises.

A Teachers' Training Centre was established in September, 1928.

During 1931 a Government School with accommodation for 600 pupils was erected in Georgetown in place of two elementary denominational schools which were closed. This school was opened on 1st June, 1932. In 1935 another Government school was opened in the county of Essequibo in place of two denominational schools which were closed, and in the previous year a denominational school was taken over as a Government school. There are now, in all, seven Government schools, two of which are small schools for Aboriginal Indians and one a Kindergarten school in Bush Lot Settlement, Essequibo.

Currency and Banking.

Accounts are kept in dollars and cents. British sterling is current and legal tender.

On the 16th August, 1915, the Combined Court approved of the issue of Government Currency Notes of the face value of $1,734*s.* 2*d.*, and $2,738*s.* 4*d.* The first notes were issued in January, 1917; and on the 31st December, 1937, there were Notes in circulation to the face value of 129,797*l.*

Barclays Bank (Dominion, Colonial and Overseas) Ltd., and Royal Bank of Canada have establishments at Georgetown, with branches at New Amsterdam, Berbice. The former, on the 31st December, 1937, had a note circulation in British Guiana of 115,210*l.* and the Royal Bank of Canada 70,520*l.* The total note circulation in the Colony on the 31st December, 1937, was 315,527*l.*

The first Government savings banks were established at Georgetown and New Amsterdam in the year 1836. The Combined Court in November, 1910, passed a resolution approving of the amalgamation of the two Banks, and authorising the transfer of the Government Savings Bank to the Post Office on the 1st July, 1911.

The British Guiana Bank, now the Royal Bank of Canada, opened a Savings Bank Department when this amalgamation took place, and a considerable amount of business went into their hands. Barclays Bank has also since opened a Savings Bank department.

There are 46 Post Office Savings Banks. At the end of 1937 these banks had 53,914 depositors, with 577,681*l.* to their credit.

Mexico, C. H. Hayward, Hon. Consul; S. K. Watson, Hon. Vice-Consul (both reside in Trinidad).
Panama, L. A. Deveaux, Hon. Consul.
Germany, G. R. Reid.

*BRITISH HONDURAS.

Situation and Area.

British Honduras is a Colony on the east coast of Central America, bounded on the north by Yucatan, on the west by a straight line drawn from the Falls of Gracias a Dios on the River Sarstoon, to Garbutt's Falls on the River Belize, and thence due north to the Mexican frontier, on the south of Guatemala, and on the east by the Bay of Honduras. It lies between 18°·29 and 15°·54 N. latitude and 89°·15 and 87°·50 W. longitude.

The area of the Colony is 8,598 square miles, (about the size of Wales), including Albion Island in the River Hondo (about 26 square miles), and Ambergris, St. George's, English, Turneffe and other Cays (Islands), 212 square miles, a large portion of the latter being mangrove swamps without any soil. It is estimated that about 175 square miles are under cultivation.

History.

The coast was discovered in 1502 by Columbus, and its early settlement is supposed to have been effected from Jamaica, about 1638, by adventurers, who were attracted by the logwood which grew on the banks of the Hondo and other rivers. Their headquarters were long at St. George's Cay. The name of the present chief town and of the River Belize is alleged to be a corruption of the name of the buccaneer Wallis, who was driven from Hispaniola in that year, and who is said to have been the leader of the settlers. The Spaniards frequently endeavoured to expel the logcutters; but, though they succeeded in driving them from the northern coast of Yucatan about 1717, they failed to dislodge them from the eastern coast.

An earlier settlement had been made by a chartered company, of which the Earl of Warwick was chairman and John Pym treasurer, on two small islands off the Mosquito coast, in 1630. The Mosquito natives were very friendly to the English settlers, and their king, shortly after the conquest of Jamaica, placed himself under English protection, and the Governors of Jamaica exercised a sort of supervision over the affairs of the settlement. In 1739 the native king made a treaty resigning his country to Great Britain, and forts were built in 1742 at the Island of Ruatan, and at Black River on the mainland. Ruatan was abandoned in 1749, but at the same time an officer was formally appointed by the Government of Jamaica to superintend the settlements on the Mosquito Coast. As a result of the treaty of Paris in 1763, the forts were dismantled and the garrisons withdrawn. The settlers remained, however, and from that date until 1798, when the last attempt to establish the sovereignty of Spain over the territory was defeated by the inhabitants in the "Battle of St. George's Cay," the Spaniards made frequent but ineffectual attempts to expel the woodcutters by force of arms. By the Treaty of Versailles of 1783 Spain recognised a district (within what is now British Honduras) within which the British logcutters might work without interference; and by the Convention of London signed in 1786, it was agreed that the British Colonists should evacuate the Mosquito Coast and the adjacent islands. In spite of these treaties, many of the settlers remained outside the agreed limits: and it was not until the treaties of 1859 with the Republic of Honduras and 1860 with Nicaragua that the Bay Islands and the

Mosquito Coast were finally recognised as belonging to those states, Nicaragua agreeing to allow the Mosquito Indians autonomy in the Reserve which was assigned to them.

On the 10th of September, 1931, Belize was visited by a hurricane and tidal wave which caused great damage and loss of life.

Constitution.

The first settlers from 1638 to 1786 managed their own affairs. Persons were annually elected to act as Magistrates at public meetings held for the purpose. These Magistrates discharged all executive and judicial functions. Resolutions were passed at public meetings, and they formed the laws binding on the community. In 1765 these customs were formally recognised by the King's Government, after the visit of Admiral Sir William Burnaby to the settlement in that year. The customs of the settlers were codified and published, and became known as "Burnaby's Laws."

In 1786 a Superintendent was appointed by the Home Government, but during the years 1790–1797 elected Magistrates again ruled the settlements. From this latter date Superintendents were regularly appointed until 1862. An Executive Council was established in 1840 to assist the Superintendent, and in 1853 a Legislative Assembly was formally constituted consisting of 18 elected and 3 nominated members. The settlement was declared a Colony on the 12th May, 1862, and a Lieutenant-Governor was appointed subordinate to the Governor of Jamaica. In 1870 the Legislative Assembly was abolished by a local enactment, and a Legislative Council substituted therefor, consisting of five official, and not less than four unofficial, members, with the Lieutenant Governor as President. The constitution of the Council was altered in 1892, after a dispute with the Governor, and became three ex-officio members and not less than five (nominated) unofficial members with the Governor as President. Since 1913 the Council has consisted of six official and seven unofficial members. A new Legislative Council was constituted in 1936 (under Ordinance No. 13 of 1935) with the Governor as President, three ex-officio and two nominated members, two unofficial members nominated by the Governor and five unofficial members elected by four constituencies. On the 31st October, 1884, Letters Patent were proclaimed constituting the office of Governor and Commander-in-Chief, which rendered the Colony independent of Jamaica. These were renewed by Letters Patent proclaimed on the 10th September, 1909.

The English Common Law and all statutes of the Imperial Parliament "in abrogation or derogation or in any way declaratory of the Common Law" passed before 1899 extend to the Colony as far as local circumstances render such extension suitable, and subject to modification by Colonial ordinances. Pursuant to Ordinance No. 31 of 1923, a new and revised edition of the Laws of this Colony has been published in two volumes. This edition, referred to as "The Consolidated Laws, 1924," came into force on the 4th February, 1925, and supersedes the revised edition published in 1915 and all ordinances passed before July, 1924. Appeals to His Majesty in Council are regulated by Chapter 155 of the Consolidated Laws, 1924.

The Executive Council consists of the Governor, and official and unofficial members; three of the official members are *ex officio*, five other members being appointed.

For administrative purposes the Colony is divided into five districts—Belize, which includes the capital at the mouth of the river of the same name; the Northern District; the Cayo district; the Stann Creek district; and the Toledo district, the main station of which is Punta Gorda.

General Description.

In its physical outlines the Colony resembles other parts of Central America, the land being flat and swampy throughout the greater portion of the coast line, and gradually rising as the interior is approached. The characteristic soils of the Colony are known as Cohune ridge (the vegetable alluvium along the river valleys), the Pine ridge (sandy tracts covered with pines, scrub, and wiry grass), and Broken ridge (intermediate between these two). Besides these there are swamp, savannah, and mountain.

The chief rivers are in the north of the Colony, and run in a north-easterly direction, the Belize reaching the sea on the east, and the Hondo and the New River on the north.

The northern district, of which the Hondo forms the natural boundary, is but little raised above the sea; but towards the south the character of the country becomes more elevated, until in the Cockscomb Mountains a height of some 3,700 feet is attained. That district of the Colony remained until 1879 wholly unexplored, when it was traversed by the then Colonial Secretary, Mr. Fowler, from Garbutt's Falls on the Belize River, at the western frontier, to the sea coast south of Deep River. The country proved to be a succession of valleys and hills, from 1,200 to 3,000 feet above sea level. The westerly portion was an open undulating grassy country, forming magnificent pasturage lands. Towards the coast it was all forest, full of valuable timber. No inhabitants were seen, but ancient Indian ruins, consisting of large stone buildings, were discovered. The soil generally was rich, and indications of minerals were noticed.

Industry, Trade and Customs.

For more than 200 years the Colony has subsisted mainly on the natural resources of its forests. A Forest Department has been in existence since 1922.

The chief items of export in 1937 were as follows:—Mahogany logs, 426,037 cubic feet; mahogany lumber, 305,605 cubic feet; cedar logs and lumber, 23,960 cubic feet; chicle, 659,916 lbs.; coconuts, 4,958,980; copra, 356,708 lbs.; bananas, 938,985 bunches; plantains, 198,200; grapefruit, 14,852 cwt.; grapefruit, canned, 893½ cwt.

Belize is a port of registry, and there were registered on 31st December, 1937, 187 vessels aggregating 2,694 tons net.

The imports consist mainly of mahogany and chicle in transit, cotton goods, petroleum oils, hardware, haberdashery and millinery, boots and shoes, spirits, tobacco and provisions.

The percentages of the Imports, Exports and Total Trade during 1937 as between Empire Countries and Foreign Markets are shown hereunder:—

	Imports. %	Exports. %	Trade. %
United Kingdom	21·94	29·08	19·63
Canada	8·19	2·29	5·44
Other British Possessions ..	4·53	·28	2·83
United States of America	31·06	67·38	45·26
Other Countries	34·28	·97	26·84

Digitized by Google

The Customs tariff is largely on an *ad valorem* basis. There is a British preference, which, in the case of *ad valorem* duties, is in most instances 12½ per cent *ad valorem*.

Communications.

The easiest communication is by water along the coast. There is communication weekly with New Orleans, Puerto Barrios and Puerto Cortes, and monthly (approximately) with Liverpool. There is also a fortnightly mail and passenger service by the Canadian National Steamship Company with Jamaica, and thence to Canada *via* the Bahamas and Bermuda. The usual length of the journey between England and British Honduras is 16 days, *via* the United States and about 21 days *via* Jamaica. Telegraphic communication with Europe is maintained by a land line to Consejo on the Hondo River, which connects, by a cable across the Hondo, with the Mexican Telegraph System through Payo Obispo in Yucatan (1911); and by radio-telegraphic communication with New Orleans (1915) and Jamaica (1928).

A telegraph and telephone line exists between Belize and the southerly town of Stann Creek, and another from Belize to the Cayo. A Radio-telegraph Station is situated in Belize, and others (for inland services only), at Corozal, Monkey River and Punta Gorda.

There is a weekly service between Belize and San Pedro, Sula, Honduras (*via* Puerto Barrios, Guatemala) by planes of the Transportes Aereos Centro-Americanos Ltd. ("T.A.C.A."), and a service twice a week between Belize and the U.S.A.; *via* Mexico, by planes of the Chiapao Air Transport Co.

A short railway leads from the town of Stann Creek, 25 miles inland, the first section of which was opened towards the end of 1908, and the second section in March, 1909. The line was practically completed in 1910, but extraordinary floods in 1911 carried away a couple of bridges, and did other damage, which have been replaced.

Rates of Postage.

	Letters.	Newspapers.
Within the Colony	per 2 ozs. 3 cents, and 1 cent. for each subsequent oz. or fraction of an oz.	1 cent per 4 oz.
To Canada and the B.W.I. generally	per oz. or fraction, 3 cents.	1 cent. per 2 oz.
To the United Kingdom, British Possessions (except as above) and Egypt	per oz. 4 cents. and for every subsequent oz. or fraction of an oz., 2 cents.	1 cent. per 2 oz.
United States and elsewhere	5 cents for first oz. and 3 cents for each subsequent oz. or fraction of an oz.	1 cent per 2 oz.

Air Mail.

To U.S.A. (*via* Brownsville and Miami), Mexico (*via* Merida), 15 cents for first ½ oz. and 10 cents for each additional ½ oz.; Guatemala and Honduras (*via* Barrios), and Nicaragua (*via* Managua) 25 cents and 30 cents respectively for first ½ oz. and 17 cents and 20 cents each additional ½ oz.; Costa Rica and Panama (including Canal Zone) 33 cents for first ½ oz. and 22 cents for each additional ½ oz. These rates are in addition to the ordinary postage.

Climate.

Though situated within the tropics, the climate is sub-tropical in character. The maximum shade temperature is 90°, the minimum 62°. The dew point in Belize, a seaport, is relatively high. Sea breezes prevail for the greater part of the year. The average rainfall during the past twenty years has been 81·48 inches per annum. From the middle of February to the middle of May is the dry season. For the rest of the year there is rain to some extent during every month, the heaviest rainfall being in the months of September, October and November, during which months about one-third of the total rain occurs.

Currency and Banking.

By Ordinance No. 31 of 1894, the currency was established on a gold basis, the United States gold dollar being adopted as the standard coin. Gold coins of the United States Mint are legal tender for the amounts of their respective denominations in standard dollars; also the British sovereign and half-sovereign for the amounts of $4·867 and $2·433 respectively. There is a local subsidiary currency of 50 cent, 25 cent, 10 cent, and 5 cent silver pieces, and a Government note issue of the following denominations: 1, 2, 5 and 10 dollars; a nickel bronze 5 cent piece and a bronze cent piece are also current. The silver coins are legal tender up to 10 dollars and the nickel and bronze up to 50 cents. The Government Savings Bank, established in 1846 at Belize (with branches at Corozal, Orange Walk, Stann Creek, Punta Gorda and the Cayo), had, on 31st December, 1937, $424,731.

On the 14th October, 1912, The Bank of British Honduras, Ltd., was bought over as a going concern by the Royal Bank of Canada. Banking business of every character is conducted.

Education.

The schools, both Secondary and Primary, are, with one or two exceptions, denominational. With few exceptions, all Primary schools are inspected and aided by the Colonial Government. Seventy-eight received aid in 1937, to the extent of $71,006·87, with 9,059 scholars on the roll, and 7,016 average attendance, *i.e.*, 77·4% of the enrolment. The total cost of Primary education for the year was $87,880·22.

The total number of pupils on the roll in all the schools was about 10,487, with an average attendance of 8,211.

A law "To provide for Compulsory Education in certain cases," was passed in January, 1915. This Law was replaced by Law No. 14 of 1926, which applies generally to all school areas where it is practicable to enforce it.

Population.

The population of the several Districts of the Colony, based on the census taken on the 26th April, 1931, was:

Belize District	21,661
Northern District	12,780
Stann Creek District	4,960
Toledo District	6,252
Cayo District	5,694
Total	51,347

Of the total population 44,670 were, at the date of the 1931 census, British subjects. Of this number, 216 were born in the United Kingdom. There were 181 Americans, of whom 165 were born in the United States, and 1,083 Mexicans who were all born in Mexico.

Population of towns at census of 1931: Belize, 16,687; Corozal, 2,197; Orange Walk, 1,099; Stann

Creek, 2,844; Mullins River, 332; Punta Gorda, 1,119; Monkey River, 396; El Cayo, 1,260; Benque Viejo, 1,211.

The estimated population, as at 31st December, 1937, was 56,893; of these 28,056 were males and 28,837 females.

Telephone Branch:

Mechanic and Storekeeper, H. W. Smith, $1,000 to $1,300.
Foreman, J. T. Walker, $950.
Inspectors, J. V. Gabourel, $702; W. Flowers and C. O. Hope, $650 each.
Telephone Operators, 1st *Grade:* Mrs. D. Wolffsohn and Miss D. Cervantes, $480 to $652.

Crown Law Office.

Attorney-General, S. A. McKinstry, $3,550 (also receives 200*l.* p.a. as a Trustee under the will of the late Baron Bliss and $240 p.a. as legal adviser to the Belize Town Board).
1*st Class Clerk*, J. N. Meighan, $942 to $1,230.

Judicial.

Chief Justice, Sir Arthur K. Agar, $5,400 and quarters.
Magistrate, Belize, H. J. Hughes, $3,000.
2*nd Class Clerk*, A. E. Cattouse, $690 to $906.
Registrar-General, A. O. Longsworth, $1,800.

District Commissioners.

Northern District, E. A. Grant, $1,600 to $2,000, free partly furnished quarters, and duty allowance, $400.
Clerk and Interpreter, Corozal, E. I. Pasos, $504 to $666.
Clerk and Interpreter, Orange Walk, R. Bautista, $906.
Stann Creek District, M. S. Metzgen, M.B.E., $1,600 to $2,000, free partly furnished quarters, and duty allowance of $300.
2*nd Class Clerk*, E. N. Trapp, $906.
Toledo District, T. V. Maccoll, $1,600 to $2,000, free partly furnished quarters, and duty allowance of $200.
Clerk and Interpreter, V. F. Colon, $690 to $906.
Cayo District (vacant), $1,600 to $2,000, free partly furnished quarters, and duty allowance of $400.
Clerk, R. Patten, $504 to $666, and duty allowance of $150.

Audit.

Auditor, D. P. Uttley, $3,000, and quarters.
1*st Class Clerks*, N. M. Tennyson, $942 to $1,350, J. Pepitune, $942 to $1,290.

Education.

Superintendent of Education, B. E. Carman, B.Sc., $3,000.
Assistant Superintendent, E. V. Brown, B.A., $1,500 to $1,800.
1*st Class Clerk*, S. E. Hulse, $942–$1,230.

Survey Department.

Surveyor-General, A. N. Wolffsohn, $3,400.
Surveyors, G. S. Busby, and J. A. Waight, $2,100 to $2,430.
Draughtsman and Computer, G. A. Elliott, $2,100 to $2,430.
Inspector of Crown Lands, E. W. Francis, $1,050.
1*st Class Clerk*, H. K. Smith, $942 to $1,230.
2*nd Class Clerk*, W. A. Johnston, $690 to $906.
Tracer, I. Hulse, $650 to $986.

Forest Department.

Conservator of Forests, N. S. Stevenson, B.Sc., $2,430 to $2,818·80; $3,037·50 to $3,645; $3,790·80 to $4,374, house allowance $360.
Assistant Conservator of Forests, J. B. Kinloch (salary as above).
1*st Class Clerk*, R. Gallego, $942 to $1,290.

Stann Creek Railway.

Superintendent (vacant), $1,800 to $2,000.
Clerks, A. E. Vellos, $1,230, and H. D. Frazer, $504 to $666.

Public Works.

Director of Public Works, E. A. Boyce, A.M.Inst.C.E., $3,402.
Executive Engineer, T. L. Bowring, A.M.Inst.C.E., $2,916.
1*st Class Clerk*, R. A. Pitts, $942 to $1,230.
2*nd Class Clerks*, H. O. E. Longsworth, D. L. Roxado, $690 to $906.

Medical.

Senior Medical Officer, R. L. Cheverton, M.R.C.S., L.R.C.P., $4,860, and quarters.
First Medical Officer, V. F. Anderson, M.D., $3,500.
†*Medical Officers*, T. Patterson, W. A. S. George, E. C. Savona, D. W. Degazon, L. M. Ram, H. S. Rassim, M.R.C.S., L.R.C.P., and P. E. M. Clark, $2,430 to $3,150, and quarters.
First Class Clerk, E. Trapp, $942 to $1,230.
2*nd Class Clerk*, G. T. McKesey, $690 to $906.
Matron, Miss L. M. Roberts, M.B.E., $1,000 to $1,200, quarters, uniform, and free board and lodging.
Nursing Sister, Miss M. Paterson, $600 to $720, quarters, uniform and free board and lodging.
Dispenser and Storekeeper, P. A. Hyde, $850 to $1,290, and quarters.

Police.

Superintendent of Police and Prisons and Officer Commanding Defence Force, Major P. E. Matthews, O.B.E., $3,000, and $360 in lieu of quarters.
Assistant Superintendent, E. J. Doxat, $1,400 to $1,600, and quarters.
Inspector (vacant), $1,300 to $1,500, and quarters.

Prisons.

Superintendent of Prisons, M. Bookham, M.B.E., $1,700 and quarters.
2*nd Class Clerk*, S. W. Bowden, $690 to $906.

Fire Brigade.

Superintendent, R. K. Masson, M.B.E., $600 to $720.
Assistant Superintendent, R. J. Gabourel, $300.

Agricultural Department.

Agricultural Officer, J. F. Ward, $2,430 to $2,818·80; $3,037·50 to $3,645; $3,790·80 to $4,374.
2 *Assistant Agricultural Officers*, R. A. Kitching and J. M. Cave, $1,500 to $2,000, and quarters.
Agricultural Instructor, D. D. Haynes, $1,200 to $1,500, and quarters.
Junior Agricultural Instructor, D. L. Foster, $960 to $1,440.
Foreman, F. F. Orio, $600 to $900.
2*nd Class Clerk*, H. O. E. Longsworth, $690 to $906.

Industrial School, Pomona, Stann Creek.

Principal, (Dist. Commr. Stann Creek, acting).
Clerk and Schoolmaster, R. S. Finlayson, $900 and quarters.
Agricultural Assistant, R. E. Belisle, $900 and quarters.

Foreign Consuls.

United States, C. Giddens (Vice-Consul).
Norway, E. W. M. Bowen (Acting).
Sweden, F. R. Ellis.
Republic of Honduras, J. Alvarado (Consul-General).
France, D. Masson (Consular Agent).
Spain, E. W. M. Bowen (Acting).
Guatemala, Felix Estrada Orantes (Consul).
Mexico, P. Gasca.
Belgium, F. R. Dragten (Consul-General).
Netherlands, T. F. Bowman.
El Salvador, J. T. Bouloy.
Finland, H. T. Grant (Vice-Consul).

CEYLON.

Situation and Area.

Ceylon, the ancient Taprobane, is an island in the Indian Ocean, off the southern extremity of Hindustan, lying between 5° 55′ and 9° 50′ N. lat. and 79° 42′ and 81° 53′ E. long.; its extreme length from north to south, i.e., from Point Palmyra to Dondra Head, is 270 miles; its greatest width 140 miles, from Colombo on the west coast to Sangamankanda on the east. Its area is 25,332 square miles, or about equal to Holland and Belgium.

The Maldive Archipelago, 400 miles south-west of Ceylon, made up of 18 groups—known as atolls—or islets, but for centuries past arranged for administrative purposes in 13 groups, which are sparsely inhabited by a mixed race of probably Aryan original stock, speaking a dialect akin to Elu, or old Sinhalese, is tributary to Ceylon, to which the Sultan sends an embassy annually. The inhabitants of the Archipelago have for nearly eight centuries professed the Mohammedan religion. The islands are covered with cocoanut palms and yield millet, fruit, and cocoanut produce. Communication is mainly by native craft with India and Ceylon. The population enumerated at the census 1931 was 79,281, including 245 Borahs, 92 Malayalees, 64 Ceylon Moors, 2 Ceylon Tamils, and 2 Sinhalese who were at Malé; the principal occupations are fishing, coir and lace making, toddy drawing, carpentry, and cultivation. Malé, the residence of the Sultan and the capital of the Islands, is a little over 3 miles in circumference.

The Laccadive Islands are under the administration of the Government of India.

Climate.

For a tropical country, the climate of Ceylon is generally comparatively healthy; the heat in the plains is much less oppressive than in India.

In the low-country the annual mean temperature is about 80°F. to 82°F. At higher altitudes it falls off, at a fairly steady rate, about 1°F. for each 300 feet rise in altitude. At Kandy, 1,650 feet above sea-level, it is 77°F., at Diyatalawa, 4,100 feet, it is 68°F., and at Nuwara Eliya, the chief hill-station in the Island, 6,200 feet, it is 59°F.

A noteworthy feature everywhere in Ceylon is the smallness of the variation in the mean monthly temperatures throughout the year. At Colombo the mean temperature during the coolest months, November to February, is 79°F., which is only 3° cooler than that during the warmest months, April and May. At Galle the mean annual range of temperature is similar in amount. In the north and east this range is only a little higher; for example, at Trincomalee, the temperature during the coolest months, December and January, is 78°F., and during the warmest, May to July, is 85°F.

This uniformity of temperature is not, however, accompanied by a similar uniformity in climatic comfort or discomfort. There is a well-marked season of the year, known as the "hot" season, generally March to May, when conditions are best described as "sticky." Partly because of increased humidity, but mainly because of the lack of wind, particularly at night, climatic conditions become uncomfortable. Most Europeans choose this season of the year for their annual holiday in the hills. With the arrival of the south-west monsoon, although neither temperature nor humidity fall appreciably in the south-west of Ceylon, conditions become more comfortable.

The daily variation of temperature, the rise to a maximum in the middle of the day and the fall to a minimum at night, is well marked in Ceylon. Its magnitude is very much affected by the direction of the prevailing wind. In the south-west of the Island the range is low during the south-west monsoon, and high during the north-east monsoon and intermonsoon periods, while in the east and north-east the diurnal range is lowest during the north-east monsoon. At Colombo the mean diurnal range varies from 8°F. between June and September to 15°F. in February, with a yearly mean range of 11°F., while at Trincomalee, although the yearly mean is the same, 11°F., the lowest mean diurnal range is 6°F., in December and January, and the highest 15°F., in August and September. Inland the mean diurnal range averages about 15°F.

During the "cool" season, which may be taken as roughly November or December to February, the nights, even in the low-country, are frequently cool, particularly in the south-west of the Island. The temperature occasionally falls below 65°F., or even 60°F., in the low-country, while the minimum temperature at Nuwara Eliya sometimes falls below freezing point. At such times the days are bright and sunny, while the air is dry, so that the day temperatures are as high as, or even higher than at other seasons of the year.

The highest temperatures are experienced in the districts to the north or north-east of the hills, but a temperature of 100°F. is rarely experienced. The highest recorded air temperature in Ceylon was 103·7°F., at Trincomalee.

The relative humidity varies generally from about 70 per cent. during the day to about 90 per cent. at night, rising as the temperature falls. Owing to the high average temperature in the low-country, the absolute humidity there is high.

The annual average rainfall varies from below 40 inches in the driest zones, in the north-west and south-east of the Island, to over 200 inches at certain places on the south-western slopes of the hills. The chief rainy seasons extend from April to June and from October to January, but as there is a sharp contrast between the windward and leeward sides of the Island during both monsoons, particularly the south-west, it is difficult to summarise the rainfall as a whole in a brief note.

History.

The authentic history of the island begins at the sixth century B.C., when an Aryan invasion from the north of India established the Sinhalese dynasty. Buddhism was introduced in the third century B.C., and from that time this faith has been preserved in comparative purity. The island abounds in interesting relics of antiquity, and in rock inscriptions, which, with the written annals left by the Sinhalese kings, are of peculiar value in revising Indian chronology.

In the sixteenth century the Portuguese formed settlements on the west and south of the island; in the next century they were dispossessed by the Dutch. In 1796 the British took possession of the

Digitized by Google

Dutch settlements in the island, which were then annexed to the Presidency of Madras, but five years later, in 1802, Ceylon was constituted a separate Colony. In 1815 war was declared against the Sinhalese Government of the interior; the last Kandyan King was taken prisoner, and the whole island came under the rule of the British.

Constitution.

The Government is administered by a Governor, aided by a State Council consisting of 50 members elected for territorial constituencies, 3 ex-officio members (the Chief Secretary, Legal Secretary, and Financial Secretary) called Officers of State, and 8 members nominated by the Governor. The State Council concerns itself with administration as well as with legislation. The Council is divided into 7 Executive Committees in charge of various groups of public affairs.

The Departments of Government are divided into ten groups. Three of these groups are in charge of the Chief Secretary, the Legal Secretary, and the Financial Secretary. The remaining seven groups are in charge of Members of the State Council who are elected as Chairmen of the various Executive Committees, and who are styled Ministers. The Ministers with the Officers of State form the Board of Ministers.

All Ceylonese, both male and female, of a minimum age of 21, are included in the franchise. British subjects not domiciled in Ceylon are allowed to qualify for the franchise in accordance with the hitherto existing Constitution, or on their furnishing satisfactory evidence of five years' residence and a declaration of permanent settlement in the Island.

Population, Area, and Statistics.

According to the decennial census taken in 1931 the population was 5,312,548, an increase of 17·94 per cent. on the population enumerated in 1921. The details of the population were as follows (including the military, shipping, estates and miscellaneous‡):—

Western Province	1,448,648
Central ditto	953,395
Southern ditto	771,283
Northern ditto	399,094
Eastern ditto	213,980
North-Western Province ..	546,988
North-Central ditto ..	97,365
Province of Uva	303,419
Province of Sabaragamuwa	578,368
Miscellaneous	8
Total ..	5,312,548

The population of the principal towns, exclusive of the Military and the Shipping, was as follows:—Colombo, 284,155; Dehiwala-Mount Lavinia, 34,288 Negombo, 25,291; Moratuwa, 32,409; Kalutara, 14,280; Kandy, 37,147; Jaffna, 45,708; Galle, 38,424; Matara, 18,893; Batticaloa, 11,585; Trincomalee, 10,160; Kurunegala, 10,467; Badulla, 9,849.

The number of Indian labourers on estates was about 677,900. They are under no indentures, and are free to quit on giving a month's notice.

The entire area of the Island is 25,332 square miles. About one quarter of this area, after deducting backwaters, etc., is under cultivation. Some 4,000 square miles in the centre form the mountain zone with an altitude of from 1,500 to 8,262 feet above sea level. The approximate acreages under the most important products are:—

	Acres.
Coconuts	1,100,000
Rice	850,000
Tea	559,237
Grain (other than Rice) ..	105,000
Rubber	605,152
Arecanuts	69,000
Cinnamon	26,000
Cacao	34,000
Tobacco	14,000

At the end of 1937 the number of plumbago mines reported to be working was 229. The amount of plumbago exported during the year was 347,613 cwts., valued at rs. 2,300,545.

The minimum upset price of Crown land is rs. 16 to 20 per acre. 4,073 acres were granted and sold by the Revenue Officers in 1937.

The revenue is principally derived from Customs Duties, Land Sales, Licences (under which head is entered the amount realised by the sale of Arrack and Toddy Rents), Salt (which is a Government monopoly), Income Tax, Stamps, and Postal Receipts. The revenue from the sale of salt for the financial year 1936-37 was rs. 2,188,895. This is local salt worked by the Government, but the importation of foreign salt is allowed on an import duty of rs. 4 per cwt.

The local revenues raised by the Municipalities of Colombo, Kandy and Galle, by the Provincial and District Road Committees, by the Urban District Councils which have been established in the towns of Dehiwala—Mt. Lavinia, Kolonnawa, Kotte, Moratuwa, Negombo; Beruwala, Kalutara, Panadure; Gampola, Hatton-Dikoya, Nawalapitiya; Matale; Nuwara Eliya; Ambalangoda; Matara, Weligama; Jaffna; Batticaloa; Trincomalee; Kurunegala; Puttalam; Chilaw; Anuradhapura; Badulla, Bandarawela; Ratnapura; Kegalla; and the Local Board of Minuwangoda; and by Village Committees amounted in 1937 to rs. 12,668,042. The revenue collected by the Sanitary Boards amounted to rs. 696,792.

The municipal debt outstanding on 31st Dec., 1937, was rs. 11,322,852. Of this amount rs. 8,407,145 is the balance of the loan borrowed from the Government for the Colombo Drainage Works, and rs. 2,277,746 for Water Works. Rs. 409,350 is the balance of loans obtained by the municipality of Galle for the construction of water-works and electric lighting, and rs. 228,611 is the balance of the loans borrowed by the municipality of Kandy for model dwellings, water supply and paving Meda Ela.

The development of the tea industry is shown by the following statistics:—Export, 1884, 2,392,963 lbs.; 1900, 149,264,602 lbs.; 1934, 218,694,956 lbs.; 1935, 212,153,102 lbs.; 1936, 218,149,441 lbs.; 1937, 213,732,751 lbs.

There has been a remarkable development in rubber cultivation in recent years. Rubber was first brought to Ceylon in 1876, and its growth proved successful. In 1898, 750 acres were estimated to be planted with rubber, in 1906, 100,000 acres and in 1937 about 605,152 acres.

The value of the products of the coconut palm exported in 1937 was rs. 48,461,936. During the past few years greater attention has been given to the cultivation of coconuts, and large areas of land formerly occupied with cinnamon are now planted in this crop. The value of cacao exported in 1937 was rs. 2,622,619 and of cinnamon rs. 2,055,627.

The chief imports are rice from British India (including Burma), valued at rs. 45,001,572, and from other countries valued at rs. 5,724,661, coal valued at rs. 7,582,089, chiefly from British India

‡ By "Miscellaneous" are meant persons enumerated in the Great and Little Basses.

Digitized by Google

and British South Africa, and textiles valued at rs. 27,930,707, chiefly from Japan, United Kingdom, and British India.

Law and Justice.

The basis of the law is the Roman-Dutch law, much modified by the introduction of English law and by local ordinances. Kandyan law and Muslim law also prevail among Kandyans and Muslims respectively. The criminal law has been codified on the model of the Indian Penal Code, and the law of Criminal and Civil procedure and of evidence has also been codified.

Justice is administered by the Supreme Court, which has an original criminal jurisdiction and decides appeals from the inferior Courts both in civil and criminal cases; by the Magistrates' Courts and Courts of Requests, which dispose, respectively, of minor criminal and civil suits; and by the District Courts, which have a criminal jurisdiction intermediate between that of the Supreme Court and the Magistrates' Courts, and a civil jurisdiction in all cases. In addition to these there are the Village Committees, and Village Tribunals, instituted under the Ordinance No. 9 of 1924, and Village Committees under Ordinance No. 45 of 1917, with powers to deal with petty offences and trifling claims. They have worked well and are thoroughly adapted to the genius of the people. Besides settling a considerable amount of litigation, they have provided a valuable machinery for carrying out local improvements. They are empowered to make rules, subject to the approval of the Governor, relating to their village economy, and it is noticeable that in many instances they have not only voluntarily provided school buildings and undertaken the cost of the current expenses and repairs, but have made elementary education compulsory.

Education.

Satisfactory progress is being made in education. The number of scholars in Government schools at the end of 1937 was 256,780, in assisted schools 479,853, and in unaided schools 47,272.

The total expenditure on account of the Education Department in 1936–37 was rs. 20,414,446. In 1868, the number of scholars was only 6,897, and the expenditure rs. 161,660. The improvement is due to the institution of a Department of Education and the adoption of a system under which the educational wants of the Island are met partly by Government, partly by schools receiving grants in aid from Government. The Government schools are all unsectarian, and no fee is charged for vernacular education; fees are charged for English teaching.

The only Secondary School entirely supported by Government is the Royal College, but there are numerous and excellent Grant-in-aid Secondary Schools. Four Government scholarships, each of 300*l.* per annum, tenable for two years with outfit allowances of rs. 750 each and free passages, are awarded annually, on the results of the B.A. honours and B.Sc. Special Examinations of the University of London to enable the best students of the year to proceed to universities in the United Kingdom for further study.

Industrial education is provided in 88 Government and Grant-in-aid Schools and in a number of Orphanages. A central Technical College was founded in Colombo in 1893; its title has since been changed to "Ceylon Technical College."

A University College opened in Colombo in 1921, offers instruction in the following subjects:—English Language and Literature, Classics and Philosophy, Sanskrit and Pali, Tamil, Sinhalese, Modern History and Economics, Mathematics, Physics, Chemistry, Botany, Zoology, Geography. Students are presented for the External Examinations, Pass and Honours of the University of London.

A Government Training College for Masters and Mistresses in English Schools and Government Vernacular Schools was opened in 1903.

Medical Institutions.

Medical College.—The Ceylon Medical College was founded in 1870 to provide a course of Medical training for the Ceylonese. The curriculum is a full five years' course, and since 1887 the Licence of the College has been recognised by the General Medical Council as a registrable Colonial qualification. The courses of instruction and examinations are also recognised by many of the British Examining Boards. The licence has been conferred upon 631 candidates since the College was opened; of recent years about 25 qualify annually.

There is a Junior or Apothecary Department in which students go through a two years' course, and after passing the prescribed examinations are qualified to serve as Apothecaries and Estate Dispensers.

The College has a staff of 5 Professors and over 30 lecturers and is managed by a Council incorporated by law.

There are at present about 125 students.

Owing to changes introduced by the Medical Council of Great Britain, the preliminary subjects, Physics, Chemistry and Biology, are now pre-medical subjects, and arrangements have been made for these to be studied at the University College. Students must pass an examination in these subjects before they can be admitted to the Medical College for their purely medical studies.

The Medical College fees amounted to rs. 55,582·63 in 1936-37.

There are 92 Government general hospitals providing 7,927 beds, with varying accommodation from 8 beds in smaller outstations to 935 beds in the General Hospital, Colombo.

There are in addition a number of special hospitals, viz., a lying-in home with 130 beds, an eye hospital with 127 beds, a women's hospital with 46 beds, a children's hospital with 96 beds, a women's venereal hospital with 29 beds, a police hospital with 36 beds, a tuberculosis hospital for chronic cases with 352 beds, two tuberculosis sanatoria with 108 beds, an infectious diseases hospital with 168 beds, a hospital for chronic and convalescents with 68 beds, a lunatic asylum and House of Observation with 1,930 beds, a prison hospital, Colombo, with 192 beds, and 8 other prison hospitals providing 149 beds, two leper asylums, one with 508 beds at Hendala (near Colombo), and the other with 180 beds at Mantivu, Eastern Province.

Ninety-two estate hospitals and 723 estate dispensaries are maintained by proprietors of estates.

There were 688 Government dispensaries in different parts of the Island in 1937, and 5,895,649 patients who paid 8,872,871 visits were treated at these dispensaries.

There is a bacteriological, a pasteur, a dental, an anti-tuberculosis Institute, an ear, nose and throat clinic and a vaccine establishment. A division of sanitary engineering and a division of health education are functioning. Campaigns are carried on against malaria, ankylostomiasis, smallpox, filariasis and parangi. Estate sanitation is looked after by five inspecting medical officers. Eleven health units have been established since 1926 and health work on intensive lines is carried on at those centres. By the reorganization in 1933, school hygiene work is now carried out by 8 school medical officers, 24 medical officers of health, 20 district medical officers, 28 field medical officers, and 1 lady medical officer.

Digitized by Google

A scheme for malaria control and health work has been organised, by which Medical Officers, each of whom will be placed in charge of an area comprising a population of about 40,000, will carry out work embracing anti-malaria work, maternity and child welfare work, school health work, mass hookworm treatment, supervision of dispensers, holding of special clinics, control of communicable diseases, health propaganda and general sanitary work.

In the Department of Medical and Sanitary Services are 320 medical officers, of whom 248 possess British qualifications, 23 medical officers of health, 420 apothecaries, and 257 sanitary assistants. There are three institutions where nurses are trained. The nursing staff of the Department consists of 37 European qualified matrons and sisters, 129 European Roman Catholic mothers and sisters, 4 Ceylonese sisters, 47 public health nurses, and 414 matrons and nurses trained locally, and pupils in training.

The cost of working the department amounted in 1936–37 to rs. 11,085,271. The receipts, which included the cost of maintenance of paying patients, sale of medicines, etc., amounted to rs. 719,061 for 1936–37. The expenditure on account of estate medical aid was rs. 890,603 for 1936–37. The export duty levied for the purpose of meeting the expense of providing Medical aid to estates under the Medical Wants Ordinance No. 9 of 1912 amounted to rs. 1,413,693 for 1936–37.

Currency and Banking.

The weights and measures in common use are British.

Accounts are kept in rupees, and the money in circulation is Indian and Ceylon rupee currency, sovereigns having ceased to be legal tender in the Colony in 1920. Ceylon cents take the place of the Indian annas and pice. The notes of the Chartered Mercantile Bank remained in circulation to some extent until 1888, when its charter expired, but since the failure of the Oriental Banking Corporation in 1884, the Government has instituted a note-issue of which the amount in circulation on the 31st December, 1937, was rs. 48,412,984. These notes are legal tender except at the Colombo Issue Office.

The following banks have establishments in the Colony: Mercantile Bank of India, Limited; Chartered Bank of India, Australia, and China; Hong Kong and Shanghai Banking Corporation; Imperial Bank of India; National Bank of India, Limited; Eastern Bank, Limited; P. & O. Banking Corporation, Ltd.; Thos. Cook & Son (Bankers), Ltd.; the Bank of Chettinad; the Indian Bank, Ltd.; the Calicut Bank, Ltd.; the Bank of Uva, Ltd. None of these issues notes in Ceylon.

The Colombo Harbour.

The Colombo Port Commission was established in 1913 to administer the affairs of the Port of Colombo. The Commission is composed of seven official members and eight unofficial members. The official members are the Principal Collector of Customs (Chairman), the Director of Medical and Sanitary Services, the General Manager of the Railway, the Mayor of Colombo, the Deputy Collector of Customs, Colombo, the Master Attendant, Colombo and Galle, and the Harbour Engineer. Six of the unofficial members are appointed to represent Import, Export, Shipping, Coal, Oil, and Landing Agencies' Interests, and the remaining two are nominated by the Governor to represent Ceylonese Interests.

The Harbour Works consist of three breakwaters, *The South-West*, completed in 1885 at a total cost of 658,457*l*., is 4,212 feet long, and runs from the shore in a direction North by East. It is built of concrete blocks weighing from 18 to 30 tons, set in what is known as the sloping bond system.

The North-East and Island breakwaters were completed in 1906, at a total cost of 531,657*l*. The North-East breakwater is a rubble embankment 1,100 feet long, tipped from a staging.

The Island breakwater is a detached work, 2,670 feet in length, running between the two shore breakwaters, leaving a western entrance of 750 feet, and a northern entrance of 700 feet. This breakwater is of similar construction to the South-West arm.

These three breakwaters enclose an area of 643 acres, or one square mile.

An extension of the S.W. breakwater, starting from a point 3,150 feet from the shore end, was commenced in December, 1907, and completed in April, 1912. The arm is 1,800 feet long, and runs in a direction almost due north, protecting the present main entrance from the S.W. Monsoon seas. The cost of this additional arm was 338,931*l*.

The Graving Dock. A Graving Dock was completed in 1906. It is 717½ feet long, 85 feet wide at the entrance, and has a depth over the sill of 30 feet at low water. Its cost was 520,189*l*. There is also a guide pier, 800 feet long, to assist vessels entering the dock. The dock has its own electric light installation. The docking of ships can be carried out by day or night.

Inner Graving Dock. An Inner Graving Dock, 350 feet long, 54 feet wide, with a depth of 20 feet "at sill" has been constructed. This is an extension of the existing Graving Dock.

The Patent Slip was opened in 1903, the cost being 44,792*l*. It is 800 feet long, the cradle being 220 feet, and is capable of dealing with vessels up to 1,200 tons dead weight.
